out to be a remarkably easy matter. The first company we thought of was the First National City Bank of New York, who we felt could use the film to promote their slogan "First in World Wide Banking." Their vice president in charge of public relations bought the idea of the film at our first luncheon meeting. The bank covered all the production costs. First National executives felt that their interests were identical with ours in this matter.

#### Why Companies Sponsor These Pictures

Other companies have made our films possible for the same reason. IBM, for example, in the case of *The Salesman Isn't Dead — He's Different*. They wanted to brighten both the image of salesmen in general and of IBM

"The Salesman Isn't Dead — He's Different" was a cooperative film venture. Cast included the president of the County Trust Company (at left).

Dynamic Films' writer-director Maurice Rapf (pointing) discusses scene with members of the cast during filming of IBM-Fortune picture.

as a good place for salesmen to work. IBM hoped that the film would not only be used throughout the business world, but also, since college recruiters had reported that students had a bad image of salesmen and were picking other fields, they hoped that this positive picture of today's salesman would be widely shown on campus. This has been the case.

Although the sponsor puts up the money for the film and gets the identification he wants on the titles, we maintain full editorial control over each production, since each is distributed with the bannerline "Presented by the Editors of Fortune." Initially the sponsor contracts only for the script. When we and the sponsor agree on an approved script we can

A positive exposition on the role of salesmen in today's business was brought to the screen in "The Salesman Isn't Dead — He's Different."

then make an accurate estimate of production costs.

For our part, the publication staff provides all the research needed for the film, all editorial talent and time, plus supervision of all phases of writing and production. We agree to buy and distribute prints of the film. We also provide the lion's share of the promotion work, arranging for major screenings at important association meetings, and conducting direct mail campaigns announcing the film's availability. In addition, we set aside pages of advertising space in Fortune to market the film.

#### The Films Are Produced by Specialists

Fortune does not have a producing unit — we merely supervise. Scripts and production are contracted for on the outside. These writers and technicians deserve great credit for taking Fortune editorial material and making it into films which are so well received by business management. I refer particularly to Maurice Rapf, the extremely talented writer-director.

Fortune makes no profit on the films. We contract with an outside producer. The maximum that any one film was ever budgeted at was \$75,000. We are very proud of the fact that, because of tight control, we have always brought our productions through within the maximum budget figure — sometimes con-

# STEEL SINEWS FOR TURKISH INDUSTRY

*drama in growth: the 35mm film story of Ereğli's massive new steel complex*

A major motion picture in 35mm color on the building of a massive new steel production plant in Turkey has been released by Koppers Associates, a consortium of American companies which undertook the construction of the project.

*The Seed and the Sinew*, produced by Willard Pictures, Inc. of New York, shows how the Koppers group — Koppers Company, Westinghouse International and the Blaw-Knox Company — working with government, industry and finance, both in Turkey and the United States, played an important part in accomplishing for Turkey its greatest industrial achievement — the great new 500,000-ton integrated steel plant at Ereğli on the Black Sea coast.

As the film discloses, Turkey has been a nation primarily of farmers, fishermen and craftsmen working with their hands; it had a critical need for more industrial growth to correct the imbalance in its economy. Now, with raw materials for steel production abounding in the country, the Ereğli plant will do much to advance Turkish industrial progress in the years ahead.

The Turkish company operating the plant — the Ereğli Iron & Steel Works — was one of the first Turkish companies to offer its stock to private citizens. An effective way of arousing interest of investors was found, and to date, nearly \$11 million dollars worth of stock has been sold to more than 1,800 Turkish individuals at 500 Turkish lira (\$55.55) per share.

Mainly it has been done through the efforts of stock sales caravans

which make a direct but simple approach to the "man in the street" in various Turkish cities. Into these cities and towns comes a small caravan loaded with display panels, a motion picture projector, a small generator (in case no electricity is readily available), and a car. The caravan is entitled *Opportunity of Lifetime — Investment in Ereğli*.

Usually, the Ereğli representative first visits the local bankers in dealing with local officials and often appear personally for showing and take part in the discussions that follow.

The film is tastefully done, low-pressure selling. Around the main theme, it shows colorful views of the Ereğli plant and finally takes the viewer into the homes of Turkish workers who have purchased stock — their investment in the future industrial might of Turkey.

*The Seed and the Sinew* has been three years in the making. From scenes made of the strawberry patch which once occupied the grounds on which the Ereğli works were built, to a vivid visualization of the finished plant, now operating, Willard Pictures' producer, Jack Squiers had two American cameramen, James Lillis and John Porrett, with several tons of equipment, on hand for the final photography. The script was by Paul Woodbridge and the production was under the supervision of Robert K. Wagner, Director of Public Relations of the Koppers Company.

Distribution in Turkey will be nation-wide in theaters. In the United States, television and 16mm audiences will be reached through the facilities of Koppers, Westinghouse International and Blaw-Knox.

*This aerial view, looking toward the Black Sea, shows the completed steel plant located one mile southwest of city of Ereğli, shown in upper right corner.*

The motor room of the combination blooming slabbing plate mill at Iron & Steel Works (see picture below). One of largest motors in the East, a twin Westinghouse 2 x 3500 hp, is in the foreground.

The blast furnace at Ereğli was built by Koppers. It has a hearth diameter of 25 feet. The furnace has capacity to produce 575,000 metric tons of iron each year and is now the largest blast furnace in the Middle East.

**The Men Behind Koppers Associates**

...S, all board chairmen in their respective companies. In the formation of Koppers Associates, the consortium of companies which built the new steel complex at Ereğli, Turkey. Fred C. Foy, chairman of the Koppers Company, William E. Knox, head of Westinghouse Electric International

Fred C. Foy

William E. Knox

W. Cordes Snyder

al Company; and W. Cordes Snyder, his counterpart at the Blaw-Knox Company, were the guiding spirits in forming the group which designed and furnished major equipment and was responsible for construction and start-up of the 500,000 ingot-ton integrated steel plant on the Black Sea Coast. Turkey has literally seen the seed grow into sinew as this great plant turns industrial hope into reality.

The picture shows a slab making final pass through 114-inch combination four-high blooming slabbing plate mill constructed by Blaw-Knox.

Here steel coils are made ready for entry into Ereğli's electrolytic tinning mill. Template will help meet demands of country's canning industry.

Subtle hues of surrounding area warm gleaming stainless steel used to build Olympic Pacifica.

## House Beside the Sea

Picture Story of "Olympic Pacifica"  
Shows New Role for Stainless Steel

**O**N A HILL IN CALIFORNIA overlooking a bay of the Pacific is a new house created to explore a number of somewhat unconventional views of the designer — architect John F. Galbreath. Olympia Pacifica, as it is called, combines building materials not commonly used in residential construction in a design of considerable architectural merit.

Jones & Laughlin Steel Corporation, as the supplier of stainless steel which is widely used in the project, has sponsored a new film, *House in the Sun*, which provides a description of the structure for intended audiences of architects and designers.

### A Virtuoso Performance by the Producer

The picture is a virtuoso performance by Stelios Roccas, of ACI Productions, New York, who designed, produced, directed and photographed it. After considering the idea of using a typical real family as cast and facing up to the problem of less than good acting, or using good actors who could easily detract from the importance of the steel, itself, Roccas determined to film the house without people, but to keep a live quality, nevertheless, by movement of water throughout — in the nearby ocean, shimmering in the swimming pool, or even running from a tap. It comes off with considerable success.

Although people are not evident, their traces are artfully included — the cigarette smoking in an ashtray, the dishes ready for washing on a long stainless steel sink.

Of particular interest throughout the film is

Outdoor garden features a steel sculpture that reflects varied colors of adjacent trees and foliage.

the delicate way colors are handled from cool dawn shots through the warmth of day into the reddish hues of sunset. The color is not only attractive outside, but beautifully balanced for the many combined inside-outside shots.

### Surrounding Colors Enhance the Metal

Color is an important aspect of the film, for although stainless steel has no color of its own,

it does take on the lovely subtle hues of surroundings, and enhances them.

*House in the Sun* will be shown to professional audiences only for several months, will then go into general public distribution. It has already attracted considerable attention in New York among small audiences and enthusiasts to whom it has been show-

## LEARNING PROPER CAR CARE: THE HARD WAY

Mr. Emmett Truesdale is the dubious hero whose car has thrown its worn fan belt. So, it overheated and stalled right in a busy intersection.

If she'd told him once to have the brakes checked, she'd told him a dozen . . . YIPE! Time, you know what? She was so very

Happiness for Joanna Jackson and daughter is NOT a blowout on a lonely mountain road . . . Mr. Frank will be hearing about worn-out tire.

The tire Mr. Jackson forgot to check was dangerously thin. Oh well, there's a road phone a few bracing miles through the

**W**ITHIN FIVE MINUTES of viewing time, a very funny new 16mm color film is making points about the importance of proper car care through a series of incidents which happen to some forgetful drivers.

The scenes above are from *Love That Car* and they illustrate just a few of the misadventures which befall eight motorists who learn the hard way "How to Drive Their Cars and Love Them." We'll mention again the case of Mr. Truesdale and his broken fan belt; Mr. Baxter and his stopped stop lights; Mrs. Baxter and her beat-out battery; the Joanna Jacksons and their mountain road blow-out; Mr. Poppins and his sublevel brake fluid; A. H. Capella and his deferred tune-up (he won't be

needing it now, his car stalled in front of approaching train); teen-ager Randy W. and friend with the leaky muffler; and unexpected victim of an empty gas tank.

This Parthenon production was undertaken by the Public Relations department of American Oil — with the very worthy objective of keeping their customers alive through proper and safe car care.

### How to Put This Picture to Work

Prints of *Love That Car* can be purchased outright at \$32.50; a preview charge of \$10.00 is deductible from the purchase price. Contact Data Films, 2625 Temple St., Los Angeles, Calif. 90026. For quick action, call them at 385-3911, area code 213.

## New Ideas Bring "Sunrise at Eastern"

Through the Medium of an Extraordinary New Factual Documentary Film  
 Flyers Share Eastern Air Lines' Progress Since Dawn of Present Era

er 15, 1963. Time is running out  
 a once-great airline. In five years,  
 as lost 63 million dollars. It expects  
 other 20 million in 1964. Of eleven  
 riers, Eastern ranks tenth in on-time  
 ce. One flight in three is late. For  
 usand passengers, four items of bag-  
 mishandled. Errors in reservation  
 hed an all-time high. The passengers  
 onstrated their lack of faith by join-  
 HEAL Club. We hate Eastern Air  
 orse still, the people of the airline  
 doubt themselves. Their airline needs  
 ts, new routes, new ideas, reorgani-  
 its fare structures, new leadership,  
 n, the time is now."

ens the narration of an extraordinary  
 on picture originally made to be seen  
 ees and stockholders of Eastern Air  
 now being made available to gen-  
 eral audiences. Titled *Sunrise at East-*  
 ilm shows the giant strides forward  
 e been taken in the past 18 months  
 Eastern a "can-do airline, a proud  
 smart airline, a new airline — on

### et and a New Skipper at the Helm

s dawn, as the film shows, began on  
 16, 1963, when the first Boeing 727  
 , safest, most sophisticated aircraft  
 s" — is delivered to the airline. A  
 lent, Floyd Hall, from TWA, is now  
 m of the company and he begins to  
 routes and tell Eastern people of  
 nce he expects, sees in them a great  
 a latent vigor to be tapped.

s drama as Eastern faces up to its  
 — whether to retrench in the face

of mounting deficits, or charge ahead. As a  
 bold new plan of self-improvement is effected  
 we can see how the airline takes hold of it-  
 self and begins an upward climb still going  
 on today.

### You Are There As the Events Take Place

To show how the airline has battled its way  
 back to prosperity, the film's producer, Audio  
 Productions, Inc., of New York, has used a  
 technique of making audiences feel *there* as  
 things happen. It is not staged action but fac-  
 tual reportage in the finest tradition of the  
 documentary film. Director Richard Miller has  
 used High Speed Ektachrome and existing light  
 throughout the film action in such diverse  
 scenes as the company's boardroom, mainten-  
 ance plants, airports, stewardess training  
 schools, reservation centers and even on Au-  
 dio's own sound stages to show the making  
 of a TV commercial featuring Astrud Gilberto  
 — the new Girl from Eastern Air Lines.

Young & Rubicam, the advertising agency  
 which has done so much to shape the upbeat  
 new image of Eastern, worked hand-in-glove  
 with the producer during *all* phases of the  
 making of the film. As a team, Y & R's and  
 Audio's production people were able to create  
 and innovate on the spot to give the film a  
 fresh and completely authentic look.

### Now Available to the General Public

*Sunrise at Eastern* opened this year's annual  
 stockholders' meeting — to great applause. It  
 is now being shown throughout the system to  
 all new employees, as well as being made avail-  
 able for general public showings. It is a film  
 which is not only beautiful in its own right  
 but enormously effective in presenting Eastern  
 as a great new can-do airline.

### Right Off the Projection Screen

s and sponsors of factual films share  
 a problem of getting meaningful "stills" out  
 of pictures for publicity and promotion.  
 At the cost of an extra still man in budget?  
 er, found by our own Bob Seymour, is  
 not most appropriate scenes right from  
 the projection screen. They won't have that  
 "look" but these examples at the right  
 capture the spirit of "Sunrise at Eastern."

In the film scenes at right (top to bottom)

One: President Floyd Hall (left) confers with  
 an associate. Two: name that's won fame on  
 Eastern's Boeing 727's. Three: experienced  
 pilot at the Whisperjet controls. Four: some  
 recent graduates of Eastern's stewardess school.  
 Five: Smart skycaps expedite handling of the  
 line's fast new baggage system. Six: another  
 proud new Whisperjet is on its way aloft!

*Whisperjet.*

# Saga of the Wild Rivers

A Timely, Eye-Pleasing Color Motion Picture Has Joined Humble's Film Library in the Interest of Conservation

**I**N HIS MESSAGE to the Congress on America's heritage in Natural Beauty, President Johnson said on February 8, 1965:

"The time has also come to identify and preserve free-flowing stretches of our great scenic rivers before growth and development make the beauty of the unspoiled waterway a memory."

Secretary of the Interior Stewart Udall accompanied the subsequent

Administration draft bill to establish a National Wild Rivers System with this urgent reminder to the American people:

"While river flows have been harnessed to aid navigation, control floods, increase farm productivity and hydroelectric power, too little attention has been given to the importance of protecting the very water we drink and the values of fish and wildlife, scenic and

*"The very mention of a wild river suggests a frenzied river, something like a bronco gone loco. A river that jumps at you to knock you down and toss you out on the bank. This is such a thing. The violence and speed of it are things a man brags about."*

outdoor recreation resources. These values, although often measureless in commercial terms, should be preserved by a program that will guarantee America her heritage of unspoiled, unpolluted free-flowing rivers."

## Outdoor Writers' Premiere

Against this background of national interest, one of the year's most timely and beautiful motion pictures was premiered at the recent 30th annual meeting of the Outdoor Writers Association in Glenwood Springs, Colorado and is now available for public show-

ing. The 28-minute color film, *Wild Rivers*, is sponsored by Humble Oil & Refining Company. It was produced in cooperation with the Department of the Interior and with the technical assistance of the U.S. Department of Agriculture. Larry May, widely-known for his award-

*"Look toward the middle of the land and there is a wild river dividing the sand hills of the prairie. Broad, clean and dependable, such a river long ago invited the buffalo to drink."*

*"Today, another kind of voyager comes by canoe to the same river, trading a few hours of quiet a reunion with the past."*

winning documentary films, produced and directed *Wild Rivers*.

This latest addition to the Humble Film Library is already in tremendous demand and the national distributor, Modern Talking Picture Service, Inc., is meeting a real challenge in swift dispatch and recovery of prints to satisfy audiences throughout the country. Humble merits well-earned praise for its alert

to this long overdue conservation program.  
 The Films Promote Travel  
 sponsor's interest in travel  
 for recreation is in keeping  
 Humble's broad objective  
 film activity. This motion  
 transcends the ordinary.

its viewers tumbling down rapids and shooting past the rocky canyon walls on a swift "bronco" of a far Western river.

**Remembering an Historic Past**

Throughout its scenes, the film carries the viewer back to other historic decades when the Indian roamed these streams in silent canoes and explorers followed their trails to open the wilderness.

The heritage of America's rivers is boundless and this motion picture brings it all back with vivid clarity as well as scenic beauty. Contrast enhances interest as placid waterways change to raging torrents; trickling, miniscule brooks widen into broad arteries of traffic for the nation's commerce.

angler asks nothing more than a wild river's loneliness... and  
 and-go acquaintance with its speckled life. He comes to claim  
 for a time of ownership... a state of perfect privacy...

in scenic beauty and time-  
 in the sheer poetry of  
 and superbly matched

 contrast, *Wild Rivers* takes

At times, there is a dimensional quality in Larry Madison's photography as the lens peers through season-tinted leaves to glimpse the shimmering waters beyond.

*Wild Rivers* will be an audience favorite, we predict, for many years to come. The Humble Film Library has been enriched.

**Blend Music and Narration**

Both music and narrator join the other instruments of this symphonic "tone poem" to blend into its totality of mood. The viewer finds that his heritage in these natural assets is readily accessible

*"The anglers who never say quit return in the gold and glass of the season for one more cast. Just one more. When they have finally gone, the river goes on shopping for an autumn wardrobe."*

throughout the land, that he and his family can look forward to countless journeys and joyous months of outdoor recreation along America's historic rivers.

**Map Booklet for the Viewer**

The rivers are not identified by name and there was no need to fix such boundaries since they typify all such places throughout the land. But Humble has wisely

prepared a 20-page map booklet with scenes from the film, describing each river in detail and showing the land through which it flows. These are made available to audiences by the distributor.

The rivers include the Hudson (New York), Susquehanna (New York-Pennsylvania), the Savannah (Georgia and the Carolinas), Cur- (PLEASE TURN TO PAGE 57)

PICTURE CAPTIONS ARE FROM "WILD RIVERS" NARRATION

*"In a quiet eddy on the river, the harvesting of this race continues as though the Machine Age had never dawned. This is a wild river serenely independent and timeless. 'Come back and remember,' it says."*

## 3.302 Attend NAVA's 26th Meeting in Chicago

National Audio-Visual Association Presents New Multi-Media Show for Business Use as Dealer Members Discuss Outlook for Coming Year and Tour 230 Trade Show Booths

**N**EW SIGHT SOUND TOOLS and techniques brought more than 3,000 members and guests of the National Audio-Visual Association to Chicago's Hotel Sherman on July 17-20 when this national organization of specializing audio-visual dealers and suppliers held their 26th annual convention. The four-day meetings were attended by 3,302 persons, including makers of equipment, their dealers and distributors and users from church, industry, medical and school groups.

The 230 booth NAVA Trade Show covered an entire floor at the Sherman as 175 exhibitors displayed their latest in equipment for sight and sound presentation.

This year's trade show was marked by a scarcity of new designs but there was plenty for both sellers and buyers to review and discuss.

### New Officers Are Installed

The association installed Mrs. Floise Keefe, Dallas, Texas dealer, as its new president, succeeding Harold E. Newman of Kalamazoo, Michigan who became chairman of the board. A telegram of greeting from President Johnson to Don White, executive vice-president of NAVA, contained this timely keynote as it was read to the assembled delegates at their opening session:

"After years of progress and innovation, our teachers have films, electronic teaching aids, lan-

guage laboratories and a host of other valuable devices and materials.

"In our nation whose resources are so great and whose educational demands so immense, our goal must be to make these essential tools widely available in the classrooms of the poor as well as those of the fortunate.

"The landmark education legislation passed by the 88th and 89th Congress have brought us closer to that goal. But, though legislators make laws, educated citizens must make laws effective.

"I am grateful for the active interest and the efforts of your organization whose members know the achievement of the American

dream depends in large measure on the classrooms and especially the teachers of our nation."

### When "Talk Is Not Enough"

That first general session brought convention delegates a first member showing of NAVA's multi-media presentation, "Talk Is Not Enough." A project which originated in the association's Industry & Business Council which was created and produced under the auspices of a special task force, headed by J. Hunecke of the DuKane Corporation, the presentation is being shown at the national gathering of business and trade groups.

Co-narrators of the slide show NAVA were Robert P. Ahrens, chairman of the Council and James W. Hulfish, association director of information. The perfor-

President-elect Eloise Keefe receives bouquet from retiring president of NAVA, Harold Newman.

required three wide screens, projectors, several tape recorders and two electronic program controllers to deliver 36 motion picture sequences, 325 still pictures and 12 tape recordings as it proclaims the theme that "talk is not enough in the commercial world."

The audio portion of the presentation continued with the problem

Opening sequence lights up screens as "Talk Is Not Enough" presentation is unveiled at the first general session of NAVA's 26th annual convention.

**Fuller & Smith & Ross "First" Uses TV to Study Consumers**

The first mobile television recording research service is helping Fuller & Smith & Ross, Inc., national advertising agency, to learn why people buy what they buy.

Entire consumer reaction panels (including the buyer comments that dismay client sales managers) are televised throughout the agency's Fifth Avenue headquarters in New York via closed-circuit televi- sion.

Hooked into the circuit is the agency's latest electronic acquisition, a 75-lb. Precision Instrument portable television recorder. It has been used more than 70 hours a month (for the past half year) on a wide variety of chores, according to FSR senior vice-president Arthur E. Duram.

The agency now has a library of 30 96-minute tapes for refer- ence and plans to equip each of its five other offices with these PI-3V recorders. •

Noted management speaker Joe Powell in a scene from "You, Yourself, Inc."

**What It Takes to Succeed in Business**

**"You, Yourself, Incorporated" Features Joe Powell in Inspiring New BNA Film on Personal Self-Development**

**W**HAT DOES IT TAKE to attain success in America's free enter- prise economy? J. Lewis (Joe) Powell has won standing ovations for his blunt, outspoken talks before audiences of business execu- tives on the subject of "obstacles in the path of personal success."

This widely-known business consultant recently completed his second management-oriented motion picture, *You, Yourself, Incorporated*. His first picture, *The Real Security*, was a witty and vigorous attack on "mental retirement" as an escape from the burden of adjusting to business and industrial change. This new Powell film is a stirring call for individual initiative and realistic self-development by every American, for a "can-do" attitude in everyone from the teen- ager approaching his first job to the seasoned top-management execu- tive.

Both films are being distributed on a purchase or rental basis by BNA Incorporated, a division of The Bureau of National Affairs, Inc., 1231 24th Street, N. W., Washington, D. C. 20037.

In his latest 24-minute appear- ance, Powell exposes and demoli- shes such obstacles as apathy, lethargy, complacency, indecision, vacillation, indifference, incompe- tence, fear of failure, and lack of imagination. *You, Yourself, Incor- porated* discusses the conflicting drives toward security and oppor- tunity. And in it Joe Powell em- phasizes the importance of good time-management, of determina-

Joe Powell points up a touch of humor in an incident from the new BNA film "You, Yourself, Inc."

tion and of positive attitudes. He demonstrates how to build on a good idea to make it a better one, how to be an effective communica- tor and how to "sell" ideas suc- cessfully.

This new picture will have broad appeal, from top managers to training directors and for high school and college counseling groups. Joe Powell makes this a very *personal* affair — with real empathy between himself and the viewer as one of the film's notable assets. We commend it to cham- ber of commerce and club groups as a luncheon program item of considerable impact.

The 24-minute print of this 16mm sound and color film may be previewed (48 hours) at \$15, applicable to print purchase or rental. The rental charge is \$45 per week and outright purchase, which includes can, reel and re- useable shipping carton, is \$275.

**Officers-elect** (front row, left to right): Harold E. Newman, Kalamazoo, Mich., chairman of board and recent past-president; Mrs. Eloise Keeffe, Dallas, Texas, president, and Max Rarig, Seattle, Wash., first vice-presi- dent; back row: Ray Swank, St. Louis, Mo., treasurer; John Ellingson, Spokane, Wash., secretary; Frank Bangs, Wichita, Kans. second vice-president.

Opening sequence for Bell & Howell audiovisual dealer show used three of the company's Tandem slide projectors to cover a 42-foot wide screen. Center image was "polarized" to animate radio waves sending S-O-S.

## Paths to the Effective Use of Audiovisuals

**Bell & Howell's Dealer Meeting Show Featured Leading Spokesmen in Church, Industry, School Demonstrations**

UTILIZATION OF AUDIO VISUALS was the theme for the annual gathering of Bell & Howell's specializing audiovisual dealers, meeting in mid-July (during the NAVA convention period) in the Bal Tabarin Room of Chicago's Hotel Sherman. Charles Musson, B&H audio-visual sales chief, welcomed 450 dealers at the four-hour special presentation on the effective utilization of sight sound tools for schools, industry and the church field.

As in the past several years, Telecine Film Studios, Inc., Park Ridge, Illinois, organized and staged the dealer show. Reaction and subsequent comment was "extremely favorable" according to company spokesmen. This year's presentation put the spotlight on *use* rather than "new model" details. Three spokesmen handled the main segments of the program.

Leading off the demonstration of audiovisuals in the school field, Robert Brown of Encyclopaedia Britannica Films, Inc. took a study program on "The American Indian" as his subject. A class of

26 sixth grade pupils met on stage for a regulation 45-minute class period. Brown combined the effective use of 16mm sound motion pictures, slides, filmstrips, overhead projection of transparencies and tape recordings as he helped both the group of young learners and his adult dealer audience to "learn more about the American Indian than they ever knew before."

Arnold Midlash, director of creative services for the International Mineral & Chemical Corporation, was the guest "spokesman" for industry's use of sight sound tools and techniques. His demonstrations covered such areas as training, consumer selling, public relations, advertising and human relations with actual screen examples ranging from 35mm CinemaScope motion pictures to standard 16mm sound films, filmstrips, slides and tape recordings. These tools were used as separate media and in combination on a single theme.

All of the examples shown and discussed at the dealer meeting

were from the IMC archives of recent films used in the field.

The church-related demonstration brought the Moody Bible Institute's audiovisual director, Wayne Buchanan, to the rostrum. His highly effective presentation included 162 slides, eight motion pictures and seven tape-recording segments. Working with the story of Jonah as his theme, Buchanan carried his role of the "teacher" from the purely verbal through various phases, adding audio, then visuals and combining both in the climax of his presentation.

A single screen, 18 feet high by 42 feet wide, carried as many as nine images for one demonstration, combining 35mm wide-screen motion pictures with 16mm film-strip and slide sequences. Four tape recorders reproduced both monaural and stereo sound. In one segment, Telecine utilized polarized techniques to add animation to an otherwise "static" slide; in another, the show producers carried a motion picture

Sales executive Chuck Musson welcomed over 450 of the country's a-v dealers to their annual meeting.

sequence into a framed one within a wide-screen slide.

An 18-man crew was busy with scenes at the Bal Tabarin. B&H equipment received a strenuous workout during the entire program. There isn't another way to "sell" audiovisuals to the men and women whose enthusiasm will be responsible for sales quotas in the year ahead.

## Light Touch Sets Mood for Product "S"

**Kodak Screens "Mixology" on Photo Finisher Program**

An important part of a series of luncheon programs that Eastman Kodak is currently hosting for photo finishers is an entertaining little film, *Mixology*, which is designed to set the stage for more serious doings to follow.

*Mixology*, produced by Willard Pictures, Inc., of New York, features Harold Peary — the Great Gildersleeve of radio and TV fame — as Romney Q. Hypo, a photo finisher with a tankful of troubles.

### He Likes to Experiment

Romney believes in mixing his own chemicals. He has a staff mixer and a whole room full of mixing equipment constantly bubbling away, but sometimes "the polar bears in the color pictures come out red."

The film makes an analogy between the time and trouble of making a sponge cake the old-fashioned way, and the ease and convenience of using a modern cake mix.

### Good Advice for Finishers

The moral is — "Let the pros do the mixing." Kodak uses the film to provide a proper mood and background for a factual chart presentation which follows.

Jack Squiers, of Willard Pictures, wrote and produced *Mixology*. Don Livingston was the director of this effective short film. •

Romney Hypo gets the point of the cake as he approves baker's ready-mix formula for preparing. Below: producer Jack Squiers (center with bow tie) directs film scene.

Below: one of the 18-man Telecine crew and equipment used for the four-hour demonstration of effective audiovisual utilization techniques.

## Idea Theater" for Electrical Contractors

Quarterly Showings of Four-Minute Films on New Products  
Sponsored by National Electrical Dealers Association

**PROBLEM:** how do you bring clear, vivid data on new products to the 23,000 electrical contractors?

**SOLUTION:** as devised by National Association of Electrical Dealers, a new "Idea Theater" program which delivers a series of four-minute 8mm motion pictures on relevant new products in projection at distributors' "con-counters" by means of a color Model 600 "Movie-Vision" projectors.

### Helps Build Wider Market

NAED believes that the Idea Theater program offers a broad range of benefits. It will help the manufacturer by creating a wider market for new products, and by shortening the weeks of their introduction.

Color Movie-Vision projector set up for new product films.

Helps assist distributors to present complete merchandising data on these fast-moving, elusive products to customers.

Usually, the theater showings aid the contractor by informing him of the new products and their features.

### Companies Express Interest

A growing number of manufacturers have signified their interest in using the developing network. Among these are Minnesota Mining & Manufacturing Co., General Electric, Westinghouse, and other giants of the electrical world.

Plans for a professionally-produced four-minute silent, cartridge-loading film (including script, art, photography, etc.) will run from \$1,500 to \$3,000. These films are ready for 8mm prints.

with notching, cartridge-loading and mailing. If "lifts" are possible from available motion picture footage, costs will be appreciably reduced.

### Douglas Serves Association

The Idea Theater program is being administered for NAED by Douglas Film Industries of Chicago. Although Douglas facilities are available for production of these 8mm subjects, users are free to select any producer they desire.

Cost of the Technicolor Movie-Vision projector in this program is \$225, including freight, special accessories and a replacement lamp. Film cartridges can be inserted and focused in a few seconds' time without special skill or training. Optical mirrors in the projector's dust-free chamber help to project a bright image on the built-in rear projection screen. Machines are accompanied by a display placard which snaps over the front access door, which is also equipped with a lock.

\* \* \*

### Anderson Company's President Cites Values of Film Program

An Aurora, Illinois metalworking company is using an automatic sound slidefilm presentation to show prospective clients the company's operations, facilities, capabilities and recent products.

Robert Grady, president of the Anderson Manufacturing Company, tells how this tool has helped his company:

"We feel that this is a tremendous aid in reaching the busy purchasing agent. With our program, he can actually see the entire operation, our products — and get an excellent insight to our progressiveness. We feel that our sales effectiveness will be increased 33 1/3 per cent through the use of this film.

"Salesmen no longer have to fear a communication problem with the customer, for now it is before his very eyes. It is also a convenience to the buyer, for he sees us in operation without ever leaving his desk. The psychological impact on both sides will be tremendous."

Anderson was established in 1946 as a custom fabricator of metal specialties and now occupies over 50,000 square feet of floor space. Offices and warehouses are located in Chicago and Aurora. •

Widescreen scenes (above and bottom of page) are from Lever meeting films.

## Focus on Product Films at Lever's Meeting

Wide-Screen Slidefilms, Motion Pictures Show Product Features, Preview Advertising and Promotion Programs

VISUALS, in the form of 14 separate 10-minute product films, were the main feature of the final day of Lever Brothers' national sales meeting on July 30 in Miami.

As designed and produced from a Lever script by Visualscope, Inc., of New York, the three-hour show, composed of wide-screen slidefilms mixed in with motion pictures, was spaced out with enough entertaining gags and gimmicks to keep even the most experienced old hands in the sales meeting game on the edges of their chairs waiting to see what would come next.

### Doesn't Believe in Fanfare

Speaking to 300 area managers assembled in the Doral Hotel, Staff Sales Manager John Wooley said that he hadn't quite decided how to get the meeting started — something corny like getting it off with a bang? (At which point assistant Fred Nolting in the audience fired off a few rounds of blanks with a pistol.) Or, having a band come in playing a Sousa march? (Band marches across stage.) Or, perhaps a snappy burlesque type of opening? (Stripper comes out and starts to shed.) But just at a most interesting point in these proceedings Wooley decided against gag openings — saying "we'll just have to get started without any fanfare at all."

The fast opening was only the beginning to the full afternoon's fact-packed meeting. In between each of the films on plans and

prospects for such stellar Lever products as Dove, All, Lux, Lifebuoy, etc., a new gag or gimmick was brought in to brighten up the show — such as a mock-up of P & G's ten-foot high washing machine, of TV commercial notoriety, toppling over ignominiously on stage.

### Holding Their Market Gains

The Lever meeting had a most serious intent — and the ten films reflected this: to help continue the company's recent dramatic rise in share-of-market for many products over those of arch-rival Procter & Gamble. The ten-minute wide-screen slidefilms demonstrated in graphic form how each product shapes up, and showed new advertising campaigns and special promotions which will keep them more competitive than ever.

New TV commercials scheduled to go on the air this fall were shown in an interesting way. As a wide-screen crawl slidefilm panned across the stage, it would contain a picture of a TV set. Then, stopping the crawl at center stage, the motion picture commercial was shown on the slidefilm's blank TV set screen.

### Applause Stops the Schedule

At several points in the proceedings the Lever area managers applauded so much it was hard to keep the show going on schedule. This whole-hearted approval served in good stead when the managers returned to their home areas. (CONTINUED ON NEXT PAGE)

**LEVER:** continued from page 47 for they carried with them one-hour versions of the same show to put on locally — with DuKane Micromatic projectors — for their own salesmen.

The Lever sales meeting — titled *The Red Cape Special* after

a trip-to-Spain sales contest the company is currently conducting — was produced for Visualscope by Marvin Green. It was supervised for Lever Brothers by Woolley and Charles Morris, Sales Plans and Communications Manager, and coordinated by Will Reynolds.

Shipside scene and (below) chickens by truckload from "Lifeline on Wheels."

## Trucking: America's "Lifeline on Wheels"

28-Minute Nationwide Look at Jobs Performed by Trucks

**T**HE TRUCKING INDUSTRY, that vigorous laborer now grown into a colossus on wheels within recent decades, is seen as a life force coursing through the nation's production and distribution blood stream in a new 28-minute color motion picture recently released by the Automobile Manufacturers Association.

14 million trucks now cover more than 400 million road miles each day to deliver virtually every kind of commodity. Trucks, as the film titled *Lifeline-on Wheels* shows, are truly giant beasts of burden serving the nation's economy.

Some 25,000 communities in the United States are served *only* by truck transport — a real "lifeline on wheels" at hand night and day.

Within its 28 minutes of screen time, many different aspects of the trucking industry are illuminated: local pickup and delivery; scenes of a crash crew in action at an air force base; missile transport to launching pad; computers conveyed to a space center; and a bookmobile parked in a supermarket lot, ready to meet the rush. All night long, armadas of trucks wheel produce to markets, material to waiting production lines, goods for export to shipside derricks. *Lifeline on Wheels* introduces a "hero" in a steller role understood by all too few citizens.

The auto makers' picture was produced by John Sutherland Productions. Nationwide distribution is being provided by Modern Talking Picture Service, through 30 regional libraries.

## A Progress Report on the Space Program

NASA Takes "Trial Balance" on Knowledge Gained to Date

**D**URING THE YEARS since the National Aeronautics and Space Administration has been involved in developing and carrying out the nation's space program, the world's knowledge of the universe has increased tremendously.

A new film, *Trial Balance*, sponsored by NASA, demonstrates how great these strides into the future have become. It is an interim report — a "trial balance" as it were — of what we have entered in the "books of knowledge" to date. It also has some thoughts on the future, and the areas of knowledge we will be increasing as we continue the studies of our universe while carrying out the space programs.

The framework of the film, as recently produced by Pelican Motion Pictures, Inc., of New York, is the "celestial counting room" where our "accountant" at the "space science" desk is preparing a balance sheet on the state of human knowledge in his department.

He enters data on recent discoveries of the true shape of the earth — from measurements which were made by satellites such as Vanguard, Echo and Syncom.

He reviews the significant improvements we've been able to make in weather forecasting through the Automatic Picture Transmission System.

Satellites for weather information, satellites for other data gathering missions and satellites for communications — all part of

NASA's approach: the *petit* for today's needs and the *heo* *retical* to gain greater knclod for tomorrow.

The "celestial accountant" continues his entries in the "de" labelled "atmosphere", "thosun" "the moon", and "the plane". he reflects on the informatn h is entering, the viewer see an mated graphic representati s this material, as well as cen footage from the cameras on the Ranger flights to the and spectacular footage wo through a telescope of solar ar

The 25-minute color film "na" rated by Albert Dekker, an w directed by Ted Lowry of Pca. It features exceptionally good ti-plane animation and fine apic work.

NASA is distributing *Triob* *ance* through its own facilitie

## 29 Million Audience for Webb "Sun City" Picture

**W**ITH OVER 500 color prints in circulation, a 30-minute motion picture has presented "a new philosophy" of retirement to over 24 million viewers since its release in 1961. The film: *The Beginning*, produced by Canyon Films of Arizona, on behalf of the Del E. Webb Corporation.

The picture brings the story of Sun City, Arizona, created by the Webb organization as a completely self-sufficient town for persons of 50 years of age and older. After a tremendous reception of this town and its "active retirement" philosophy, the Webb company opened three more identical communities and had the film revised to include scenes from California and Florida.

*The Beginning* has now been shown 939 times on television to

23,810,000 persons and before 416 group audiences and involving another 878,243 people. These are the figures reported by Webb headquarters at Phoenix by three national film distributors. In addition, there have been hundreds of other showings by select personnel to groups near four retirement towns.

Scenes were first mapped by Canyon Films' Ray Boley, Garland of the Garland Advertising Agency and Tom Breen Webb, around a theme outlined by Breen.

"We know that the film has done an excellent job of telling the Sun City story," concludes Meeker, community development director for the Webb company. "It's been our lowest paid but most effective salesman."

## National Board Plans for an Active Year

New Requests to Launch New Chapters in Six Regions Drive to Expand Association Activities Moves Ahead

COMING YEAR appears destined to be one of the most important in the history of IFPA. It has already moved ahead under a "burst of steam" as enthusiastic and energetic members of the National Board and new Chapter formation are well under way soon after the National Conference. The National Board has been in weekly sessions since their meeting in June, mapping out a larger and more valuable organization to serve IFPA's membership.

### on the Board's Agenda

These plans are the forerunners of additional chapters in various sections of the U. S.; a re-examination of the association's Constitution and By-Laws for possible simplification and modernization; participation of members in social activities and operational matters of IFPA; and a bi-weekly news-letter.

Increased and closer collaboration with Sustaining Members and exhibitors at the Conference is being planned and a series of seminars and workshops on various phases of films and production has already been planned — with outstanding speakers leading each program. Plans also include a job-opportunity survey for its members.

### Interest in Local Chapters

Chapter formation has been stimulated by recent requests to establish local chapters in other cities. The need for a "centralized" organization to the aid and welfare of theatrical film people is being given serious consideration. The establishment of new chapters in Dayton and Cleveland, Ohio and in Houston, Texas, Seattle and a centrally-located Florida city.

Due to this widespread interest, there have been a growing number of requests and the enrollment of new women throughout the country who are actively engaged in "independent-type" film production. Not only members of an "independent" film organization but also notes the recruitment of commercial film company members of "in-plant" type because of their valuable experience and training. Although many members have accepted such

posts, they do not want to give up their active membership in IFPA.

### Active Memberships Retained

Taking a sympathetic view of these member requests, the National Board recently made it possible for them to retain active membership in IFPA. At the same time, the Board has voted to accept membership from their fellow-workers in similar fields. Now, in response to many requests, all those who are employed in making educational, business, religious and free-lance or contractual industrial-type films are welcome to become actively affiliated with IFPA.

The National Board is also giving serious consideration to requests of these members that the organizational name reflect this extended field of service. It plans to ask the membership to express opinions regarding a name-change in an early mail ballot.

### Newsletter to List Openings

Starting immediately, the National Board (in collaboration with the Los Angeles Chapter) will start sending a regularly scheduled newsletter to the membership, including Sustaining Members and past exhibitors at IFPA's annual National Conferences.

Included in the newsletter will be a listing of job opportunities as reported to us. So, for those of you who are seeking highly-skilled and trained personnel for writing, direction, production, cinematography, editing, sound engineering, animation, artists, etc., the Editors of the JOURNAL urge you to pass on such information to Jim Newcom, 22854 MacFarlane Drive, Woodland Hills, California. Jim will include such information in the newsletter.

The 1965-66 period looks like the beginning of an historic era for IFPA! Can you afford to miss being a part of it? •

\* \* \*

### Send in Your Contributions for the IFPA Journal Pages

IFPA members are cordially invited to submit stories on their new pictures, good utilization of audio-visuals and other developments for these JOURNAL pages.

Send editorial material and pictures (if available) to Editorial Vice-President Roy Deets, c/o IFPA, P.O. Box 1395, Thousand Oaks, California. Keep us posted.

## Full House as Los Angeles Chapter Meets

Bruce Herschenshon Presents Films at Cinesound Studio

A PACKED HOUSE greeted the newly-elected Los Angeles Chapter officers at the first membership meeting of the year, held July 8th at the studios of Sustainer members, Cinesound Corporation, and to see a presentation of motion pictures produced for the USIA by Bruce Herschenshon.

James Swift, chapter chairman for 1965-66, introduced the new chapter officers: Roy George, Treasurer; Gene Burson, Billy Curtis, and Nancy Reed of the Program Committee; Ray Jewell and Billy Curtiss, co-publicity chairmen; and the membership committee of William Morrison, Leon Vickman, Jim Newcom, Paul De Mello, Robert Gunther, Everett Kelley, and Bob Hecker.

### Show Two Outstanding Films

Following an hilarious and elaborately put-together reel of film clips, for which the Cinesound staff provided a *live* dubbing of sound, Herschenshon presented two of his outstanding films: *Five Cities In June* and *The President*.

The first film is fairly well-known among people in the business and is highly respected for the ingenuity of its conception, the excellent (and sometimes spectacular) photography, and fine musical scoring. The second film gave a warm and intimate insight into the life and personality of

President Lyndon B. Johnson during the days shortly after the assassination of the late John F. Kennedy.

Bruce astounded many of those present, however, when he revealed in the following question-and-answer period that he not only conceived the ideas for both films and produced and directed them, but that he also did some of the cinematography and composed, scored, and directed the musical accompaniment for both titles.

Bruce Herschenshon is truly a great talent.

### New Quarters for Cinesound

Prior to the showing of the pictures, Mr. Austin Green — who, along with his wife, Rose, own and operate the Cinesound studios — announced that his organization was moving to larger facilities on Highland Avenue in Hollywood within the next ninety days. Shortly after the move, all IFPA members will be invited to an Open House in appreciation for the mutual friendship and business affiliations between IFPA and the Greens over the past seven years.

Mr. Green expressed his regrets that Rose could not be in attendance. She had left that morning for Japan to permit their adopted

Japanese daughter to visit her parents.

Jim Swift also announced some of the plans for future meetings of the Los Angeles Chapter — meetings that are certain to bring the largest attendance ever seen at chapter meetings. Tentative agreements for guest speakers in-

cluded such prominent names as Jerry Lewis, Blake Edwards, and Henry Mancini. Jim took this occasion to announce that those "perennial guests" of chapter meetings might miss some of these world-famed personalities, as these meetings may be closed to all but members.

**President in Profile: Dr. Harald Dyrenforth**

In response to many requests for biographical information on I-PA members and officers, we inaugurate this "behind-the-personalities" column with the facts on our recently elected National President — Dr. Harald Dyrenforth.

Now a resident of Gardena, California, Harald was born in Switzerland, and continued his education there through four years of undergraduate study of German and English literature at the University of Zurich.

**Parents Were Noted Explorers**

His father — Professor Dr. G. O. Dyhrenfurth (original spelling) — and mother, Hettie, were famous mountain climbers and explorers who received Olympic Gold Medals in 1936 for the greatest mountaineering feat of the year. Mrs. Hettie Dyhrenfurth still holds the World's record for the highest ascent of a mountain ever made by a woman. And Harald's brother, Norman, is world-renowned as the leader of the highly successful American Mount Everest Expedition of 1963. For this, Norman (who is also a member of I-PA, and a pretty good film producer) received the Hubbard Medal of the National Geographic Society from the hands of President John F. Kennedy shortly before the late President's assassination.

In 1935, Harald entered the acting profession in the Swiss theatre and radio. In 1938, he came to America and acted in Broadway plays and radio until the outbreak of World War II. Throughout 1943 and '44, he served with the Mountain Infantry ("Ski Troops"), testing military supplies for use in mountain and arctic warfare. In 1944, at the request of Elmer Davis, then Head of the U.S. Office of War Information, Harald was transferred from the Army to the OWI as a "Psychological Warfare Specialist," assigned to the New York headquarters as a foreign language broadcaster for the "Voice of

Harald Dyrenforth, as he appears in a scene for the picture "Morituri."

America" — where he remained throughout the war and, on a voluntary basis, until 1949.

In 1946, Dr. Dyrenforth married Dodie Yates, one of the few outstanding women producer-directors in national radio. Among the shows she directed were "Young Doctor Malone," "When a Girl Marries," "Rosemary," "Portia Faces Life," "Myrt And Marge," "Showboat," and others.

**Received Masters at UCLA**

In 1949, when television began making inroads into the radio field, Harald decided to return to his studies and earn a Master's Degree in order to teach. He chose the UCLA school of Theatre Arts, and obtained his M. A. in 1950.

Following this, he was an in-

structor of drama and speech at Mount St. Mary's College, Brentwood, California (1951-1953); of radio and television broadcasting at Pasadena City College, Pasadena, California (1954-1954); and from 1954 until 1958 he was Associate Professor of Speech Arts at Chapman College in the southern part of Orange County, California. In 1963, he received a Doctorate Degree in the field of Communications from the University of Southern California.

**Joins North American**

Meanwhile, Harald joined the motion picture department of the Space and Information Systems Division of North American Aviation in 1962 as Film Coordinator for the "Apollo" project (America's space project to land men on the moon), and added to this the duties of writer-director in the same capacity in the Television Department — where he still is.

But, all of this was not enough to absorb all of Harald's energy. And, he had never been able to shake the "acting-bug" in him. So, throughout the years, he continued his thespian career — appearing in more than 50 TV programs and 50 motion pictures. His most recent role in the picture *Morituri* (a picture), starring Marlon Brando and Yul Brynner.

**Served As Our Editorial Vice-President**

However, like all busy men, even this crowded career is not enough for Harald. He has been active with the Industry Film Producers Association, serving a year as the Editorial Vice-President and now as President of I-PA.

With all this drive, Harald is humming already, a year of his service promise an exciting and promising one — and active!

(A continuing Journal feature)

## How to grab attention for your story... and hold it

Make a movie.

A movie can train, sell or communicate whatever needs telling. It never forgets a point, never deviates. It tells your story as convincingly and as professionally as your most effective spokesman would tell it, time after time.

A movie shuts your audience into a room with your message. No phones. No distractions. Every eye and ear is intent on your message from beginning to end. This is what makes movies great.

But be sure to show your movie with a KODAK PAGEANT Sound Projector, Model AV-126-TR. We built this 16mm projector for situations where everything—from careers to contracts—rides on the movie you're showing.

The sound system in this projector is a transistorized system. This is the kind that is completely dependable as well as instant starting. The sound system exciter lamp is a

little bigger than the job it has to do. This means it should last for the life of the projector. Since this is also a *high-fidelity* sound system, your audience will always hear the best sound it is possible to record on film.

The 12-watt amplifier has the power to fill a big room with commanding sound. At low volume levels, it can be heard with complete clarity in small rooms. We also built in a P.A. system to provide the flexibility of substituting live voices in your programs whenever you wish to do so.

Your films should last longer, look better, and require less upkeep when shown with this projector. That's because we designed the film-transport system so that it never comes in contact with either the sound portion or picture portion of the film.

Schoolchildren set up, thread, and operate this projector. Adults should find it just as easy.

Kodak has a new free booklet to

help you acquaint your management with the benefits of audiovisual presentation. Called **AUDIOVISUALS IN BUSINESS AND INDUSTRY**, this booklet introduces audiovisual methods and applications and includes a bibliography of current literature. Please use the coupon.

## Ford Picture Wins a Top Award in Britain

155 Entries Compete for British National Awards Honors

**T**HE BRITISH NATIONAL Film Awards Competition's top award of 1965 has been presented to the Ford Motor Company's film *Project D*, selected as the "film best calculated to promote British exports." Over 250 delegates from industry and business film production attended the recent awards ceremonies in London where that country's outstanding sponsored films of the year were honored. 15 of these award-winners were selected to represent Britain at the 6th International Industrial Film Festival in Rouen next month.

*Project D* was described by Walter Hayes, Ford's Director of Public Affairs, in a pre-awards conference. He noted that this British-based plant sold in 168 different territories and the film, describing a \$36 million design and development for a new line of trucks, was designed for "an emphatic impact in these export markets."

### Fly Dealers Into Copenhagen

Former newsman Hayes said that 2,000 auto dealers from all over Europe were flown into Copenhagen, Denmark to see the film. The sales picture cost \$45,000 and was cited as "a very good buy indeed."

155 films were entered in Britain's 1965 awards competition. Since April, these were viewed by jury panels of more than 70 members of the British Industrial Film Association prior to the final selections. The entries came from nearly 100 sponsors and represent about 25 per cent of the total

number of films sponsored in Britain last year.

### Films From Leading Industries

Films from the oil and petroleum industry accounted for 12 per cent of the entries; government services accounted for another 11 per cent. Transport & shipping

Walter Hayes, director of public affairs, Ford Motor Co. Ltd., as he discussed role of "Project D."

and chemical industries made up another nine per cent. Eight per cent of these entries came from the tobacco, food and drink industry; construction (building and civil engineering); and mining and mining equipment.

Building and civil engineering, iron and steel, atomic energy and agriculture occupied a lower place in the list of entries than the previous year — but there was an increase in the number of films made for British professional and trade groups and for financial, insurance and banking firms.

Panel members agreed that both production and informational content was higher this year. 67 films were made for general audiences and 88 for specialist groups.

Sir Peter Runge, president of the Federation of British Industries (right), presents award for "Project D" to Norman Vigars of Ford Motor Company.

Cycling along the Corniche (South of France) in a scene from "Shellerama"

## Shell Premieres a Major Film in Cinerama

Worldwide "Shellerama" to Play Theaters in 20 Countries

**T**HE SHELL INTERNATIONAL Petroleum Company's most ambitious sponsored motion picture project was premiered in London in July. At a production/distribution cost of \$1,000,000 *Shellerama* is the first sponsored movie to be produced for single lens Cinerama and is featured in Britain with United Artists' *The Hallelujah Trail*.

It is also released internationally in over 60 cinemas in 20 countries and is expected to reach 20 million people in the first nine to twelve months.

### Journeys Around the World

*Shellerama* is 14 minutes of high-speed entertainment with all the movement, realism and excitement of the Cinerama technique and it carries the viewer all over the world — to Nigeria, Venezuela, Thailand, Hong Kong, Iran, Italy, France, Great Britain and the United States of America.

The film relies on pictures and sound effects to describe pictorially the flow of oil from the very earliest stages of exploration with bare feet in the brown jungle swamps of Nigeria to the use of the refined product carrying bare midriffs on mopeds to the sunlit blue Riviera.

### There's Drama in Oil Scenes

There is big screen drama as a drilling crew struggle with a new section of pipe — rigs by the hundred spike the yellow desert and then mile upon mile of pipeline are followed at breathless pace by an inspection helicopter which sweeps low across bare deserts and stony mountain to the tanker waiting at the coast. A thrilling sequence shows a tanker in a storm at sea, then the home port and the refinery.

The car, the consumer of petrol, then takes a tour of the world. There are shots of the great cities, asleep and awake. Bangkok at

dawn, going to work in New York. Two derby hatted city "gits" proceed up London's Whitehall on mopeds. A day on the beach in the mountains, the crowded streets of Hong Kong; a pe-

Richard Cawston, head of documentary programs for Shell, produced "Shellerama" film.

of a mosque in Isfahan and robed monks at a Buddhist temple. The crowds at St. Peter's Square in Rome. Finally, at an ever increasing pace, from vintage English country roads, smooth sports cars on a French autostrada, or an Italian autostrada, mountains and lakes and hills in the air.

*Shellerama* is essentially a film of thrills, contrast and beauty from the hand of a great Cineramarian, Richard Cawston, head of Documentary Programme for Britain's B.B.C. Television. Given three months leave of absence last year to make this motion picture.

### Pictures Carry the Story

One feature of his treatment is that the whole story is told without commentary, for he believes in making a subject speak for itself. This has practical importance. *Shellerama* can now be shown in any theater. (CONCLUDED ON PAGE 52)

This is a Polaroid Land Transparency.  
 It was made in 10 seconds.  
 It can be inserted into projects of all sizes.  
 It costs 55¢ to make the first slide, less than what you pay for conventional slides.  
 It is one of two transparency films which work in standard-size Polaroid Land Cameras.  
 It is one of eleven Polaroid Land Films which give you the results you want or "no stop."  
 Shouldn't you be using it?

### British Industrial Film Assn. Confirms New Executive Posts

The appointment of R. E. Tritton as a vice-president of the British Industrial Film Association Ltd. was confirmed last month by Miles Pitts-Tucker, chairman of BIFA. He also noted the appoint-

M. W. Pitts-Tucker, chairman of British Industrial Film Association, pictured as he introduced speakers at a recent conference.

ment of B. G. Akroyd and J. Michael Shersby as Council Members. The latter has also assumed the newly-created post of director.

Ronnie Tritton is General Manager, Public Relations and Information, for the British Petroleum Company Ltd. He played a key role in setting up the association and was chairman of its Council from 1962 to 1964.

Mr. Akroyd is Deputy Director of Public Relations for the United Kingdom Atomic Energy Authority. His appointment will strengthen the scientific phases of the association's program.

Michael Shersby has been secretary of BIFA since its formation in 1961 and directed the 5th International Industrial Film Festival for which Britain was the host country last year.

EDITOR'S NOTE: Additional entries for the Rouen festival begin on page eight of this edition.

## Films Highlight IVA Exhibition in Munich

### Herb Mitchell Reports on Sight & Sound Applications at World Exhibition of Transport and Communications

CINERAMA, CINEMASCOPE, a simultaneous non-stop show on six film and slide screens, and a seatless hall in which four parallel screen banks carry the output of 16 projectors — these are highlights of an exposition now on in Munich which must match or exceed the use of a-v materials at any world's fair.

The event is one which lends itself ideally to both picture and sound, and only reality competes with the image: IVA, the First World Exhibition of Transport and Communications.

#### Moving Men and Ideas

Here, in the West German city's "Oktoberfest" grounds, more than two dozen halls are filled with exhibits of transportation equipment, from bicycles (very much a part of the European scene, as a drive past a plant at quitting-time will show) to space vehicles. Communications, also shown, range from exhibits of the German postal system — with a multi-color press printing and perforating stamps from webs of paper, and automatic sorting and cancelling equipment in operation — to radio and television, shown by a fully-equipped studio with picture, sound and lighting controls, magnetic picture recording and reproduction system, film scanning equipment, and much more.

Among a number of open areas, more than a half million square feet are devoted to displays by the German Federal Railways and other European and overseas rail-

ways showing the importance of rail transport. Here are actual locomotives, cars and equipment of all kinds; the rail buff can view the riches of variety from a bridge which crosses above the yards or may roam through much of the equipment, study track construction, signal systems and other details of operation. An adjacent main line track permits some visitors to ride from the exhibition grounds to Augsburg and back at 120 m.p.h.

A dozen international organizations and 35 nations are participants in the exposition which takes as its general theme "Man and Transport." Separate halls and open areas provide displays showing structure of world transport; supply of energy; bicycles and motorcycles; motor cars and accessories, including racing cars and historic vehicles; international railways; European private railways and regional bus systems; rolling stock; mountain railways; aeronautics and astronautics. Iron and steel, aluminum, and chemistry and plastics in transport have separate halls. International shipping, inland shipping, and separate halls for German, Italian and Belgian shipping, and international forwarding are interesting exhibit areas.

#### Some of the Notable Exhibits

There are exhibits covering road transport; public urban transport; town traffic; traffic safety, education, noise abatement and traffic science; and a traffic youth park.

*Cinorama Theater where Swiss Railroads film was shown at IVA Exhibition.*

the "children's city of the International postal and telecommunication service occupies hall, radio and TV; other there are separate exhibits by German Federal post office, man postal service and German telecommunications services.

Finally there are tourism transport toy show which includes models of all sorts of transportation equipment and is especially strong in model railroad, one of which is operated in miniature of a regular rail control console.

#### Wide Use of Audiovisual

There are few areas which pictures or sound to create reality of equipment shown in operational settings and conditions. Stills are everywhere, effectively selected, well mounted together with maps. Transparencies are sequentially lighted and timed to tell a story. The exhibition generally dozens of motion pictures some produced by or for various governments and bureaus, produced by and for various industry.

The Disney Cinorama tells the story of the Swiss roads. The Cinemascope presentation made especially for IVA film journey on inland water projected on a backcloth depicting a river landscape with prominent industrial buildings.

#### They Call It "DB-Vision"

The 16-projector spectacle named "DB-Vision", or "Vision." Each of the four screens is segmented for projector output, and while it runs continuously the boundaries between end and beginning images by a screen-swing to a position perpendicular to the viewer, a swing to viewing position clang like the slamming of a door.

Since the screens — quadrants — are placed above head level and about 40 feet apart, the viewer wanders both forward and side to side to gain the impressions intended. Screen segments include many climactic terrains, all seasons, man and figures. Sometimes taken from a speeding train, times from a plane at the moment of takeoff and into its landing. Sometimes the viewpoint is purely, foot-paced. At times one of the giant screens, the outer pictures may be identified while the two inner ones are different from all else visible.

## Report from Europe:

(CONTINUED FROM PAGE 54)

Paolo Nestler and Edgar Reitz, and Insel-Film GmbH & Co., get credit for the experimental production; Joseph Anton Reedl, and the Studio for Electronic Music, created the unusual and effective electronic score; Alexander Kluge prepared the text and speech montage. Elsewhere film credits were not seen — except in the case of Disney's 360° Circarama — and the press office had no information as to their producers.

Sound by itself tells an effective story of town traffic, and a panel of 20 closed circuit TV receivers spots problems at key points in Munich traffic as they occur, to help make significant points for the administrator attending IVA for business reasons.

The exposition, quite serious in purpose as evidenced by attendance of business, professional and government representatives from many lands, also is fun for the general public. Many tourists on the Continent, and Germans in great numbers, are attending.

IVA opened on June 25, and one month later chalked up its millionth paid attendance, at 6 DM — \$1.50 — or half that for those entering after 3 p.m. It continues until October 3, and is well worth the trip for any film-minded, fortunate European traveler. •

\* \* \*

### 1966 Photokina Will Feature Award-Winning Short Films

The world-renowned photographic equipment marketing center at Cologne, Germany, will feature outstanding short films from worldwide sources when the 1966 edition of the Photokina is held in October (1st-9th) of next year.

Continuous showings of prize-winning motion pictures of the past 10 years has been arranged from titles in the archives of the West German Short Film Meetings at Oberhausen, Germany. They will be shown in a special cinema housing 240 persons. A symposium on short film production is also planned. •

\* \* \*

### Corning Film Brings Culinary Delights of European Holiday

*The World in Your Kitchen*, a new film sponsored by Corning Glass Works, invites audiences to take part in a gourmet's European holiday.

After punting on the river at Oxford, there is a visit to a Swed-

ish castle, a Sunday in Venice, a stop at a Parisian restaurant and a pause in elegant Vienna. Intermingled with these scenes are brief interludes with European chefs who demonstrate their considerable skills.

Studio shots (filmed on return to the United States) translate the gourmet cookery into dishes to be created in American kitchens.

Rodney Chalk and Stan Lopresto of Show Associates, Inc., New York, produced the 27½-minute color film for Corning. It is available from all offices of Modern Talking Picture Service •

\* \* \*

### U. S. Shows "To Open a Door" at World Health Conference

*To Open a Door*, a 34-minute documentary film about urban health needs sponsored by the New Jersey State Department of Health, represented the United States at a week-long film seminar during the Sixth World Conference of the International Union for Health Education in Madrid, July 10. Health leaders and educators from 90 member countries affiliated with the International Union took part in the conference.

*To Open a Door* was selected for the conference screenings by the American National Union for Health Education of the Public. The American body, United States' affiliate of the International Union, singled it out as an outstanding example of an actuality film depicting new ways to bring essential health services to low-income groups.

Sponsored by the New Jersey State Health Department in cooperation with the U. S. Public

Health Service, *To Open a Door* was produced last year by H. Mantell, Inc., of Princeton. Mantell wrote and directed the film. It was produced to show community leaders and press how to enlist the cooperation of hard-to-reach low-income groups in preventive health programs.

The film documents a polio immunization program directed at "inner city" residents of a New Jersey municipality. Call on the resources offered by the community itself — the bartender, the block leader, the shop-keepers, social workers, school teachers — the organizers succeed in educating and motivating uneducated through their "natural" leaders. The film shows the actual methods used to overcome fears, prejudices and hostilities — the powerful barriers to communication between middle-class professionals and low-income persons which must be overcome if the nation's goal of poverty is to succeed.

Prints of *To Open a Door* have been placed in regional offices of the United States Public Health Service.

### Advantages of "Speeder" Shown to Maintenance Workers

Demonstrations and tests of Speed Crete, a micro-crystalline product, are the subject of an 11-minute motion picture produced by Pilot Production for Concrete Maintenance Products, Inc., Crystal Lake, Ill.

The picture was created for tractors, builders, plumbers, engineering managers, street and highway maintenance personnel and "do-it-yourself" workers.

## ANNOUNCEMENT: DISTRIBUTORS SOUGHT FOR EDUCATIONAL FILM SERIES IN MATHEMATICS FOR ELEMENTARY TEACHERS

The project, *FOUNDATIONS OF MATHEMATICS FOR ELEMENTARY TEACHERS*, seeks a distributor. The program consists of thirty-minute, 16mm kinescopes, an accompanying text of 250-300 typewritten pages, and a consultant's guide of no more than 50 typewritten pages, to be used in providing an introductory program that will enable teachers to get an overview of some of the ideas of mathematics, before more intensive study is undertaken.

These materials have been prepared at the State College of Iowa by E. Glenadine Gibb and Augusta Schurrer, with financial support from the National Science Foundation and the State College of Iowa.

Inquiries should be sent to:

Raymond J. Schlicher, Director of Field Services  
State College of Iowa, Cedar Falls, Iowa 50613

## "Wild Rivers" Joins Humble's Film Library:

 filming and words like  
 awn from the spirit of  
 hey visited:

### "The River Is a Traveler"

e countless shapes and  
 er, from ocean, sea and  
 lake to fishpond and  
 river is the friendliest,  
 river is a traveler, car-  
 of adventure from wil-  
 village, town and city.  
 al friend of scattered  
 neighbor-maker.

river is the best travel-  
 vers, for it begins in  
 freshness, like a child  
 bears life, stimulates  
 oteets life. It is a joy  
 hare its presence . . ."

### "Other Noteworthy Lines"

o can can soon forget  
 escriptive phrasing:  
 be a daughter of the  
 ade of meltwater and

the overflow of icy springs, hur-  
 rying down a church aisle to mar-  
 ry the ocean."

You wish that the film, like a  
 timeless river, would wind on and  
 on through other eye-filling ex-  
 periences, but it comes, all too  
 soon, to its ending with seasonal  
 congeniality in the twilight of these  
 all-too-brief 28 minutes:

"Shadow, cloud and chilling air  
 draw close in the shortening days,  
 preparing the river for a long sea-  
 son of meditation and mending,  
 anticipating the first deep frost  
 and perhaps an overcast of snow.

"Now, the wild river seems to  
 slow in its tracks, as though look-  
 ing backward to its birthplace, and  
 to friends across the years — pio-  
 neers last century, vacationers last  
 month. And then, seemingly aware  
 of the dependence of all life upon  
 its progress and purity, the river  
 rolls on to an appointment with  
 another springtime."

### Dedicated to Scout Groups

Each showing of *Wild Rivers* is  
 a "premiere" but two of its first  
 screen debuts were well-publicized  
 events. The 500 members and  
 guests who attended the showing  
 at the Outdoor Writers Associa-  
 tion's annual meeting (see pic-  
 ture) were enthusiastic in their

Charles W. Bohmer, Jr., Humble's public relations manager, presents print of "Wild Rivers" to Louis E. Reid, Jr., chief of information, Bureau of Outdoor Recreation, following premiere showing of film at 38th annual meeting of Outdoor Writers Association of America. At left: John Gartner, president of writers' association; Larry Madison, film's producer and director, and, at right, Ralph J. Del Coro, vice-president of Modern Talking Picture Service, national distributors of the Humble film library and this picture.

praise; another premiere was held  
 at Hayward, Wisconsin and here  
 the film was dedicated to Boy and  
 Girl Scouts of the area as they  
 shared this viewing.

It was a most appropriate and  
 thoughtful gesture for, after all,  
 these wild rivers of America are  
 their heritage. The preservation of  
 these priceless resources has one  
 principal aim: to safeguard them  
 for generations to come as well as

for the pleasure and rejuvenation  
 of those who would visit these  
 natural wonders today.

## A BID INVITATION TO DISTRIBUTORS

The National Council of  
Teachers of Mathematics  
(NCTM)

is interested in the sub-  
mission of proposals by  
qualified film distributors  
for the distribution of a  
series of eleven half-hour  
films (16mm, color,  
sound) on modern mathe-  
matics for elementary  
school teachers.

**OBJECTIVE:** to offer in-  
service education mater-  
ials that will help elemen-  
tary school teachers to  
understand the basic con-  
cepts of modern mathe-  
matics programs.

**AVAILABILITY:** film pro-  
duction will be completed  
by August 31, 1965.

**TEXT MATERIALS:** to be  
published by the NCTM to  
accompany the film series.

### Techniques of "Winning Golf" Filmed for NCAA Libraries

The latest in the National Col-  
legiate Athletic Association's ser-  
ies of how-to-do-it films on sports  
is *Winning Golf*, featuring the  
teaching techniques of Robert H.  
Kepler, coach of Ohio State's great  
golf teams since 1938.

The film, which was produced  
by William J. Ganz, of the Insti-  
tute of Visual Training, features  
two of Kepler's former NCAA  
champions, Tom Nieporte, victor  
in 1951, and the fabulous Jack  
Nicklaus, winner in 1961.

A two-time NCAA champion  
who presents many of the do's and  
don'ts in *Winning Golf* is Dick  
Crawford, who captured the title  
originally in 1959 and repeated in  
1960 as a member of the champ-  
ionship University of Houston  
team.

To make his teaching points as  
meaningful as possible, Kepler  
also calls on his present varsity  
stars and such recent Buckeye  
alumni as Mike Podolsky, runner-  
up to Nicklaus for the 1961  
championship, and Tom Weis-  
kopf, who won the Western Ama-  
teur in 1962 since leaving the Ohio  
State campus.

Photographed in color, with a  
substantial amount of slow motion  
to enable viewers to detect minute  
movements, the 35-minute film al-  
so includes various phases of the  
game, from driving to putting. In  
addition, there is interspersed such  
normal trouble shots as sand trap  
play — both from buried and set-  
up lies — right on through side-  
hill, downhill and uphill lies.

*Winning Golf*, like other films  
in the extensive sports series, is

Producer Bill Ganz (at left) dis-  
cusses scenes for "Winning Golf"  
with Ohio State coach Bob Kepler  
and famed golf pro Jack Nicklaus.

available on rental from National  
Collegiate Film Service, 1030  
West Chicago Avenue, Chicago  
60622. It was produced with the  
financial cooperation of Brun-  
swick Sports, manufacturer of Mac-  
Gregor golf equipment.

### New York World's Fair Film Gets Big Play from Viewers

☆ *To the Fair*, a film sponsored  
by the New York World's Fair,  
and produced by Francis Thomp-  
son, is attracting large audiences  
in schools, clubs and community  
organizations, according to Asso-  
ciation Films, the distributor. The  
Fair closes next month.

The average audience per book-  
ing for the 26½-minute film is  
181 persons, or 81% higher than  
the norm for public relations films.

Television demand for the film  
has been far above average. Asso-  
ciation reports that the film was  
televised on 89 different stations

during its first five weeks of  
distribution, to an audience exceeding  
four million persons.

### Clark Victory at Indianapolis "500" in "Short Way Around"

The 1965 Indianapolis 500  
race is re-created in the new  
color film, *The Short Way Around*,  
sponsored by the Firestone  
& Rubber Company and released  
for nationwide group booking  
through Association Films, Inc.

Made from footage leased  
(Racefilm Productions) during  
qualifying tests and during  
500-mile event, the film shows

Jim Clark: auto tracks' champ  
how Jim Clark, 29-year-old  
wizard from Scotland, claimed  
victory. Title of the film refers  
to the goal of every racing driver  
to find "the short way around"  
victory.

Firestone has sponsored  
films and distributed them to  
Association Films' library for  
more than 35 years. Last year  
film, *Indianapolis 500* 1965,  
seen by more than eight million  
persons on television and in com-  
munity organizations.

 ed as the winner of a

CINE Golden Eagle Award and will be shown before worldwide audiences at film festivals. •

**Ransburg's Film "Close-Up" of Waste-Saving Spray Method**

☆ Does paint spray really turn corners when you add electrostatic control of stop waste?

A motion picture cameraman, working with a close-up lens, "rode" through a complete production painting loop to capture the answer in a new color film

Camera setup for Ransburg's film.

sponsored by Ransburg Electro-Coating Corp., of Indianapolis, Ind. The film was produced by The Film-Makers, a Chicago studio, for Caldwell, Larkin & Sidener-Van Riper, Inc., the sponsor's ad agency.

Riding inches away from a variety of small parts as they were painted, the camera records what appears to be complete spray control. Where conventional spray equipment would have "blown" enough over-spray waste past parts being covered to saturate the lens in a few feet, the Ransburg electrostatic equipment confined its

spray of bright green paint to the actual parts.

Application of the coating process is shown in 28 actual case histories, demonstrating in a series of close-ups exactly how a wide range of manufacturers have eliminated waste in production-line painting.

In addition to U. S. showings, prints have been made in overseas versions for French, Spanish, German and Japanese showings. •

**Gas Industry's 150th Year Picture to Craven Film Corp.**

☆ A new film which will be a part of the American gas industry's commemoration of its 150th anniversary in 1966 has been commissioned to the Thomas Craven Film Corporation, of New York.

The sesquicentennial film will deal with the industry as a dynamic, growing business, with emphasis on the present and future rather than on historical events.

Awarded following competitive presentations, the film has a nationwide shooting schedule that is presently under development by the project production manager at Craven, Willis F. Briley. •

**Ushijima Back from Scotland With Scenes for Walker Film**

☆ Film producer Henry Ushijima, head of Ushijima Films, Park Ridge, Ill. has completed shooting abroad of a new Hiram Walker-sponsored color motion picture, *Heritage of Thornes*. His film sequences cover 3,300 miles of Scotland's highlands, lowlands, central section, Outer Hebrides and Shetland Islands. •

**FORTUNE'S FILM PROGRAM:**  
(CONTINUED FROM THE PRECEDING PAGE 35)  
siderably less. Walter Lowendahl, now at Dynamic Films, has produced most of our films and we are very grateful for his careful cost-watching.

Techniques vary: Fortune Films have used either live action or animation or a combination of the two. The treatment depends upon what we feel the subject requires.

Films are shot either in color or black and white, again as we think best to fill individual requirements. We shoot on a variety of Eastman Kodak professional films. Release prints are made on 16mm Kodak print films. The distributor is in a position to make a profit on release prints. So could we, if we chose to market the films ourselves, but here too, we defer because our pay-off lies in image building, not in film sales.

**Reader Reaction a Key to Film Interest**

Whatever its treatment, or its subject, each of the Fortune Films come basically right from the pages of Fortune Magazine. Each of our films is a cinematic treatment of an article which has proven unusually successful in the magazine. Whenever we get a big reader reaction from a piece, whenever executives begin writing in requesting lots of reprints of a certain article for "distribution to all my salesmen and executives," we know that we have the basis of a potential movie.

One reason that Fortune Magazine is willing to go into the movie format is that we believe that there are many cases where films can add an enormous additional dimension to the written word.

For instance, I think that it is contrary to the facts of modern business life to distribute copies of documents and require everyone on the distribution list to read them. If a discussion meeting is held later to compare notes and ferret out ideas based on the original documents, you are apt to find a surprising lack of group response.

However, if you can bring that same group together to view a motion picture, and have a discussion afterwards, the chances for stimulating thinking, based on immediate impact, are much greater. Then too, everybody sees who is in the audience, and the opportunity for creating further discussion between participants at some future time is a lot better.

**Gratifying Response from Industry Leaders**

Response to the various Fortune films has been very gratifying to us because so much of it is from the very top management executives that the magazine attempts to reach. Edgar Monsanto Queeny, Chairman of the Board of Monsanto Chemical Company, saw one showing of *The Big Change in World Markets* and promptly requested a print to show to his executive committee and board of directors. It was, he reported, the best film he had ever seen to encourage business thinking on an international scale.

The president of Dictaphone Corporation requested a print of *The Salesman Isn't Dead — He's Different* to highlight his annual outing for his top hundred salesmen.

After having presented *Opportunities Un-*

limited to his management, the marketing director of the American Steel and Wire Division of U.S. Steel enthused: "Six months ago our people are still talking about the concepts outlined in this film. It has been able in molding the marketing and production thinking in our organization."

All of this is by way of saying that as long as we have some business executives who stimulate, Fortune Films will be in for a long run at industry's box office.

**BRIEF PREVIEWS OF FORTUNE FILMS**

**"The Salesman Isn't Dead — He's Different"**  
16mm, b&w, 21 minutes.

• This motion picture is based on the Fortune Magazine article of the same title; it was produced with the cooperation of IBM. A complete lack of platitudes, the picture shows what today's successful salesman does and how he does it; the responsibilities involved and the benefits he derives. The change in image from stereotyped characterizations of the salesman to the modern representative of his profession will be recognized and accepted by present and potential sales personnel. In a use is suggested in showings to other management people of the modern concept of salesmanship at work. Prints may be purchased at \$125 from Dynamic Films, 405 Park Avenue, New York, New York 10022. Short term loan to firms, trade groups, etc. by Fortune Films.

**"The Computer Comes to Marketing"**  
b&w, 30 minutes.

• This film is also based on various Fortune articles and was made with the cooperation of Ernst & Ernst. The magazine said: "probably the most excited band of men in U. S. today is that still relatively small group of marketing men who are discovering that computers can work wonders in helping solve many of the problems in marketing and distribution. This film provides a provocative insight into the successful computer applications in the wide range of marketing. \$125 per print; contact Fortune Films for either purchase or loan."

**"The Big Change in World Markets"**  
color, 30 minutes.

• This film was made with the cooperation of the First National City Bank of New York. The bank's descriptive folder says "This film is a travelog, but an exciting world tour for interested businessmen how and why things are different overseas today. The picture opens with animation sequences to show how Europe has changed its post-war comeback and the effect this has on world trade. Then, in live-action color, the viewer sees what is now going on in Europe: the emerging, growing, middle-income, group of countries, the new ways of doing things in industry, agriculture, in construction and in marketing. The film also visits Latin America, Africa and Asia. \$125 per print; contact Fortune Films for either purchase or short term free loan arrangement."

**"The Salesman,"** 16mm, b&w, 9 minutes.

• This very funny, short film is a sure crowd pleaser. It shows one character's reaction to a typical convention sales harangue. The flaw is that audience laughter is so long that people miss part of the narration. The picture is also a gem. The picture provides some wit and broad, unabashed humor to allay the tedium of spots during any kind of company meeting. \$125 per print; contact Fortune Films for purchase or short term free loan.

### George Chappell Is Appointed Senior Art Director at Niles

George S. Chappell, III, former art director with major Chicago-based advertising agencies, has been named senior art director (a newly-created post) at Fred A. Niles Communications Centers, Inc.

He will work in liaison with art directors of various agencies who

George S. Chappell III

place TV commercial business with Niles, seeing that art concepts are implemented during actual production. In addition, Chappell will advise on slidefilm art, film titling and experimental films as well as taking a hand in the art direction of the national communications company's advertising.

Chappell was associated with both Waldie & Briggs Advertising and the Fulton, Morrissey Company where he was art director. He holds a masters degree from the Yale University School of Art and Architecture.

### Joseph Keaney to Sales Staff at Audio Productions, Inc.

Joseph P. Keaney has joined the sales department at Audio Productions, Inc. He was formerly active in film sales for leading producers in the Philadelphia metropolitan area.

### Stewart Garner Named Manager of Western Office of WCD, Inc.

Stewart Garner has been appointed manager of the West Coast branch of WCD, Inc., in Los Angeles.

Mr. Garner has long been an advertising agency producer of TV commercials and advertising films for BBDO, Lambert & Fealey and Foote, Cone & Belding.

### Gene Hennessey is Managing Director at Filmvideo Releasing Corp.

Gene Hennessey, former managing director of Filmvideo Releasing Corporation, of New York, has been named as managing director of the company in 1963. He was previously an independent television producer-director and a staff producer at Ogilvy, Benson & Mather.

Filmvideo Releasing Corporation is a major supplier of picture stock footage for advertising agencies, television networks and film studios. The corporation also produces and syndicates its own television programs.

### ColorTran Appoints Charles Lipow as Head of Advertising

Charles Lipow has been named director of advertising and public relations for ColorTran Industries, according to Milton Forman, executive director of the film production lighting company. Forman is affiliating with ColorTran. Lipow was associated with Birm & Meyer Cine Equipment Company in Los Angeles and The Cameo Company, Inc., F&B Cecco, of New York City.

The company is now located at a new headquarters building, 1015 Chestnut in Burbank, California.

## Storyboard Pad and Template Offered by Bebell & Bebell

☆ A StoryBoard Pad and a trans-  
 parent Film Template for the crea-  
 tion and production of Frameless  
 Continuous Flow Horizontal Film-  
 strips for use on DuKane VistaSell  
 projectors and for full aperture of  
 Powerhouse and Gold Plate pro-  
 jectors are now being offered by  
 Bebell & Bebell Color Labora-  
 tories, Inc., New York.

The StoryBoard Pads are pre-  
 cision-scaled, show accurate crop-  
 ping for both picture and type and  
 centering lines useful for story con-  
 ferences as well as detailed in-  
 structions for artwork and head-  
 lines, captions, and text matter.  
 The transparent Film Template is  
 correctly scaled, with cropping  
 lines for picture and type for the  
 most commonly-used transparency  
 sizes.

Either, or both, the StoryBoard  
 Pads and the Film Templates may  
 be obtained by writing on a com-  
 pany letterhead to Norman Bebell,  
 president of the lab. Because both  
 items are comparatively expensive  
 to produce their availability is  
 limited to those companies or per-  
 sons who actually intend to use  
 them. Bebell & Bebell is at 108  
 W. 24th St., New York City  
 10011.

### "Studio City" Complex Under Construction in Miami Area

A multi-million dollar film and TV production center, Studio City, is being built in North Miami, Florida. Located across Biscayne Blvd. from the North Miami entrance to Interama, the project was undertaken by industrial developer Dave Brady.

The first sound stage will be completed by late November; the first building on the 55-acre complex (for set construction) was scheduled for completion in late August.

When finished, Studio City will have one large sound stage (350' x 150' x 50') and four smaller sound stages, each 160' x 125' x 40'. Each of these stages will have 35mm rear-projection facilities as well as "pits" 30' x 30' x 12' deep which can be used for "basement" or "first floor" shots or flooded for water sequences.

They will also have dividers to create half-size stage areas and will be self-contained, with their own offices, conference rooms, make-up, wardrobe and dressing rooms, showers and camera rooms. Equipment will also be acquired.

Sound recording studios will also be available as well as film

editing service facilities. A 650' "live" TV theater capable of holding the largest "spectaculars" both b&w and color will be adjacent to a motel, cafeteria, restaurant-lounge and large swimming pool. The pool will have a glass wall with tunnel for close-up shots.

Associated in this project are Ray Brady, am and Le Van Lincoln. Capital Labs, Inc. of Washington, D.C. are building a lab in the complex for processing b&w and color.

### L. & L. Film Services Starts Giant Special Effect Project

The largest multiple special effects optical project built by Oxberry Corporation, an East Coast studio has been acquired by L. & L. Film Services, Inc., of New York. The project incorporates three projection — main projector, aerial and beamsplitter. It is capable of blow-up and reduction exceeding 40 diameters — the equivalent of an animation studio stories high. The beamsplitter is capable of blowup and reduction to match the aerial head.

It will now be possible to insert simultaneously an insert zooming matte in the aerial. This means that L. & L. can do a zooming matte scene, as most mattes and individually correct for tilts in one pass through the camera.

The new L. & L. printers use lamp houses, one for background scene and matte and the other for insert. This makes it possible to compose all the elements of a scene and visually see in the camera viewer. It eliminates chance and guesswork that mattes will fit. The second lamp house provides the most efficient means of balancing light between various film elements even if individual densities are different.

The two lamp houses are more important with the increasing demand for color. Each lamp house has its own filter primary to allow for balancing the light between the various film elements.

Matte work that in the past would have required pre-shooting, or could not have been accepted because of unbalanced mattes, can now be done more efficiently on the new L. & L. Oxberry printer. Another advantage, according to proprietors Lippman, Irv Levine and Grodewald, of L. & L.'s "personal service."

Amateau

Recently returned from Paris where we had occasion to utilize the  
services for which you arranged the French translations. This  
consisted of four separate films, concerning our product lines and  
Canadian Subsidiary, and included fairly technical terminologies  
and translations.

These movies several times a day during the 20e Salon Inter-  
national de l'Aeronautique et de l'Espace (Paris Air Show) subjected your  
translations and the narrative which you edited and arranged for to a  
very rate and very critically technical audience. This included our  
customers, who are constantly working in Europe, our French  
customers, as well as the general public.

Especially pleased that your work received sincere plaudits from  
technically capable French speaking people in terms of your  
accuracy as well as the contemporary language which you se-  
lecting the technical and scientific aspects of our products.

Very specialized area of work and is certainly to be looked  
upon as such and critically by viewers and listeners. You should be  
praised and complimented with the results.

Sincerely,

*Stewart R. Bennion*

## F&B/Ceco Has the Aero Camera Mount for Helicopters

☆ Exclusive U. S., Canada, Latin-American distribution Aero-Vision anti-vibration helicopter camera mount has been required by F&B/Ceco. This unique apparatus has been successfully used in Japan NHK-TV network.

Five patented Aero-Vision features are said to provide 100 per cent picture steadiness, freedom from vibration, even using long focal length lens equipment illustrated (see page 10) is equipped for the 16mm with mounted 400-ft. mag and 12-120mm zoom lens.

Base disc of the unit is carried by three sets of friction-damped inertia wheels; main shaft is held axial slide bearings and the axis of the head is hung by a coil spring.

Unit weighs 120 lbs and is mounted inside any of the helicopters. Data and equipment (available for both rental and purchase) from F&B/Ceco, Inc., 3143rd St., New York, N. Y. or any of the company's branch offices.

**DRUG INDUSTRY ON WORLD SCENE:**

(CONTINUED FROM THE PRECEDING PAGE 33)

long run they tend to balance out and provide a plus margin more often than not.

How are we competing? We are competing successfully, I believe, because the sum of American drug industry skills — skills in research, in development, in production and in marketing — are impressive indeed. We have shown that we can operate internationally in a number of ways — by exporting bulk materials, by exporting finished or semi-finished pharmaceuticals, by granting licenses to overseas dealers or companies, by operating in other countries with partially or wholly owned subsidiaries, and by joint ventures of various kinds. We have been able to do this in lands with widely varying social, economic and political conditions.

**America Has Strong Marketing Skills**

Our American marketing skills are, in total, superior to those of most international competitors. We can utilize them to advantage in an overseas affiliate, especially where the precision of our production technology, market research and quality control are important. U.S. drug products, imported or produced locally by a U.S. subsidiary, are often preferred by the local physician because of his confidence in their purity, safety, efficacy and stability.

Another strong point is extensive hiring of nationals. Abbott, for example, from the manager to the janitors, hires only nationals, never keeps Americans overseas as permanent employees. Such a policy tends to win local good will, reduces criticism of American business and people. Furthermore, it is good business since nationals are most familiar with their own country's customs, traditions, laws and, yes, foibles. Thus many a pitfall can be avoided.

A local subsidiary well integrated into a nation's economy is more apt to be regarded favorably by local officials. Sometimes local manufacturing is a matter of national prestige. The local government prefers the modern drugs of our time produced within its own borders. And some countries simply do not have the dollar exchange available for drugs with even high import priority.

**Meeting Medical Fashions Overseas**

There are other advantages to local control. For example, each country has its own specifications on labeling. What is correct in one land may be illegal in another. It is easier to conform to local regulations on the ground than from some distant headquarters.

It is easier, also, to adjust to local customs. For while medical needs are basically the same everywhere, medical fashion can and does vary considerably. In some countries people think medicine must taste bad to be good, or, as in Latin America, that injections are superior to oral medication. The concept of pharmaceutical elegance has been accepted in America and it is part of the know-how being spread by American drug firms. This will be to our advantage as more sophisticated views on health come to the forefront.

It should be emphasized that each operating (CONCLUDED ON THE FOLLOWING PAGE 68)

## DRUG INDUSTRY ON WORLD SCENE:

(CONTINUED FROM THE PRECEDING PAGE 671)

subsidiary faces exactly the same problems as a separate company, and in each country it must cope with situations that differ from those of any other country. Such diversity and complexity call for know-how of a wide range of specialists, backed up by experienced staff and operating personnel at headquarters.

The joint venture may be more controversial as a means of operating overseas. Much depends on the individual country's laws. Some simply deter sound investment and provide no tangible benefits to the U.S. partner. In other countries, joint ventures may offer distinct marketing advantages and better tax and tariff protection. Each venture must be decided on its own merits.

### Trends . . . and Problems of the Industry

Now to some current trends and problems. Under the U.S. 1962 Drug Amendments, it is more expensive and it takes much longer to bring a drug from early evaluation to market clearance. Consequently, companies are looking abroad and are beginning with research itself. Because of the regulatory climate, because of the importance of overseas markets, and because more scientists are being trained than in the early postwar years, we can expect to see a steady increase of overseas research efforts, at least in the more advanced countries of Western Europe.

Perhaps more significant than laboratory programs is the stepping up of clinical studies overseas. Here cost is a factor, but more important is the shortage of highly qualified investigators in the United States. Thus worldwide sources are being tapped. Another reason is that the United States holds no monopoly on scientific and medical talent. It is one reason, for example, why Abbott maintains some 1,000 formal contacts and many more informal ones with all kinds of research centers around the globe.

### Clinical Trials of New Drugs Abroad

The third facet of this trend is the actual introduction of American drugs in overseas markets prior to their entry into the U.S. market. To the extent that these drugs are accepted, our overseas operations benefit earlier than they would otherwise. We can expect to see more clinical trials and market introductions abroad.

Another trend that could be helpful to our industry is the regional grouping of nations on such matters as common patent and registration policies. This is now being done, for example, in the four Scandinavian countries and in Central America. Such regional efforts won't have the impact of total common mar-

kets, but any easing of restrictive barriers will be good for all international business.

Within the European Common Market itself, we may eventually have common drug regulations, so that pre-clearance procedures, for example, would be identical throughout the market. A Common Market would also ease other problems and perhaps make it more feasible for each company to serve all member countries from one plant.

### Drug Inquiries Continue from Abroad

A trend that has prevailed in recent years is the legislative one of delving into the operations of the drug industry in many lands. Thus we can look forward shortly to a major inquiry into the British drug industry by a special committee of the House of Commons. Affiliates of subsidiaries of American firms handle perhaps 35 per cent of the drug business in Britain, so our interest in this pending inquiry is no small matter.

Previous committees have given the industry good marks in serving the National Health Service and in aiding Britain's trade balance. Nevertheless, there is some possibility that drugs may be made scapegoats for the rising costs of the National Health Service and also that negative publicity could cross both the channel and the ocean.

The attacks on patent systems as they affect drugs represent a trend that cannot be taken lightly. This is a rather curious phenomenon that keeps cropping up in various corners of the world. There seems to be a sort of quixotic belief that the erasure of drug patents will automatically bring lower prices and drugs in greater quantity for large populations.

Actually, there are many men in science, as well as in government, who believe that the elimination of drug patents would reduce if not destroy the incentive for new discoveries. Italy is a classic example. It has long refused to grant drug patents. While Italian scientists have contributed notably to the progress of such related fields as chemicals — where patents exist — they have not made a single significant discovery in the drug field in 25 years.

### Overseas Pirating of Patented Drugs

Obviously lacking these scientific breakthroughs, a few Italian producers have turned to pirating the tetracyclines and other U.S. patented drugs from American patent holders, and an agency of our own government has been an accomplice after the fact by purchasing these drugs. The quickest and easiest way to open the floodgates to the pirating of intellectual property is to dynamite the patent systems of the world.

Nevertheless, proposals that would erode patent systems have sprung up in such varied countries as Canada, India, Belgium, The Philippines, Colombia, Brazil, England and South Africa. Some go as far as to encourage the importation of pirated products. Most of them see magic in extreme forms of compulsory licensing. All of these proposals pay little attention to equitable treatment of the patent holder and in the final analysis do not

show much concern for the ultimate of the patient.

It is encouraging that despite pressure to scrap or dilute patent protection on drug lines is so far being generally held. Patent protection in various forms prevails in many countries, in part because efforts of the industry to preserve these valuable systems have been effective. There should be no realization on the part of all industry that an attack on drug patents is really an attack on all patents. We would welcome a wide discussion about such a basic bastion of private enterprise.

### Climate for Progress in Other Nations

Another always continuing problem is the form and practice of the government in our diverse markets. If developing nations trend toward communism or extreme nationalism, the climate for progress will be less divergent, or impossible.

On the other hand, we are accused of dealing with countries which have various degrees of socialized medicine, but where the physician generally has freedom in prescribing drugs. We are also used to various forms of price control offshore.

We probably do best in those countries that encourage private enterprise, but wherever we operate, we must essentially be good neighbors, contributing to economic growth and better medical care.

In looking beyond such problems, the salient point remains: we have invested successfully overseas and our sales and earnings are growing. Our confidence is reflected, for example, in the rise of net assets abroad. In a few selected companies, just since 1960, net overseas assets of Eli Lilly have risen from \$14.7 to \$31.6 millions, of Merck from \$8.5 to \$95.1 millions, of Schering from \$14.4 to \$35.1 millions, of Upjohn from \$17.4 to \$27.0 millions, and of Abbott Laboratories from \$27.0 to \$43.9 millions.

### Land of Promise for Our Products

Where are the best offshore markets for American companies likely to be in the next 10 years? Perhaps the most promising is Latin America, where U.S. companies are likely to do well. Venezuela, Chile, Colombia, Peru, Brazil, and Argentina. We foresee growth in the Mediterranean area, especially in Spain, Turkey and Greece. Africa should be best in Southern Rhodesia, Algeria, Egypt, Ghana and the Union of South Africa.

While we will advance in continental Europe, we have especially strong competition from the old, established giants, especially in France and Italy. In Asia we are making steady gains in Taiwan, Malaysia, The Philippines and Pakistan. Japan, of course, will remain a major market. Finally, we should continue to do well in Canada, Britain and Australia, where we have well-established companies.

We are consciously and deeply engaged in world markets. We believe this is an important road to expansion of our industry that it can better serve the health needs of the economy of our own country as well as peoples throughout the earth.

# HUMBLE OIL TEAMS WITH GOVERNMENT TO SHOW AMERICANS THEIR

Our wild rivers, one of the nation's most important natural resources, is the exciting subject of a 28-minute color film produced by Humble Oil & Refining Company in cooperation with the Department of the Interior and with the technical assistance of the Department of Agriculture. WILD RIVERS represents a joint effort of industry and government to bring home the importance of conservation through the effective medium of educational audio-visual entertainment.

Millions of Americans will see WILD RIVERS because Modern distributes the film as a part of Humble's extensive and resultful film program. This new film shows that there is more than one way to make a successful sponsored film, and nobody knows how better than Humble.

Knowledgeable sponsorship, production and distribution are the keys to success in film communications. WILD RIVERS, produced by Larry Madison Productions, was premiered in June, and it's off to a running start through Modern's national network of community film libraries.

# CAN CLOSING START BEFORE A CALL IS MADE?

Yes! Even before a salesman enters a prospect's office, the sale should be made mentally. This color film-strip shows how to accomplish this; how to plan in advance of the interview. It's one of a powerful series.

## "Closing the Sale"

demonstrates how to make presentations that keep an eye on closing . . . from the moment of the opening. It provides examples of how to pursue the order . . . how to counteract a refusal to sign . . . and how to resume or continue selling when the prospect appears to have ended the interview.

## "SELLING IS MENTAL"

offers six sales training filmstrips oriented on the attitudes and techniques of dealing with people . . . to reduce your problems in training.

**'66 National A-V Convention in Washington D. C. Next July**

For the first time in more than a quarter century of its history, the National Audio-Visual Association has scheduled its national convention and trade show in a city other than Chicago. The 27th NAVA Convention and Exhibit will take place July 16-19, 1966 at the new Washington Hilton Hotel in Washington, D. C.

In making the announcement, NAVA president Eloise E. Keefe explained that the organization hopes to accomplish a two-fold objective in its move to the nation's capital city:

"First of all, we look forward to enjoying the magnificent facilities of the recently-completed Washington Hilton, which makes possible the housing of our entire Convention program and the extensive NAVA Exhibit all on one floor.

"But, more important, the move to Washington will bring our industry into closer contact with the government agencies now playing an increasingly important role in the direction of American education and training programs."

The National Audio-Visual Exhibit is also expected to assume greater industry significance with

the move eastward. It now becomes a unique showcase of a-v equipment and materials for military and government personnel headquartered in Washington.

**Modern Completes Major Move of Headquarters in New York**

The big move of its New York headquarters facilities by Modern Talking Picture Service was completed in early September. The international film distribution company now occupies the entire 20th and 21st floors of the new 24-story office building at 1212 Avenue of the Americas. The company's New York City film library has also relocated on the ground floor of the same building.

The major expansion provides Modern with 60% more headquarters space than it had occupied at 3 East 54th Street. One company executive summed it up as — "probably the largest integrated area of office space devoted to business films anywhere."

In addition, the Avenue of Americas' quarters houses Modern's data processing center, sales staff, promotion department, gen-

eral administrative personnel and the educational films division, Modern Learning Aids.

The company's film library in Summit, New Jersey, which serves part of the metropolitan New York area, is not affected. Modern also maintains a printing and mailing department at another Manhattan address. The company now operates 32 film libraries in the United States and Canada and is an affiliate of Inforfilm, an association of sponsored film distribution companies in 14 major world areas.

28 years ago this far-flung network was founded. It then occupied 1,000 square feet of space in Rockefeller Center, just a half-block from Modern's new headquarters.

**National Safety Congress to Honor Winners of Film Awards**

Winners of the 1965 Safety Film Contest, conducted by the National Committee on Films for Safety, will be honored during the National Safety Congress, opening in Chicago on October 25th.

Vice President Hubert H. Humphrey is scheduled to address

one of the Congress sessions. "The Federal Government's Role in Occupational Safety" on Wednesday, October 27, in the Congress Hotel. The Congress is bringing some 12,000 specialists in all fields of safety education to Chicago during its four-day program. They will attend meetings in seven hotels.

**Ninth Annual San Francisco Film Festival Opens Oct. 21**

Two major changes have taken place at San Francisco's city's Ninth Annual International Film Festival moves toward opening day, October 21st, at the Masonic Auditorium on Nob Hill. This year, the Festival has been sponsored by the Greater San Francisco Chamber of Commerce and, secondly, major motion pictures (entertainment film) will be shown non-competitively.

Although this event is primarily concerned with the artistic and cultural aspects of cinema exhibition, especially for theatrical and television release, important attention is given to 16mm competition among institutional, commercial and educational films.

tries in its "Film as Communications" category.

Prizes will be awarded in seven groups. At last report, there were nearly 300 entries for "Film as Communications" honors.

There is also 16mm competition among "experimental or interpretative films" which are shown in the "Film as Art" category. Prizes are awarded to the best and to honorable mention films. All these entries will be shown October 17 through the 21st at The Movie, 1034 Kearny Street, San Francisco.

Richard Fowler, of Vista Productions, heads the non-theatrical division of the San Francisco International Film Festival. •

#### **A-V Institute for Training Directors Opens October 24th**

☆ A second annual audio-visual institute for industrial training directors and military instructors will be held October 24-29 at Indiana University, Bloomington, Indiana. The five-day workshop is jointly sponsored by the American Society for Training and Development (ASTD) and the National Audio-Visual Association (NAVA) in cooperation with the

Audio-Visual Center of Indiana University.

The institute curriculum includes periods and demonstrations on graphics, slides and filmstrips, sound recordings and motion pictures. Among the principals involved are Harvey Frye, Indiana University, who will direct the workshop on "Graphic Preparation of Training Materials" and Howard Turner, DuKane Corporation, in charge of the workshop session on "Production of Slides and Filmstrips" and "Production of Sound for Use with Visuals." James J. Graven, Bell & Howell, will direct the seminar on "Motion Pictures — Why Film!"

Information on the program may be obtained from Gordon Bliss, executive director, American Society for Training & Development, P. O. Box 5307, Madison, Wis. 53705. •

#### **Kodak Plans Major Addition to Film Manufacturing Plants**

☆ A multi-million dollar addition to its film manufacturing facilities has been announced by the Eastman Kodak Company. A new

three-story building with 185,600 square feet of floor space will be erected at Kodak Park Works, northwest of Rochester, N. Y. The building is scheduled for completion in late 1967. The structure will be designed to house spooling, inspection and packaging operations on roll film for use in Kodapak cartridges. Finishing operations on other amateur roll films will remain in their present location in Kodak Park East.

Kodak Park, which was laid out in 1891 on a 16-acre site, now has more than 140 buildings on 1,300 acres. The plant employs over 20,000 persons. •

\* \* \*

#### **Festival of Forestry Films Invites Entries by Nov. 1st**

☆ An International Festival of Forestry Films will be held later this year at Madrid, Spain, during the Sixth World Forestry Congress. U. S. entries for this unique event, which includes *only films relating to forestry and forest products*, are being cleared through the Division of Foreign Forestry, U. S. Department of Agriculture Forest

Service, Washington, D.C. The deadline for entries is November 1, 1965.

The Forest Service notes that entries should be accompanied by (a) title of the film; (b) category, whether *instructional or recreational* in content; (c) the name of the producer and date of production; (d) name of sponsor, if involved; (e) names of writer, director and cameraman; (f) length and whether in color or black and white; (g) size, 16mm or 35mm; and (h) a brief statement of purpose. Entries must not exceed 75 words.

Prints are not to be submitted with this entry information. Entries will be advised where and when to submit films for judging. Instructional films containing advertising are not accepted. Purely entertainment films will not be accepted. •

tures and filmstrips in 35 subject-area categories ranging through Art and Culture; Business, Industry and Public Relations; Education and Information; Health, Safety and Medicine; and Religion and Ethics.

Entries must be filed with the association's headquarters in New York City by midnight, January 27, 1966. All 16mm films and 35mm filmstrips released in the United States during the current year (1965) are eligible for competition. Last year's event attracted a total of 750 films and filmstrips.

Entry blanks may be obtained from EFLA, 250 W. 57th St., New York, N.Y. 10019.

### Industry Leaders Elected to Columbus Film Council Board

One of America's pioneer film competitions, the Columbus Film Festival and its sponsor, The Film Council of Greater Columbus, Ohio, will be guided by a group of widely-known industry leaders during the coming year.

The Council has announced the membership of its new Board of Trustees, who met for the first time during the 13th Annual Festival on October 1st in that city. The new trustees are:

G. Roger Cahanev, executive vice-president, Sterling Movies U.S.A., Inc.; Dr. Edgar Dale, research associate of the Bureau of Educational Research and professor of education, The Ohio State University; Robert Finehout, vice-president, Association Films, Inc.; Dr. Alfred Garrett, vice-president for research at Ohio State; Carl Lenz, president, Modern Talking Picture Service, Inc.; Charles W. Vaughn, director, Communication

Arts Department, Xavier University; and Dr. Robert W. Wagner, director, Motion Picture Division, Photography Department, Ohio State.

### Leonard Quartin, Kalart Vice President, Named Director of Connecticut Export Expansion Council

The appointment of Leonard Quartin, executive vice-president of The Kalart Company, Finville, Conn., to the Connecticut Export Expansion Council has been announced by U. S. Secretary of Commerce John T. Connor.

In making the appointment on behalf of Secretary Connor, James E. Kelly, director of the Commerce Field Office in Hartford, Conn., noted:

"Mr. Quartin's extensive experience in the field of export trade will provide invaluable assistance to the many firms in the state who seek the Council's advice in developing overseas business."

### Sun Dial Films Completes Move to Larger Manhattan Quarters

Expanded studio and office space facilities are provided by the recent move of Sun Dial Films, Inc., a division of Carl Ragsdale Associates to new quarters at 330 E. 45th St. in New York City.

With more than twice its previous floor area, Sun Dial has installed a new Oxberry animating stand and has a permanent department at work on several animation projects. In addition, the facility on Manhattan's East 45th St. near the United Nations building houses editing, screening and conference facilities within its own walls.

According to Sun Dial president Carl Ragsdale, the headquarters and the company's Washington, D. C. branch office, provide the firm with facilities needed to handle an expanding volume of documentary and informational film.

## International Film & TV Festival of N.Y.

Program & Awards at Americana Hotel Begin on October 14

TELEVISION FILM personalities and project interests will hold the limelight when the privately-promoted International Film and TV Festival of New York gets underway on October 14 at the Americana Hotel in Manhattan. Headliners on the two-day program of discussions and award presentation include George Heineman, manager of public affairs for the National Broadcasting Company, and Milton Robertson, director of radio, television and films for the National Tuberculosis Association.

They will be joined in a symposium on "The 60-Second Public Service TV Spot Film" by Anram Nowak, president of Nowak Associates, on Thursday afternoon, October 14. The following afternoon, another symposium, "New Possibilities in U.H.F.," will bring Edwin Cooperstein, president of Channel 47; Rene Anselmo, executive vice-president, Spanish International Network and Seymour N. Siegel, director, Municipal Broadcasting System, to the podium for short talks on this subject.

### Ganz Reviews Film Progress

The program will open on Thursday morning with an important address by film veteran William J. Ganz, president, Institute of Visual Communication, Inc., who will review "The Projected Image of Public Relations Films" from "caveman to camera — from Genesis to Gemeni." His decades of experience in the field are expected to lend great interest to this presentation.

Other film talks include Steve Krantz' on "Producing for Fun or Profit Overseas?" and a discussion of "The Film as a Tool in Inter-

William L. Cooper, Jr., director of film programs at WPIX-TV, N. Y.

George Heineman, manager of public affairs at NBC, will be speaking at International Festival of N.Y.

national Understanding" presented by Victor Kayfetz, president, Swedish Film Center, and a discussion of "The Art and Science of Creativity in Advertising."

There will be a "fresh air" long-dormant 3-dimensional projection as "3-D Films and Glasses" are demonstrated by Dimension International Corporation at 4:00 p.m. on October 14.

Friday's program turns to the television film field with a morning program, "Nobel Prize But Us Experts," which will feature a panel discussion on the "rise of a new generation of artists and copy writers as a growing force for the television commercial." Eli Feldman, president of Focus Presentations, Inc., will talk on this subject. He will be followed by Neil J. Tarant, creative supervisor at Young Rubicam advertising agency, talking about "The Agency Finks."

### Present Awards at Luncheon

Highlight of the two-day program is, of course, the awards presentation luncheon on Friday noon. William L. Cooper, Jr., director of film programs at WPIX-TV, will speak on "The Contribution to Documentaries by Mounting Costs," and share in pre-awards events at the luncheon. Another speaker, Tompkins, program director for the Television Stations, who will discuss "The Action Isn't — a Challenge to Those in the Film Industry."

Master of ceremonies for the awards presentation luncheon is John Tillman, WPIX-TV. Guests will be entertained by Lee, song stylist and Rudy recording artist, Marlene Schaefer, former Miss Universe, will present the silver trophies to this year's winners.

## How do you measure quality in film transfers?

You know it when you see it! Your eye is our judge. That's why we demand perfection in clarity, definition and true grey scale. We get perfection by complete control. All of our work is done under one roof... a unique way of operating in our industry. And we feel the results are worth it. So do our clients—companies like AMERICAN MOTORS, MGM-TELESTUDIOS, MCA-TV, HEATH DEFUCHILMONT, even AMPLEX. Their names tell you a lot about our standards. But there's a better way to find out. Try us. We offer "in by 9—out by 5" processing—with your transfer jetting back the same night. And optimum quality is guaranteed (backed by two decades of expert Hollywood technology). If you believe your eyes call Acme Film Laboratories, Inc., Hollywood, 1161 North Highland Avenue, HO 4-7471; New York, 100 Madison Avenue, HA 1-3400.

Acme Film Transfers

### FESTIVAL IN NEW YORK :

(CONTINUED FROM PAGE TEN) winners of the Festival Awards.

The two-day registration fee, which includes the awards luncheon, is \$30; the luncheon charge only is \$10. Reservations are being accepted by the sponsors of the event, Industrial Exhibitions, Inc., 17 E. 45th St., New York City. Herbert Rosen has directed these events for the past five years.

#### James W. Davis, of Modern, Victim of Sailing Accident

✧ A sailing disaster on the stormy waters of Lake Michigan last August 28 cost the life of our good friend and industry executive James W. Davis, of the Chicago office of Modern Talking Picture Service. Only 36, Jim was participating in a night navigational race aboard the 26-foot sloop Lorelei.

The late James Davis

owned and skippered by Murray Morison of Murray Morison Productions, also of Chicago.

The vessel was last seen when it reached the quarter-point of the 66-mile course near the Indiana Harbor buoy. A storm came up later that night, with winds up to 40 knots raising mountainous waves and playing havoc with boats and crews. All hands aboard the Lorelei, including two other crew members, were lost. Davis' body was found floating in a lifejacket two miles off Dunes State Park on Sunday.

Jim is survived by his mother, Mrs. Mary Davis of Detroit, and two brothers. He will be remembered by hundreds of friends and business associates. Our field has suffered a grievous loss.

#### Industrial Ad Executives Hear Fraser Talk on Business Films

Thomas H. Fraser, president and creative director of Fraser Productions, San Francisco film company, discussed the "Three

Faces of the Commercial Film Producer" at the September meeting in that city of the Association of Industrial Advertisers.

His talk covered economic and editorial aspects of business and filmstrips for sales promotion, training, recruiting, publications and advertising. A highlight of the presentation was the view screening of the Fraser-produced *Film Film*, a 30-minute anthology of communication techniques. More than a demonstration reel, *Film Film* is a special production with its own narration and story.

#### Brooks, FilmFair to Present Vocational Educational

✧ The Brooks Foundation, Santa Barbara, California, is conducting a ten-month research and development project, involving a series of motion pictures which illustrate the new Federal programs in vocational education, on behalf of the Division of Vocational Education, U.S. Office of Education. Research studies in data dissemination also included in the project.

The films are being produced by the Foundation with the FilmFair Communications and will be shown nationwide in school, business and parent groups via television and 16mm audiences.

Five films are contemplated including one 30-minute picture dramatize education opportunities available to youth and a Four shorter films will describe specific programs available through the Vocational Education Act.

#### POSITION AVAILABLE! AUDIO-VISUAL TECHNICIAN

One of the nation's largest and chemical companies, headquartered in Chicago, has excellent opening for an Audio-Visual Technician.

Must be able to take b&w and stills and silent motion pictures, handle tape and disc recording, create and maintain usual variety audio-visual equipment and have good sense of showmanship. Duties include producing and traveling with audio-visual presentations, co-operation with leading food counts.

Right man will be considered for future position as Audio-Visual Director. College graduate, 25 to 30 years old preferred. Send resume and expected salary range to:

**Honor Winners of Overseas Festival Award**

Cine Holds Annual Exhibition in Washington November 14th

WINNERS of 1965 Awards at international film festivals and of "Golden Eagles" given U.S. motion pictures selected for these overseas events will be honored in Washington, D.C. on November 10, when The Council of International Nontheatrical Events holds its annual Exhibition and Awards Presentation.

The principal awards ceremonies will be held on the evening of that day in the auditorium of the National Education Association. It will be preceded by a dinner in the NEA dining room for awards recipients and will be followed by a reception at 10:30 p.m. at the nearby Gramerey Inn.

The day's events will begin with a luncheon hosted by the Washington Film Council which will honor the Golden Eagle winners. On that afternoon, at 2:00 p.m., an exhibition of award-winning films will be held in the NEA auditorium. There is no charge for admission to this event but the evening affair (limited to two persons per film) is formal (black tie) and the cost is \$7.50 per plate. Tickets to the evening awards presentation are also limited because of the accommodations for awardees but are available without charge, providing requests are in the CINE office by November 3rd.

The Council on Nontheatrical Events handles the entering and dispatch of nearly all U.S. documentary, business-sponsored, television and theatrical short subjects going to principal overseas festivals each year. A non-profit organization, CINE, is headed by Willis H. Pratt, Jr., American Telephone & Telegraph Co., as president. Reid H. Ray, president of the midwest film company bearing his name, is chairman of the 1965 Exhibition and Awards program. All requests and reservations for these events should be directed to CINE'S Washington headquarters, 1201 Sixteenth St., N.W., Washington, D.C. 20036. •

Twin Cities' new Skyport

the new installation is the result of a growing chain of airports withaters being opened by Modern Talking Picture Service Inc.

In making the announcement William M. Oard, vice-president of Modern, noted:

"Negotiations are under way a half-dozen major metropolitan centers for the installation of similar services for airport passengers.

Studies by Modern show that airport passengers spend an average of one hour and five minutes viewing the free sponsored programs. 70% of the passengers spend a portion of their time watching programs.

**Newlywed Granduccis at Home to Friends in Virgin Islands**

**Modern Opens Skyport Theater at Twin Cities Int'l Terminal**

A free movie theater will serve waiting passengers and their friends at the Minneapolis-St. Paul International Airport after October 1st. Patterned after the highly-successful "free skyport cinema" in operation at the Greater Cincinnati Airport for the past year,

Capital Film Laboratories is coming to Miami, Florida, early next year.

Capital will become part of an increasingly important motion picture film production center that is developing in Miami.

The new Capital Film facility will be designed to serve the Florida-Caribbean-South American area.

Now the motion picture entertainment industry

—which will include the theatrical, commercial, and syndicated productions originating in the area — will have the professional services from one of the nation's top quality laboratories.

"On the scene" capability for overnight 35mm color service, combined with Capital's nationwide reputation for reliable, quality processing, gives Miami the professional "back up" needed to support its rapidly expanding motion picture industry.

**I**T WAS FESTIVAL NIGHT in Columbus, Ohio on that gala Friday evening, October 1st, when members of the Greater Columbus Film Council and their guests gathered at that city's Gallery of Fine Arts for the annual Chris Awards banquet which culminated the 13th Film Festival hosted by the organization.

The top award at Columbus is the symbolic Chris statuette and this year 13 of these were awarded in the five principal categories of the festival. With traditional generosity, fortified by the numerous entries from studios and sponsors throughout the U. S. and Canada, Columbus also bestowed more than 150 Certificate Awards on films accepted for showings.

Citizens of the "Athens of the Midwest" and surrounding counties saw the prize-winning festival films on Saturday and Sunday, October 2-3, in the auditorium of the Battelle Memorial Institute.

#### Best in Business & Industry

The winners of Chris statuettes as the best of their class for Business & Industry were: *Sunrise at Eastern*, produced by Audio Productions, Inc. for Eastern Air Lines (see B S #5, page 41) and a Wolper Productions film titled *And Away We Go*.

In the category of Special Fields, where five motion pictures received Chris statuettes, the American Telephone & Telegraph film, *Beyond All Barriers*, produced by Larry Madison Productions, led the list. Another Wolper production, *Four Days in November* (t.v. documentary); *Fifty Years of Floods*, produced by WBNS-TV; *Scott's Last Journey*, entered by Contemporary Films; and *Colonial Naturalist*, submitted by Colonial Williamsburg, were the other four statuette winners in this group.

#### Travel and Health Winners

Two travel films won top honors in this category. *The West Indies*, produced by William Deenen, Inc. and a Swissair-sponsored film, *Gifts of Winter*, received the statuettes.

The Health and Mental Health film category had six winners of Chris trophies, leading off with *For Children Because We Care*, produced by the U. S. Public Health Service Audiovisual Facility. *Point of View* won a "Chris" for Vision Associates and the Metropolitan Life Insurance Company also won with *The Time of Growing*. *Encircling Tascia*, submitted by Ohio State University,

## Statuettes to 13 at Columbus Film Festival

Over 150 Motion Pictures Receive Certificate Honors at 13th Annual Banquet of the Columbus Film Council

won the statuette, as did *Clinical Applanation Tonometry*, produced by Dynamic Films, Inc. The final winner in this group was *Children on the Move*, produced by Coronet Films.

#### Education-Information Pictures

The group of Educational-Information films had only two Chris statuette winners. Michael Birch & Associates received one of these for *The Sea*; Sterling Educational Films, Inc. won the other for *The Smallest Elephant in the World*.

In the field of Religion, a single Chris statuette was awarded to Cathedral Films for *The Guide*.

#### These Won Multiple Honors

Columbus could be sure of a large turn-out at its Awards Banquet by simply inviting all the recipients of its Certificate Awards. Too numerous to list in detail, some noteworthy "multiple" winners received four or more certificates. Among these, the Douglas Aircraft Company was cited for *The Many Faces of Mexico*, *Three Facets of Adventure*, *The Wind of Change* and *The Sleeping Giant*.

In addition to its Chris statuette, Audio Productions received certificate awards for *Jacoby*, *Before It's Too Late*, *The Invisible Power of Coal*, and *The Land — Legacy and Promise*.

#### Winners of Two or More Awards

Dynamic Films won in several groups, with certificates for *American Challenge* in Special Fields; *A Magazine Only a Homemaker Could Love*, in Business & Industry, as well as the "Chris" for its medical winner.

Four Henry Strauss & Company productions received certificate honors in the Business & Industry class. *Follow the Leader*, *Image*, *It's Always Now* and *A Matter of Balance* were the Strauss' winners.

The Jam Handy Organization had two award winners in Business

"America the Bountiful" icon Chris award for Jam Handy Organization.

& Industry; *America the Bountiful* and *The Pursuit of Profit* were cited in this group.

The National Safety Contest plaque winner, *Slips and Falls*, won a certificate award at Columbus for Parthenon Pictures, as did another Parthenon entry, *Muscles That Think*.

And Wilding, Inc. scored with two certificate awards in the Travel group, being cited for *Africa — Jet Safari* and *The Colors of Italy*; also taking home two more certificates in Business & Industry for *Light!* and *The World Next Door*.

Bailey Films, the Centron Corporation and Film Associates of California were other multiple award winners at this 13th annual gathering.

## Win Honors Abroad

CINE Reports on Awards from Venice and Edinburgh

**F**ACTUAL MOTION PICTURES produced and sponsored in the United States have been accorded numerous honors at various film festivals abroad within recent months. The films were entered through the Council on International Nontheatrical Events (CINE).

Top award at the Venice, Italy

"Sunrise at Eastern" won a Chris Statuette Award as one of two best films from Business & Industry. Scene (right) shows some charming recent graduates of Air Lines' school for training of stewardesses.

International Exhibition of Children (the Lion Mark) went to *The Searching Eye*, produced by Saul Bass. Awards for the Eastman Kodak Company's New York World's Fair Pavilion. The film also won CHDALC prize at the Venice International Documentary Festival.

A plaque of the Lion Mark at the Venice Documentary Festival was won by *Children Without*, produced by General Productions for the National Education Association, Washington, D. C. The St. Mark award for Children's event was given to *Snowy Day*, produced by Ton Woods Studio. *Children*, ACI Productions and *Children*, Million Teenagers, by General Films, also received plaques in that competition.

#### Edinburgh Honors Films

Programmed at the 15th Edinburgh Film Festival (to be given to an award, since this year was non-competitive) was *Children for the Fair*, produced by General Murphy Productions for the American Telephone and Telegraph.

*The Searching Eye* also received this honor as did the other five titles shown at Edinburgh. *Children*, by Eliot Noyes, Jr., Harvard University; *The Eyes of Jimmy Blue Eyes*, produced by Robert Clouse Associates; *Trail of the Iguana*, produced by Professional Film Services; *Seven Arts/MGM*; *The Heart With a Heart of Gold*, produced by Carson Davidson; and *in Wet*, produced by Groening.

A television documentary, *Out Men*, produced by General Productions and sponsored by 3M Company, won the Grand Premio Internazionale della Tecnica at the International Electronic and Teledocumentary Exhibition.

#### "The Sea" Won Golden Eagle

The Didactic Film Exhibition in Vicenza, Italy, brought home three 1964 Golden Eagle awards. *The Sea*, produced by Michael Birch for Encyclopaedia Britannica Films, won the Golden Eagle. *Discovering Line*, produced by Film Associates of California, won first prize in television; and *Communication Satellites?*, also produced by the same producer, won other first prize.

*The Sea* won a further award: the Cup of the President of the Ministry and Council of the Milan, Italy Maritime Documentary Film Review.

ARRIFLEX records retinal circulation via fluorescence cinematography technique

published in the Journal of Laboratory and Clinical Medicine, Vol. 68, No. 1, January 1967, and the Journal of the American Medical Association, Vol. 201, No. 12, December 1967. The author is Dr. Robert H. H. Howarth, M.D., of the Department of Medicine, University of Illinois at Chicago. The research was supported by the National Institutes of Health, Grant No. 5R01-00125-A-01.

The technique of fluorescence cinematography is a new method of recording retinal circulation. It is based on the principle of fluorescence and is the most sensitive method of recording retinal circulation. It is the only method of recording retinal circulation that is non-invasive and does not require the use of radioactive isotopes. It is the only method of recording retinal circulation that is portable and can be used in a laboratory or in a hospital. It is the only method of recording retinal circulation that is safe and does not require the use of any special equipment.

**Navy Film Making,  
Stein, Has Retired**

stein, has retired after 21 years in this field. He was a picture director at the Center (NMC) at California, at the date of his retirement, September 17th. He served in the Navy in the role of a combat photographer and after completing a training course with the motion picture unit in 1943 he was transferred to the Army Two Photo Lab at Fort Monmouth, New Jersey. In 1943 he joined

Stein (right) at Point  
with film editor Dan Milner.

combat photography unit  
led by the noted Edward

During his tour he saw duty on aircraft carriers USS Enterprise, Wasp and Yorktown. While on the Yorktown he flew a combat mission over the Japanese Base at Iwo Jima. While photographing the attack, Stein's plane was hit by anti-aircraft fire, causing a crash landing which earned him the Purple Heart. After the war, he headed the photo team covering atomic bomb tests in the Pacific.

In 1947, he helped plan the flight of Byrd's "Operation

Highjump" in the Antarctica and in 1951 took command of the Atlantic Mobile Photo Unit in Norfolk, Va. He retired at Norfolk in 1954 as a commander, due to his combat incurred injuries. He also wears the Navy Air Medal with three stars, the Distinguished Flying Cross, the Presidential Unit Citation with two stars and the Navy Unit Citation with one star.

**American TV Festival Seeks  
More Entries from Abroad**

☆ Enthusiasm by judges and festival audiences for entries from abroad in a special "International Category" this past year has encouraged operators of the American TV Commercials Festival to enlarge this category in 1966.

Festival Director Wallace Ross recently toured several European advertising centers where he met with trade groups that will coordinate entries from those areas. He was one of five international judges who appraised entries in the Third Annual Cork, Ireland, Festival of Television Commercials, in connection with that city's annual festival of the arts.

Afterward, he showed the 1965 American winners to London agencies, advertisers and production firms, and subsequently repeated the showings in Paris, Barcelona, Bologna, Frankfurt and Dusseldorf.

The International Category is judged independently of U.S. and Canadian entries in the American Festival. In 1965, advertising or broadcasting associations in some ten countries were invited to submit only ten entries apiece, of which a total of twenty were selected by festival judges for showing at the Waldorf-Astoria banquet last April 30th. Of this group, two were from Australia, five from France, five from Great Britain, one from West Germany, and four from Japan.

**AND WE'RE NOT TRYING TO BATTER YOU UP.** *Why are you big at CFI?* Because all our customers are big fish to us. No job is too small to warrant our earnest attention. Whether you're a budding producer or an epic film maker — from a spot commercial to a major motion production we give your job individual attention through every stage of its development. *Complete job?* At CFI we provide every service for you right in our own lab. *16mm or 35mm?* We process both in black and white or Eastmancolor. *Special effects? Opticals, titles, inserts, animation photography?* You name it, we do it. *Speedy service? Need dailies in the morning?* Our lab runs 'round the clock. *Quality?* At CFI, we have among the best facilities in the business. Sensitometry equipment insures your film proper color correction and exposure balance; exacting chemical control gives you consistent color balance and density. And because we do the entire job at CFI, our team of experts is supervising your job every step of the way. *Thinking of a filmstrip?* We furnish artwork, shoot 3-dimensional products, superimpose type or shoot your slides from 35mm through 8 x 10 direct into your filmstrip. Special lighting assures minimum contrast gain and our unique continuous-loop printing equipment delivers uniform filmstrip prints from scratch-free negatives. *How long for a top-flight filmstrip?* Well, one week is normal delivery with us. But we'll work with you to meet even tighter deadlines. All these CFI services are as near as your phone. Pick it up and tell us what you need. We'll try to give you those big fish answers.

THE EDITORIAL VIEWPOINT

## THE SPORTS PICTURE OF THE YEAR

**M**AJOR LEAGUE BASEBALL'S annual Series games have become one of the most challenging as well as satisfying production assignments in sports film making. Tight budgets, races, especially in the National League, and recent years, make location problems unpredictable; weather delays often hamper crews; lighting conditions run the full gamut of deep shadow to blinding sunlight.

In the years of Yankee mastery, the depths of their New York playing field often harder for the cameraman to "pinpoint" a rookie outfielder chasing a Mantle. Today's wider latitude in color films has been a real miracle in capturing the big, full picture of all the game action.

But the past is only prelude as the World's Series action got underway this month. The boss film man of both professional leagues, Lew Fonseca, again turned to Jack Lieb Productions (their fourth straight year) for the shooting of this annual sports classic.

The Lieb advance party could figure out a big new park between Minneapolis and St. Paul for the American League's role in the Series.

Now, long before the first pitch was thrown in the '65 Series' opener, camera equipment had to be checked in every detail; film materials and stock orders were set; crew guides and travel plans (figure four cities at a cost two later) required early airline reservations.

At every World Series' game, there will be at least five cameras operating at pre-located vantage spots; all will be equipped with telephoto and zoom lenses. Slow motion, a popular feature in past Series' films, will be emphasized and prepared for. Film that at least 35,000 feet of the right color would be on hand. Would it go four, five or the full seven games? You had to have matching stock for the maximum requirements. *Men, material, movement . . . then action.*

The veteran player-manager Fonseca demands excellence and the product deserves it. That's the ultimate reward for both producer and sponsor of a film package which premieres to initial audiences of the foremost sportswriters, earning columns of publicity to build subsequent booking interest. It was the film that nearly all League clubs carry into hundreds of winter banquet engagements, that the Series' winner and loser uses to satisfy thousands of regional fans as the games are replayed for months to come.

Last year's Series' film won critical acclaim for Lieb Productions' camera work, color especially, for capturing the spirit of the final victory.

And then there's the awesome fact that one motion picture, with nearly a thousand color prints in day and night circulation (CONTINUED ON THE FOLLOWING PAGE)

### "Human Investment Act" Proposes Tax Aid to Industry for Re-Training of Workers

U. S. Representative Thomas B. Curtis (R-Mo.) has introduced a Human Investment Act in Congress to deal with the critical problem of "structural unemployment." As he describes its purpose:

*"A large portion of our unemployment is not because of too few jobs, but because a large portion of our manpower is untrained in the skills that are actually at this moment in serious demand."*

His bill would complement the manpower training programs under government supervision by offering a 7 per cent tax credit to employers who train workers in new job skills. The credit parallels the 7 per cent allowance enacted three years ago to spur investment in machinery, plant and equipment. His position is well taken that "tax laws should treat humans as at least equal to machines."

By encouraging private industry's role in retraining, the bill involves the people who know best what skills are needed and how to get the greatest results for the money. We endorse his measure without reservation and hope that it gains the support of both parties for enactment.

## Labor & Management—Working in Harmony

Form East Coast Council on Motion Picture Production

LABOR AND MANAGEMENT of the motion picture industry in New York sat down together last month and came up with a new organization to help maintain the East Coast as a prime production center.

The new organization — the Labor Management Council on Motion Picture Production East Coast — to be called COMPEC — was formed by officials and representatives of the Film Producers Association, TV Series Alliance, advertising agencies, IATSE and non-IA production unions. It hopes to counter the increase of TV commercials and theatrical productions moving to the West Coast.

### Set Up a Panel for Disputes

IATSE and FPA have agreed, through COMPEC, to the establishment of machinery for uninterrupted studio and location shooting by immediate referral of labor-management differences to a Disputes Panel Board.

Steve D'Inzillo, IATSE East Coast Council and Business Agent of the Projectionists, who was elected Chairman, and Harold Klein, Executive Director of the FPA, elected Co-chairman, said they were confident that the film industry in New York could now function more smoothly than anywhere else in the nation.

### Major Step in the Industry

They felt that the joining together of unions and employers in COMPEC would some day be looked upon as one of the major advances in the history of labor-management relations in the motion picture industry. With the threat of work stoppages and lock-

outs virtually prohibited, New York can look forward to continuing as the leading motion picture production center in the country.

A prime objective of COMPEC will be labor management harmony and the development of more efficient production procedures. COMPEC will not confine its activity to labor relations but will strive to promote the film industry on the East Coast by promotion work with federal, state and local governments. In the near future, COMPEC hopes to obtain extensive publicity on the advantages of producing films in New York and its environs.

### Other Officers Are Named

Other officers of COMPEC, elected in a meeting at the Americana Hotel on September 22, are John Babb, Executive Vice President, F & B Ceo, Secretary; and John Francavilla, International Representative, IATSE, Treasurer.

The Disputes Panel Board will be composed of ten members. Five on the labor side of the table are: Jim Gartland, of the Studio Mechanics; Jay Rescher, of the Photographers; John Wall, Jr., of the Wardrobe Attendants; Tom O'Donnell, of the Teamsters; and Rudy Karnolt, of the Scenic Artists. Nox Lempert of the Screen Directors Guild will serve as alternate.

### Management Men on Board

Management members of the board are Robert Bergmann, Filmmex; Buzz Berger, Plautus Productions; Sandy Greenberg, MPO; Harold Klein, FPA; and Lou Mucchiolo, Gerald Productions. Sam Magdoll, Elektra, is an alternate member of the board.

Officers of the Labor/Management Council on Motion Picture Production (l to r): Steve D'Inzillo, co-chairman, John Francavilla, treasurer, Harold Klein, co-chairman, and John Babb, secretary of the East Coast organization.

**Your message  
printed here.  
In 10 seconds.  
55¢.**

You can put your message on a Polaroid Land transparency in 10 seconds for a mere 55¢. That's about 23 hours, 59 minutes, and 50 seconds faster, and 1 dollar less expensive than an ordinary slide.

All you do is load the film into the camera. Snap the shutter. 10 seconds later you have your transparency.

After a quick hardening just slip the slides into the snap-together plastic frames. And you're ready to go.

There are 2 different kinds of transparency film.

Polaroid PolaLine transparency film is designed especially for line copy work. The blacks are really black, the clear areas are extremely clear. That makes it ideal for charts, graphs, diagrams...anything set in type or drawn in pencil or ink. It develops

in only 10 seconds.

The other film is for continuous tone work. You make slides of pictures and objects with it in 2 minutes. You can even take a picture of someone in the audience. And a few minutes later show it on the screen. That's guaranteed to liven up the presentation.

Both kinds of slides fit any standard lantern slide projector. Both kinds of slides can be made with the many Polaroid Land cameras that accept Series 40 film, except for the J-66.

And both kinds of slides have terrific impact when they're projected. Just imagine how much more this ad would have impressed you if it had appeared 3 feet tall on your office wall.

ample of French industrial research films: "Lacq in France" is sponsored by Société Nationale des Pétroles d'Aquitaine produced by Cinetext.

and human relations films within companies has also made significant progress. But French film makers say it could be much better. They point to the films of Houillères Nationales (the National Coal Board) and of large banks who are now showing films to their staff and employee groups as well as to a broader public audience.

What's the problem, if any, in France? Large companies tend to

France's great super-sonic "Concorde" is previewed in a Sud-Aviation film produced by Société Objectifs, it was entered in "image" category at Rouen.

ing regular subjects on significant, timely themes instead of depending on the "big picture" to do the job!

A good example of a progres-

broad-minded concept of public relations film making is welcomed by the French film maker . . . mindful of the great pictures which have been turned out for Esso and Shell, as two noteworthy examples of enlightened sponsorship.

### Breaking a Theater Tradition

Combining recent strides in community audience development previously noted (via CEFILM and CEDFI) will help take sponsored films beyond the previous confines of theatrical showings and out to the people of France!

What the French call "witness-films" (film-temoignage) and the cinema verite, with its strong sense of the factual documentary style, are being influenced by television. These "techniques" appear to form an area of expansion in the year ahead.

France holds high hope for its super-sonic jet transport, The Concorde, and a film on that national project. *Le Concorde*, will be eagerly viewed at Rouen. It was produced by Société Objectifs. Modern industrial techniques will be presented in such films as *Acier Sans Fumée* (Steel Without Smoke), produced for the Compagnie des Ateliers et Forges de la Loire by Gaumont Industrie.

### Helicopters for Agriculture

Modern agricultural methods are reflected in *L'Agricoptre* (Agricultural Helicopter), sponsored by Sud-Aviation and produced by Société Objectifs. In the important field of employee training, *Les Analyses Cinématographiques* has

"Pompey Special Steels" is sponsored by Société des Ateliers de Pompey and was produced by Caravelle.

believe that public relations or "image" films are simply that . . . relating the "image" which they don't believe needs altering each year. They should, film people point out, maintain continuous relations with their publics, supply-

sive sponsor is the well-known pharmaceutical manufacturer, Sandoz, which has taken the lead in entrusting young and talented directors with rather important budgets for the production of films *without imposed themes*. This

"The Secretary" is a film for personnel training. It was sponsored by Institut Pédagogique National, produced by Les Analyses Cinématographiques.

## Report from France:

produced *Le Secretariat* (The Secretary) with the Institut Pédagogique National; *Ne le Prenez Pas à la Légère* (Don't Take It Easy), sponsored by Houilleries du Nord Pas de Calais and produced by Son et Lumière, has a top role in safety education.

Jury members at Rouen won't see *The Great Injustice*, a recent title dealing with the problems of youth in under-developed countries. France had its problems, too, with Festival category classifications and this excellent Cinesastes Associes' production was discarded as "not in the industrial film category."

### Industry Needs P/R Pictures

Summing up the outlook in France, there's a need for a "re-awakening" on the part of major industry to the potential of regular screen fare for "public relations." Less concern with the "image" and more attention to the interests and needs of the French people through the medium of useful, informational films would serve these sponsors well—especially with the development of a vast new national viewing audience in all provinces and via television.

France might also begin to think about international distribution of its outstanding sponsored pictures;

INFORFILM and film distribution companies in England, Germany, the United States and Canada (to name a few) could help expand overseas trade!

"Agricultural Helicopter" is a recent technical information film sponsored by Sud-Aviation and produced by Société Objectifs. A French entry for the Festival.

"Atomic Tilt"—a research film from the Commissariat à l'Énergie Atomique.

"Diesels 67-68" was sponsored and produced by French National Railways.

### Sir Peter Runge is elected British Industrial Film Association president

Sir Peter Runge, vice-president of Tate & Lyle Ltd. and a former past president of the Institution of British Industries, has been elected president of the British Industrial Film Association. The new president took office following the annual meeting of the group in London on September 10.

Sir Peter has been closely concerned with the activities of the Association in recent years. He was vice-president of the 5th International Industrial Film Festival at its meeting in London last year and served as president of the BIFA National Industrial Film Awards Ceremony held this past June.

The Earl of Drogheda, managing director of the F&W Trusts, The Earl of Halsbury, president of the Institution of Mechanical Engineers and R. E. Tritton, general manager, Public Relations, Information, British Iron and Steel Company, Ltd., were vice-presidents of BIFA. Tritton served as the chairman of the BIFA Council.

"Aluminum Weld" presents useful technical information for metal workers. Sponsored by L'Aluminium Français, produced by Les Films du Centre.

"Don't Take It Easy" is a safety education film sponsored by Houilleries du Nord-Pas de Calais. Produced by Son et Lumière—a French entry for the Festival.

# an Industry and the Film

ported by Our Correspondent, Dr. Hans Schaller

FILM conferences and provide a kind of "balance" for this very important industry public relations, educational programs, industry looks to the 1965 year, as it will be drawn in this month and where country's "best" films own. With applications for 50 pictures filed at have to use "quotes" "best" since only 15 of the 50 fine films could get the closing dates.

news from Rouen be disappointing? We note German contribution to international gathering is not or general criterion to measure total German production output, nor early selection required countries blocked the path for many new films. But position of German in production as we seen is not unfavorable.

**Approval Is Noted**  
of approval for the film medium has been in German industry. The step-ladder years has now become, to a large extent, a favorite example. It has become in a large and growing German companies, them worldwide enter- show company share- annual meetings the production, capacity for the level of research efforts via the film me-

not necessarily long productions, most often only representative of functional applications in German industry.

**of Industrial Film**  
"and" of the German industry might well be based on three important "pillars": modern mass medium; "representation" film.

technical information sales promotion film. They call the "representational" should include those projects with considerable budgets, self-limiting and most would not undertake efforts at less than two or three intervals.

include some notable

examples of recent date: *The Hot Peace* (sponsored by Badische Anilin- und Soda Fabrik); *Thrust Into the Unknown* (Esso AG); *The Third Factor* (a film dealing with scientific research and made by order of the Ministry of Science and Research in Bonn); *Rhythm of Our Time and Raisting* (two films of the German Federal Post Office); *Only Fog Is Grey* (Thyssen AG); *The Road to Mul-tan* (AEG); *Foundations* (Fried. Krupp); *It Started With Colors* (Farbwerke Hoechst) and others.

**Human Equation Now Foremost**  
It is interesting that in all these the documentation in a specific form relates to man. The reason: today, nearly all industrial installations have technically matured and are more or less equal in their function. Differences can only be found in the human equation and in man's relation to his work.

The second large "pillar" of the German industrial film: technical information pictures. These have proliferated during the past year. These films are of a subjective, cool, sober design. They are nearly always technically clear and strictly informative without excessive artistic ambition. This does not preclude modern film creativity! *But their purpose decides the form.*

Citing just a few of these which come to mind: *High Voltage High Performance* (AEG); *Bitumen in Coastal Production* (BP); *See More, Realize More* (Siemens); *To the End of the World* (Esso AG); *Tested and Approved* (Henkel & Cie); *Dangerous Thieves* (Siemens); *The Thinking Elevator Control* (AEG); *Silopren and Macrolen* (Bayer, Leverkusen) and *Synchronous Machines* (AEG).

**When Is It a Technical Film?**  
The third pillar: the sales promotion film — has a tendency to "overlap" the technical film in character and objective. They often have similar goals. But this phase of the film medium is advancing swiftly, with a bright future ahead.

German enterprises are aware that they can woo client favor, improve market positions through good use of the sales promotion film. The difference between the internal or completely technical information film may be spotted in narration:

The phrase "assure a depend-

The 35-minute industrial research color film, "Der Heisse Frieden," was produced for BASF by the Gesellschaft für bildende Filme, of Munich . . .

able increase in production" wouldn't be needed in a technical film for worker training, etc. But the border is as indistinct as that recently headlined area in the Himalayas . . .

Noteworthy films of recent date would include *Measurement Technique and Plant Control Equipment* or *Measurements of Widths in Hot Rolling Mills* (AEG); *With Five Steps* (Siemens); *Mannesmann in Steel Water Construction* or *Galvanized Straps* (Mannesmann AG); *Building and Heating* (BP); *253,000 Hours* (Roehm & Haas); *Safety Is At Stake* (Daimler Benz AG) and others.

**Distribution a Key Problem**  
Distribution of sponsored films remains a special problem in Germany. Producers too often consider the job completed when they deliver the film to the client. And perhaps it is the sponsor's task to show his film to the right people!

This phase of our work requires a great deal of attention. It begins with a well-organized premiere of the film, extends through such promotional phases as well-designed announcements, folders, brochures, etc. The best film in the world will not find an audience if nobody knows about it!

But the highly technical film, as its description implies, is subject to different rules. These pictures require special promotion.

"Grabkernkraftwerk Gundremmingen" is the subject of another in the long series of useful technical information films sponsored by Germany's AEG.

**eclair**

## you don't hand-hold the NPR. you shoulder-rest it.

We all know what hand-held shots look like. But a lightweight, silent camera that needs no blimp, no clapstick and no power cable can obviously go places where a tripod would be in the way.

It's not how much the camera weighs, but how the weight is distributed that determines steadiness. Every camera on the market, except ours, requires the cameraman to support its weight in front of him with both arms. There's no hand free to follow focus, change the aperture or zoom. And muscle fatigue causes camera shake.

Most of the NPR's weight is over your shoulder. The feed and take-up reels are side by side at the back of the magazine. Balance doesn't change as the film goes through. The motor nestles into your shoulder like a rifle butt, only higher. While your elbow rests against your side, you keep the camera in position with one hand.

Many of our customers report that they're getting steady shoulder-rested shots of still subjects with such focal lengths as 75 and 80mm. They're also getting ten-second magazine changes, registration-pin movement, precise reflex viewing, a rotating lens turret, synch-pulse generator, constant speed motor and, of course, blimp-free silence.

Service, sales and rental facilities are available from these expert, franchised dealers: *Chicago*: Behrends Inc.; *New York*: F&B CECO, Camera Service Center or Camera Mart; *Los Angeles*: Gordon Enterprises or Mark Armistead; *Detroit*: Victor Duncan Company; *San Francisco*: Brooks Camera. Or write to us. We'd like to send you our brochure: Eclair Corporation of America, 7262 Melrose Avenue, Los Angeles, California

# Trends in Britain

— as Reported by Robinson P. Rigg

European Editor for BUSINESS SCREEN

THERE'S A NEW DYNAMISM in British business film sponsorship these days — B.S. No. 5 published details of Ford of Britain's sales drive spearheaded by their award winning export film *Project D* — now there is news that General Motors' British subsidiary, Vauxhall Motors Ltd., are about to launch an all-out export drive in Europe based on their film *Vauxhall, Bedford, England*, an up to the minute eye opener on the Vauxhall auto plants.

To present the film three mobile display units, costing \$45,000 each, will be used. They each contain an air conditioned cinema with its own separate projection box and seating for 15 people. As well as *Vauxhall, Bedford, England*, sound slidefilms to illustrate servicing will be shown. The presentation includes a mobile turntable for car display, and a number of illuminated displays, panels and three dimensional exhibits to extend over 3,000 sq. ft. of floor space, all of which are carried in the display vehicle. This fall and winter the Vauxhall "circus" will tour Belgium, Holland, Germany, Denmark, Norway, Sweden, Switzerland and Austria with a planned program of 40 separate 4/5 day stands.

Another pace setter in the British export drive is *The Paper Machines*, a film made for Walmsleys of Bury, Britain's leading manufacturer of paper-making machines, and associated with the Beloit Corporation of America. Selling a \$4 million paper machine requires finesse, and Walmsleys provide it in their latest top quality movie which contains some of the most dramatic industrial cinematography this correspondent has seen — a big film to impress big overseas buyers.

A third recent example of dynamic selling through films is a new British European Airways movie, *Air Age Marketing*, a hard hitting sales film to sell the airline's cargo facilities to European exporters. Based on current TV commercial techniques the film has one purpose only — to promote further inquiry.

This single-mindedness of the new films is a sign that sponsorship is developing as a distinct marketing technique — that the "general information" film with vague distribution patterns is on its way out. It is being replaced by motion pictures tailored to the tastes and needs of specific audiences.

Take *Out Shopping* for example — a Consumer Council (the equivalent of the Better Business Bureau in the U.S.A.) film to educate shoppers in good buying habits. The target for this movie are the 14 million housewives who are members of the six national women's associations which show films regularly at their monthly or weekly meetings.

Recent surveys of particular industries' use of films and a-v materials show some interesting facts. In the Plastics industry for example, 29 major manufacturers use film as a prime sales and promotional aid and in eleven cases films are directed to builders and architects.

The building industry itself contains many sponsors who use their films with great skill. To inform potential clients about the new industrialized building techniques over twenty firms offer top quality films — to quote just one section of the industry. In fact, the British

Industrial Film Association has formed a Building Industry Chapter so that members can discuss the industry's film projects with an eye on rationalization, meeting the requirements of the architectural colleges and avoiding wasteful duplication of effort.

Scenes from "A Different Drum": "... his cupped hands ... and ... his cage to keep a cricket in ..."

"... these become the test tubes, beakers, retorts of modern medical research ..."

## New A M A Picture Sounds Beat of "A Different Drum"

A Significant Documentary of Ideas Behind New Institute for Biomedical Research

"... What is the shape of hope?"

What is the size of dreams?"

SO BEGINS *A Different Drum*, a 13-minute, full-color jewel of a film which takes as its theme nothing less than man's wonder and curiosity about his world, a wonder and curiosity that spur his inquiry into the very nature of life itself.

Produced by Henry Strauss and Company of New York City for the American Medical Association, *A Different Drum* is a documentary. Its essential purpose is to portray the significance of the AMA's newly inaugurated Institute for Biomedical Research.

But in showing the potential and the promise of this unique facility devoted to pure research, the film becomes less a documentary of an important event than a record of the purpose behind it. *A Different Drum* is thus one of the rarest of films — a visualization of philosophy, a documentary of ideas.

Using visuals ranging from the abstract to the very real, the film portrays the Institute for Biomedical Research as an environment rather than an edifice. Instead of a mere building housing the tools and equipment of experimentation, the Institute becomes a place unbounded by pre-determined dimensions where the creative spirit has free rein to explore, to search, to seek objectives of its own choosing. As the narrator says, "The promise of the Institute is not one of miracles but of a place where miracles may have a beginning."

The need to search, the purpose "... in taking a road not knowing its end, in tracing a river not knowing its source," has been a basis for medical research from the beginning. As shown in *A Different Drum*, seemingly unrelated events can be welded into a chain of discovery ... folklore about dairy-maids leading to the virtual elimination of smallpox

... legends about the magic in a snake's plant becoming an effective drug in the treatment of hypertension.

Imaginative artwork shows the history of man's curiosity about himself, from naive speculations about the function of organs to the far-reaching implications of the discovery of DNA. Antique urns and "coffers from the attic of time" — all used to suggest the variety of containers man has built to hold the products of discovery over the years. An empty box portrays the hope that the frontier of knowledge will continue to be extended.

A boy is shown seeking the sound of a forest stream. As he is father to the child, so is his curiosity parent to the later child who will solve more profound mysteries, perhaps those shrouding the nature of the living cell. His cupped hands, his "cage to keep a cricket in", become the test tubes, the beakers, retorts of modern medical research.

It is this combination of the abstract with the concrete, the skillful blending of elements of film-narration, cinematography, and musical score — that give *A Different Drum* both its charm as a film and its powerful statement of purpose.

The idea that man must seek, that there are no dimensions to his quest for knowledge, takes shape as a valid proposition on which to base an institution whose purpose is to further the aims of those who are called to play a different drum. The idea that there is significance in the "unimportant", truth in the unknown, purpose in "vain" pursuit, sense.

*A Different Drum* is now in the film library of the American Medical Association. An adventure of the mind and spirit and a pleasure to the eye, it is worth viewing

# Film Mecca: Cypress Gardens!

... focus on colorful Florida plus scenic beauty, sports action

THE CYPRESS GARDENS that the name implies under, Dick Pope, has a color film footage in his love it.

Central Florida mecca of isn't always the tropical it has become. It took inspired planning, hard the now visible love and ting of life and nature's to create this wonder-ter and floriculture.

**Popes Envision an Eden** here in 1932. Dick and e began to build their a swampy morass better the alligators and turtles sited the place. As Dick lylie added her special the beds of rare flowers — the winding walkways

through eye-filling gardens. A dismal swamp was turned into tropical lagoons.

The official opening took place on January 2, 1936. Dick Pope promoted this historic occasion with covets of pretty girls. And since that day, Cypress Gardens has won worldwide fame for its unbeatable combination of lovely ladies, lavish displays of blooms and those moss-festooned cypress trees that seem to frame every picture.

Through the years, the key word in Cypress Gardens' publicity has been "picture." Probably no other tourist attraction in America has been as thoroughly lensed in every aspect, by the countless thousands of its visitors, by the "pros" who have shot award-winning motion pictures "on location" and by the

Gardens' own active photographic group.

## There's Action on the Water

The television and theater viewer's picture of the Gardens usually contrasts sharply with the idyllic tour of its flowery paths. Zooming into screens and off in a cloud of spray are those famed water ski champions, or lovely Aquamaids chased by racing outboards.

They can call the Gardens' water ski show "frosting to the cake" for visitors, but this is a cake fit for a king! Four breath-taking performances each day are accompanied by organ music, the whirl of visitors' movie cameras and the click of still camera shutters. And these water shows have made tourist promotion history. They've also set some records for the use of

Family album: Richard Pope, Ski board chairman and founder of the Gardens (left) with Dick Pope, Jr., his son, now active as president.

color film and for the outstanding job the Gardens have done in really promoting photography at this attraction!

## Getting the Ski Show Idea

The ski shows began almost by accident back in August, 1942. Dick Pope was away at the time.

"e" lens on a camera affixed to the high-flying water ski kite provides unusual panoramic scene from the Photorama files at the Gardens.

Camera fans on Gardens' photo pier film world-famed Aquanauts as a professional staff photographer calls out proper shutter speeds and lens settings.

in uniform, and the rest of the family wanted to entertain visiting service men. Julie Pope gathered son, Dick, Jr. and daughter, Adrienne, and four other teenagers from nearby Winter Haven and this group put on an impromptu ski show for a group of six soldiers.

Mrs. Pope then sent out the first publicity pictures of that first water-ski show. The following Sunday, a convoy of 800 soldiers ar-

rived to see a performance and a new phase of Cypress Gardens' operations had begun.

#### "Matt Dillon" With a Camera

When Dick and the army parted company, he took over where he left off, becoming the Gardens' one-man publicity and photographic department. Out on the picture boat, with four Kodak Medalists (two with color film and two with

black and white) Pope was faster with the shutter than Matt Dillon with a .45.

In those early years, all of the Gardens film processing was "farmed out." Prints and giant murals were also made for them by a commercial studio. But 10 years ago, Cypress Gardens really geared up for photography.

#### Camera Tips for the Tourists

The "picture" today is a film manufacturer's dream. Tens of thousands of visitors watch every single water show to the running commentary of a photo expert who advises proper lens settings, calls the "shots" in advance, gives light readings and does everything but snap the visitor's shutter.

Miss the picture? Drop over to the nearby camera counter and pick up rolls, reels, transparencies, color prints or whatever you want. Or try again, pick up a nice fresh roll of color movie film, still cartridge . . . it's there and encouraged.

#### Scene of Hollywood Features

Perhaps the Gardens drew a little inspiration from visiting crews, fresh out of Hollywood. New York, Detroit and points coast-to-coast. Drift along in one of those electric boats and you're really visiting a movie set you might have seen in *This Is Cinema*, MGM's *On An Island With You*, and *Easy to Love*; in the 20th

Century Fox films, *Moon Over Miami* or *Neptune's Daughter*. Warner Brothers made the best in *Water Babies*.

Dick Pope's favorite among the many screen stars who have been "on location" at Cypress Gardens is Esther Williams. He elected her president of the local Chamber of Commerce and hung a sign with her effect outside his office.

#### Now There's Photorama Division

Inspiration is one thing but execution is another. It's the same with its rules when it comes to photographic capability at the Gardens. A very complete photographic division, called Photorama, is headed by Nathan O. (Red) McMillan. Photographers in the division are specialists in their respective fields, such as Ambrose (Buddy) Campbell III, Morris Monts de Oca, Tom Hallinan, Jerry Imber and V. Lyndal. They are aided by secretaries, who also help in the production and film editing by three photo-lab technicians.

Photorama has its own building which houses executive and clerical offices, the photo equipment room, editing and projection room, the photographers' "ready room" and processing quarters.

These are primarily for staff but hospitality is shown via camera crews and still men, who often share this base.

Film darkrooms (for dev-

or print room features a 7 enlarger, a Kodak color Drum Processor K and a Speedmaster lyser. To read control enischron unit is set up t drying room, just out- color print room. Also in drying room is a Pakoil er and a Seal 16 x 20 press.

aphers keep their per- in lockers lining the wall eady" room. This room es in brass as a studio, with a full complement lighting equipment, and room. Tucked into one a small cubicle made or film loading.

in Both 16 and 35mm and 35mm motion pic- shot at the Gardens, so

the projection and editing rooms are set up to handle these dimensions. Editing equipment includes both 16 and 35mm splicers, 16 and 35mm footage counters, two 16mm Moviescope viewers and two 35mm Moviolas.

Projectors are ready for screening in Photorama's "Little Theater" and they include both Bell & Howell 16mm sound and silent equipment, a 16mm Kodak sound projector and a 35mm DeVry arc machine as well as a 35mm slide projector. Completed motion picture prints are on file in the projection area. Television and other group requests for prints are filled in an adjacent film shipping area.

**Little Theater for Previews**

The plus "Little Theater" features a 6 x 8-foot screen and wall-to-wall carpeting, 12-padded chairs and well-placed ashtrays add to viewer comfort in the room and it's both cooled and heated by a central system, like all other Photorama facilities.

Behind drapes along the side walls of the theater are files containing extra color footage and black and white sequences in both 16 and 35mm. Also stored in the area are originals and workprints as well as negative films which match all release prints.

**Motion Picture, Still Cameras**

Photorama's experts believe in having diversity and excellence in equipment. They use one or more of the division's five Bell & Howell 16mm Filmo turret models, or the B & H Model 200EF 16mm camera. A lot of the shooting is done

This floating camera platform on an outboard-powered barge provides filmmakers at Cypress Gardens with unusual nest for that "birds-eye" sequence.

with the two 16mm Arriflex cameras with 400-foot magazines and with the 35mm Arriflex (also with 400-foot magazine). There's also a 35mm B & H Eyemo and a reliable Auricon 16mm sound camera.

From Dick Pope's original four Medalists, the still camera inventory has grown quite a bit. It includes equipment ranging from an 8 x 10 Deardorff down to 35mm Nikons. There are three Hasselblads, one with an extra wide-angle

lens, a Bronica and six Linhofs. The cameras are also equipped with wide-angle, normal and telephoto lens accessories. Put down countless tripods, lights, reflectors and underwater camera housings before you close the list.

**Gardens' Unique Picture Boat**

Want a film-making adventure? Join one of the crews of the photographic division's picture boat, powered by twin 300-horsepower Ford Intereceptor engines,

Picture boat's two camera bridges are in action as it pulls Aquanauts through water, the 26-foot tou arms can handle 20 skiers at a time

Print drying and mounting room of Photorama: Wilson Tyndal checks a control strip on the Deuschlon, while Jerry Imber adjusts 5X7 Durst enlarger.

Motion picture editing room scene, with the Photorama projection background. Both 16 and 35mm color and b & w films are handled.

Carpenter shop at Cypress Gardens is staffed by three men who are expert in building film sets, or backdrops. Two scenic designers are also employed.

Air-conditioned "Little Theater" has comfortable seating for 12, wall carpeting and a six-by-eight foot screen for frequent film projection.

The custom-built 40-foot hull can be equipped with 26-foot tow arms capable of pulling 20 water skiers. It can be equipped with almost any special feature a cameraman can think of (and that goes a long way). Bridges on the boat are 20 and 32 feet above water level.

#### Cooperate With Film Makers

We've asked the big question asked by sports producers, agency film executives and everyone who considers this pictorial paradise for a possible film sequence—Horalama ski thrills, Fern-eyed young men and beautiful girls. "How does Cypress Gardens cooperate?"

Several visits with Red Pope, general manager, and Jack Irwin, Photorama's chief Red

McGuire, have convinced us that the worldwide publicity achieved by this tourist attraction is largely due to their tremendous spirit of helpfulness and all-out cooperation. Many a similar scenic area could profit by the professional attitude and real understanding these people have of the problems as well as the potential in working with producers and sponsors.

#### Services at Reasonable Cost

They play no favorites where commercial shooting is involved and reasonable established charges are unvaried. For example, the complex picture boat, complete with a three-man crew that includes a driver, a rigger and a liaison man is hired out at a \$50 per hour fee with a minimum of three

hours. Location fee for the picture boat is \$250 per day, the same as that charged for Cypress Gardens location shooting.

The Garden's Aquarama pool, scene of many underwater sequences and equipped with underwater windows and speakers, is available at \$300 per day, including a liaison man, office accommodations and one diver. 15-foot deep and measuring 80 by 160 feet, the pool may be equipped with a complete underwater stage. Reflectors, color transformers and generators are also for hire as part of Photorama services.

#### Release Over 500 Stills a Week

In addition to being retained to assist on TV commercials and for magazine advertising shots, the

Photorama staff keeps busy ing out publicity pictures at Gardens' own movie films. 500 8 x 10 stills are released week by the publicity staff, by Patrick J. Callan, director of public relations (to whom most of the credit for this material). In 1964, Photorama cameramen shot 95,998 16mm motion picture film (mostly for a near-record of 18½ mi-

#### Featured in Newsreels, Shows

The Gardens hold another record any publicist would care to mention. It has been featured in 1,000 newsreel sequences and 350 short subjects for both theatrical and television release. Miss America since 1955 come to the Gardens to play

photographed! It goes on. For a six-month period last year, television commercials were filmed at the Gardens. The list of products includes Eckerd Drugs, Seven-Up, Eastman Kodak, Aluminol, Sterno, Lilt Home and Servisoft water

television and still production cameras would include Lark Cigarettes, Spring Cigarettes, Hill & Libby, Apache Milk, Charles Pfizer Wheaties, Polaroid, and many, many more.

Television should have to capture the beauty of the Gardens, even without Genie's indomitable faith in them. Recent short subjects on screen have brightened the eyes of viewers; in case of the "feature" those on commercials filmed here would surely catch

**Building an "Eden"**  
 Nearly three decades ago the Gardens' 30th

anniversary) since the opening day of Dick and Julie Pope's floral exhibition on their lagoons. Today, every flower in the Gardens has a name and they're called out with pride by the guides who man the electric tour boats wending their way through the botanical display.

*"On your right is the Princess tree . . . the pink blossoms are Duchess of Cypress azaleas . . ."*

There's a name, too, for those wonderful youngsters who perform with derring-do and precision in the water ski show. They're *all-Americans* and you focus with pride as they do impossible feats with skillful abandon.

But in the quiet of the Gardens, in the soft and scented air of their myriads of blooms, there's another symbol: for the Pops have created a place of beauty and a garden of peace.

Small wonder that the right sense of cooperation, a bit more understanding of the value of the pictorial image have brought this place to millions beyond the Florida borders, to eventually lure them to the Gardens on their travels through the U.S.A.

And that's the final wonder of it all: *those one and one-quarter*

Shooting an underwater sequence in the Gardens' Acquafama pool. It has water-proofed speakers, a bubble curtain and underwater viewing windows.

million visitors who paid a \$2.40 admission charge last year.

Close-up and fade-out on the weathered paper scrap on which

one doubter back in those trying 30's scribbled his opinion of the Gardens project. He called it "Pope's Folly!"

THE SCENIC BEAUTY OF FLORIDA'S CYPRESS GARDENS

*Two pictures from the camera of Morris Monts de Oca of the Gardens' Photorama staff capture the peace and solitude of this place—a water and garden wonderland. At left, an infra-red shot along the one-and-one-half miles of waterways traveled by electric boats. Below, the sunset over Lake Eloise is a favorite subject for the color photographer.*

# MODEL FILM LIBRARY SYSTEM

Control of Valuable Footage at NASA's Manned Spacecraft Center in Houston Helps Film Editors to Quickly Locate Frame "Needles" in Proverbial Haystack

Librarian Supervisor Mrs. Ira Hurst logs cans of developed film from Building One at MSC. Average receipts for each day total 6,000 feet of 16mm color film. Original negative and prints are in identification stage here in the Cataloguing and Matching Unit. After paperwork is complete, the film will be matched frame-by-frame, edge-coded and the Scene List is prepared.

Film technician re-sets edge numbering machine after a new roll of film is threaded. Original film and all prints from the original are given same edge code. Specially fabricated numbering machines place up to seven identifying numbers on the edge of 16mm film. Two of three machines are in continual use, third is for back-up use.

After edge-numbering, a technician prepares the Scene List by viewing the screening print. Each scene is described briefly, starting footage number is given plus ending number on each scene. Camera angles such as "medium shot," "close-up" are also noted. Material is recorded on office dictating equipment to be transferred by typist to a 40 master with a litho master a carbon

SOMEWHERE IN A FILE of more than 3,000,000 feet of original color motion picture film is a scene that lasts only a few seconds. Without it a documentary motion picture being produced will be neither accurate nor complete.

The requirement — retrieve that scene as quickly and economically as possible.

To film editors at the Stock Film Library, NASA Manned Spacecraft Center (MSC), Houston, Texas, finding specific scenes such as the one described is a daily routine. The problem at MSC varies not so much in character as in scope from that of any other organization faced with the need to file motion picture film so it can be made available for use at any future date.

## Controls Footage But Keeps Free Access

MSC has solved the problem with a filing system which positively controls all film while providing editors with complete "freedom of access" to film rolls on file. The system is flexible enough to "bend" with the situation when emergency requirements forego normal filing routine — such as during the time of a manned space mission. And it is so effective that film editors at MSC have met deadlines as short as 24-hours for a scripted movie.

Involved is all the motion picture film used in the activities of MSC's Public Affairs Office (PAO), the public relations branch responsible for handling press contacts throughout the world. This film is used to meet the worldwide requests from television news, schools, movie producers, civic organizations and in fact, anyone interested in informing people about this country's space effort. From this vast file, MSC produces numerous finished films.

## All Films Have Historical Significance

Actually operating this gigantic filing system is a government contractor, the A-V Corporation, Houston, whose job it is to absorb better than 6,000 feet of 16mm film daily. They identify, catalogue, store and stand-ready to locate tiny bits or all of the film upon request.

Funneled into the system are varying lengths of film picturing everything from complete Gemini launches to hometown parades honoring astronauts. Not only does the subject matter of the film vary, but fluctuations in the amount of film received help demonstrate the flexibility of the filing system. During the Gemini flights, as an example, film footage received at MSC jumps to about 9,000 feet per day.

"My office could easily be mistaken for the film library during actual flight periods," says Mrs. Ira Jane Hurst, librarian supervisor of A-V's Cataloguing and Matching Unit. "Cans of film are piled desk-high. It keeps us hopping."

## 95% on "Eastman Ektachrome Commercial"

Of all in-coming material, approximately 95 per cent is on Eastman Kodak Ektachrome Commercial film, a low-contrast original from

which color release prints or color negatives are made.

"Probably the most important thing to remember about any film filing system," William W. Robbins, vice-president and production manager, A-V Corporation, will be using the system. It must be tailored to those people. At MSC, an editor-writer is the primary user of the film. They pick desired scenes in written files, and because they have access to screening prints in the library, the team can view the actual footage with a minimum of paper work and restriction."

Immediate utilization of new submissions made possible with a Film Received report issued daily to all producers, editors and writers. It lists the file roll number, source and general subject of each piece of film received during the day. Using the report, an editor can call for a work print to be made of urgently needed scenes before the permanent library roll reaches the shelf. If this is done, the work prints are numbered using the editor's identifying number — by-passing all other operations — is then given immediately to the editor.

Aside from the overall size of the filing operation, Robbins feels that the Film Received report is probably the most unique part of the system.

## New Building Will Centralize Activities

Activities of the library are in MSC's new building complex of white buildings south of Houston and also at Ellington Air Force Base, a few miles away. Still underway is a program that is intended to eventually centralize all MSC activities in this new building.

Initial receipt of all film is at the "vault" room or "vault" in Building One at the Manned Spacecraft Center. There exposed and undeveloped film is logged in and a color number is painted on the 16mm can before being sent to the Photographic Technology Laboratory. It is developed in the laboratory, a screening print is made that will later find its way to the Stock Film Library shelf. An optical master is made at the same time. It is needed to be "cut into" a production. Copies of a film bear the same number as the original roll from which they were made.

Occasionally pre-developed film is sent to MSC to be included in the files. However, bulk of motion picture film from contractors, NASA photographers and other government sources is developed at the Center under carefully inspected quality standards.

## Sent to Cataloguing and Matching Unit

After development all prints and the original film are forwarded by messenger to the Cataloguing and Matching Unit at Ellington. "We act as 'middle-man' between receiving operations and the editors," says Mrs. Hurst. "When film arrives it is entered on a sheet, on the Film Received report and it is handed over to our film technicians."

A-V film technicians perform an initial check (CONTINUED ON THE FOLLOWING PAGE)

## National Conference at Miramar Hotel

James Paul DeMello as Chairman of Conference;  
Dolnick Will Serve as Conference Coordinator

MIRAMAR HOTEL in Santa Monica is the site of the National Conference of the Industry Film Producers Association. The conference is confirmed for the month of June and announced for June 2nd-4th.

Conference secretary, Elaine Dolnick, also has been named by the Board to serve as Conference Coordinator. The selection was announced after the conference with several candidates.

DeMello has been very active in the past annual conference and is thoroughly familiar with the requirements. To insure the carrying out of the advance preparations and the operations of the 1966 Conference Board also made arrangements:

### Assumes a Key Role

DeMello is the 1966 Program Chairman and is one of the most important speakers for next year's gathering. He will be speaking on the subject of "The Future of the Film Industry" by Paul, the news given in these IFPA pages.

DeMello and Bob Ganon will chair the award ceremony. The winners of the "Cindy" award, Bob Ganon, have done yeoman work on the committee in the past; Ray Dolnick brings the experience and acquired over the past in which he has headed activities for the San International Film Festival.

### Plan to Arrange Exhibits

Bob Dickenson of the Gordon Corporation, an IFPA member company, has been named to head the Conference Exhibits Committee. He is already working on lining up exhibitors and features for the 1966 conference. Joining him in this project is another good friend of IFPA, Alan Gordon of the Hollywood Film Company, another sustainer. Other members of the committee are Joe Gulli and Mel Kelley.

Conference Publicity Chairman and National Editorial Vice-President, Roy L. Deets. Two members with considerable experience in public relations will be Ray Jewell of Lookout

Mountain A.F.S. and Jack Southworth.

Mark the dates on your advance calendar: June 2nd through the 4th, 1966. The place: The Miramar Hotel, Santa Monica, California!

\* \* \*

### San Diego Chapter Sets Up Programs on Monthly Basis

SAN DIEGO'S active chapter got off to a fine start this fall by scheduling their meetings on every last Tuesday of the month and by initiating their own local newsletter, THE MONTAGE.

The Chapter will conduct formal business meetings in the even-numbered months and is holding informative, general programs in the odd-numbered months. Members of the group are also trekking to Los Angeles for meetings of interest and have attended such sessions as those presenting Henry Mancini and Sid Solow as well as our national board meetings.

The Chapter's Executive Board also brought the Industry Film Producers' name to the attention of their fellow citizens when they publicly expressed their opinions on a civic project that affected their members.

They object "in principle" to a city and county contract which, among other things, covered film services and was awarded to a state college. What seemed to be a passing comment of local interest has attracted widespread attention and has stirred up considerable discussion. However, city and county officials responded to the Board's expressed opinions with instant action and a genuine concern over the question raised. Chapter officers, in turn, were gratified by the response of the elected officials and commended them for their prompt action.

You're welcome to participate in Chapter activities if you live in or near San Diego and are engaged in or concerned with film production. Drop a line to the Industry Film Producers Assn., P. O. Box 11-081, San Diego, California 92111.

\* \* \*

### Lapel Pin Is Being Designed

An IFPA label pin is being designed, along with a matching logo, to provide a unified symbol for IFPA and its membership.

# IFPA JOURNAL

INDUSTRY FILM PRODUCERS ASSOCIATION, INC.

## Los Angeles Chapter Hears Mancini, Solow

Noted Film Composer, Laboratory Head Address Membership

THE LOS ANGELES CHAPTER opened its program season with one of the film industry's most talented creative people: Henry Mancini noted composer of music for such films as *The Great Race*, *The Pink Panther*, *Breakfast at Tiffany's*, *Days of Wine and Roses*, and *Charade*, (to name just a few). He has also written theme tunes for television shows such as *Peter Gunn* and *Mr. Lucky*.

The views and technical contributions of this often-honored composer gave IFPA members and guests an insight on that phase of film music scoring seldom heard. The program at the KTTV Studios was attended by a large number of members and representatives of our sustaining membership, such as Eastman Kodak, Cine-sound, Hollywood Film Company, Magnasyn Corporation and Gordon Enterprises.

Chairman Jim Swift and his committee followed this program "winner" with another top-flight presentation as Sidney P. Solow, president of Consolidated Film Industries was our guest speaker.

Mancini praised the work done by IFPA film makers:

"I've been tremendously im-

pressed by some of your films that I've seen. The photography ranks with the finest of the professional cinema."

Readily admitting that most of our film makers could only rarely afford the caliber of music composers he represents to score their films, he felt that there could be a larger place for original music, perhaps done by eager, young composers.

"After all, I was new once," Mancini noted, "and so were Elmer Bernstein and all the rest. Someone had to take a chance with them . . ."

Mancini also told the group that IFPA members were "part of the avant garde" of picture makers, inasmuch as they have to invent ways of doing things as they go along. Today there are few innovators in theatrical films.

"When something happens in theatrical film making, it's an accident, you know," he said. "The 'jump-cut' or something . . . and the critics all say, 'isn't that a fine foreign film?'"

The composer gave a brief history of scoring of films for television. Through labor problems in the early days, producers turned to canned music. The first real

(CONTINUED FROM PAGE 43)

breakthrough came when producer Blake Edwards signed Mancini to compose and score the *Peter Gunn* show with modern music. Edwards told him: "I want something that makes me feel it's happening now when I hear it."

Mancini said he believed that when this show first came on the air, "people were conscious that for the first time the music was *up front*." During the question-and-answer period, he was asked why, when *his* motion picture scores were transferred to record albums, the actual motion picture sound tracks weren't used.

Mancini replied: "Well, in the first place, I don't think that motion picture sound, as such, compares to commercial record sound. The techniques are different and I think that when a person lays down five bucks for a stereo record, they should get a true stereo reproduction which you do not, to my mind, get in transferring from a major studio sound track.

"Another thing," he continued, "in *Breakfast at Tiffany's* we had a big party scene. There were five numbers played during that sequence but they were only *pieces* of music. I only had to write a chorus of one number, two choruses of another, etc. Now if the record company that is owned by that studio had taken that track (and they had the right to take it) it would have been a very dull thing . . . not make much sense.

"So I took those five bits of music and developed them into complete numbers. Each one had its own identity and it made an enjoyable record. Nine of ten albums coming out of pictures shouldn't be made. You get some pretty distantly-related pieces up against each other in an album."

A tape recording of the Mancini talk is available to IFPA members. Contact Bob Gunther, 11182 Fairbanks Way, Culver City, California.

**Sid Solow Tells Basics of  
Color for Motion Pictures**

Sidney P. Solow, president of CFI, was the guest speaker at the Chapter's September meeting, held at the Glenn Glenn Sound Company. Before his talk, Sid previewed a recent AT&T (Pacific Telephone) film, *Plane Talk*. The 20-minute Fairbanks production in Eastman color shows the importance of telephone communication by the airlines, both in the air and on the ground.

He then gave a highly-informa-

CFI President Sidney Solow talks on basics of color in motion pictures.

tive and entertaining talk on the basics of color motion picture photography. Every phase of color — from how the eyes see color to

**Meet Executive Vice-President Ray Jaeger**

**R**AY JAEGER, executive vice-president for the Western Section of IFPA, is the subject of this second in a series of biographical sketches. He's a man with some unusual qualifications.

First of all, Ray is one of those legendary native Californians. He was born and reared in Oakland and has spent most of his life in the Northern California area.

A second unusual aspect: nearly all of his working life has been spent with one company: the Lawrence Radiation Laboratory of the University of California. He started his career with that organization when it was located on the California campus, transferred out to the new laboratory when it opened in Livermore in 1953.

Finally, in the "unusual" category, Ray worked his way up in that organization. He started at Lawrence as a still photographer more than 15 years ago. When the Lab received requirements for various films in '53 he switched over to that field.

the construction of color itself — was discussed and treated. It was not only a fresher "short course" in color principles but including facets which were new to his audience.

Sid also demonstrated CFI's new "Color" process. This system makes color separations from one of the color negative through optical printer. It gives storage capabilities of the films on one strip of film (area-sharing on each frame) with many other technical advantages.

CFI thoughtfully provided a person at this meeting with containing samples of the films used in "Colorvision" illustrating steps in the process.

Ray Jaeger: man of the movie

During the growth of the industry he has participated in all phases of film making and now leads the group as the "man in charge" of all photographic services. The Graphic Arts Department "All services" includes still photographers, motion picture production and personnel, etc.

## New... high quality for low-budget jobs

Here is the ideal and practical answer where 35mm and 16mm production might be impractical or impossible: KODAK INSTAMATIC Movie Equipment, a completely new motion-picture system for projecting your original camera footage immediately after it's processed, edited, and sound-stripped.

A new Super 8 picture format, 50% larger than regular 8mm, means brighter, sharper pictures on the screen.

A new all-electric camera, the KODAK INSTAMATIC M-6 Movie Camera—a zoom model that does practically everything automatically. You don't have to use your best men on productions where this camera is used.

A new film cartridge you just drop into the camera. You can shoot 50 feet of film without stopping. No flip-over at midpoint. No threading at all. No chance for double exposure. No chance for edge fogging. No chance of exposing only half the film.

And to show your films at their very best, there's a new sound projector, the KODAK INSTAMATIC M-100 Sound Projector. Fully transistorized, built to professional standards, this machine offers such features as automatic threading, still projection, and extremely quiet operation.

For complete information, please write Motion Picture and Education Markets Division, Eastman Kodak Company, Rochester, N. Y. 14650.

**Kodak**  
TRADEMARK

(CONTINUED FROM PAGE 44) laboratory, visual aids unit, photo-instrumentation, etc. There are more than 30 people in his unit.

And because the Lawrence Radiation Laboratory is also one of those few "unusual" companies engaged entirely in pure nuclear research, Ray Jaeger has had the unique opportunity to participate in many forward area nuclear test projects, both at the Nevada Test Site and at the AEC Pacific Proving Grounds. His films are distributed throughout the world by the technical laboratories of the U.S. Atomic Energy Commission.

### Recent Film Honored Abroad

The Labs' latest film, *Transcurium Elements—Synthesis, Separation and Research*, was a finalist at the Brussels Scientific Film Festival and at the American Film Festival. It also received a citation from an industrial photographic publication. In 1964, the unit produced four films on laboratory nuclear research projects for exhibition at the World's Technical Fair in Geneva, Switzerland.

Ray has done more than entering his own films. He has been actively associated with the San Francisco International Film Festival for the past five years and served on the executive committee of its non-theatrical division for four of these. For the past two years, he has been in charge of judging "Films as Communication" entries for the San Francisco event.

### Studied at Pacific, Rochester

Our subject of the month was graduated from the University of the Pacific in 1947 with a degree in International Relations. He also has had two years of post graduate work at the Rochester Institute of Technology where he specialized in photography. His service record shows three years in the Marine Corps, where he served in the Pacific Theater from 1943 to 1946.

That athletic look (see portrait) is authentic. He's an enthusiastic participant in tennis, skiing, volleyball and swimming. Ray is currently president of the Livermore AquaCowboy Swimming Club.

Past president of the Society of Industrial Photographers of the Professional Photographers of California, Ray has served I.P.A. in the recent past as chairman of

our Northern California Chapter. In 1964 he was elected National Executive Vice-President.

The Jaeger family (Ray, his wife Betty Jean and their two daughters, Beverly and Lauren) reside in Livermore, about 40 miles east of the Golden Gate. •

\* \* \*

### Douglas Film Makers On the Move in U. S. A. and World

Change that slogan to "Join Douglas and see the world!" Members of that company's film department (and of IFPA) are constantly on the move. Even world-traveler Bill Gibson doesn't have a monopoly along the trail . . . Donn Bates has been spending a good bit of time up in San Francisco working on an Apollo Mission videotape show.

Vern Barry hardly had time to say "hello" to his family on returning from the Scandinavian countries . . . he was off again to the Fiji Islands, Australia, New Caledonia, Tahiti and Hawaii!

It's *real* good to hear that Bill Gibson is well on his way to a good recovery after recent major surgery. His friends at Douglas and IFPA wish him speedy recuperation! •

\* \* \*

### Don Whaley to the Majors!

We and Hughes Aircraft lost a good man to a major Hollywood studio recently when Don Whaley fulfilled a life-long ambition. He was recently hired as an assistant cameraman by a major company and has already worked on several top-flight television shows. Good luck to Don! •

Producer-Director Wilbur T. Blume (right), of MAVS Air Photographic and Charting Service, with singing star Jack Jones as they share honors for a Blue Ribbon award won by the film "Time and Tide" at American Film Festival. Jones sang and acted in this Air Force picture.

### "Discovering America" Series Released by Assn. Telefilms

A new color television series for public service television release by Association Telefilms features introductory remarks by Vice-President Hubert Humphrey. The series, *Discovering America*, shows scenic attractions, resort areas, historic landmarks and natural wonders throughout the United States. It is being offered in quarter-hour and half-hour segments, to television stations nationally. Several programs are devoted to such sports as yachting, auto racing, ocean fishing, skiing and hunting.

Each film in the series is introduced by the Vice President, speaking at the New York World's Fair. He asks Americans and peoples of other lands to travel and "see the U. S. A." Mr. Humphrey has since been named by President Johnson to head up the "Discover America" program which enlists the support of travel and transportation companies in this effort.

Association Telefilms is the tv. division of Association Films. The new series is available from AF distribution centers at Ridgfield, N. J.; Oakmont, Pa.; La Grange, Ill.; Dallas, Texas; or Hayward, Calif. •

\* \* \*

### 15-Minute Ford Film Gives Tips on Buying a Used Car

A new 15-minute color film can help potential buyers get the most value for their money when purchasing a used car. Joining the Ford Motor Company's film libraries last month was *So You Want to Buy a Used Car*, which portrays a teen-ager buying his first automobile.

The film demonstrates how a step-by-step examination on a dealer's lot can help determine the general condition and operational capabilities of the car. Many of the techniques shown are used by professional appraisers in evaluating the worth of a used car.

With information learned in his driver-education course at school, the youth applies a "BELTS" test to check important safety factors: "B" for brakes, "E" for exhaust,

"L" for lighting, "T" for tires, "S" for steering mechanism.

Four important reminders included: (1) select a dealer when choosing a car; (2) reassure yourself that the car is in good physical condition; (3) make the BELTS test; (4) examine the car on the lot and on the road.

The film is available on free loan showings from Ford libraries in Dearborn, Michigan, New York City and Oakland, California. •

\* \* \*

### "Naturally, It's Rubber" Available for U. S. Showings

Much-in-the-news Malaysia is the subject of a new film *Naturally It's Rubber*, now offered on free loan to community organizations and stations through United World Films.

The picture shows how Malaysia has fostered the expansion of its rubber industry and how its growth has in turn broadened the nation's standard of living.

The processes of bedrock grafting, fertilizing and erosion are examined. Research to improve quality and increase output is a major factor in the growth of the industry.

While absorbing a broad understanding of the culture, traditions and diverse nationalities which have molded the Federation of Malaysia, we see how contrasting elements have been forged into a new national consciousness. •

\* \* \*

### Brief Science Film Dept. "Miracles of Modern Steel"

Dr. Jonathan Karas, nuclear physicist, lecturer and TV personality of Manchester, Mass., demonstrates some unusual properties of steel in *Miracles of Modern Steel*, a 16mm free-loan film presented by The American Iron and Steel Institute through Association Telefilms, Inc. The five-minute picture is available to adult organizations and institutions.

Dr. Karas performs the experiments, the first demonstrating how steel, in the form of a wire, resists fire and is light enough to fly. In the second experiment a car dramatically crashes through a guard rail and bounces over it, though the barrier is only one-tenth of an inch thick. Finally, an automobile weighing over a ton is hoisted into the air by an eight-ounce thread of steel. Dr. Karas at the wheel!

**All you need is the script (and maybe some dark glasses)  
CAMERA MART will supply the rest**

Camera Mart sells and rents everything you need from Arri cameras to Zeiss viewers. That includes specialized equipment for shooting in the tropics or the North Pole.

And Camera Mart's 30 years experience working with film makers really pays off for you: it means a broad background of technical know-how to help

you on special projects; lower costs; no delays; faster, more efficient handling.

Camera Mart frees you to concentrate on **your** job — film making.

Call today and see why it pays to do business with the **one** company that can get the job done. The way you want it . . . when you want it.

## The Past and Future of "Steel in America"

American Iron and Steel Institute's 30-Minute Color Film  
Expected to Reach 700 Million Viewers in Next Five Years

**T**HE EVOLUTION OF STEEL into today's highly-developed technology and a fresh look at the innovations coming from steel research laboratories are the basic content and theme of a new half-hour color motion picture to be released by the American Iron and Steel Institute.

The new Technicolor film, *Steel and America*, is expected to reach over 700 million persons during the next five years of distribution. Showings to community groups and schools will be handled by Sterling Movies U.S.A. and television stations will be served by Modern Talking Picture Service. The picture was produced by Walt Disney Productions. John J. Roche, president of the Institute, made these comments:

### Meets Requests from the Field

"*Steel and America* fills a need for an informative screen chronicle of the industry with which we can meet the many thousands of requests now being received each year from educators and community groups."

The film opens with animated sequences showing how iron ores become part of the earth's crust in the geological turmoil of ages past; graphics and live action scenes then document the parallel development of America and the steel industry.

### New Techniques Are Explained

Present-day steel-making processes are shown, including the revolutionary new techniques adopted in recent years (such as the oxygen furnace, etc.). Some of

During the Revolutionary War an iron chain was stretched across the Hudson to keep British ships from coming upstream, scene from "Steel and America."

Electron microscope helps scientists to develop improved steels.

the industry's 5,000 research people are shown at work on new projects, ranging from ore beneficiation to further utilization of nitrogen, hydrogen and oxygen to create better steels. The point is made that only about half the iron atom's potential for strength and versatility has been explored thus far.

The film closes with an affirmation that the industry will meet the demands of steel's "Century Two" as it has during the past 100 years.

### Sponsor a Color Filmstrip on "Story of Coated Abrasives"

The Coated Abrasives Manufacturers Institute is using a color filmstrip, *The Story of Coated Abrasives*, to inform industrial arts, social study and sciences classes in schools on abrasive products. •

## "Compressed Air & Gas—Yours to Command"

Industry's Institute Observes a 50th Anniversary  
With Third in Series of Informative Technical Pictures

**"T**HE POWER of moving air..." is explained with graphic clarity in a new 26-minute color motion picture premiered last month by the Educational Committee of the Compressed Air and Gas Institute. The many uses of compressed air and gas in industry are shown; a look into the future shows advances being made in medicine and space technology. *Compressed Air and Gas—Yours to Command* is the third film sponsored by the Institute; all of these are being distributed nationally by Modern Talking Picture Service, Inc.

### Film Produced by Fred Niles

The film was produced by Fred A. Niles Communications Centers.

The new picture is an appropriate tribute to the 50th anniversary year of the Institute, a non-profit organization whose 40 member firms manufacture compressors, pneumatic tools and hoists, rock and rotary drills. Principal aim of the film program is to keep engineers and student-engineers updated on developments and alert to potential uses in manufacturing, processing, construction and mining.

... *Yours to Command* shows some of the thousand-fold uses to which these tools are being put — from inflating tires to spraying concrete, unloading freight cars, making steel and fueling rockets. It relates how air tools perform a multitude of tasks in manufacturing and construction — through linear, rotary and percussive motion — and unveils the exotic new developments of compressed air and gas for hyperbaric surgery and in artificial gem production.

### Modern Distributes the Series

The Institute's film program has been notably successful in reaching its intended viewer audience. An earlier 17-minute film, *Compressed Air Power*, had 2,482 showings via Modern libraries alone in 1964. A specialized audience of 97,271 was reached for an average of 39 persons per showing. This animated color film shows the operating characteristics of compressors, the thermal and cooling effects of compression and staging and, through animation shows how compressed air is converted into mechanical power in pneumatic tools.

The new anniversary year re-

lease will also be available to television stations for public showings and to educational institutions for closed-circuit use. Prints are also being made available for outright purchase by technical societies, member companies and educational institutions.

For free loan of *Yours to Command* or other Institute films, contact the nearest Modern Talking Picture Service library or Educational Committee of the Compressed Air and Gas Institute, 100 Public Square, Cleveland, Ohio 44113.

### "Happy Holidays in Smoky Now in Production"

The scenic wonders of the Great Smoky and Blue Ridge Mountains are being lensed for a color motion picture, *Happy Holidays in Smoky Camping in the Smokies*, scheduled for fall release by American Oil Company and Ford Motor Company, sponsors. The film is being produced by Matco Associates and will be printed in both 16mm and 35mm versions.

Most of the action is set around the great Smoky National Park and the Blue Ridge Parkway. Matco crews are "on location" at Cherokee, North Carolina and West Jefferson in North Carolina and in Gatlinburg, Tennessee.

Distribution of the 16mm version will be handled by Modern Talking Picture Service. mount Pictures will distribute the 35mm (theatrical) version. The film is the fourth in the *Holidays* series sponsored by American Oil. Three previous subjects were produced by Paramount Pictures, of Hollywood.

\* \* \*

### Four More Language Versions for "The Day of the"

The German Information Center's film, *The Day of the*, originally made exclusively for American audiences, has now been issued in four more languages — French, Spanish, Portuguese and "British" — for Europe and South America.

The film shows German people at work and play in class rooms and night clubs. It also includes scenes of a conference held by Berlin's Willy Brandt and of Chancellor Erhard's political campaign.

## "Wide Window" of the New York Times

A Behind-Scenes View of a Great Newspaper at Work

The New York Times  
*Wide Window of Mr. Malone*  
 produced by Spectrum

Malone lives in Stamford, Connecticut. He gets most of his knowledge of any day's news from the news columns of the New York Times. *The Wide Window of Mr. Malone* is a film that provides an understanding of the philosophy and the day-to-day operations of that newspaper, the best tradition of The Times — calm, thorough, and eminently "read-

able." The philosophy is best summed up in the word "excellence." The film is put out by skilled, thoughtful people today as it has for over a century. The Times has become one of the most influential journals in the world.

ed States, across the world. After the many sources of news are touched upon in a kaleidoscopic round-the-world sequence, the film becomes quite specific as the Times Brussels correspondent calls in a Common Market story to the London Bureau.

This story is transmitted across the Atlantic to the newsroom on 43rd street, and the camera stays right with it, following it through the entire editorial and printing process until it emerges on the giant Goss press to be reproduced sixty thousand times each hour. Next morning, this is the first story to catch Mr. Malone's eye when he picks up his paper at the Stamford station. Once again, the Times has served as his wide window on the world.

### Times Will Handle Distribution

*The Wide Window of Mr. Malone* was produced by Spectrum Associates, New York, and directed by George R. Pitt. It will be available through the facilities of The New York Times.

Sequence of Gemini 5 for the NBC program.

Gemini 5 drifts toward ocean surface in final phase of voyage . . .

## Graphics Visualizes Gemini Landing

Top-notch coverage of the landing of astronauts Cooper and Conrad in Gemini 5 included 23 minutes of an exciting anti-which visualized exactly what was happening on the TV screen took place in the stratosphere.

prepared in advance by Film Graphics, Inc., New York, for NBC to show at exactly the right moments the firing of the rockets and the glowing heat shield on the dark side of the spacecraft and the opening of drogue and main chute and let-down into the ocean.

This is one of six new longer-length motion pictures now in production recently released by Film Graphics, an associate company of Film Graphics, Harold Wondsel, a well-known pioneer producer of industrial films, is director of industrial sales for the firm.

New color film processing facility of Capital Film Labs to open in Miami.

## Miami Extends Welcome to New Capital Lab

GREATER MIAMI civic and business leaders welcomed Capital Film Laboratories, Inc., of Washington, D. C., to their community at a luncheon in the Terrace Room of the DuPont Plaza Hotel on September 22nd. Capital Film is building a third-of-a-million dollar plant in North Miami to provide the industry in the Southeast with daily laboratory processing service of 35mm color films.

The new plant is under construction on N. E. 151st Street as a part of Studio City, being developed by Dave and Ray Brady. It is scheduled to open next January. Samuel C. Gale, customer relations executive of Capital Film, described how the new service fits into Miami's growing motion picture production complex:

"After the producer brings together all the basic elements and shoots the picture, we then process the original camera negative. From this, we print and process workprints, called 'dailies', which enable the director and producer to see the film shot the previous day. This is, of course, only one of the many services Capital will offer from the Miami plant."

In establishing the laboratory in North Miami, Capital Film's president Alfred E. Bruch said that he is "realizing a long-awaited

Capital's president Alfred Bruch

personal ambition of helping the Miami metropolitan area become a third major motion picture production center," behind only Hollywood and New York.

General manager of the Miami laboratory will be Robert W. Hiltwine, who recently rejoined Capital Film after serving as chief of the Film Services Section of the United States Information Agency.

\* \* \*

### Studio City Adds Two Stages

Construction of Studio City in North Miami, Florida has been expanded to include two additional production stages, each 85 feet x 40 feet, with 30-ft ceilings. They will be available by October 15.

Garland C. Misener, vice-president, technical director of the laboratory.

William N. Brooks, vice-president and secretary, Capital Film Labs

## There are five new black-and-white films from Eastman

1. EASTMAN XT Panchromatic Negative Film, Type 5220/7220

Improved emulsion technology gives XT Panchromatic sharpness and excellent grain structure. For use at 1/125 to lower speeds, new XT Pan eliminates the need for neutral density filters on far-throwing windows when shooting extremely bright exteriors.

2. EASTMAN 4X Panchromatic Negative Film, Type 5224/7224

F. I. 500 but there's no more grain than in most medium-speed emulsions. New 4X Pan combines speed, resolution, acutance and brilliant tonal response. And it has an extended forced processing range. It's great even under tough new-reel conditions.

3. EASTMAN Fine Grain Release Positive Film, Type 7303

16mm never looked better than on this new fine grain positive. It's a great team mate with our new high acutance XT Pan Negative. Gives clean, brilliant highlights and crisp, well separated middle tones. This print film brings out the best in any negative.

4. EASTMAN TRI-X Reversal Film (Improved), Type 7278

For sports, news, documentary, our new TRI-X Film leads the way in tonal quality and reduced flare and halation. Because "blooming" is eliminated, TRI-X Film is good for the high contrast subjects often encountered in night sports and news photography.

5. EASTMAN Fine Grain Duplicating Positive Film, Type 5366/7366

Permits exposure on low portion of characteristic curve resulting in a "thinner," fine grain master. Improved emulsion speed allows printers to operate up to four times faster. Or, this speed increase can be translated into savings on lamp costs.

## ... plus this superb new color print film

### 6. EASTMAN Reversal Color Print Film, Type 7387

A highly improved reversal color print film with superior color reproduction especially in the reds and greens. Twice as fast as Type 5269, it offers improved sharpness and grain. Improved emulsion and processing give a sound track of superior frequency response.

And remember **TYPE A704**, Eastman's new magnetic sound recording film featuring brilliant tonal quality, archival stability, high wear resistance—and most important, roll-to-roll uniformity. Printed continuously on the back of the film are quality control numbers that you can use for cataloging. Want to know more? Contact:

*Hollywood, Chicago, New York, Rochester*

Final destination of the screening print: shelf in the Stock Film Library. Motion pictures stored there are readily available to writer, editor and other personnel working on MSC productions.

Editor-writer team checks film against script, using a Moviola in the editor's office. Ease of access to screening prints filed in a library room down the hall speeds selection of scenes used in NASA productions. Signature on a card listing the file roll number permits the editor to preview a film on library or office projector.

Mechanical Visa-Record files are used as a permanent reference to all MSC plus. File is divided along functional lines with eight major headings. Data is same as that on Scene Lists issued to producers, editors and writers involved

## FILM LIBRARY SYSTEM

(CONTINUED FROM THE PRECEDING PAGE 42) series of identification steps just before screening prints go behind locked doors in the Library and Editing section.

These identification steps are:

1. Matching of all prints frame-by-frame with the original and breaking long film into rolls of less than 980 feet. Leader is attached and spoiled or fogged footage longer than one foot is removed.

2. Edge numbering each roll to correspond with the original.

3. Preparing a Scene List for distribution to editors, writers and formal files. Using an office dictating machine, a technician views the screening print scene by scene and gives footage numbers (scene start and stop), camera angle and a brief scene description. This recording is later typed on ditto and litho masters for reproduction.

Three specially fabricated edge-coding machines are used in the Unit. They can place up to seven numbers (no letter prefix is used) on the edge of the 16mm film. The first four numbers are used for the file roll identification and the last three for footage, starting with foot number 10, which accounts for a standard 10 foot leader.

After the original film and all prints are made identical, the original is returned to the "vault" for permanent storage in motorized file shelves. Thereafter, only technicians in the storage vault and the printing laboratory will handle the original film in order to preserve it.

### All Footage Has Historical Significance

All of MSC's film is considered historical material. Unlike commercial film companies who may cut the original negative to match an approved work print, MSC never damages scenes by cutting them internally. When a scene is to be used cuts are made at "camera start" and "camera stop."

"The flexibility and accuracy of our system is such that editors call for individual scenes without taking an entire roll," says Robbins. "Before A-V Corporation became the Stock Film Library contractor in 1962, standard practice was to call for a full file roll print if a useable scene was on the roll. Matching all prints frame-by-frame and edge coding permits our people to place orders by file roll number and footage numbers. There is a considerable savings to the government in film using this method."

Other savings are made when only a small portion of an extremely long scene is needed. Instead of ordering an entire scene, the editor calls for the required action with a "paper to paper print" technique. He indicates the footage number a few feet ahead of and following the action and the print is made in the laboratory to correspond to this order.

Unused footage from work prints is retained by editors for use in future productions. Notable savings in time and money are made following this practice. Scrap or damaged film is sealed in bags to be destroyed in a similar manner to classified government ma-

A high-speed 16mm projector, which runs times faster than the average machine, is used by personnel to scan a complete subject. Here, William Robbins (right), writer, and Richard Gough and editor Etsuzo G. Ishikawa are preparing to screen a film.

terial, even though much of the film is not classified.

### Film Editors First Turn to Scene Lists

"The initial work in our editing system is done in the editor's head and on paper," says Etsuzo G. Ishikawa, one of A-V's chief editors. "When an editor gets a finished script or script outline he goes to his individual file shelves for a Scene List for a brief scene description and a file roll number. With this number and access to screening prints he can preview the material he plans to use on a Moviola right in his office. Signing his name to a check-out card with the file roll number is all that is necessary."

When additional research is required, personnel may go to Visa-Record files in Building One. Cards printed from litho masters used to print Scene Lists are arranged in motor driven file cabinets under eight functional headings. These formal files contain all of the film stored at MSC in four reels. Original descriptive material prepared at the time the film was shot is also available if needed.

### System Follows Through in Many Steps

"As scenes are selected or tabbed," says Ishikawa, "the file roll number, scene numbers and other information is entered on a Production Scene List Locator. When a total 900 feet, the form is sent to A-V's Tabbing Section in Building One. Technicians locate the original negatives and clip requested scenes. The laboratory gets this roll of negative and makes a work print and optical master. The Tabbing Section replaces each scene on the original roll using blank leader film at the end of the clip to eliminate destroying frames in future orders. The work print and optical master are then routed to the Logging and Matching Unit to be logged, matched, edge coded and turned over to the editor."

Working closely with the writer, who also act as the producer, an editor selects the work print and fits scenes and action.

## The Viewlex 8mm Optical Sound Projector

Color Service Unveils New One-Step Print Process at Showing

**A**N 8MM OPTICAL sound projector, featuring a larger picture format, optical sound and other improvements, was introduced by Viewlex, Inc., during a two-day series of demonstrations at the Johnny Victor Theatre of the RCA Exhibition Hall in New York last month.

The companion product, shown simultaneously, was a new single-step method of producing optical sound color films from 16mm or 35mm, at less than half the cost of other methods. This system is now in operation by Color Service Company, New York.

### Under Design for Four Years

The new Viewlex optical sound projector was four years in the design stage by Viewlex engineers and is now in production. It is actually an 8mm in name only, for in this case, the individual picture frame size has been increased, thus assuring more picture brightness and sharpness than the standard 8mm format.

The major breakthrough in the new Viewlex projector has been the placement of a full-size optical sound track on the film, while simultaneously increasing the picture area. Both the new 8mm optical sound projector and the films for it are so designed that standard magnetic sound can be added as well, in addition to silent film projection.

### Direct Comparison With 16mm

The demonstration, consisting of direct comparisons between 16mm

or theatre

Ben Peirez, of Viewlex, describes the new 8mm sound projector.

picture and sound and the Viewlex-Color Service picture and sound, was impressive. On a screen about four feet square it was almost impossible to tell the 16mm sample from the new format 8mm.

In operation, changing the "run" from optical sound to magnetic or silent showing is a matter of a single switch. Film threading has also been simplified, using the new Viewlex semi-auto feed design.

### User Can "Over-Ride" Sound

Another important feature is a "cut-in" microphone with which the projectionist can over-ride the sound being heard and thus add his own commentary where the picture is being shown. Projector operation is controlled by an automatic keyboard panel. Forward and reverse speeds are provided.

The projector can accommodate 600-foot film reels, which is equivalent to 1200 feet of 16mm film.

All the projector components, the projector itself, speaker, reels and microphones are housed in a single case measuring 8<sup>1</sup>/<sub>4</sub> by 10 by 14<sup>3</sup>/<sub>4</sub> inches. In use, the speaker, which is part of the cover, is detached and placed near the screen — a long speaker cable is provided for this purpose.

The projector was designed to fill a specific need. The use of films in classrooms, industry, and the church has increased enormously in the past five years. McGraw Hill is now readying a new film program for the school market using the new Viewlex 8mm projector and Color Service-printed optical sound films. This is seconded by industrial companies who

Bob Crane, president of Color Service, explains the one-step process.

are making extensive plans for the new medium, creating programs as the result of the found savings.

Format of Viewlex 8mm picture and sound frames showing large .0254 square-inch of projected image area. Single sprocket holes are located between optical or magnetic sound track; picture area is slightly smaller than Kodak's "Super 8" size, but sound track area is 85% greater than is used in "Super 8." Standard 8mm formats are smaller in both picture and sound track areas than the new Viewlex projector.

## Report Progress on Automated Film Cataloging

Industry Can Take Note of Automated Cataloging Project Which Delivers Information on Needed Titles in Seconds

**D**IRECT TRANSMISSION of audio-visual materials from centrally located A-V libraries into classrooms anywhere in the nation will one day be as simple as a station-to-station phone call, says a University of Southern California expert on audio-visual services.

Research already accomplished by the Automated Cataloging Project at USC has proved the feasibility of devising centralized and wholly automated catalogs on audio-visual materials, according

to Glenn McMurry, director of the project.

The next step, using computer-aided information-retrieval and communication techniques, is to have the audio-visual materials themselves, electronically accessible from central locations for immediate accessibility.

McMurry, who is also director of film distribution, views the classroom-link as imperative in eliminating time-lag—knowledge-lag

John L. Pauzat joins Niles

**Int'l Marketing Specialist to Supervise Niles Accounts**

An international marketing specialist, John L. Pauzat, has joined the Fred A. Niles Communications Centers, Inc. as an account supervisor. His appointment to that company's Chicago staff was announced by sales vice-president Norman C. Lindquist.

Pauzat is a native of France and comes to the Niles organization from New York City where he was sales manager of the Chalet Cheese Company, Ltd. of Switzerland. He is a graduate of the Ecole Mayol, Paris.

**Rex Fleming Productions Adds Turvey as Chief of Production**

Irv Turvey has been appointed production supervisor for Rex Fleming Productions, Santa Barbara, Calif. Rex J. Fleming, president of the 26-year old film company, confirmed the appointment in September.

Prior to assuming his new post, Turvey was western manager for S.O.S. Photo-Cine-Optics, Inc., at their branch in Hollywood.

**Four in New Executive Posts as Chapman 5 Expands Program**

Reorganization of Chapman 5 Productions, Burbank, Calif. has brought news of several new executive appointments. Frank E. Guire has been named general manager of the film company. He served as business manager and associate producer the past two years.

President James H. Flint is assuming the post of sales manager and will head up a new agricultural division at Chapman. The company has also entered the television and theatrical film production field with the appointment of Quinn K. Redeker as vice-president.

Robert G. Thomas of Birmingham,

NEWS OF STAFF APPOINTMENTS AND A-V INDUSTRY DEVELOPMENTS

ham, Ala. is now a vice-president and associate producer, heading up activities in aerospace, aircraft and electronic fields. Thomas is a Lt. Col. USMCR and is a jet pilot. He will relocate at the company's Burbank, Cal. headquarters.

**Irving Schwartz Named V. P. & Treasurer of F&B/Ceco, Inc.**

Irving Schwartz, treasurer of F&B Ceco, Inc., has been promoted to vice-president of the national film equipment company. He joined the firm in 1959 and continues as treasurer in addition to his new duties. Schwartz is the chairman of the Motion Picture Division of the National Credit Men's Association.

**Ed Rasch Joins Wilding, Inc. as Account Executive in N. Y.**

The appointment of Edward L. Rasch as an account executive in the New York office of Wilding, Inc. has been announced. Formerly associated with Visualscope, Inc., he is a resident of Westbury, New York and a graduate of Hofstra University.

**David Schwartz to Direct Sales for the H. Wilson Corporation**

H. Wilson Corporation, of Chicago, has named David D. Schwartz as its general sales manager. He had been eastern sales chief for this a-v equipment manufacturer before returning to Chicago to assume these new duties.

... film architect Dean Collin

**Dean Collin to Free-Lance a Film and Stage**

A 20-year career in marketing and training film communications is taking a new turn for Collin as Dean Collin, vice-president of The Jam Handy Organization, resigned that post to turn to "planning and writing of stage presentations as a free-lance architect."

"The word architect," he says, "is Greek in origin and means the 'key workman' in business communications. He is the key workman on the job, the writer. Without the right ideas and words in the beginning, the result is lackluster, even unprofitable."

Collin has authored many films, dramatic books and lyrics for public entertainment for industry. While at Jam Handy and Wilding, Inc., he supervised the writing of many communications projects. Long involved in theater work, he has directed 30 stage productions and shared this interest with his wife, Wanda Collin, featured in many radio programs such as *Hollywood* and *Bonanza*.

After October 1st he will move his offices in Hollywood, Michigan.

**Taylor, Johnson to Side with Sales Staff for Two Regions**

Two sales posts have been added by Sickles Sales and Service Company, Scottsdale, Arizona, to that production equipment company, provide immediate construction service in outlying states.

Robert M. Taylor has been assigned a midwest territory to serve Sickles' clientele in the central states, from Ohio to Missouri, as well as Kentucky, Tennessee, Mississippi and Alabama.

Gustave E. Johnson will cover the Atlantic seaboard from Maryland to Florida, including Washington, Virginia. The company distributor Emby Homrich optical products

**MARKETING MEN:  
ENJOY  
A BIG AUDIO-VISUAL PLUS  
WITH  
LENSCREEN REAR SCREENS  
by POLACOAT**

*16 mm. Cine-Educator by Busch*

The advantages of rear screen projection in sales promotion, sales training, exhibits and displays are well established.

However, Lenscreen by Polacoat offers a valuable plus. The millions of tiny lenses on the surface of LENSSCREEN respond only to projected light. Lens response is unaffected by room illumination! So, with Lenscreen, your present projector can show sharp, clear pictures (even in full color) in fully lighted rooms.

You command greater attention. Your viewers take notes readily, assimilate faster, retain facts and sales points longer.

Eliminate the inconvenience and distractions occasioned by darkened rooms. Discover how only Lenscreens can let you enjoy the benefits of true "daylight" presentations. Reasonably, too.

Send for your free LENSSCREEN Idea Kit, today.

NEW PRODUCTS & ACCESSORIES FOR PRODUCTION AND PROJECTION

Polmer 16mm Interlock Projector

## Palmer Films Develops New 16mm Interlock Projector

A new 16mm interlock sound projector is announced by W. A. Palmer Films, Inc., of San Francisco. The Palmer Interlock Projector is an easily-operated, portable 16mm sound unit for running picture and separate magnetic sound during synchronizing, editing and previewing stages of motion picture production.

Palmer's own magnetic film transport has been combined with the well-known Graflex 800 series projector. At the touch of a lever, picture and magnetic track can be run forward or instantly reversed in perfect interlock. In addition, the sound track can be shifted forward or back a frame at a time relative to the picture without unthreading either film, so that lip synchronization can be simply and precisely checked and corrected.

The easy-threading unit provides flutter-free playback of standard 16mm magnetic film. It incorporates a preamplifier and a separate torque motor for takeup.

The Graflex projector retains all of its regular features, including the standard optical sound pickup, 2-level projection lamp and adjustable gate pressure for all conditions of film. The 15-watt amplifier's dual tone controls regulate both the magnetic and optical playback systems. Reel capacity is 2400 feet for both sound and picture.

For further details and prices write: W. A. Palmer Films, 611 Howard St., San Francisco, California 94105, or ask our New Products Desk to send.

## New G E Incandescent Dimmers for Studio, Screening Room

For the studio or office screening room, there's a handy new group of UL-listed, solid-state incandescent dimmers available

from General Electric's Wiring Device Department.

Designed for commercial applications where varying levels of light are desirable, these new dimmers provide for smooth control of light levels from OFF to full brightness. They're available in both single-pole DI-51 and three-way DI-53 types, with 500-watt rating and feature press action ON/OFF operation. Also available is a single-pole 1000-watt dimmer (DI-101).

Available through local General Electric lighting dealers and distributors or your electrical contractor.

## New Adjustable Mirror-Stand for Rear-Projection by S & S

Useful in correcting the image of rear-projected motion and still pictures is a new stand-mounted rear screen projection mirror available from Spindler & Sauppe.

The mirror has a 4¾-inch aluminumized surface, coated on the first surface to avoid second-surface images. It was designed for use

Spindler & Sauppe's adjustable mirror stand used in rear projection.

with all Selectroslide slide projectors (and all motion picture projectors) with lenses on any focal length.

A locking ball joint permits the mirror to be set at any angle from the horizontal to the vertical — and to any position in a complete circle. A 3-inch adjustment in height provides for proper alignment with projector lens. The base has mounting holes for permanent installation, if desired.

Write: Spindler & Sauppe, Inc., 1329 Grand Central Ave., Glendale, Cal. 91201 or ask our New Products Desk to refer your inquiry.

Arri with a synchronous motor

## New A/C Synchronous Motor for the Arriflex 16mm Camera

A new 110-volt, 60-cycle AC synchronous motor is now available for the Arriflex 16mm camera from the Arriflex Corporation of America. The new motor is available from all franchised Arriflex dealers.

It operates directly from 110-volt, 60-cycle AC power source; no power supply or step-down transformer system is required. Acoustical isolation of the gear train assures quiet operation and makes the motor ideally suited for use in Arri sound blimps. Incorporated in the power cable is a unit housing a capacitor and toggle switch for on/off and forward/reverse operation. The motor is capable of driving all film loads, including the M1200-ft. coaxial magazine. Price is \$325.00 user net. Write our New Products Desk for source nearest you.

## Hampton Uni-Processor for Both 16 and 35mm Color Films

An all-purpose 16 and 35mm automatic film processor is now available from Hampton Chemical & Equipment Corp. The new Hampton Uni-Processor operates under daylight conditions; Kodachrome I and II, Ektachrome ER, Anscochrome and other bases can all be processed on the same machine.

Modular construction permits rapid tank changes and easy adjustment; the Uni-Processor features simple changes in speeds, printing heads and temperatures to accommodate various films. Write Hampton Chemical & Equipment Corp. at 1275 Bloomfield Ave., Fairfield, New Jersey 07007.

## Model 705 "Multidata" Camera Has Range from 3 to 300

A 35mm intermittent motion picture camera which takes detailed pictures at speeds up to 300 fps (frames-per-second) has been announced by the General Scientific Corporation, Richmond Division. While the "Multidata" camera was primarily designed to photograph general military subjects such as missile drops, etc., the camera has obvious applications in other industry film uses.

The Model 705 captures images at high speed by means of a vibration-free mechanism; its cyclic movement is counterbalanced to vibration levels of .0001 double amplitude. The camera is priced at \$1,700.

Model 705 "Multidata" Camera

will record (at 300 fps) for as long as 50 seconds without reloading. It has a wide range: from three fps to 300 fps provided by a silicon-controlled rectifier motor speed controller.

The flexibility of its operation is notable; the desired frame rate may be dialed and changed remotely on the film run. This is a 35mm camera.

Write the New Products Desk for literature, price and source.

## Brochure on Executive

One of the best-illustrated brochures we've seen on audio equipment is available for request from the Executive Corporation, 113 N. San Marino Blvd., Beverly Hills, California. The literature gives full details on the company's automatic (cartridge film) audiovis and new "Executive" M

## MSC FILM LIBRARY SYSTEM:

(CONTINUED FROM THE PRECEDING PAGE 52)  
gether into a "rough cut." After screening and receiving final approval on this version the editor cuts the optical master into an A and B roll. As many as 15 prints are made from this master for distribution. If more prints are to be made at any one time, an internegative is printed and distribution prints made from that.

"The filing system works back from the editor," explains Robbins. "It's made as uncomplicated as possible to still be effective. One reason for the system's success so far is our willingness to make changes as the job expands. America's space program is growing and the time between orbital flights is getting shorter. More film is coming in and 'demand' for completed production is increasing. To get the job done we can't complicate the lives of our writer-editor team with a lot of unwieldy formality."

Screening prints are only as valuable as their availability to the editor when he needs them, Robbins notes. "If we make it too difficult to get a piece of library footage this would prevent effective use of the film."

He offers these suggestions to the company planning a film filing system or one with an established operation:

1. Facilitate handling, editing and storage by keeping original film and work prints in easily handled roll sizes — A-V Corporation has found that 980 feet or less is preferred.

2. Files work well when organized along functional lines of a company. MSC's system of eight major functional headings has been trimmed from over 30 original headings, and it still proves accurate for millions of feet of 16mm color film.

3. Try to avoid complicated or needless paperwork or formality that could limit the use of your film.

4. Be willing to make changes in the system when necessary.

"A file system for motion picture film is not only for large volume work," explains Robbins. "Any company or organization that shoots film should have a library, even if it is just someone's part-time responsibility. Unless you can retrieve film for future use, you might as well not file it at all. Flexibility is the key word. A company's operation should govern the system, not vice-versa." •

### *Bureau of Mines Equips Four Busses as Mobile Classrooms for Safety Education*

Modern "classrooms on wheels" are helping  
the U. S. Bureau of Mines to do its part in the  
Federal Government's nationwide effort to  
curb on-the-job accidents. Four new safety  
busses, each equipped with the latest in effec-  
tive teaching aids and supervised by an experi-  
enced mine safety instructor are now undertak-  
ing their first teaching missions in the coalfields  
of Appalachia.

Film projection equipment and other "audio-  
visual" aids complement a variety of safety  
demonstrations aboard these vehicles. Each has  
its own lighting, heating and air-conditioning  
system and produces its own current for pro-  
jection apparatus. Other features include a  
transistorized speaker system, pegboard side  
panels for safety displays and power ventilators.  
Two of the busses seat 24 miners each. The  
other two seat 16 apiece, were designed to have  
greater maneuverability in mountainous terrain.

Noting that small mines employing relatively  
few workers represent by far the largest num-  
ber of individual operations in the domestic  
mining industry, the Bureau said its experience  
shows that a worker at one of these mines has  
as much need for accident prevention instruc-  
tion as workers at much larger installations.

*A Name  
with a Purpose*

★

The objectives of Comprehensive Service  
Corporation are, as the name implies, to  
render the most comprehensive and  
satisfying service, with complete under-  
standing of the needs of all who require

**"Through-Lens" Shooting With B & S "Auriflex" Conversion**  
 ☆ Through-the-lens viewing while shooting with the Auricon Cine-Voice and Pro-600 cameras is now possible via the new "Auriflex" system developed and produced by Birns & Sawyer. The cameraman is able to see exactly what he's shooting as he shoots; he knows his precise focus and depth of field. Parallax problems are eliminated.

Auricon with Auriflex Conversion  
 Any "C" mount lens from 5.7mm to 1700mm can be used without requiring special objective, optical or masking finders.

This conversion of any Auricon camera or installation on new Auricons by Birns & Sawyer costs \$895. Direct inquiries to the company at 6424 Santa Monica Blvd., Calif. 90038. Or drop a card to our New Products Desk for referral.

Next: the Annual Buyer's Guide to Film Production Services!

## AR-2 Processing Materials

**Available for Anseochrome**  
 ☆ AR-2 processing materials for Anseochrome motion picture film will be available in October, according to the General Aniline & Film Corporation. The AR-2 process provides maximum "put thru" rates, a much shorter total process time than the previous AR-1 process according to the manufacturer. The process has 14 steps and takes only 22 minutes, wet to wet. With the emphasis on color telecasting of "hard news" and growing demand for short process times, it is expected to gain wide usage in the field.

## Gordon Enterprises Handling Fiberbilt's Camera Case Line

☆ Gordon Enterprises, North Hollywood, Calif., is now the West Coast distributor for a line of new Fiberbilt camera cases, custom-designed for professional photographic equipment. They are specially made for Arriflex, Auricon, Bell & Howell, Eclair, Mitchell, Pathe and Plaubel cameras, plus magazines and accessories. Each case is custom-designed to fit the camera.

READER NOTE: Inquiries on any products in this department may be directed to the New Products Desk, c/o BUSINESS SCREEN, 7064 Sheridan Road Bldg., Chicago, Ill. 60626 and will be promptly referred to the manufacturers on your behalf. A single airmail or first-class postcard will bring data.

# Reference Shelf

## "Film Library Catalog" Lists United Air Lines Stock Shots

☆ A very comprehensive loose-leaf "Film Library Catalog" describes the extensive stock footage scenes available from United Air Lines. Free film is provided to motion picture studios, television companies, industrial and educational film producers and their agencies. These scenes are available without charge when *United Air Lines is identified and script content approved*.

The company's film library features the DC-8, Boeing 720 and 727 jets, United's piston fleet and historical aircraft. Footage includes in-flight scenes, take-offs and landings and general airport activity. Scenes have been filmed in 35mm Eastman Color, are available in 16mm and may be ordered in color or black and white. Viewing prints will be furnished from which producers may order duplicating material.

Contact your local United Air Lines representative or the Publicity Department in these cities: New York, phone 922-5225; Chicago, phone RA 6-5500; Washington, D. C., phone RE 7-6830; and in Los Angeles, phone HU 2-3300. Mention BUSINESS SCREEN.

## Colburn Booklet for In-Plant Units Tells How to Cut Costs

☆ A new 12-page booklet "Colburn Comments on Industrial Film Cost Reduction," describes how "in plant" production units can cut costs. Both technical and non-technical tips are provided for achieving effective films at savings. Recommendations are made on specific production techniques and suggestions for avoiding hazards.

Cost-saving techniques begin with pre-production planning, the production sequence, script preparation, photography, workprint editing, voice recording, narration and final laboratory operations. Booklet is available on letterhead request from the Geo. W. Colburn Laboratory, Inc., 164 N. Wacker Drive, Chicago, Ill. 60606.

## Genarco Catalog of Equipment

☆ Genarco, Inc. has a new audiovisual equipment catalog, No. 396, which describes the company's line of 3,000-watt slide projectors and the Genarco electric slide

changer for 3 1/4" x 4" adaptable to any projector capacity. Write: Genarco, 97-04 Sutphin Blvd., N.Y. 11435 on your letter mentioning this item.

## Association Films' Catalog Lists 600 Free-Loan

☆ More than 600 free-loan motion pictures, available to groups and community organizations as well as schools are described in page 1965-66 catalog by Association Films, Inc.

The 16mm sound films offered as a public service of ican industries, associations, government agencies, foundations, international organizations cover a wide range of subjects: public affairs, sports, current events, business, industry, social problems, safety, career guidance, construction and engineering, transportation and communications.

To obtain a copy, write to Association Films, Inc., 34 Avenue, New York, N.Y. 10017. Please mention Reference Shelf source.

## Fairchild Bulletin on Cartridge Film

☆ "Film Techniques for Fairchild MoviePak Cartridge" is included in a continuing series of bulletins on 8mm cartridge equipment and techniques. Designed primarily to labs and individuals who may not be aware of various requirements for 8mm cartridge film preparation and loading as opposed to conventional 16mm requirements, the bulletin describes cartridge preparation techniques, types of film (film base, emulsion, etc.), treatment, loading, splicing, and general information for clients.

Copies are available from the Director of Communications Products & Services, Fairchild Industrial Products, 221 Fairchild Plainview, N.Y. 11803.

EDITOR'S NOTE: please mention this Reference Shelf column in BUSINESS SCREEN as the source of your request information for writing for publications or for this useful reference page.

The "boy" holding the scene slate in the picture is not an official member of a Jam Handy crew. But he did hold that slate for the JHO staff in Zululand, The Union of South Africa is one of 70 different countries in which Jam Handy production personnel have worked and one of the 30 countries in which they have operated for U. S. customers in the last two years.

For the production of any type of film anywhere, The Jam Handy Organization offers:

- ... Planners and writers who know how to express what you want to make clear to people.
- ... Production crews "who have been there" and who "know the way around"... know how to work efficiently with the wonderful, capable and talented people they can find.
- ... All of whom have the staff support of The Jam Handy Organization's specialized experience and well-credited reputation for getting the job done right - getting it done economically - and getting it done wherever it needs doing.

that's why these 70 resort/travel advertisers... along with 502 in other fields... make Modern part of their marketing plans.

Whether you're selling airline tickets or zebra skin rugs, your promotion budget has one goal: moving people to purchase. Nobody does it more spectacularly than the resort/travel industry, whose leaders come to Modern for the most efficient, economical distribution of sponsored films. And Modern comes through... as only a leader can. We place their films in the right places (TV, theatres, community groups, at airports, and even at resorts). At the right time. Before the right people. At the right price. And why not? Who else has film libraries in every major market area? With field men opening new channels, promoting your films? The latest computers and electronic equipment for instant reporting of results? Nobody else! That's why leaders of all industries depend on Modern to move people. Toward their products. How about you?

## FIFTY YEARS OF SERVICE TO THE MOTION PICTURE INDUSTRY

The Technicolor story is a narrative of science and technology, of film and dye, of lenses and machinery. It is the story of how color came to motion pictures. It is also a story about people. Looking back over our progress from the first experiments to our present eminence as the world's foremost film processor, we feel a deep and warm gratitude to the friends who have traveled with us along the way. But looking backward is a luxury we permit ourselves only once every half century. Looking forward is the Technicolor way. Our forward look is full of confidence for the industry and ourselves.

## NOW FOR TELEVISION

The Technicolor Corporation proudly begins its second half century of service to the film industry by announcing the opening at Universal City, California, of the world's most modern plant designed specifically for the processing of film for television. The most respected name in motion picture film processing is now available to all television film producers.

Color and black-and-white film for television is being processed on equipment of Technicolor design and manufacture. The laboratory operates on a round-the-clock basis five days a week to produce 35mm and 16mm prints on schedules geared to meet television air dates. Remember also, traditional Technicolor quality costs no more.

### Jan. 27 is Entry Deadline for 1966 American Film Festival

January 27, 1966 is the deadline for motion pictures and filmstrips to be submitted for jury consideration in the eighth annual American Film Festival. Entry forms must reach the host group, the Educational Film Library Association, on or before that date to be eligible for Blue Ribbon Awards.

The 1966 Festival will be held on May 11-14 at the Biltmore Hotel in New York City. All 8mm and 16mm motion pictures and 35mm filmstrips suitable for the 36 subject area-categories of the Festival and released during the calendar year of 1965 are eligible.

Pre-screenings of Festival entries will be done between February 15 and March 15 by EFLA-supervised committees consisting of a-v specialists, subject-area specialists and persons experienced in screening films for audiences in the specific categories. The Association is currently accepting applications from qualified persons who wish to serve on the 1966 pre-screening committees and on the Blue Ribbon juries which will cast the final votes for the Awards.

Official entry forms and applications for jury assignments may be obtained from the Educational Film Library Association, 250 W. 57th St., New York, N. Y. 10019.

### Van Dyke Heads N. Y. Museum of Modern Art Film Library

A noted photographer and filmmaker, Willard Van Dyke, has been appointed director of The Museum of Modern Art Film Library. Margareta Akermark, formerly in charge of the Library's circulating film program and executive secretary of the department, is now associate director.

The Museum also announced the resignation of Richard Griffith as curator of the Film Library because of ill health. Griffith served as curator for 14 years.

Many of Van Dyke's films, dating from 1939 to 1965, are in the Film Library Collection. Recently, he served as consultant to the Film Series shown from November 15-22nd and moderated a symposium, "Whither Underground?" on November 18.

Van Dyke turned from still photography to become a cameraman on the classic documentary, *The River*, in 1937. His production of *The City* in 1939, with Ralph

Steiner, brought further recognition and such films as *Ule Town* (1940) and *The Edge* (1944) consolidated his leadership among documentary film makers.

During World War II, he was chief of technical production for the Office of War Information Overseas Motion Picture Board and liaison officer between War and Hollywood script writers. Since then he has been producer-director of television, industrial and educational films for such programs as *Omnibus*, *Twentieth Century* and *Excursion* and for such sponsors as General Motors, The Ford Foundation, The Rockefeller Foundation, Associated Press and Schlumberger Ltd.

### Kodak, JM Developments Agree to Develop 8mm Optical Sound

Eastman Kodak Company and JM Developments, Inc. of New York have reached an agreement providing for the latter firm to undertake to develop a commercially acceptable system for producing optical sound tracks of good quality on Eastman Company Super-8 film and to test and release prints of the Super-8 format.

Kodak has been considering the problems involved in producing good quality optical sound tracks at a commercially acceptable price and cost per print in this new dimension. JM Developments is to design and construct equipment to produce the optical sound tracks on Super-8 film and to test and demonstrate their feasibility. Kodak will supply film for use in the development program and a Super-8 processing machine will be used, according to terms of the agreement.

A Kodak spokesman noted that JM Developments and its president, John A. Maurer, were selected "because they are recognized in the trade for their experience and expert knowledge in the field of 16mm optical sound production picture techniques."

### Three N.Y. Studios Join FPA

The following motion picture production companies have become members of the Film Producers Association of New York: Film Fair, Inc., Charles Mann, v.p.; Savage-Friedman Productions, Inc., Harold Friedman, v.p.; and Mickey Schwarz Productions, Inc., Mickey M. Schwarz, president.

# NILES AND THE SALES PROMOTION FILM

"Pattern for Progress," a 16 mm color film for American Oil Company and its Standard Oil Division. Uses a humorous twist of a midnight robbery setting to introduce the company's 1965 advertising campaign. Actual examples are shown of all of the firm's programs in the various media. Produced for showing to company distributors and dealers.

"Every Day Is Salad Day," a 16 mm color film for Kraft Foods Company. Depicts the relation of salad dressing sales to overall sales in grocery stores and supermarkets. Emphasizes the advantages of company's Profit Planner Program for retailers. Produced for showing to Kraft salesmen, grocery personnel, and college marketing classes.

"First 100 Years," a 16 mm film, in color, for the Theo Hamm Brewing Company. Dramatizes the firm's 1965 advertising and sales promotion program. Original music and choreography are used to show both promotional plans and history of company in its centennial year. Produced for showing to dealers and distributors, with separate versions for each of three geographical divisions.

**\$25,000 Grant by Movielab to SMPTE Scholarship Program**

An initial grant of \$25,000 from Movielab, Inc. has helped to launch a scholarship program for higher education in the photographic and television sciences under the auspices of the Education Committee of the Society of Motion Picture and Television Engineers. The grant was presented by Saul Jeffee, president of Movielab, New York City.

The Rochester Institute of Technology, Rochester, N. Y., was selected by the Education Committee as the institution to administer the first scholarships. Students selected for this program will study in areas of photographic science and instrumentation leading to a bachelor of science degree.

As additional contributions from the photographic and television industries expand this scholarship fund, the program is expected to broaden to encompass other phases of the communications sciences.

**Open TravelCinema Theaters Memphis, New Orleans Airports**

Travelers at Memphis and New Orleans air terminals will soon have free movie entertainment while they wait for flights, it has been announced by Association of Films. The company will provide sports, travel, news and entertainment films for two TravelCinema now under construction in airport waiting areas.

The first TravelCinema, constructed in Tucson International Airport last March, has attracted several thousand visitors. Films are shown in a large, mahogany rear-screen unit located on a mezzanine adjacent to the airport's main restaurant and cocktail lounge.

The theaters are operated by TravelCinema, of Westwood, N.

Dr. Ugo Morabito (left), commercial minister of the Italian Embassy, congratulates Rex Chaney (center), vice president, public relations, for the National Coal Assn. and Peter J. Mooney, president of Audio Productions, Inc., on winning Diploma of Honor in the recent Gold Mercury Film Festival at Venice for their documentary color film, "The Invisible Power of Coal."

Venice "Diploma of Honor" to "The Invisible Power of Coal" The only "Diploma of Honor" awarded to a U. S. motion picture at the recent "Gold Mercury" international film festival sponsored by the Venice (Italy)

Chamber of Commerce was bestowed on the National Coal Association for its color documentary, *The Invisible Power of Coal*, produced by Audio Productions, Inc., New York City. The annual competition drew

69 entries from 12 countries, including 14 films from the United States. The jury at Venice praised the coal film's technical and descriptive quality, its high production values and the effectiveness of its message, that "coal is definitely in the new wave of energy developments."

Dr. Ugo Morabito, commercial minister of the Italian Embassy, presented the award at ceremonies in Washington, D. C. to Rex Chaney, vice-president of the National Coal Association and Peter J. Mooney, president of Audio.

More than 113,000 persons had seen the film by mid-September of this year at 2,437 showings to civic clubs, other adult groups and in schools. More than 100 television stations have screened it to an estimated audience of three million.

**Sterling Movies U.S.A. Handles the Civil Engineers' Film Library** The complete American Society of Civil Engineers free-loan film library has now been made available to local sections and student chapters of the ASCE through Sterling Movies U.S.A. The film library consists of 22

titles. All of the films have special interest for civil engineers and engineering students. Subjects range from nuclear excavations to bridge planning to bridge construction. New titles are regularly added to the library, but at present the entire collection contains over 1,000 hours of film running time.

A complete listing and short description of the available free-loan films may be obtained from Sterling Movies U.S.A., 375 West 42nd Ave., New York 10022.

"Litton Reports" on Science in New 15-Minute Film Series Litton Industries is using a series of 15-minute color films released every three months, to present in-depth reports on scientific subjects. First film in the series was *Treasures in the Earth*, covering world-wide activity in recovery and development of petroleum and mineral resources beneath the earth's surface. Films in the series (*Litton Reports*) are edited to interest technical audiences and are available on loan from Litton's Department, 336 N. Foothill in Beverly Hills, Calif.

You can buy or lease Moviematics and there are 7 models available. Ask your dealer or write; **KALART/VICTOR**, PLAINVILLE, CONNECTICUT 06062, Department 1.

**"Productivity" Shows the American System at Work**

**T**HE NATIONAL TASK FORCE ON Economic Education, after reviewing the level of training in economics in the U.S. secondary schools, reported: "The understanding of the American economy developed in most high schools today is not adequate for effective citizenship." In addition to this survey, a recent Opinion Research Corporation study uncovered a considerable lack of economic knowledge among adults.

A new film, *Productivity, Key to America's Economic Growth*, offers TV stations a good opportunity to help reduce this "economic illiteracy." It gives a clear review of America's system of free enterprise from revolutionary times to the present and acquaints viewers with the vital role productivity plays in raising living standards.

**Good Use of Screen Technique**

Using animation, graphic imagery and a delightful musical score, the film dramatically shows the contrast between the austere conditions in colonial America and today's high standards. To illustrate productivity advances in America the film traces the historical development of agriculture — the inventions, scientific research and discoveries, and the tremendous increase in farm productivity. (In 1820 — 72 per cent of the labor force was engaged in agriculture. In 1962 — 7 per cent produced *more* food and fibre than our population could consume.) Also seen are advances in the shoe industry, chemicals and others.

**Compares Cost in Man-Hours**

With fascinating detail, the film compares the 1920's with today in man-hours of work involved in the purchase of a car, a refrigerator, and dress. (In 1929, it took 500 hours of work to buy a refrigerator. Today it takes 165 hours of work to buy a more efficient refrigerator-freezer.)

*Productivity* . . . was produced by Sutherland Educational Films, Inc., a division of John Sutherland Productions. Text of the film was written by the producer in collaboration with Professor John W. Kendrick, of George Washington and Connecticut Universities. The film, a pilot project for a whole series on economics that the Sloan Foundation hopes to sponsor, is being currently distributed to television stations across the country by Sterling Movies U.S.A. •

**PUSH FOR THE POSITIVE**

On the screen flashes the conference room lights and the Committee sits in the usual waiting-for-somebody-to-open Silence . . . until finally somebody clears his throat and says "you other fellows notice the guard on one of the 131A grinders looked like maybe unhooked?" And now the ends and the Happy Hour

Let's imagine we're a group of people — corporate department heads, a film committee, or whatever — and we are gathered in a room for an approval session on a new film; a script reading, in-house or answer print screening. How should we go about our evaluation?

**What Does Good?**

Very simply, we'll look for what's good. What is there in this picture that can do some good for the company? And if the film is in an interim stage, how can its strengths be bolstered? In other words, we'll concentrate on the positives, the values.

This is very hard to do. Some are abstract, require creative thought. Faults are finite, easy to find of course when we tear down someone else's work we are enabled to feel ourselves superior, which is regrettable, but human.

How can we force ourselves to see the new routine? Again, very simple — we'll screen the film twice.

First time through, we'll force ourselves honestly to look only for the good things. And when the lights come back on, we'll continue honestly with the discussion as he digs for our ideas on how a piece of material can help train, sell, to improve attitude. Fulfill whatever was the initial objective of the project.

Of course it's important that the film go out with all the inaccuracies corrected. But in too many evaluation sessions, the initial and the entire attention goes to the negatives. The contributions and values for which the money is invested will come from the positives.

So let's plan, and firmly announce the plan before the screening. Then to run the print twice, with discussion after the first running. Be firmly concerned with bringing out the values in the picture and being creative how to use them in our work toward the positive achievement of our objectives. **PUSH FOR THE POSITIVE.**

**Now! An exciting new opportunity  
to tell your PR story to  
theatre audiences across the country:**

# CAVALCADE

**Sterling Movies USA presents a new low cost  
PR film series for companies  
and organizations that have a story to tell**

CAVALCADE is a news-and-feature film series in the great tradition of the theatre newsreel. Stories in CAVALCADE serve the hearty American appetite for information on meaningful events taking place around them every day. In striking wide-screen color, CAVALCADE achieves high impact in reporting on modern science, travel, fashions, industry research and development, trends in education . . . in fact, any activity of interest to discriminating theatre audiences.

If you've got a story to tell — and who hasn't? — get in touch with us about theatre CAVALCADE. In less than a year, you can reach approximately 2,500,000 people under ideal viewing conditions. And at a cost which will surprise you.

Call or write at any of the Sterling Movies addresses below — or use our coupon so we can add up the response to this announcement.

**FILM PRODUCERS:** CAVALCADE offers you a unique opportunity to extend the reach of your clients' film programs. Discuss with us how your current projects can include a CAVALCADE segment at small additional cost.

**STERLING  
MOVIES

Famed camera pioneer Andre Debric (center) is pictured at New York showing of his new CX-16 motion picture camera, accompanied by Pierre Lhomme (left) and marketing director René Fauvel, of the Paris firm

#### Andre Debric Unveils a New 16mm Camera in New York

Andre Debric of Paris presented his new 16mm professional motion picture camera, the CX-16, to the trade press and industry leaders at the offices of the French Embassy in New York on November 10. Mr. Debric, 74, is one of the pioneers of cinematography. In collaboration with his father, Joseph, Mr. Debric was design-

ing and building motion picture cameras and printing machines as early as 1907. Since that time he has acquired 732 patents in 14 countries.

Latest in this long series of professional motion picture equipment, the CX-16 was designed to provide lightweight (15 pounds with 400 ft. magazine) and silent

operation for a wide variety of picture taking assignments. It is designed primarily for hand-held use and places a large part of its total weight on the shoulder, thus leaving the hands free for aiming and control.

More than a year of field testing in Europe by Radio-Telediffusion Francaise and private cameramen has resulted in a camera designed for highly efficient performance under all conditions of use.

The camera is distributed in the United States by Andre Debric of New York, College Point, N.Y., 11356.

Robert Harrington (right), head of Andre Debric of New York, is pictured with head of Paris firm.

#### Andrew L. Gold, Veteran of Film Making, Is Dead at 47

Andrew L. Gold, vice-president of MPO Productions and a 25-year veteran in the film industry as a director and cameraman, died October 2, 1965. He was 47.

Gold received an Academy Award in 1951 for his work on the Warner Bros. short subject *The World of Kids*. During his career he also received awards from the Freedoms Foundation, Salerno Film Festival, and the International Industrial Film Festival of New York. He directed or photographed over 200 films as well as hundreds of commercials.

Andy Gold, who was head of MPO's Special Projects Division, was probably best known throughout the motion picture industry for his work on governmental films and films for prime governmental contractors.

Gold joined MPO in 1961 after serving stints with Trans-RKO Pathe, and Warner Bros. He was an active licensed actor and radio amateur. He was a member of SDIG and IAE Local 644.

Capital Film Laboratories is coming to Miami, Florida, early next year.

Capital will become part of an increasingly important motion picture film production center that is developing in Miami.

The new Capital Film facility will be designed to serve the Florida-Caribbean-South American area.

Now the motion picture entertainment industry

—which will include the theatrical, commercial, and syndicated productions originating in the area —will have the professional services from one of the nation's top quality laboratories.

"On the scene" capability for overnight 35mm color service, combined with Capital's nationwide reputation for reliable, quality processing, gives Miami the professional "back up" needed to support its rapidly expanding motion picture industry.

 pany's New York World's Fair  
 Pavilion, won an Edinburgh Dip-  
 loma of Merit and two Italian  
 prizes — the Lion of St. Mark  
 (first prize) from the Venice  
 Children's festival and the Golden  
 Gondola of the International Com-  
 mittee for Educational and Cul-  
 tural Films.

### Honor "Clay" and "The Sea"

A Harvard University student,  
 Eliot Noyes, Jr., won an Edin-  
 burgh Diploma and the Helen  
 Grayson Award from Anney,  
 France for his creative film, *Clay*.  
 A 1964 Golden Eagle award win-  
 ner, *The Sea*, by Michael Birch  
 (for Encyclopaedia Britannica  
 Films) won the Minister's Silver

Award-winners dined at NEA headquarters before annual CINE Exhibition ceremonies. Among those at table above are Al Tyler, of AV Productions, Houston, Texas, Ralph Hoy, recently retired Alcoa executive, and producer Don Flagg, whose film "Creativity" won third prize at Rouen Film Festival.

George Stevens, Jr., director, the Motion Picture Service, U. S. Information Agency, addressed guests at this CINE Exhibition

Mrs. George Stevens, Jr., at the CINE dinner with Dr. William G. Carr, executive secretary of the National Education Association.

Cup at the Milan Maritime Fes-  
 tival and the Plaque and Special

Jury Prize at Vicenza, Italy. Film  
 Associates of California took  
 prizes at Vicenza for two 1964  
 films: *Discovering Line* was  
 awarded a plaque and "Jury Ab-  
 solute First Prize" in one cate-  
 gory and *Why Communication  
 Satellites?* received the identical  
 award in another category.

### Wins Brussels' Science Award

The Brussels' Science Festival  
 gave a first prize bronze medallion  
 and scroll to *Molecular Spectro-  
 scopy*, produced by Reid H. Ray  
 Film Industries for the CIEM  
 Study program. A sailing film, *The  
 America's Cup Races*, produced  
 by Agnew Fisher for Thomas Lip-  
 ton Ltd., won the ANEC Silver  
 Cup and honor certificate (first  
 prize) at the Cortina Sports Film  
 Competition. And an experimental  
 film on ocean surfing, *Study in  
 Wet*, produced by Homer Groen-  
 ing of Portland, Ore. received a  
 Diploma of Merit from Edinburgh.

*The Snowy Day*, made by Wes-  
 ton Woods Studio, won the Lion  
 of St. Mark first award in the  
 Children's festival in Venice this  
 (CONTINUED ON THE NEXT PAGE)

Gnoli, counselor for the Em-  
 Italy, prefaced his awards  
 tion with an inspiring sum-  
 of the film's role in modern  
 ication and its history.

THE NINTH ANNUAL San Francisco International Film Festival, held October 21-31, gives primary emphasis to the feature entertainment motion picture and to the arts and documentary phases of film production. For the past five years, however, two phases of the festival program have also recognized factual and business use of the medium.

"Film as Art" and "Film as Communication" were honored at two special events during the program and awards were presented to winners of these events at a banquet program held on Saturday evening, October 23, at the California Palace of the Legion of Honor. A reception preceding the dinner also honored 150 pre-screening jurors and members of the local consular corps. Richard Fowler, executive vice-president of Vista Productions, San Francisco, presided over the ceremonies as chairman of the Festival's "Non-Theatrical Division."

#### Nature Study Film Wins Highest Award

Top honor, the Golden Gate Award, was given to *White Throat*, produced by Dan Gibson Productions, Ltd. of Toronto, Canada. The film also received the Redwood Empire Association Award as "The Most Outstanding Foreign Entry." Both awards were presented by the dean of the San Francisco consular corps, Senor Rudolfo G. Dominguez, Consul General of Mexico.

Winners of second place Silver Awards in each category were: Category I (for industrial, government and institutional films for internal use): to Audio Productions, Inc. for the East-

## GOLDEN GATE HONORS

### Top Award to Canada's "White Throat" Silver Trophies to Audio and Vision

ern Air Lines' production, *Sunrise at Eastern*. The winner in Category II (government films for general public information) was *White South Africans*, produced by the Department of Information, Pretoria, South Africa.

Silver Award winner in Category III (films sponsored by industry, companies or com-

San Francisco cited "Sunrise at Eastern"

mercial groups for general public showing) was *Railway With a Heart of Gold*, produced by Carson Davidson Productions, New York.

Category IV (films sponsored by civic and community or other non-profit institutions for public showing) brought a Silver Award to *Point of View*, produced by Vision Associates,

Inc., New York, for the National Tuberculosis Association.

Category V (classroom films, primary, elementary) was represented by the Golden Gate Award Winner, *White Throat*. The Silver Award, in Category VI (classroom films, secondary, college) was presented to *Thousands of G*, produced by Alfa-Laval of Tumba, Sweden.

In the Film as Art competition, the Golden Gate Award went to *Moods of a City*, produced by the late Herrick L. Johnston of Los Angeles. The award was given for "the elegant, witty and resigned treatment of a depressing subject, the growing pains of Los Angeles and for a distinguished achievement in documentary film."

#### "Yeats Country" Has Subtlety and Beauty

The Silver Award went to the film *Yeats Country*, produced by Aengus Films, Ltd. of Dublin, Ireland, for the Department of Internal Affairs of that country. It is a beautiful subtle film inspired by Yeats' poetry.

The Frank Stauffacher Award was won by Philip Greene for his film, *Dorothea Lankester*, a sensitive portrayal of the art and view of this famed photographer.

A final group of prizes, totaling \$1,000 in cash (The Second Annual Harold L. Zerkbach Awards), went to three young filmmakers. Robert Nelson received a \$500 prize for his film, *Oh Dem Watermelons*; \$200 prizes went to Jean Mayo, Allan Willis and Fred Padual in this presentation made to encourage, recognize young film makers.

## ColorTran BROADS

For very wide, powerful fill light applications in motion pictures and television. Use long-life 3200°K quartz-iodine lamps on 120 or 230 volts AC or DC. Ideal for color work where

constant color temperature is required. Singles, variable focus and fixed, and fixed focus doubles (illustrated). "TV" models available for television studio installations.

Colortran meets every lighting challenge . . . with Academy Award Winning Quartz-Iodine lights.

## How do you measure quality in film transfers?

You know it when you see it! Your eye is our judge. That's why we demand perfection in clarity, definition and true grey scale. We get perfection by complete control. All of our work is done under one roof... a unique way of operating in our industry. And we feel the results are worth it. So do our clients: companies like AMERICAN MOTORS, MGM-TELESTUDIOS, ABC-TV, HEATH DE ROCHEMONT, even AMPEX. Their names

tell you a lot about our standards. But there's a better way to find out. Try us. We offer "in by 9—out by 5" processing—with your transfer jetting back the same night. And optimum quality is guaranteed (backed by two decades of expert Hollywood technology). If you believe your eyes call Acme Film Laboratories, Inc., Hollywood, 1161 No. Highland Avenue, HOLLYWOOD 4-7471; New York, 100 Madison Avenue, HA 1-3400.

Acme Film Transfers

Murray Naidich

**YOU'D BE SURPRISED AT THE VARIETY** of filmstrips we make at CFI. Our customers don't wait for that special sales meeting—they find a well-planned filmstrip solves many a problem, most any day of the week. *New client to impress? Sales force to train? Introducing a new product? Pep talk to the staff? Is a filmstrip the answer to your particular problem?* Let the experts at CFI help you decide. Bring us your material, tell us your objectives, and we'll give you our honest opinion. If a filmstrip is called for, we'll help organize your existing material for best sequence and maximum impact. We'll shoot your maps, the president's picture or other flat art up to 24" x 32" (32 field). Our art department will design and execute original frames as needed. *Want your sales message to read over a special background? Can do. We set type on cell overlays or even hand letter your logo. Need a 3-dimensional product shot? We'll photograph it on a color background right into your filmstrip. Have some transparencies you'd like to use?* We shoot originals ranging from 35mm through 8 x 10 with no intermediate reduction step to cause loss of detail or color. And at CFI, no matter what the subject, you're always sure of the quality of your filmstrip. Special lighting insures faithful color rendition with minimum contrast gain. And our unique continuous-loop printing equipment assures you absolutely uniform filmstrip prints from scratch-free negatives. *How long for a top-notch filmstrip?* Normal delivery is one week at CFI, but on rush jobs we'll work with you to meet a tighter deadline. Don't keep your problems to yourself! Call Lou Livingston at HO 2-0881.

*Your filmstrip benefits from the superior facilities and technology that have been developed to meet the high standards of the motion picture industry.*

## FILMS TO SAVE LIVES

**Damon Study of Traffic Safety Film Shows Urgent Need for More Pictures**

**T**RAFFIC ACCIDENT DEATHS and injuries have literally wiped out the population of a good-sized American city in a single year. A single holiday weekend's toll makes even the most casual casualty lists from Viet Nam look mild in comparison. Yet the majority of such accidents have been *avoidable*; their causes traceable to carelessness, moments of relaxation, too much alcohol, poor driver preparation and simple lack of courtesy.

Europe, as well as the United States, has the same problem. Wide, open freeways and tollways help but open roads don't end the menace. Safety experts believe that an intensified program of *hard-hitting education through the film medium can help*. But it will take more than those *good but too-brief* television spots—the "drive-to-live" lesson *must be delivered in depth*, beginning in the schools, carried through clubs, PTA's, union meetings, Grange halls, and into short subjects for *both* theater and television exhibition.

Members of the National Committee on Films for Safety, who have performed notable service in the U. S. through their well-conducted National Safety Film Contest, prevailed on the retired vice-president of the Automobile Safety Foundation, Norman Damon, to make an informal study of available motion pictures on traffic safety.

The purpose of this study was to determine which areas of traffic safety, in his expert opinion, were in the greatest need of more films. This winner of the 1964 Paul Hoffman Award put his 40 years of experience in the field of street and highway accident prevention into this study of a vital educational NEED.

A list of 23 subject areas for possible films has been issued by the Committee. The Damon study titles *prospective films* in such areas as *While the Public Sleeps*; *The No. 1 Traffic Accident Problem: Drinking and Driving Don't Be a Tail Gater!*; and *How to Avoid One-Car Accidents*, to name just a few.

The full list of *potential film subjects* available on letterhead request from William Englander, secretary of the National Committee on Films for Safety, 425 N. Michigan Ave., Chicago, Illinois 60611. If only a few of the urgently needed subjects hit the screen this year, the savings in lives and property would be tremendous!

## International Management Film Festival

Society for the Advancement of Management Sponsors I  
Second Annual Awards Contest and Audio-Visual Worksho

A FILM PRODUCED FOR Eastern Air Lines by Audio Productions, Inc., was awarded the Grand Prize at the second International Management Film Festival held on October 15 at the Hotel Commodore in New York. *Sunrise at Eastern* was the winner.

The Management Film Festival, which was sponsored by the Society for Advancement of Management, also presented nine other awards, in three major categories, from over 75 entries. Category A dealt with films in the community service field. Category B with management techniques and teaching films, and Category C dealt with management of a specific area of a company or organization.

### "Industrial Film At Its Best"

The grand prize winner depicts the steps taken by Eastern Air Lines to improve the services, operations, and image of its company through new equipment, new and improved facilities, improved employee morale and effective management. According to the film judges, Eastern's entry represented industrial film making at its finest.

The Festival judging panel consisted of Dr. Louis Goodman, an industrial training expert; Jack Blazier, a management engineer; Harold Klein, Executive Director

Dr. Solomon Dworkin, Bell Telephone Labs, told the Workshop "Sources and Techniques of Visual Aids for Management."

of the New York Film Production Association; Leonard Schmitt of Local 644, IATSE (Motion Picture Cameraman); Henry A. Singer, Executive Director, SAM; Peter Livingston, Film Festival Director, SAM.

### First Award Plaque Winner

Other awards presented included first prizes in each of the categories to: (Category A) *Sunrise in America*, produced by Walt Disney Productions for American Iron and Steel Institute; (Category B) *Follow the Leader*, produced by Henry Strauss Productions; Pan American World Airways and (Category C) *Sam's Secret* produced by Portafilms.

Management film awards: top left, Gerry Hotchkiss, Eastern Airlines, receives grand prize from Henry A. Singer; top right: Karl Kuechenmeier, Modern Talking Picture Service, accepts first award plaque for picture "Sam's Secret" on behalf of the producer, Portafilms. Below, left: Ed Martin, Henry Strauss & Co., receives first award plaque (Category B) Pan American film "Follow the Leader." Below, right: Edward J. L... of the American Iron & Steel Institute, receives first award in Category C for the picture, "Steel in America," produced by Walt Disney Product

# Autoload

Light trace shows what you have to do to thread old-fashioned 16mm sound projectors.

With Autoload,\* here's all you do!

The bottom picture shows you how easy it is to thread a 16mm sound projector today... if it's Autoload.™ With new Autoload you simply insert 16mm sound film in a slot and pick it up when it comes out the other end, threaded completely, automatically. Even around the soundhead, where things get tricky.

But Autoload does more. It stops on a single picture for discussion, reverses back to a scene fast, throws a brilliant picture in lighted rooms, sets up in seconds.

Ask to see the Bell & Howell Special Autoload Filmsound, the largest selling 16mm sound projector anywhere.

# Bell & Howell

...they're a little better than they really have to be

Speaking on "Producing Films for Management Education and Information" were (left) Nathan Zucker, president, Dynamic Films, Inc., and (right) Ted Westermann, eastern vice-president of The Jam Handy Organization.

**MANAGEMENT AWARDS:** (CONTINUED FROM PAGE 24) of three categories were: (Category A) *Rochester: A City of Quality*, produced by The Jam Handy Organization for the Rochester Gas & Electric Co.; (Category B) *The Pursuit of Profit*, produced by the Jam Handy Organization for Procter & Gamble; and (Category C) *Catalog Merchandising*, produced by Academy Film Productions for Montgomery Ward.

Third prize winners in each of

the three categories were: (Category A) *Pacemakers*, produced by Film Enterprises, Inc., for IBM World Trade Center; (Category B) *A Forward Look*, produced by Douglas Aircraft Co.; and (Category C) *Formula for Success*, also produced by Douglas Aircraft Co.

**Hold Discussion Workshops**

Running concurrently with the film screenings at the Festival was an Audio-Visual Workshop whose participants discussed "Visual Techniques in Management Development." "Producing Films for

Management Education and Information." "Sources and Techniques of Visual Aids for Management." "Using Motion Pictures as an Effective Management Development Technique," and "Television and Management Education."

Participating in the Workshops were John Kiermaier, President of WNBT, New York's educational TV station; Bennet H. Korn, President, Metropolitan Broadcasting Television, WNEW; Dr. Solomon Dworkin, Head of the Educational Programs and Photographic Services Department, Bell Telephone Laboratories; Raymond Dinkin,

Acting Chief, Div. of Employee Development, Social Security Administration; Harvey Plants, Communications and Training Manager, Birds Eye Division, General Foods Corp.; Dr. Emil Mees, Cornell University; William Walton, IBM, President, National Visual Presentation Association; Irene Cypher, Director of Adult Visual Education, New York University; Theodore H. Westermann, Vice-President, The Jam Handy Organization; and Nathan Zucker, President, Dynamic Films, Inc.

**Potomac Films in New Location**

Potomac Films, Inc., Washington, D. C. producers, is now occupying new quarters at 2222 Street, N.W., in the capitol city.

Bob Rennerstrom (at left above) accepts multiple awards given The Jam Handy Organization for "Rochester - A City of Quality" (2nd, Category A); and to "The Pursuit of Profit" produced for Procter & Gamble (2nd, Cat. B).

**PROJECTION FEATURES NO OTHER SYSTEM HAS!**

**HPI GROUPSHOW™ REAR PROJECTION SCREENS**

If you use rear projection just to beat room darkening problems, you're wasting 90% of your investment. Only HPI Groupshow Rear Projection Screens guarantee all these advantages . . .

- One Hand Portability—On Foot, In Car, Flying . . . exclusive folding action permits HPI Groupshow to store or go anywhere.
- No "Extra" Wide Angle Lenses—No Image Loss . . . all HPI Groupshow Screens operate with lenses in existing projectors with all the image quality of the original optical system.
- Removes Distracting Noise And Movement Of Projectors . . . standard lenses allow separation of projector from HPI Groupshow—can be hidden from audience if desired.
- Examine Images Close Up Without Shadow, Grain or Fabric Patterns . . . normal for HPI Groupshow—impossible with front projection.
- All Projected Material Accepted Without Cut-Off . . . exclusive square format of HPI Groupshow yields maximum image size for movies, film strip and slides—horizontal and vertical.

*When military or commercial laboratories want to upgrade their processors to handle new film emulsions, whom do they contact?*

**TREISE**  
*of course!*

**MODEL EKC 16/35**

Custom designed for Wilding, Inc., one of the nation's largest commercial film producers

**MODEL MT20**

A standard module processor for the U S Air Force, Edwards Air Force Base, Calif.

In order to take advantage of new film emulsions, many military and commercial laboratories have found it necessary to improve their processing equipment. Drying capabilities have to be increased and humidity controls perfected. New types of heat exchangers and precision controls are needed to accommodate the elevated temperatures. Increased processing speed calls for improved film spools and bearings. Certain emulsions require specially designed rollers and sprockets to prevent skiving.

Under these circumstances, who is usually contacted? Treise, of course! Why?—Because Treise engineers are trained in problem-solving. Our staff can rebuild your existing equipment to accommodate the newer color emulsions or to increase your production capacity. Moreover, we are equipped to repair and upgrade your present processors and to supply Treise engineered accessories and replacement parts.

**WE BUILD . . . REBUILD . . . or REPLACE!**

Treise engineers have the specialized knowledge needed to build any size of continuous lab processor . . . from small B&W models to giant 100 f.p.m. color processors . . . and to provide maximum film capacity consistent with high quality and within practicable budget limits. When you buy from Treise, you have the assurance of performance possible only from a manufacturer noted for its outstanding laboratory experience!

Shown at "Cavalcade" preview (l to r): Sterling exec. v.p. Roger Cahancy, F. S. Prather, manager, Public Affairs Programs, General Telephone & Electronics Corp.; Sophie Holme, senior vice-president Sterling Movies U.S.A.

## A "Cavalcade" Series for Movie-Goers

A NEW SERIES of two-minute featurettes for theatrical use was premiered last month in New York by Sterling Movies U.S.A. The series is designed to follow the format of the old theatre newsreel, familiar to most movie-goers but increasingly missing from today's programming.

Thus *Cavalcade*, the overall title of the series, will try to serve both the theatre-goers appetite for newsworthy reports of interesting

developments in today's world, at the same time that it offers business and other organizations a much-needed public relations exposure with large theatre audiences.

The first *Cavalcade* release contained five stories — on executive air travel (Lear Jet), modern community living (Gulf American Land), home decorations (Barwick Mills), engagement customs (Sears Roebuck) and foreign trav-

el (South Africa). Each story ran two minutes and all were narrated by Jim Ameche.

Participation in *Cavalcade* follows an established Sterling Movies U.S.A. pattern, in which Sterling absorbs the cost of all post-filming production, provides the

"Chuck" Dolan describes series

talent and the release prints. This leaves only the cost of original footage and distribution for participants to pick up.

"*Cavalcade* participants can, and frequently will, arrange with their own film producers to provide us with the original color footage," Charles F. Dolan, president of Sterling, said at the premiere,

"and we expect to solicit producers ourselves since *Cavalcade* represents a new business opportunity for them, too."

National distribution chain and independent theatres is already under way. Sterling expects to complete the distribution assignment of 500 boxes in "first-run" theatres in less than a year. By that time, second and third *Cavalcade* releases will be completed and in distribution.

"Sterling Movies U.S.A. has been in business for years," Mr. Dolan said. "I strongly believed that the ground story on American business life needs to be exposed continuously by our public communications outlets. Our free entertainment system is as basic to our national welfare as human rights are to individuals. The information contained in *Cavalcade* will go far beyond contributing to a richer appreciation of the investment technology and research which American business' investment in all our futures."

## SEE THE U. S. A.

A Colorful New Film Visits Festivals All Over America

**T**HE UNITED STATES Travel Service has introduced a new documentary film, *Festival USA-66* which will have a major role in the Service's 1966 campaign to attract foreign tourists to the U.S.

Produced by Audio Productions Inc., *Festival USA-66* will be made available for distribution abroad for showings to prospective U.S. visitors as part of an extensive advertising and promotional campaign carrying out the President's renewed proclamation designating 1966 "a year in which all persons are especially invited to see the United States."

Prints Available from Audio

USTS Director John Black explained at a recent New York preview that the film would be made available to travel agencies, airlines and other interested parties for foreign showing by Audio Productions, which will also mount a distribution campaign throughout the United States.

The 15-minute color compendium of typical American festivals eliminates the language difficulty in foreign showings by using no narration. Twenty-four different

Indian ritual in "Festival USA"

festivals are covered, from Kamehameha Day in Hawaii to the Seafood Festival in Rockland, Maine, and the flavor of each event is realized in an average of 30 seconds per sequence.

Tall Timber and Zany Boating

One highlight, the Oregon Timber Festival, evokes a strong nostalgia for pioneer America in its Bunyan-like lumbermen felling huge logs and racing down hundred-foot tall trees. Festival zaniness is capsuled in the Seattle Sea Fair, half a minute of speed boats and planes scurrying in all directions for a wild Keystone Kops effect.

Others include the Greenwich Village outdoor art festival and

Scenes from 24 festivals around U.S.A. highlight this touristic

the Berkshire Music Festival in Lenox, Mass., which captures the spiritual quality of our festivals.

fine film writing

## Slides made while you wait. 55¢.

While you wait 10 seconds or 2 minutes.

10 seconds for a line copy slide.

2 minutes for a continuous tone slide.

It's done, as you might expect, with a Polaroid Land camera and Polaroid Land transparency film.

And it's about as easy as taking Polaroid Land snapshots. So, anybody can do it.

All you do is snap the shutter. Pull

the tab. Wait for your picture. Dip it in a hardening solution. Slip it into a snap-together plastic frame. And you've got a slide ready for immediate projection.

The type of film you use depends on the particular kind of slide you're making. To make a line copy slide like you see here, you want to use PolaLine Type 146-L transparency film. It's especially for line copy work.

For continuous tone work, there is

Type 46-L Polaroid Land Projection Film.

Both kinds of film make slides that fit any standard lantern slide projector. Both can be used in any Polaroid Land camera that takes Series 40 film, except for the J-66.

Both films make slides that are sharp, brilliant, and free of grain.

And they do it for 1/3 what you pay for conventional slides.

Or just about 55¢.

**Polaroid Land Transparency Film**

THE EDITORIAL VIEWPOINT

## TIME MARCHES INTO AUDIOVISUALS

**E**VENTS OF SIGNIFICANCE in the broad news spectrum of factual film production and use included such noteworthy items as the TIME announcement of its new, broad involvement in audiovisual education and training activities (with General Electric and textbook publisher Silver Burdett); the \$100,000 grant of the National Council on the Arts for a preliminary study of a proposed American film institute; and the unveiling of the new laser technique for three dimensional photography in Chicago. The year was ending on a surge of activity.

\* \* \*

### *Time, Inc. Joins With General Electric, Silver-Burdett in an Educational Program*

☆ Recognition of the top priorities now given to education and training in the U. S. was further emphasized this month as Time, Inc., Silver-Burdett and the General Electric Company announced plans for joint ventures in this field. The program, as disclosed in a recent editorial foreword in TIME magazine, includes development of a wide range of audiovisual media.

\* \* \*

### *National Council on the Arts Allocates \$100,000 for Study of a U. S. Film Institute*

☆ The National Council on the Arts has allocated \$100,000 for a study of the possibilities of an American film institute to provide professional film training for young people. The council has also earmarked \$500,000 as a matching grant to help finance such an institute if the study should indicate its need.

\* \* \*

### *Laser Beams Provide Amazing Realism in Exhibit of New 3-D Photographic Method*

A major attraction at the recent National Electronics conference in Chicago was the University of Michigan exhibit of a new three-dimensional photographic process. A flat (CONTINUED ON THE FOLLOWING PAGE 33)

## EDITORIAL VIEWPOINT:

(CONTINUED FROM THE PRECEDING PAGE 32)  
Graphic plate shown in the exhibit was created by a laser beam and was so utterly clear that it permitted viewers to see behind objects in the photograph.

**You Can See Behind Chessmen on Board**  
The scene showed a chess board, with five chessmen on it, arranged so that some of the chessmen were behind others. By moving his head from side to side the viewer could see behind the chessmen, reconstructing pieces just as if they were real chess pieces. The new three-dimensional process was developed by Emmett N. Leith and Juris J. J. J. of the University of Michigan. It is considered to represent the first radical change in optical techniques in decades.

The new process uses a camera without a lens. A laser beam is used and the light reflected themselves are recorded on the plate. The laser emits a beam of coherent light in which all waves travel in the same direction. Ordinary lighting sources emit irregular waves. The beam of coherent light is directed at the object to be photographed the light reflected from the object bounces back to a simple lens that has only a shutter.

**Negative Smudges Become Optical Code**  
The negative produced in this way is smudged, has no recognizable image. But the smudges represent an optical code which projects all the information about the object including that which is not seen by an ordinary camera. When a laser beam is shown through the negative, it liberates the "frozen" light and the viewer then sees a three-dimensional picture which changes as he moves.

\* \* \*

**Veteran Arthur Miller Is Elected**  
President of Cinema Laboratories Association  
Congratulations are due members of the Cinema Laboratories Association, Inc. for the election of Arthur J. Miller, vice-president of Du-Art Film Laboratories of New York as their 1965-66 president. Arthur Miller has been active in the film industry since 1922 and is a 40-year veteran of the film processing

Two other new officers join Miller following the election which took place in November at the association's annual Fall meeting during the SMPTE Convention in Montreal. Alfred W. Truch, president of Capital Film Laboratories, Washington, D. C., is now vice-president; Robert A. Colburn, vice-president of W. Colburn Laboratory, of Chicago, was elected treasurer. Neal Keehn, national director of sales for DeLuxe-General Laboratories, continues as secretary of the ACL and Preston Bergin, of Washington, D. C., is the group's executive secretary.

## Change films in 2 seconds flat!

Read how Fairchild's amazing new MoviePak cartridge multiplies the value of your entire sound film program

At last you can show any film, anywhere, anytime—without threading, film handling or rewinding.

Simply select the Fairchild MoviePak sound film cartridge you want, snap it into the Mark IV rear-screen projector, and play. In broad daylight. In a prospect's office. In showrooms. At trade shows. On sales counters. In training classes. In the boardroom. To switch instantly to another film, just snap out one cartridge, snap in another.

Every film you have can be easily converted to 8mm and threaded into the MoviePak cartridge. Duplicate prints are less expensive than 16mm, too. Now you can unleash the full power of your entire sound film program.

The Fairchild Mark IV projector is portable, weighs only 20 pounds and is always ready for action. No warm-up time required.

For display use, it will run without supervision, repeating automatically. It takes up to 22 minutes of film with a single MoviePak.

To see for yourself, just send in the coupon.

**THE EDITORIAL VIEWPOINT:**

(CONTINUED FROM THE PRECEDING PAGE 33)  
 Academy of Underwater Photographers. Initial results indicate that supplementary lighting is necessary to retain the warm colors of the spectrum as depth increases. Yellow-green tones retain visibility longer, according to Brooks.

"The critical part of the study is in determining the exact spectral response to depth and a method for correction of red, orange, yellow, green, and blue without artificial light. To a limited degree, some correction can be made on the first 20 feet," Brooks noted.

With increasing interest in oceanography, both by the military and for its economic implications, underwater filming is expected to greatly increase in the years ahead. A full report on the exposure tests will be made in a technical paper to be presented before the Academy in February.

**70th Congress of American Industry, Held in New York, Offers Ideas for Needed Films**

☆ From December 1st through the 3rd, some 1,500 delegates from American business firms gathered for the 70th Congress of American Industry, hosted by their National Association of Manufacturers at the Waldorf-Astoria in New York City.

There's an aspect of real challenge in the theme of this meeting: "Emerging Opportunities in an Age of Ferment." The opening ses-

Sir Arthur Elton (right), president of the Scientific Film Association in England, was recent visitor to the U.S. Sir Arthur is pictured during discussion of film technique with Steve Knudsen, manager of Iowa State University film production unit during brief visit to Ames. He was also an honored guest of the Chicago Film Council and attended CINE Exhibition in Washington, D.C.

sion took up the international aspects of monetary and economic ferment; featured on the second day was a topic on which all too-few (if any) authoritative motion pictures exist: "New Wealth From the Sea." And there are other film themes in subsequent panel and other discussion topics: unrest on college and university campuses, solutions to employment problems; and steps toward solving the high school dropout problem.

This department is indebted to the NAM for its aid in sending us to the Sixth International

Industrial Film Festival at Rouen, France. Association is the official U. S. clearinghouse for American entries into this significant and authoritative showcase of the very best in industrial film making throughout the world.

\* \* \*

**Canada's International "Expo 67" Begins to Take Shape on that Island in St. Lawrence**

L'envoi New York, hail Montreal! A scene on Flushing Meadows returns to the park lawns, new pavilions begin to rise on island in the St. Lawrence where the Universal and International Exhibition "EXPO 67," will be held from April 27 to October 27, 1967. This is the first of "first category" world exhibition to be held in the Western Hemisphere. It will commemorate 100 years of Canadian confederation and the 325th anniversary of the founding of Montreal.

The last exposition to be given "official recognition" by the strong International Bureau of Exhibitions was held in Brussels in 1958. The Seattle Fair, in 1962, had been approved in a limited category. New York World Fair never received the approval of a powerful international group and ultimately failed to erect Pavilions.

An estimated 80 nations are expected to participate at Montreal and some 45 industrial corporations have indicated that they will exhibit. Films for "EXPO 67" are already in planning and production stages and technical experts as Crawleys and the Reevesour

\* \* \*

an Petroleum Institute Premieres an Energy's Dynamic Role in Life "Time to Live!", a new film which tells the of the dynamic role that energy plays in a life, was given a premiere showing in New York on November 3 before an audience of businessmen, educators and the press. Frank N. Kard, president of the American Petroleum Institute, introduced the picture, which was produced by the Institute.

The 28½-minute color production depicts

the energy revolution that has swept this country since the first oil well was drilled a little over a century ago. In two fast-paced montage sequences, energy is shown at work all around us, three-quarters of it from oil and gas.

The film portrays the often-disappointing but never-ending search for petroleum to supply the hundreds of millions of gallons consumed daily.

It also points out how energy has freed Americans from the drudgery of the past and given them time for more leisure and more education.

Produced for the API by John Bransby Productions, "Time to Live!" has an original musical score.

The film is being distributed by United World Films, Inc. A ten-minute version for theatres is now in preparation.

\* \* \*

**1966 Will Mark 20th Anniversary Year for the Calvin Motion Picture Workshop**

☆ It doesn't seem possible but 1966 will mark the 20th anniversary year of the effective, highly-successful Calvin Motion Picture Workshops. On February 7, 8, and 9, some hundreds of earnest "learners" of film production and processing techniques will gather on the stages of the Calvin Productions in Kansas City for another program replete with information, film showings, and talks by authoritative personalities.

Topics already released include: film pre-planning, writing, studio and location lighting,

Among principals at premiere of "Time to Live" were Kerryn King, Texaco, Inc. (left) and the president of the American Petroleum Institute, Frank N. Kard, whose group sponsored picture.

studio and location photography, sets and properties, camera stocks, special effects, the role of the director, the editing process, film music, art and animation, studio and location recording techniques, lab operations and the finished print.

Sound like a short course in film production? That's what these Workshops aim to give those who are fortunate to attend; at no cost other than living expense while you're in town!

(CONTINUED FROM THE PRECEDING PAGE 35)  
health problems have been presented to a cross-section of the nation's community leadership at major meetings using a full complement of audiovisuals.

The National Commission on Community Health Services used film, integrated sound tape and slides at a series of meetings held in San Francisco, Chicago, Atlanta and Philadelphia to explain the results of the study to these leader groups. Nicholas C. Read of Potomac Films, Washington, D. C. produced the show. Included was a 16-minute filmograph, *The Task We Face*, which traced the historic development of community health services.

An eight-minute slide presentation introduced members of the Commission; and a special 15-minute sound-slide production told *The Springfield Story*, which demonstrates how one of the 21 communities participating in the "self study" portion of the Commission's program went about analysing its own health needs and initiated action to carry them out in this Illinois city.

#### *Notable Camera Work on New Steel Film*

*Credited to Reid Ray's Production Team*

☆ The new American Iron and Steel Institute motion picture, *Steel and America*, was previewed in the previous issue of BUSINESS SCREEN. But what the reviewer didn't mention was those superb sequences filmed in the Chicagoland area by crews under the direction of Reid H. Ray, president of Reid H. Ray Film Industries, assigned to this project by producer Walt Disney.

More than a week was spent filming action in Chicago plants early this year. Footage was shot at the structural and plate mills of U. S. Steel; at the seamless pipe, galvanized and tin plate mills of The Youngstown Sheet & Tube Company; and in the open hearth steel-making plant and slabbing mill of Inland Steel.

Scenes of iron ore mining and shipping were filmed the preceding fall and these include ore loading in the Chicago district. Credit the Ray group with superb technical quality throughout these important sequences of the film. •

## Trends in the BUSINESS of Audiovisuals

Lipsner-Smith Now Sole Owner of Eastern Effects, New York

The Lipsner-Smith Corporation, owner of 50% of Eastern Effects, Inc., New York-based optical effects house, has purchased the remaining 50% of the company from Maurice Levy and is now the sole owner.

Operating personnel will remain unchanged. New officers elected to serve as vice-presidents include, Rodney Friedson, general manager; Lester Price, production; and Ed Berger, quality control. Jerry Lipsner continues as executive vice-president and sales manager.

While Levy is no longer connected with Eastern Effects, he will be available as a special consultant. The company also plans to offer the new EMMEL camera to producers on a lease basis. This new camera eliminates optical work, artwork, tedious panning and permits intricate zooms and pans to be done automatically by prior camera adjustments. The EMMEL recently received a CLIO Technical Achievement Award presented by the Film Producers Association of New York.

### General Aniline Earnings Set Record for First Nine Months

Third-quarter earnings of General Aniline & Film Corporation were the highest for any quarter in the company's history, lifting earnings for the first nine months of 1965 to a record. Consolidated net income for the third quarter reached \$3,777,000 or 32¢ per common share (up \$630,000 from the same period in 1964).

Net income for the first nine months climbed to \$10,117,000 equal to 85¢ per common share, an increase of 29 per cent over the \$7,873,000 for the same period

last year. Increased sales income in all of GAF's major product lines, including photographic products and Ozalid diazo reproduction lines, as well as improvement in manufacturing costs, were behind the record net income according to Dr. Jesse Werner, chairman and president of GAF.

### Technicolor Reports Slightly Lower Earnings for 39 Weeks

Earnings of Technicolor, Inc. and its wholly-owned subsidiaries were off slightly for the first 39 weeks of 1965. Earnings for the 1965 period were \$3,684,601 or \$1.10 per share as compared to \$3,725,338 and \$1.18 per share for the same period last year.

Figures for the period have been restated to include operations for the period in which companies were acquired in 1964 and 1965.

### Wilding Net Loss is \$380,280 in First Nine Months of Year

Wilding, Inc. reported net sales of \$3,283,079 and a net profit of only \$5,918 or 2¢ per share for the third quarter ended September 30, 1965. Net sales of \$8,081,169 and a net loss of \$380,280 or 91¢ per share were reported for the first nine months of this year. The stock is traded over-the counter.

### Electro-Netic Company Acquires the Radiant Manufacturing Corp.

Radiant Manufacturing Corp., projection screen manufacturer widely known throughout the a-v industry and a former subsidiary of the U. S. Hoffman Machinery Corp., has been acquired by Electro-Netic, makers of magnetic laminations, television tuners and other items, headed by Cary Wang.

Waiting airline passengers view films in new free skyport cinema operated by Modern Talking Picture Service at Minneapolis-St. Paul Int'l airport.

### Modern Opens Skyport Theater at the Twin Cities' Int'l Airport

☆ A new Free Skyport Cinema for waiting passengers in the Minneapolis-St. Paul International Airport was opened in late October. William M. Oard, vice-president of Modern Talking Picture Service, Inc., operators of the facility, helped inaugurate the new theater with representatives of the terminal and first guests from among waiting air travelers.

The daylighted theater features free travelogs, sports films, business information and other public relations films sponsored by various companies and associations. It seats 40 persons and is open from 9 a.m. to 8 p.m. daily.

Oard noted that the Twin Cities cinema is patterned after the highly-successful unit which has been operated by Modern at the Greater Cincinnati Airport for more than a year. Studies the company made show that airport passengers spend an average of one hour and

five minutes viewing free films and that 70% of these out-bound travelers spend a portion of their waiting time in the free cinema. •

### Parthenon Acquires the Stock of Raphael G. Wolff Studios

☆ Executive producer Charles Palmer of Parthenon Pictures, Hollywood, has acquired the capital stock of Raphael G. Wolff Studios, Inc., with stage and production quarters at 1714 N. Wilton Place in that city. The company will be operated in conjunction with the Parthenon business-film group.

Wolf retired in 1961, selling his interest to Canadian industrialist William S. Gerrie, who has joined v.p. Norman Glazer in charge of corporate marketing for the Parthenon - Datafilms - Wolff group. The Wolff acquisition is expected to accelerate a program initiated last year to put the film medium into related but new fields of business. •

# Alliance for Progress at Work

First U. S. State Department Film on Foreign Relations Shows "The Unending Struggle" to Aid People of Ecuador

WHEN JUDGES AT THE recent San Francisco International Festival chose *The Unending Struggle* as one of the best American government films for the general public, their decision called attention to an interesting development: the return of the U. S. Department of State to the film field.

Not since 1948 has the Department sponsored a new film for the American public. Even before 1948 the Department made only a few films, largely in connection with the second world war effort, in the best recollection of present officials. With the release in June of *The Unending Struggle* produced for the Department by Vision Associates, the drought ended, and the State Department is now planning further films for the future.

## Response to Public's Interest

What brought State back into the film field is "a long delayed effort to respond more effectively to mounting public interest in our foreign relations," according to W. Blair, Jr., Director of State's Office of Media Services, which supervised production of the film. In the space of one generation, public interest in foreign affairs and foreign policy matters on the part of the American general public has increased geometrically," Blair says. "Until fairly recently, however, we were still trying to respond to this interest, and to the numerous public demands on us for information, with the tools of an earlier day — the press release, the boilerplate letter, and the banal speech.

While these things are still important, they are no longer adequate by themselves to meet the demand. Accordingly, in recent years, we have been trying to modernize our efforts, and to use newer media like television and films, as additional means of communication with the public."

## Picture Has Three Objectives

*The Unending Struggle* was produced for three purposes, the official said. A half-hour black-and-white documentary photographed entirely in Ecuador, it was planned first of all to illustrate graphically for a wide audience in this

country the nature of our national interests abroad, and the different ways in which U. S. representatives abroad work to advance those interests. For this general audience, it is currently being shown widely on television and distributed non-theatrically by the Department of State.

The film is also being used to help recruitment for the U. S. Foreign Service, as well as in training

Indian mother and child shown in film "The Unending Struggle."

and orientation programs of the military services and of various government agencies involved in foreign affairs.

## The People Behind the Film

Writer-director of the film was Lee R. Bobker, president of Vision Associates, with Irving L. Oshman (editor of *David and Lisa*) as editor, and Helen R. Kristt as executive producer. The film includes a number of documentary sequences probably never before photographed, such as one in which the American Ambassador in Ecuador discusses Alliance for Progress problems in the country with the ruling military junta.

In other unusual sequences, a young American Foreign Service officer is seen looking into communist propaganda among Ecuadorian university students, and two U. S. labor attaches are shown working among banana loaders at the port of Guayaquil.

As most of the work of the Americans who figure in the film is conducted in Spanish, Vision used two narrators — Alexander Scourby for the narration, and Ralph Comargo for a running translation of the live Spanish dialogue.

*The Unending Struggle* is an excellent beginning to a most valuable series of public service films

Children of Ecuador in documentary film: "The Unending Struggle."

by the State Department. Particularly impressive were scenes showing America's real shirt-sleeve diplomats — of labor union, farm, and teaching backgrounds—doing their daily jobs amongst the people of Ecuador. It is a picture that is not often presented by other media.

Vision's crew, under the direction of Lee R. Bobker, covered the entire country from the jungles of Oriente to Guayaquil, Quito and such upland villages as Cayambe. (Vision Associates, by the way, has filmed in 22 countries around the world these past 18 months.

## 300 Prints Being Kept Busy

The Department of State has been highly pleased with public reaction to the film to date, which is keeping its 300 loan prints busy and producing sales of additional prints through Precision Film Laboratories in New York. The Department has now contracted with Vision for a second film, scheduled for release next summer.

which will be an authoritative statement on U. S. foreign policy, in which the Secretary of State and other principal officers of the Department are expected to appear.

While there is a strong possibility that the second film, because of its subject matter, may be given some distribution abroad as well as at home, neither film is intended for overseas audiences. "The information job overseas is the mission of the U. S. Information Agency," Blair comments. "USIA's films and other materials are made specifically for foreign audiences, and are distributed exclusively abroad. Our job is to help keep Americans informed about their foreign policy. Both our films are being made for the American audience."

\* \* \*

Ed. Note: Inquiries concerning the film should be addressed to the Office of Media Services, Room 4831, Department of State, Washington, D. C. 20520.

Vision Associates' cameraman Ray Long checks light for a scene being filmed for State Department film on its people, programs in Ecuador.

the boys. We must above all... something he said — make... tive decisions, and have... that communications skill... positive value in today's... ment picture.

Program committeeman... Rice (Norton Company) ... together for the meeting... perts in the use of the fun... als of audio-visual commu... Alexander Nesbitt, Chairm...

Harold Read, Liberty Mutual Insurance Company, was program chairman for IAVA's fall meeting.

Visual Design and Director of Graduate Program, Southwestern Massachusetts Technical Institute; Domenico Mortellito, Design Advisor and Chairman of the Upper Color Council, The DuPont Company; Tony Nappi, Creative Director; Myron Helfgott and Partners; script writer Edward Knowlton.

Mr. Nesbitt held his audience entranced with an illustrated talk on the history of typography and its uses in today's visual communications. He demonstrated the importance of the use of appropriate type to represent visually the type of a company. Saul Bass, IAVA had done outstanding work with typography on the screen, and exact styles — often from International

Ben Schultz, Technifax, illustrated his talk on "putting life in written visuals" through design.

## IAVA Studies "Anatomy of Communications"

Industrial Audio-Visual Association's Annual Fall Meeting in Boston Reviews Latest in Tools and Techniques; Hear Experts on Fundamentals of the Medium

**A** NEW LOOK at the Anatomy of Communications" headlined the activities of the Annual Fall Meeting of the Industrial Audio-Visual Association, held this year at the Sheraton-Boston Hotel in Boston, October 19-21.

Some 60 members — audio-visual communications managers of

major American business concerns — were on hand opening day to take part in a stimulating program constructed by Program Chairman Harold Read (Liberty Mutual Insurance Company) and his committee of active Boston area IAVA members.

Seven new members joined the

Association at this meeting. As introduced by Membership Chairman Gordon Butler (Dixie Cup Div. American Can Co.) they were: Thaddeus M. Bonus, Manager, Internal Communications, Xerox Corp.; Leo Coyle, Information Manager, Ohio Bell Telephone Co.; William Crowley, Production Manager, Public Relations Department, Monsanto Chemical Co.; James L. Fagan, Manager, Audio-Visual Communications, Atlantic Refining Co.; Rex E. Ingersoll, Creative Director, Developmental Projects, The Boeing Company; Robert E. Parker, Asst. Director, Audio-Visual Department, Deere & Co.; and Robert F. Unrath, Port Promotion Manager, The Port of New York Authority.

### Intern Program Will Continue

It was announced that IAVA's program of student memberships, which has been successfully undertaken by the Central Region, will be continued. It is hoped that this program will be extended to other regions.

After opening remarks by IAVA president, Harold Butler (Honeywell, Inc.), keynote speaker Gurth Abererombie, Associate Dean of Northeastern University School of Continued Education, set the stage for the meeting with an address on *A Paradigm of Communications Theory — The Dilemma of Choice, Chance and Change*. The burden of his remarks was that *chance* is not something to lean on, but something to be quickly seized when it comes. We live in a world of *change*, he said, but we can control these changes and make them work for us. *Choice* is the vital element that separates the men from

Modern's president, Carl Lenz, used "Stop Light" presentation to show film's status as a recognized medium.

Dean Gurth Abererombie, Northeastern University, delivered keynote speech of fall meeting.

Alexander Nesbitt illustrated his talk on "putting life in written visuals" through design.

Dr. Gaylen Kelly, Boston University, told "how industry can help the field of education"

Members of IAVA pictured at Boston (left to right): Robert Parker (Dress & Company), Leo Coule (Ohio Bell Telephone Company); Rex Ingersoll (The Boeing Company), and James L. Lagan (Atlantic Refining Company). Three other members were also accepted

— to fit different moods.

Nesbitt urged visual communicators not to be modish — like women's fashions; communications must be more stable. Other guidelines: Don't use fussy types that are in people's hair. "Neutral" types, like Caslon, are excellent for promotion work. Typefaces such as Ultra Bodoni, fine for the printed page, lose effectiveness and clarity on the screen.

**Color's Influence on Buying**

Mr. Mortellito said that color has a great importance in creating a mood. It can influence people to buy, irritate or soothe, be repulsive or nauseous. We are now going from a gray age to a color age, he said, and we will see this in hundreds of ways in the near future.

Mr. Nappi's subject was "how to arrive at good concepts in advertising and visual communications." His steps along this road are: (1) examine the purpose, (2) find a relevant difference, (3) be simple, (4) be dramatic, and if the previous points are adhered to, (5) don't be afraid to be adventurous.

Mr. Knowlton described the

function of a film script writer as opposed to any competent copy writer. He explained how to get the most value out of a script writer — by setting financial parameters, supplying background material early, and delegating one man, rather than a whole committee, to work with the writer.

**Demonstrate Tools and Media**

Equipment and materials demonstrations at the meeting included those of Robert Weisgerber and Bernard Drayton of Advance Film Reproductions, who showed 8mm reproductions in color, taken from a TV tube; David Lutyens, Ealing Corp., who screened his company's single-concept films; Walter Hamton, Hamton Engineering, with a versatile slide programmer; Peter Hldau, with a remarkable demonstration of the new quiet self-blinded Arriflex 16BL motion picture camera; and Ben Schultz, Technifax Corp., who showed that the overhead projector is now more than an amateur gadget but a most versatile tool for professional communicators.

The overhead projector also received accolades from one of another group of speakers gathered together by Program Committee-

(CONTINUED ON PAGE 100)

Frank Stedronsky, A. B. Dick Company member, speaks up at the Topical Go-Round session.

Bill Connelly, Union Carbide Plastics, was moderator for the Topical Go-Round session for members.

Tom Nappi, Mylon Holtzoff & Partners, gave his views on making visuals meaningful.

Lawrence Warneck, Ind. Bell Co. member, demonstrated "The Great Fiction Package."

Harold Dutka, president of IAVA, sets before members a

David Lutyens, of Ealing Corp., reviewed some of his company's single-concept 8mm film subjects.

Peter Hldau, Arriflex Corporation of America, showed group the new Arriflex 16BL, self-blinded camera.

Tom: "I saw the wires running along the river. Do you think we could have electric lights?"

"Where goes the family today? It isn't easy to look ahead . . . see strength in individuality . . ."

## Anniversary Film Looks to Human Values

Portland General Electric Company Observes a 75th Birthday of Service With Different Kind of Anniversary Film: Showing Inner Values of the Individual

THE CORPORATE ANNIVERSARY is often well-observed through the medium of a motion picture which brings employees, customers and shareholders a review of company history, updating progress, products and policies. But the Portland General Electric Company, observing its 75th year of service to the people of Oregon, merits special attention for an anniversary, *doesn't* show long sequences on its new generators, *doesn't* have a sequence on how "the West was won" and turns, instead, to the story of two families, past and present, as their lives reflect the changing times from 1889 to 1965.

Portland GE's 28-minute color film, *The Constant Heart*, was produced by Fred A. Niles Communications Centers, Inc. Because this investor-owned utility is one of the community's leaders in effecting change and progress, the film became a most appropriate expression of its point of view about change. It was created for audiences of opinion leaders and has been well accepted by such groups, showing in color on regional television and attaining wide distribution to audiences throughout PGE's 30 square mile service area.

Fred Kempe, assistant vice-president in charge of advertising and public relations for the utility company, supervised this highly-creative effort. *The Constant Heart's* "families" of yesterday and today might well be your neighbors. They adjust and adapt to the exigen-

"Here is change . . . but a curious sort of continuity, too . . . for this is a building block of civilization. Is he civilized? Born in the darkness of a jungle, would he grow up to study law? Do centuries really make that much of a difference?"

Niles' vice-president Lionel Grover discusses scene in "The Constant Heart" with Fred Kempe, assistant vice-president for advertising and public relations at Portland General Electric.

cies of the late '90's, meet the problems of the depression days of the 30's and, as they enter the post-war decades, their values remain constant but today's patterns of women's influence emerges, the children develop wider latitude in their activities.

This picture deals, primarily, with the changes that occur in the outer fabric of life — boom or bust — war and peace. But it also seeks to show the *inner values* of the individual — love and faith, trust and hope, giving and getting — making something of one's self and working toward a better life. These, the film shows, are the human values that in the midst of change are constant. These are the values that forge dreams into reality.

Illustrating this "constancy of values through change" the same cast is used through the three main periods of the story: 1889, 1933 and contemporary. The periods were chosen with good reason: 1889 was the birth date of Portland General Electric; 1933 was a time of major change; modern times provide a frame of reference for "what is to come."

Lionel Grover, Niles' vice-president and writer of the script, took special care in research of set dressing, props and story elements. Casting is excellent, with special emphasis on the young people in the picture. The net result: viewer reaction has been most rewarding. •

## TV in EDUCATION

Definitive Bell System Film Shows How ETV Helps Maintain Top-Quality Teaching

NEWS REPORTS TELL THE STORY of progress in educational television—ETV. Daline, Puerto Rico. The Department of Education has placed an order for nearly 1,800 educational TV sets to improve the quality of education in that island commonwealth. Daline, Dade County, Florida. More than 23,000 Catholic school pupils began receiving classroom instruction in November as Miami became the nation's first Catholic Diocese to use the form of multiple-channel educational broadcasting. Daline: New York City. The Roman Catholic Archdiocese of New York will utilize one of the largest educational television systems in the United States . . .

Spurring the nation's schools into broader thinking about ETV in recent years has been a 27½-minute color motion picture, sponsored by the Bell System. *Television in Education*, produced by Parthenon Pictures, has provided U. S. educators with a documentary survey on film, of how the television medium is being used in pioneering ETV installations.

### On-the-Scene Record of Installations

Filmed and recorded in actual classrooms and ETV studios in schools, colleges and broadcasting stations from South Carolina to California, it shows how this medium is being used to maintain top-quality instruction despite explosions in school population and new information. It is completely non-commercial.

But the film has also provided the company's representatives with positive answers to the many questions asked of them. With this picture, the Bell System has prepared its people with a complete "package" which has been supplemented by a second Parthenon-produced film, *Communications Services for ETV*. This film provides specific data on equipment.

### Helpful Guidance for School Committees

*Television in Education* helps the school committees considering this subject to know what instructional TV is, how it is integrated

"Television in Education" asks "will you pay attention to a teacher on a tube?" And "they've been doing it all their short lives"

the curriculum; how the lessons are created and distributed; the relationship between the teacher in the classroom and the teacher on television; and how young pupils react to television instruction.

For educators who cannot visit ETV installations for background, the picture provides a clear and definitive survey of the above topics. Its mission: to give this concerned audience an across-the-board "short course" which enables them to approach their local applications with solid knowledge of the whole scene.

#### How Difference Between ETV and ITV

The film clearly differentiates between ETV and ITV under an "umbrella" term which includes not only instruction, but also cultural and enrichment programming, and Instructional Television (ITV) which is defined as the regular teaching of school subjects in day-to-day classes. It compares the two methods by which tele-lessons are distributed: Open-Circuit and Closed-Circuit, i.e. the broadcast station v.s. the schools' system of coaxial cables and micro-links.

Contributions of each are shown: Open-Circuit broadcasts covering a large geographical area at a relatively low-cost per pupil, but restricted to one lesson at a time; Closed-Circuit permitting the transmission of several lessons to multiple grades simultaneously, thus keeping content and scheduling under control.

#### 10,000 Miles of Travel for Research

No time does the film itself editorialize. The narrator presents only obviously factual information. Personal views on ETV are given by heads of various school systems and college-TV centers, in person, on-camera. The reality reflected in this picture may well stem from the 10,000 miles of travel by the producer Charles Palmer and Courtney Johnson, researcher, who visited 12 states. A third "capsule version" entitled *Television and the Teacher* was a final derivative. This three and one-half minute film was prepared for use in displays and exhibits by continuous loop projection. The total program is summed up as a "major contribution to the nationwide discussion of educational television's role in the nation's schools."

Non-director Don Livingston (above) captures up a scene for "Television in Education" in a South Carolina high school classroom.

Sometimes a little knowledge can really be a dangerous thing. The dialogue from the picture: "And you know those rumors about Federated? Well, I can tell you what's really going on..."

## "A Matter of Balance" in Business Ethics

### IBM Presents Realistic Appraisal of Ethical Behavior in Competitive Business

**B**USINESS ETHICS, like the weather, has traditionally seemed a subject more suited for conversation than action. Not so with IBM. As acknowledged leader in its field — and fully aware of the responsibilities which that leadership imposes — the IBM Corporation takes the matter of ethics in business seriously enough to do more than talk about it.

As evidence, the company has underwritten a 22-minute motion picture which takes as its theme the delicate matter of ethical behavior in competitive business situations. By presenting honestly and realistically the problems faced by IBM representatives in conducting the everyday affairs of their company, the film makes clear that management is not unaware of the ethical dilemmas in which its employees sometimes become involved.

#### The Nucleus of an IBM Training Program

By opening the door on the whole question of what is ethically proper in certain basic situations, the film also serves as the nucleus of an extensive IBM training program on the subject of business ethics generally.

*A Matter of Balance* is, as its title implies, a film that touches upon a sensitive scale of values. Produced by Henry Strauss and Co. of New York City as part of the ethics program developed in conjunction with IBM, the film brings to life the criteria with which an individual can measure his actions against the background of pressures, tensions, and temptations that complicate his life.

The pressure to succeed, the tension that accompanies freedom of choice, the temptation to "look good" no matter at whose expense, are factors of business life that are hard to ignore. *A Matter of Balance* takes a long and candid look both at them and at what it takes to stand up to them.

#### Child's Make-Believe vs. Adult Reality

The balancing act that goes on between the desire to win and the knowledge that fair is indeed fair is shown in the film to be a precarious one that has its beginnings in childhood. Scenes of youthful games and fantasies are cut and blended with scenes of typical factory and

office situations in a way that enables *A Matter of Balance* to make the whole business of ethics forceful and dramatic. What was largely and comfortably make-believe as a child is seen as a hard and occasionally painful reality as an adult.

A fuel oil salesman is shown using the sheer size of his company in an attempt to run down his competition. A building contractor relies on a dazzling exposition of expertise to impress a customer. A factory mechanic seeks to gain additional stature by revealing "inside" information about other firms for which he works.

#### The Audience Makes Ethical Decisions

In each of these instances, intentionally removed from the context of IBM to permit a more objective appraisal, the audience is motivated towards recognizing and critically evaluating behavior that edges against the bounds of acceptable standards. And in the process, a viable code of ethics based on the independent judgment of each individual begins to take shape.

Competition, though, is still the name of the game, and it's nice to win. But, as the film makes clear, there are rules — rules that are sometimes hard to live with unless the goals are clearly understood.

In dramatizing the way an IBM salesman reacts to a competitive bid, the manner in which a programmer meets a customer's request for a personal favor, and how a customer engineer solves a problem involving a competitor's attachment to the satisfaction of

(CONTINUED ON THE FOLLOWING PAGE 120)

Below: IBM customer engineer and his manager work out an ethical solution to a delicate problem: "If we could get their representative to come here, we can locate the trouble together."

Scrubbed, gowned and masked, Sturgis-Grant president and executive producer Warren Sturgis mans the camera himself to lens an operating room procedure (at Presbyterian Hospital, N.Y.) for a film on surgical technique.

**T**HE "EDUCATIONAL" LABEL is often stretched precariously to cover films that are sponsored by or receive financial support from commercial concerns. Pulling together industrial and academic interests in a film project is a difficult assignment, but it happens with an uncommon degree of success in the field of medicine.

While medical societies, health agencies, and the U.S. government often finance audiovisual materials from their own funds, a look at the whole spectrum of medical films produced in this country shows that the drug and allied industries have invested millions of dollars in films that authentically accommodate the educational label.

#### Active Sponsors and Subjects

Well-known pharmaceutical firms such as Squibb, Abbott, Johnson & Johnson, Winthrop, Smith Kline & French and Schering, to name a few, are active in the sponsorship and distribution of medical films whose subjects range from *Intra-diaphragmatic Resection of Vagus Nerves* and *Gastroenterostomy*

(Winthrop), and *Technic for Central Commissurotomy* (Squibb) to *Resuscitation of the Newborn* (Smith Kline & French) and *Frontiers of Allergy* (Schering).

During the last two decades, a period that has seen the broadening of medical practice into a wide field of highly disciplined specialties, the established trend of specialization in every branch of medicine has placed unique demands on film-makers who serve the medical-pharmaceutical establishment.

#### Film Maker As a "Catalyst"

Warren Sturgis, president and executive producer of Sturgis-Grant Productions in New York, knows from long experience that the maker of medical films not only has to be well-informed on virtually all levels of medical science, but has to function also as a kind of chemical catalyst. "When you make a film that involves a medical society, a pharmaceutical company, possibly a hospital for location, and a physician who serves as technical advisor," says Mr. Sturgis, "one's powers of di-

## THE WELL-CONCEIVED TEACHING FILM SERVES MEDICINE

### Higher Standards in Content, Production Increase Films Use by Medical Profession

plomacy and discretion must be utilized to the full!"

In addition to bringing various institutional and policy interests into focus and harmony, there is the ultimate need for a film that hangs together visually as good cinema — a film which will not only please its sponsors but command the attention of its intended audience. And physicians, Mr. Sturgis is quick to underscore, "are by profession and nature among the most critical film-viewers anywhere."

#### How One Film Serves Medicine

Typical example of an industry-supported medical teaching film is a recent production by Sturgis-Grant for The American Academy of Orthopaedic Surgeons, made with a grant from Johnson & Johnson. Titled *Plaster Casts and Splints: Preparation — Application — Removal*, the film is being circulated through the Film Library of the American Medical Association to hospitals, medical schools and societies.

A supplementary brochure published by Johnson & Johnson sums up the film's genesis and purpose: "The need for an educational motion picture on basic techniques of immobilization with plaster of Paris has long been recognized by the American Academy of Orthopaedic Surgeons. Such a film should be broad enough in scope to provide a good fundamental knowledge of the more common pitfalls of cast application, as well as to point out various short cuts and methods familiar to the experienced medical orthopedist.

Above: diagrammatic animation (below) a doll manipulated in "the scene" were techniques used in Smith Kline & French teaching film "Resuscitation of the Newborn."

"Because firsthand experience at the side of a skilled technician is not always easily attainable, this film should help to answer many questions and fill the need for proper, basic instruction in the 'Preparation, Application and Removal' of the more familiar types of plaster casts and splints.

"It is hoped that medical societies will find the film useful as a basis for discussion and that hospitals will take advantage of it."

Preliminary film layouts are reviewed (left to right) by Warren Sturgis, art director Orsted, Calpin, and Dr. Ronald V. Chapple, medical director of Ortho Pharmaceutical Corporation, an active sponsor of medical films.

This animation artist is rendering a diagrammatic scene to illustrate a part of fetal circulation. Medical teaching films demand such skills, requiring the ability to interpret anatomical detail in the appropriate cinematic style.

oversights in film content or form.

**Teaching Is the Primary Goal**

As for the industrial sponsor who foots the bill, whatever tangential exposure his product may receive, he is logically intent on accommodating the needs of the medical men who are interested in teaching and not advertising. The professional ethics attached to that distinction are well defined and strenuously pursued.

Another example of successful collaboration between industry and medicine is *Modern Obstetrics: Normal Delivery*, a film officially presented by both the American Medical Association and the American College of Obstetricians and Gynecologists. Sponsored by Ortho Pharmaceutical Corporation, the 16mm. color sound film, 27 minutes long, was produced by Sturgis-Grant as an up-to-date teaching aid for the practicing physician, intern and student. Dealing with the care of the obstetric patient and her baby during normal delivery, the film provides details on current widely-used obstetric techniques.

**The Role of the "Product" Film**

The pharmaceutical industry's contact, via film, with the medical community, is not limited to the institutional teaching subject. Doctors are naturally interested in new drugs and equipment which

showings through hospitals and local physicians' groups.

When Squibb was ready to announce what it considered a major break-through in bone grafting, a ten-minute color film was instrumental in promoting their new product, trade-named "Bo-plant." Television, along with national press and periodicals, gave considerable coverage to the new heterogenous bone and cartilage harvested from calves and processed for human bone grafting.

**Use Restraint in Promotion**

Frank Rollins, veteran head of Squibb's motion picture program, acknowledges the broader latitude for product identification in a film such as *Boplant*, but stresses the need to exercise restraint in promotional zeal when the audience is composed of physicians. "The medical audience accepts the fact," says Mr. Rollins, "that somebody has to pay for a film which describes a new product and how to use it. But common sense and good taste dictate the subordination of commercial reference to scientific information."

Also in the product category, Sturgis-Grant will soon complete a Squibb film dealing with radioactive isotopes as well as a Schering film on a new dermatological medication.

**Audience of 200,000 Doctors**

That the multi-billion dollar ethical drug industry is acutely tuned to the communications frequency of physicians is an accepted fact. Pharmaceutical firms generally recognize the efficacy of aiding the continuing education of the nation's 200,000 doctors. Significantly, an ever-increasing percentage of the drug industry's advertising-promotion dollar is being invested in the film medium, possibly on the assumption that a useful educational motion picture is worth as much if not more than 200,000 free drug samples. •

of subjects, camera angle and lighting are all critical factors in rating technique for the proper application of a plaster cast. This being lensed for a recent Johnson & Johnson medical teaching film.

## How to Catch a Porpoise on Film

Sea-Borne Reela Film Crew Joins the Porpoise Hunters to Bring Home Award-Winning Film for the Miami Seaquarium

**S**IXTEEN DAYS spent on a 72 foot yacht cruising emerald-green, sub-tropical waters off the coast of South Florida with professional porpoise hunters is something to remember!

To this exciting adventure add the extra thrill of underwater photography of 600-pound porpoises in their natural habitat, plus aerial photography so high that the yacht is but a white speck in a vivid green sea which is clear enough to see, twenty feet below the surface of the water, eelgrass growing on the ocean floor, swaying with the ebb and flow of the water. That is something you can't forget.

### Seaquarium Commissions Series

This was the experience of the Reela Films' production unit that made *To Catch a Porpoise* for the Miami Seaquarium, an outstanding, world-renowned attraction in South Florida.

In March 1964, Burton Clark, Director of the Miami Seaquarium, commissioned Reela Films, Inc., Miami, Florida, to produce five films: two documentaries, one to be half-hour and one ten-minutes, both to be 16mm color, sound on

film; also three 3½-minute short subjects in 16mm color, silent — for retail distribution.

All subjects were to differ in specific scenes, but all had the same subject matter: the capture and training of porpoises for entertainment purposes.

All of the films were for promotion of the porpoise show at the Florida Pavilion at the World's Fair in New York, which was produced by the Miami Seaquarium. The ten-minute show was to be finished in time for the opening of the Fair, the end of June 1964. This film was used for closed-circuit television within the Fair.

F. F. (Ted) Sack, Vice President and General Manager of Reela, immediately traded his "Vice President" hat for his "Producer-Director" hat and called a production staff meeting. This was too juicy a production to let pass.

Four cameramen were assigned to the production, temporarily called #1159. The Reela staff cameramen were Ralston Princee and Roberto Insua, Seaquarium staff cameramen were Michael Davis, long-time marine-life pho-

tographer, and Don Renn, underwater photography specialist. In addition, Sack assigned Marian Kley, Supervisor of Production at Reela, as supervising editor, with Raul Corvison as chief sound engineer, Grip, electrician, and assistant cameramen completed the crew.

Kley, veteran of many years of production, wrote a tight shooting outline. The finished half-hour show is almost scene-for-scene the same as the outline . . . a rare accomplishment considering the animal stars are quite unpredictable and completely undirectable in their wild state.

The yacht "Seaquarium", official collecting boat for the Miami Seaquarium, is skippered by Captain Emil Hanson, Hanson, a man bursting at the seams with energetic and never tiring knowhow, was invaluable on the production. The boat itself, although officially registered as a yacht, is actually a work boat, comfortably and efficiently appointed for its purpose . . . to transport a crew of three and huge quantities of marine specimens.

### They Aren't Easy to "Shoot"

There are several factors in porpoise hunting that make photographing the entire catch very difficult. Porpoises are wary and very intelligent. They are caught in a type of nylon net — three quarters of a mile long and weighing well over a ton. When this net is played out over the stern, the speed of the boat is "wide open". When the net has porpoises in it, the net is shortened and pulled around into a pocket. Porpoises are hauled

out of the ocean in the pocket and put into a skiff by three professional porpoise hunters working a team.

This action must be fast work or the porpoises can be hurt. Once the porpoise is boarded, it is docile. But the actual boating of 600-800 pounds of porpoise thrashing animal is very exciting and, until #1159, was photographed from a skiff along the boating skiff. If the sea was rough the hobbing of the boat made filming nearly impossible.

### Camera Platform Really

Captain Hanson was consulted on the possibilities of building a special camera platform to be extended from the side of the collecting boat near the stern, so that in a rough sea — scenes of boating of the porpoises would not have the eyetearing, p-a-down motion.

Hanson and his crew built a platform strong enough to support with the camera crew's needs would support the weight of cameraman, assistant, battery, reflectors and/or other gear, the director.

This platform made it possible to photograph every step of exciting moments of the net and capture, from the moment the net was played out, at top speed to the transfer of the porpoise from the skiff to the deck of the mother ship.

### Tight Schedule and High Hopes

Shooting began April 19, 1964. Dockside scenes of the yacht "Seaquarium" being loaded with supplies, etc. Reela had a tight schedule and high hopes: yachtsmen

In the picture below, made during the filming of "To Catch a Porpoise," trainer Jimmy Klue is working a porpoise through a high jump. At right: Reela Films' crew included (left to right) cameraman Ralston Princee; grip Bill Cabana, producer-director Ted Sack (pointing); cameraman Mike Davis.

Doug Bonham tempts a porpoise into a high jump at World's Fair.

sea — 14 days; dockside five; odd pickup scenes. Three. Shooting at the Pavilion showing the porpoise performing at the World's Fair. Two days. The shooting, due to other and other delaying factors, took 28 days, instead of the scheduled 24.

The yacht crew, under the close eye of Captain Hanson, had a tight shooting schedule. There was never a time when they weren't sitting on the deck; moving nets, rigging and equipment to make room for a new camera setup.

For a time when, if they were to move the cameras in their hands, they weren't working. Grips, gaffers, or anything else — all in addition to their other duties. Previously mentioned limitations held production to a minimum.

It began a Nine-Day Chase. The first five days were spent in shoot-out surface scenes at sea. During that time . . . always on the lookout for porpoises. No matter how many scenes had to be shot, the goal was to get as many porpoises as the first concern of the yacht crew, "the porpoise" and its crew.

At the time the lookout at the helm or the Captain shouted, "Porpoise", the crew jumped into the water with the precision of a military unit. Under full speed, the yacht began a huge circle, feeding the porpoise net out over the stern. After the netset and return of the porpoise, it took from two to five hours, depending on the weather, wind, and sea.

The aerial scenes caused real

havoc in the schedule. Due to the necessity of split-second timing with the netset, and the position of the camera helicopter having to be synchronized with the speed and position of the boat, coupled with the possibility of not finding any porpoises to catch when we had the helicopter in the right overhead position . . . we had citizens-band communication set up.

When an attempt was made to communicate sea to air, something went wrong with the "walkie-talkies". We could hear the cameraman in the helicopter, but he couldn't hear us. On the second day we got new communication sets and were able to get the scenes we wanted.

#### Timing Was a Vital Factor

The timing of the 'copter and boat had to be perfect and added to a perfectly timed netset. Every time that net was set, the yacht crew had to move on the double without stopping a single second for at least twenty minutes.

That net was run out and taken in three times on the morning of each day we made the aeriels. The aeriels are breathtakingly beautiful. It was with great difficulty that we selected which aeriels to use in the half-hour show. The collecting crew was exhausted and our good relationship with them was somewhat strained.

Although the waters in Biscayne Bay and the Atlantic Ocean off the coast of South Florida are beautiful and photograph in vivid color topside, Reela, like other producing units, had to go to the Bahamas to shoot the underwater scenes. (Continued on page 113)

## PICTURE PLAYS KEY ROLE IN SELLING COMPANY IMAGE

### A Film Helps Win Sales for Mogen David

Chicago-Based Wine Maker's Picture Building Business by Showing Company's Size, Scope and Product Quality

**H**OW IMPORTANT IS THE NAME of a company or a product? How directly can a name be related to sales?

Management at Mogen David Wine Corporation can provide some cogent answers to these questions. The firm is currently riding the crest of a still growing wave of consumer popularity.

Yet, through the end of World War II, Mogen David was basically a sacramental wine used during religious ceremonies.

#### Among Most Popular Wines

Today, the Mogen David label is among the most popular with wine consumers in the United States.

"Mogen David caught on so fast, and so surprisingly, that, at the end of World War II, we actually had to 'dump' tanks of other brands we produced and bottled just to make room for it," recalled Bernard Wiernik, President and Chief Executive Officer.

Traditionally, there was little historic market for wine in the United States. In addition, there are many legal regulations on the sale of wine. Thus, to increase sales of Mogen David, it was first necessary to create a growing market for wines as a mass consumer product.

"The wine market is booming today," Wiernik explained, "because well-placed advertising and effective point-of-purchase displays opened the door to the consumer market. Once this was done, consumer tastes developed, and the door was pushed open wider by word-of-mouth.

"But this was not enough. In

order to sell OUR wine to the public, it became necessary to sell OUR image to distributors, principals, distributor salesmen and consumer groups," Wiernik concluded.

#### Film Helped "Sell" Image

Much of this image-selling has been accomplished with a single 16mm color and sound motion picture film stressing the size and scope of the company and the quality of Mogen David Wines.

Bernard Wiernik, President Mogen David Wines, Chicago

The film was designed to tell this basic story to all groups affecting sales of Mogen David Wine — from key distributors on down to individual consumers.

In contrast to most business films, the motion picture has a story line — and a humorous one, at that. The story line is a direct take-off from Mogen David's well-known advertising slogan: *Wines Like Grandma Used to Make.*

The film opens with a little old (CONCLUDED ON PAGE 122)

District sales managers review the Mogen David color film they are using throughout the field to show distributors and retailers the company story.

**For Information, Write**

Industry Film Prods. Assn.  
Post Office Box 1395  
Thousand Oaks, California

Members of the Television and Film Department, Space & Information Systems Division at North American, outlined the uses and potentials for closed-circuit television in an industrial complex at this recent chapter meeting.

**TV & Film at North American Aviation**

**Members of Space & Information Systems Division  
at Downey Hosts for Los Angeles' Chapter Program**

**T**HE TELEVISION & FILM Department, Space & Information Systems Division of North American Aviation at Downey, Calif. was host to members of IFPA's Los Angeles Chapter in October. Despite an unseasonal heat wave and the 20-mile drive from Hollywood to Downey, some 60 members gathered in the large Studio "A" to learn more about the development of one of the nation's largest industrial television organizations.

Chapter chairman Jim Swift's brief word of greeting, followed by national president Harald Dyrenforth's report on national activities were preliminaries to the main program event as Bob Lloyd, marketing representative for the S&ID closed-circuit television organization gave a brief history of the department.

He also outlined the purposes of this activity, the many trials and

Bob Lloyd presented a brief history of the NAA closed-circuit program.

tribulations it has faced during its first three years of operation and then presented a TV-tape recording which graphically illustrated the many varied uses and potentials of a close-circuit activity within an industrial complex.

Following this introductory presentation, members separated into three groups for guided tours of

IFPA President Harald Dyrenforth reports on national activities of the association during the recent October meeting of the Los Angeles Chapter.

the TV facilities. Each group led by a member of the S&ID and Film Department. Fred Deets (IFPA editorial v.p.) and Reed, IFPA member and former "Cindy" award winner and Lloyd took their respective roles through the plant.

**Story of Film Operations**

During a "coffee break" Reed delivered the story of Film Operations within the unit. He also noted that although the film

Cal Reed described Film Operations during the Downey S&ID program.

unit "spawned" the television station, this offspring promise for a long time to turn into a "master about to consume its own are"

Both Reed and Lloyd were refreshingly candid and said forward in their comments neither hesitated to outline the difficulties members of each department had to overcome. But by now, personnel in both film and TV realize and understand how each group member can help to complement the efforts of his counterpart; many production staffers now interchange duties between the two media.

**Role of Closed-Circuit**

It was an exciting and thought-provoking session for those who attended. Questions kept coming at the various speakers until 11 p.m., when the meeting adjourned.

We are sure that many members, most of whom are film people, went off pondering the statement made by Bob Lloyd: look closely at these presentation activities, because if you look forward to TV's role in your organization you will learn many of the advantages and how to live with it.

But to those who do not care for television in their facilities, it is noted that this also gave them a good look at its capabilities.

Under no circumstances, it is noted, should anyone feel that it should halt its arrival on the industrial scene... it is well on its way now as even a cursory look at present

Chapter Chairman Jim Swift led members to the recent North American Aviation. "hardware" sales to in-

### Discuss Animation Techniques at Meeting in San Francisco

☆ Members of the Northern California Chapter took active part in the recent San Francisco International Film Festival last month. During its preceding (late September) meeting, the chapter opened its fall-winter program with a session on "Animation". Two animated films produced by the National Film Board of Canada were screened and their techniques discussed following dinner.

Cameron Guess, Jeffrey Hale and Barry Nelson, of Cameron Guess Associates in San Francisco, conducted the screening and discussions on the two films: *Christmas Cracker* and *The Great Toy Robbery*. These short films are wryly satirical in content and both have had feature theatrical release. *The Great Toy Robbery* was especially successful, having been distributed by Columbia Pictures. It was generally "packaged" with the feature *Dr. Strangelove*.

Guess and Hale produced both films while members of the Film Board staff and, because of this, an authoritative discussion was held on the techniques and equipment used as well as the trials and tribulations endured during production.

H. Vin Agar, chairman of the Northern California Chapter and Jim Goldner, program chairman, are lining up a series of highly interesting programs for the months ahead, including a promised visit (right after the first of the year) by noted Hollywood cinematographer James Wong Howe.

All former members and others in the area interested in joining this conveniently-located Chapter

### Confer With Kodak

on a Program for Seminar A's proposed series of Seminars to be conducted in the Los Angeles area by our office is making considerable progress. Through the generosity of Neal Keehn, national sales for DeLuxe-Genm Laboratories, the aid of Kodak has been assured and help developed for a seminar. Meetings have already been held with Dr. Harald Dyrenforth, president; Roy L. Deets, Editorial v.p., Mr. Keehn, Hugh C. Shaner and J. L. Robertson (of EK's West operations) to review matters, approach and other involved in getting the project underway. •

## Meet Jim Swift: Man Behind the Camera

OUR CLOSEUP for this issue is focused on the dynamic chairman of the Los Angeles Chapter of IFPA — Jim Swift, supervisor of the motion picture unit of Hughes Aircraft Company in Culver City, California.

James R. Swift was born in Cleveland, Ohio but moved to California at an early age. He attended school in the Hollywood area and began his higher education at Pasadena Junior College.

Jim's career had already started to take shape while he was in high school. During his spare time, he worked in a local portrait studio and was bitten by the "photographic bug" — although it took several years for the results to develop into a profession.

Meanwhile, Jim had become an expert ice skater, and was offered a job as a professional skater in ice shows, which he accepted. His ice-skating talents also led to his participation in professional ice hockey for two seasons.

World War II interrupted the skating potential of Jim Swift, and he served in the Navy from 1941 through 1945 as a deep-sea diver and as a tug master.

By the time of his military discharge, the photo "bug" had taken hold and he began the career that was to lead him from still photographer to motion picture executive. In 1946, Jim was employed by Shiney Wright, a color illustrator, to do his magazine, fashion, and advertising photography.

In 1947, our seasoned cameraman joined the Steve Hanagan Publicity Agency in Sun Valley, Idaho as a still and motion picture cameraman. He shot news stories to service movie fan magazines, wire services, and newsreel companies with information on Hanagan's clients. The Hanagan office,

L. A. Chairman Jim Swift

(and Jim), moved to Las Vegas in 1948. During this time, Jim accumulated credits for more than one hundred magazine covers and advertising layouts.

Then, in 1950, Jim took a fling at operating his own photo studio, known as Buck and Swift Photography, in Las Vegas, in partnership with another former Hanagan employee. But, by the end of 1950, Jim was back in Los Angeles as head cameraman for Rocket Pictures, Inc.

Five years later, he accepted a job with his present employers, Hughes Aircraft Company. Starting as a motion picture cameraman on the Falcon missile program, he steadily advanced to become supervisor of the motion picture unit.

When asked about his hobbies, Jim always replies that it is the buying and remodeling of older homes filled with character and charm. But somehow, for those who have seen his remodeled homes, they seem to take on a new vitality — just as has the Los Angeles Chapter of IFPA under Jim Swift's chairmanship during the past six months. •

Three guided-tours of S&ISD facilities at Downey was conducted by Editorial v.p. Roy L. Deets, shown with members of his tour party.

(CONTINUED FROM PAGE 53) of the Exhibitors' Committee, disclosed that the Arriflex Corp. of America, Amega Corporation, Baeh Auricon, Inc., F&B Ceco, Inc., Hollywood Film Co., Magnasyn Corp., Ralke Company, Inc., and S.O.S. Photo-Cine-Optics, Inc. are the first exhibitors signed.

Sponsors for the upcoming Conference include Brown's Motion Picture Labs (San Diego), Color Reproduction Company, Consolidated Film Industries, and Film-service Laboratories, Inc., all of Hollywood.

As additional organizations join our Exhibitors' Roll or become Sponsors for the National Conference, they will be listed in these JOURNAL columns.

pated in the mail vote (thus not giving the Board a real expression of total membership feeling on the name change), it was felt best not to make the change at the present time.

Those in favor of the name change expressed the opinion that perhaps they had not done a proper job of "educating" the membership on why they felt that a change in name (but retaining the "IFPA" letters) would be advantageous at this time.

### "Sea Lab" Experiment Films

#### Shown at the San Diego Chapter

Films made during the recent "Sea Lab" experiments conducted deep below the Pacific Ocean off the coast of San Diego were featured on the October program of IFPA'S chapter in that city.

Dear Mr. Amateau:

The movie "Speed and Heat" that you translated and narrated for us in French was very well received in Europe. We have had much success with it there, and I must say part of the credit is due to you and we want to take this opportunity to thank you for your assistance.

It has been a pleasure to work with you and both our motion picture department and Mr. Galichon were very pleased with your performance.

Sincerely,

*Gordon F. Gray*

## Films of 21 Countries Compete at Rouen

France Wins Grand Prix With Seven Awards; British, German Films Win 12 Prizes as the Sixth International Industrial Film Festival Attracts Hundreds to Normandy

**T**HU TURNING YEARS brought the International Industrial Film Festival back to Rouen, France in October, 1965. Since its birth in this ancient Norman city in 1960, this foremost industrial film showcase of the Western World has grown in stature and in numbers of participating countries. The Sixth International at Rouen brought nearly 130 films from 21 lands and the horizon of competition expanded to new continents as Africa, Australia and Japan brought films to Rouen. Joining this expanding group of participants were Canada, Ireland and Israel. The Festival was held for a full week, from October 11 to 16th.

Some 500 delegates and jurors were there,

joined by wives and by a growing number of interested industrialists from all over Europe. The international press coverage was amazing, considering the highly-specialized nature of the event. Over 40 journalists from Austria, Belgium, Britain, Denmark, Finland, Germany, Italy, Norway, Spain and Switzerland joined a large number of their counterparts from the press of France for the week of showings.

The Grand Prize of the Festival at Rouen was won by the host country—France—which accumulated the necessary points when its entries won two first prizes, three second prizes and a fourth prize. Although no official recognition was given to runners-up," the

The Cinedit cinema in Rouen was the showcase where nearly 150 industrial films competing for Festival honors were shown to jury members.

Festival delegates at Rouen gather for the opening of the "Film Photography in the Service of Industry" exhibition held during the

A Report from Rouen by Ott Cohn

honors for second place went to Britain, whose films won two first prize awards, a second prize and three third prizes.

Six special prizes were also awarded to members of the international press, the French Productivity Association, the French Federation of Industries, the City of Rouen and Inforfilm, international film distributor organization now serving some 19 countries, including the U. S. and Canada.

Their Hospitality Knew No Bounds

These are the "vital statistics" of the Rouen Festival. But there was another, vastly more appealing side to this story in the tremendous "show" which the organizers of the Festival officials of Rouen and of the Seine-Normandie

Claude Auguste-Dormeuil, of the Department of Cinema, Kodak-Pathe in Paris, registers attendance at festival showings in Rouen.

district and the people of that area put together for the comfort and enjoyment of the delegates, jurors, press and other guests.

Industrial films reigned in Rouen; a flag of competing nations hung throughout the town; guidebooks "posted" the daily showings; students from the University of Rouen attended the judging session. The "Paris-Normandie" newspaper carried a column inches every day with Festival news items and critiques of the day's films. The Regional Prefect, representing the regional government, the Mayor and the President of Rouen's Chamber of Commerce all gathered

ceptions. The French hosts at all these  
 shore than upheld traditions of grandeur.

nation (all wrapped in one memorable eve-  
 ning), was the almost total absence of time  
 and place for some discussion and viewpoint  
 exchange with industrial film men from all  
 over Europe and abroad. For Rouen was truly  
 a "United Nations" of specialized film makers  
 and users. Festival authorities finally answered  
 our call on the last day of the week, permitting  
 a brief two hours of early Saturday morning  
 discussion among the members of the inter-  
 national juries, who were most appreciative.

"The Forth Road Bridge" won both first and special prizes. Story of one of Britain's most important civil engineering projects has scenes which capture grandeur and excitement of magnificent feat.

At the end of jury deliberations French  
 entries led that country to the Festival's Grand  
 Prize with two first awards, three third prizes,  
 a fourth and the one of the two special awards  
 given by the Conseil National du Patronat Fran-  
 cais (the French Industrial Federation).  
 Britain also took home seven prizes, includ-  
 ing dual honors for an inspiring film story of  
*The Forth Road Bridge*, co-sponsored by

g delegates (left to right): M. Lorailiere; M. Lecanuet, mem-  
 ber of the French Senate; and M. Weil-Lorac of the French film industry.

Rene Arnaud (third from left); secretary-general of Council of Euro-  
 pean Industrial Federations; right, M. Dauge, festival jury president.

"Der Heissen Frieden" (The Hot Peace) was a first prize winner at Rouen for its sponsor, Badische Anilin-und Soda Fabrik. The film emphasizes the importance of scientific research for industrial progress. It was produced by Gesellschaft fur bildende Filme.

Shell-Mex and British Petroleum Limited. This film won first prize in Category B and also received the unanimous vote of the press for a special "Journalist's Award." Britain wound up with another first (*Triumph of Childbirth*); as well as a second prize and three third prizes.

German film entries also did exceedingly well at Rouen. That country's industrial films also won two first prizes (*The Third Factor* and *The Hot Peace*); took single second and third prizes and finished up with a special award from the French Industrial Federation for an important "employee attitude" film titled *The Log Is Grey*. Belgium was a surprise winner as this comparatively smaller

## CATEGORY A AWARDS:

## Films of 21 Nations Compete:

H. T. Wolff (at right), representing the German Government Information and Press Office, accepts first award in Category A for "The Third Factor." The presenters (left and center): E. Loraillere, secretary-general of the Rouen festival, and E. Mayolle, vice-president, the Conseil National de Patronat Francais.

M. M. Mignard (left), representing N. V. Philips' Gloelampendabrieken, of Holland, receives second prize in Category A for "Interludium Electronicum," produced by N. V. Multifilm, of Hildersum in the Netherlands.

## CATEGORY B AWARD:

V. J. A. Lillie-Costello (right) accepts first prize, Category B, awarded "The Forth Road Bridge." The presenter: M. Heudier, president of the Employers Federation of the Seine-Maritime region. Film was sponsored by Shell-Mex and British Petroleum Ltd.; produced by Random Film Productions Ltd.

(CONTINUED FROM THE PRECEDING PAGE 57)  
 nation scored a first award for a thrilling non-verbal fishing film (0.333); won a fourth prize (*Inclinaison vers l'Eau*) and then received the City of Rouen's special prize for the film *La Cybernetique*, detailing the principles of cybernetics.

### Films of Holland and Italy Match Honors

Holland and Italy were matching winners as the Netherlands' entry, *Interludium Electronicum*, sponsored by Philips of Eindhoven, won a second (and to many at Rouen deserved a first!). *Interludium* was judged the winner of the first annual Infortilm award, given by the international distribution organization. Italy also won a second prize as the Fiat-sponsored film, *F4CB—Acciaio su Misura* was accorded that honor. A special award to the Italian entry *Qualcosa di Nuovo Fra Gli Olivi* (a film on improving olive culture) was given by the French Productivity Association.

Who brought up the rear ranks? Well, the U. S. A. for one as only one third prize was won by this country when the Johnson's Wax film, *Seven Keys to Greater Creativity* (produced by Flag Films) was so honored. Japan, with only two entries compared to the U. S. total of 14 submissions, had a better "percentage" as its informative wide-screen film *A New Railway Is Born* took a similar third prize. Denmark won a fourth award for a very useful motion picture, *57 Million Bubbles*, describing an historically new marine salvage method using polystyrene granules to raise a wrecked freighter.

### Training Subjects Win First for France

The French winners have not been mentioned by title thus far but merited the jury consensus. First prizes went to two extremely useful "working" films: *Le Soudage de l'Aluminium* (The Welding of Aluminum), sponsored by L'Aluminium Francais; and to *Le Secretariat*, (The Secretary) co-sponsored by Olivetti and the Institute National Pedagogique (produced by Les Analyses Cinematographiques of Paris). French second prize awards were of equally high quality. *Pompey Aciers Speciaux*, on the specialized steels of its spon-

The skill and pride of the workers who built "The Forth Road Bridge" make this a shining hour of triumph over height, wind, weather.

Upholding opening day tradition are M. Loraie (left), official of the French picture industry and (right) M. Loraie, secretary-general of the Festival at Rouen.

sor, Societe des Acieres de Pompey; *Tilt*, a brief eight-minute color film on the structure of material, sponsored by the country's Commissariat a l'Energie Atomique; *Ne Le Prenez Pas a la Legere* (don't take heavy things too lightly), sponsored by the Nord et du Pas-de-Calais, all won second awards at Rouen.

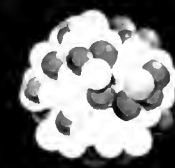

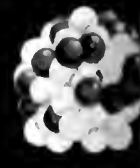

France wound up with a fourth prize for *Le Concorde*, sponsored by Sud Aviation, presaging the new super-sonic air transport plane now in early stages of production. The host country completed its prize-taking at Rouen with a special award from the French Industrial Federation to *The Iron Mountains*, sponsored by S. A. des Mines de Fer de Madagascar. This picture shows iron ore mining has begun in the heart of Africa.

### Britain Almost Won the Festival Prize

And Britain might well have won its second successive Grand Prize (which it received last year in London) but for a six-point difference in final totals. *The Forth Road Bridge*, repeatedly mentioned for its first and special award, had a counterpart first prize winner in France.

(CONTINUED ON THE FOLLOWING PAGE)

146 NEUTRONS
143 NEUTRONS

# ISOTOPES

"Atome Tilt," an eight-minute color film sponsored by the French Atomic Energy Commission, won the second prize in Category B for its clarity of exposition on the structure of material: atoms and molecules. The film was created by Paris Cite Productions.

## GRAND-WINNING FILMS OF FRANCE

TWO FIRST PRIZES, three seconds and one fourth award, plus the special prize given by the French Industrial Federation, carried France to the Grand Prix which it won at Rouen. Films on job skills and safety were notable.

Specialized steels of Pompey were described in great detail in a color film awarded second prize. Created by Films Caravelle.

"Le Concorde" won a fourth prize at Rouen. This Sud Aviation film on the advance planning for this super-sonic airliner gave viewers a significant and timely reminder of today's smaller world, united by air.

The winning French entries at Rouen had several things in common: first, the painstaking care and skill used by their producers to delineate the subjects; secondly, where color was vital (as in *Pompey Aciers Speciaux*), the quality shown was superb! Content was also most timely in Sud Aviation's advance look at *Le Concorde*, their new super-sonic airliner. *Le Montagne de Fer* shows iron's role in developing Africa. But two first prizes won by France went to job instruction films: to show *how* to weld; to *improve* secretarial skills.

"Soudage de l'Aluminium" was another winner, a first prize (Category D). Sponsored by L'Aluminium Français and produced by Films du Centaure, this 28-minute color film shows methods of welding aluminum.

"Le Secretariat" won a first prize at Rouen for its producer, Les Analyses Cinematographiques, of Paris. This scene shows Monique as the perfect secretary, the boss' right hand. She excels in relations with other workers.

"Ne Le Prenez Pas a la Legere," sponsored by Houilleres du Nord et du Pas de Calais, was cited for safety message: "don't take heavy things too lightly, because anything heavy is dangerous and statistics prove it."

Absit (right) accepts first prize in Category D for the film "Le Soudage de l'Aluminium" sponsored by L'Aluminium Français. Mayolle was the award presenter.

Georges Roze (right), of Les Analyses Cinematographiques, receives first award in Category F for his film "Le Secretariat-Part III." Film was sponsored by Olivetti and I.P.N.

M. Chaniand (right) of Houilleres du Nord et du Pas de Calais, receives second award in Category G for "Ne Le Prenez Pas a la Legere," produced by Son et Lumiere, of Paris.

"Triumph in Childbirth," sponsored by Smith Kline & French Laboratories Ltd., describes two methods of relieving fear-tension characteristics of child delivery: hypnosis and psychoprophylaxis. It was created (for professional use) by Little King and Partners.

(CONTINUED FROM THE PRECEDING PAGE 58)  
Smith Kline & French-sponsored film, *Triumph of Childbirth*. Britain's second prize award was given the Fruit Producers Council for *Be Careful Boys*, a humorous but pointed film on care in handling perishables.

Three third prizes (in Categories C, D and E) helped Britain's score mount up. *The Bargain*, a humorous cartoon film that leads its perplexed hero to the benefits of bank services, won a third prize for its sponsor, Barclays Bank Ltd. Produced by W. M. Larkins Studios in association with the Film Producers Guild it merited even higher honors. The Shell International film, *Detergents Up-to-Date*, was a third place winner and that group also included *Water in Biology*, sponsored by Unilever Ltd. and produced by World Wide Pictures Ltd.

**Did National Interests Influence Jurors?**

*Were jury decisions fair?* Our own experience proved this point to our complete satisfaction as experienced men from five different lands had almost total unanimity in final selections for Category B in which we judged. Friendships were born, problems discussed in candor and respect for our "home" countries engendered.

To Javier de la Cueva, of Spain, our Category B jury chairman; to Erik Heimann Olsen

of Denmark; to Jean Bacon of France; and to Dr. G. Scharnhorst of Germany we send our fondest regards and await the day when we shall meet again!

**Confusion Didn't Affect Winning Entries**

Through the years, confusion in placing films in their correct categories has persisted.

Fortunately, none of the winning entries were affected by the confusion in categories but there were noteworthy questions raised among the jurors. A recruiting film (from Britain) hardly seemed to fit the defined areas of Category B (products and projects) where it was placed for judgment. A Swedish film (*The Alno Bridge*) turned up in Category D, so ostensibly it was for highly specialized audiences, while the prize-winning *Forth Road*

"Water in Biology" was sponsored by Unilever and produced by World Wide Pictures Limited. This third prize winner (Category E) shows that industry is concerned with scientific principles which underlie its manufacturing interests. "Every living thing, plant or animal, depends on water for vital life processes."

*Bridge* (in Category B) was placed there because it was intended for public showing.

The United States submitted no films sponsored by either Federal or state governments, interpreting this competition as restricted to industrial films. But Europe takes a different view of such matters, as witness entries from the German (government) Press and Information Office; Belgium's Maritime Commission; the Japanese Ministry of Foreign Affairs; the Belgium Government's 0.333 (winner of first prize in Category C and sponsored to promote

"The Bargain" won a third prize at France's sponsor, Barclays Bank Ltd. Produced by W. M. Larkins Studios, in association with the Film Producers Guild Ltd., this cartoon film pictures the trials and triumphs of a man who learns to employ banking services

that country's fishing industry); and the French Atomic Energy Commission. A recruiting army film, *Ten Foot Tall* was also destined for prize honors but certain did originate within industry.

**Important Subjects Presented at the Istiv**

Over-riding such "problems" (and the any film competition where they don't arise) was the sheer interest, the revealing facts, the contrasting excellence of film work illuminated the two screens of the Circuit a neighboring theater where jurors sat to competing entry. Subject matter related to industry concerns such as productivity, technological progress, and export promotion (not only products but of engineering skills). The stage came to light on screens at Rouen and did advances in air and rail transportation.

Japan's entry *Un Nouveau chemin de fer est ne* (a New Railway Is Born) sped views along the high-speed, automated right-of-way out of Tokyo. This development is of great importance in both Europe and the US. French "design stages" look at *Le Cere* presaged the super-sonic airliners which shorten the distance across the Atlantic little more than two or three hours.

An historic "first" in marine salvage was revealed in Karl Kroyer's film, *9000 Feet Lion Bubbles*, in which this Danish filmbo

RECIPIENTS OF PRIZES pictured below received honors in these categories. Films in Category D presented specific industrial products, materials or projects, or were about industrial technique. Category E included films on industrial application of scientific principles and research for special audiences; Category F covered films on management and manpower training for industrial audiences.

ium Electronicum," a most imaginative composition on human perception, shows helping man to exceed these limits.

ing of a valuable cargo vessel by the special pumping system and polygranules. Banking services were properly the clever animated film. The Barclay's Bank is using through-ain. It was created with consummate Beryl Stevens and the W. M. Larkins in association with the Film Producers or Charles Barker & Sons Ltd.

### Competition Brings Out Cinematic Flaws

Flaws which mar otherwise useful pictures become apparent in competitive. Two U. S. entries lost ground from shortcomings. One of these, *Cover Girl*, took coals to Newcastle when it carried a lovely young American girl dressmaker salons of Paris but unfortunately conveyed double entendres to frustrated French viewers at Rouen. An otherwise fascinating film, well-liked by its feminine audiences in the U. S., *Cover Girl* was a bit *too* much for the French. Would it be that this *single feminine audience in all the Festival* was beyond the grasp of industry-oriented male jurors?

Another good U. S. film, *Winds of Change*, an aircraft was sailing along to awards when it came to a natural conclusion. What? An irrelevant sequence on tour-  
 CONTINUED ON THE FOLLOWING PAGE (62)

"Careful Boys" for this lady is not for handling. She's the only "live" figure in the 11-minute cartoon film sponsored by the Fruit Producers' Council to induce workers to reduce waste, damage and spoilage of fruit and other perishables. It was Biographic Films Ltd., England.

H. Sauer (right), of Siemens & Halske A. G., receives second prize in Category D for the film "Mehr Schen-Besser Erkennen" sponsored by Siemens-Reiniger-Werke AG, of Germany. Film was produced by Siemens & Halske A.G.

Hugh Wickham (right), of Shell International Petroleum, receives third prize in Category D given "Detergents Up-to-Date" produced by the Shell Film Unit. The presenter: Maitre Allard, representing the Mayor of Rouen.

Dr. W. Paekeniuss, (right) of Badische Anilin- und Soda Fabrik, receives first award in Category E for "Der Heisse Frieden" produced by Gesellschaft fur Bildende Filme, of Germany.

S. Jovanovic (right), of Unilever Ltd., accepts third prize in Category F given his firm's film, "Water in Biology," produced by World Wide Pictures. The presenter: M. Columbiere.

Michael Shersby (right), of the British Industrial Film Association, accepted second prize in Category F for "Be Careful Boys," on behalf of its sponsor, the Fruit Producers Council. The presenters: M. Heudier and M. Lorallere, festival secretary-general.

Carl Lenz, president, Modern Talking Picture Service (right), receives third prize in Category F for "Seven Keys to Greater Creativity" on behalf of Johnson's Wax and Hagg Films. Presenters: M. Lorallere; M. Vaudour, president of Rouen's Chamber of Commerce.

## Evaluating the Films at Rouen:

(CONTINUED FROM THE PRECEDING PAGE 61) ism, literally tacked on after a fine ending, cost this picture a possible Festival prize.

The most general single flaw in many films at Rouen was their tendency to compress too much within a single reel. To know when to end the picture, how to simplify and direct the message was a lesson many industrial film makers still need to learn!

Color dominated the winning entries at Rouen with 22 out of 23 award-winning subjects of excellent color quality. The sole black and white subject was Les Analyses Cinematographiques' *Le Secretariat*, which obviously didn't need color to show aspiring office secretaries the qualities which help them succeed.

Also worthy of comment was the near-perfect job of translation provided jurors at Rouen. Head-sets were provided and controls for these "walkie-talkie" receivers permitted a choice of English, French or German translation on every subject. Experienced translators were on hand early and late. About the

R. L. Bassett (right), Smith Kline & French Laboratories Ltd., accepts first prize given "Triumph of Childbirth" (in Category F). It was again presented by M. Mayolle (left).

only time they seemed superfluous was in the ceremonial events outside the screening rooms where every formal introduction and talk was laboriously translated into the three "official" languages of the Festival. But that's protocol!

## What This Festival Achieved

THE MOST SIGNIFICANT CONTRIBUTION of these annual International Industrial Festivals is their complete specialization in an era when most other film competitions are confused into a mixture of cinematic entertainment, experimental and underground filmmaking, pot-pourri of classroom, religious and other types of films. The emphasis at Rouen, as it has been throughout the previous festivals, is upon *industrial* concerns. Even the term "business" has special meaning brought to it.

There is strength in this unity of approach and in this direct comparison: where the Festival lacked strength it was only because of European tendencies toward nationalization of industries, i.e. railway films from France and Japan were government films. But its value of little note when compared to the better of important industrial executives who found it worthwhile to view the offerings at Rouen because they knew their time would not be wasted by irrelevant material.

There is no single comparable event of

## SIX WINNERS OF SPECIAL INDUSTRIAL & INFORFILM AWARDS AT ROUEN

The first annual Inforfilm Award was presented at Rouen by (left to right) Jan Botermans, general secretary of international film distribution group, to Messrs. Gerdes, Mignard who accepted on behalf of sponsor, Phillips, and the producer, Multifilm, of Holland.

Giacomo Guiglia (center), of the Italian Confederation of Industries, receives special prize awarded by the French Productivity Association to the film "Qualcosa di Nuovo fra gli Olivi" produced by Gruppo Cinema Montecatini for Societe Monteshell Petrochimica.

Karel Simons (right), of the International Audio-Visual Technical Centre, receives special prize awarded by the City of Rouen to "La Cybernetique" sponsored by the Belgian Service Cinematographique du Ministere de l'Education Nationale et de la Culture.

P. R. Wolff (left), president of the French Productivity Association, presents the special Inforfilm Award given "The Forth Road Bridge" to A. J. A. Lillie-Costello, who accepted on behalf of sponsors: Shell Mex and B.P. Ltd.

Mme. P. Ouzilleau (right) accepts a special prize given S. A. des Mines de Fer der Mauritanie for their film "La Montagne de Fer" by the French Federation of Industries. Producer was CAPAC. The presenter: M. Mayolle.

B. König (right), of August Thyssen-Hütte AG, receives special award of the French Federation of Industries given his company's film "Nur der Nebel ist Grau" produced by Deutsche Industrie und Dokumentarfilm GmbH.

ze (left), president of Laboratoires Paris, chats with Peter Rigg, Euro-tion of Business Screen, in the lobby of the theater, Rouen festival showcase.

Ott Coelln (left), jury member and delegate for U.S. at Rouen festival (and publisher of Business Screen) enjoys one of many official luncheons given by hosts of Sixth Festival.

de in the United States or anywhere the world, for that matter. There is the U. S. for such an event, sponsored industrial organization of the stature of S. participant at Rouen: the National ion of Manufacturers.

#### t of European Industrial Federations

United States, however, has no official this European-dominated event. While ants are the industrial federations of an countries (and their officers were presented on juries at Rouen), the host s the Council of European Industrial ons. Secretary-general Rene Arnaud of ncil told us at Rouen that it has been standing U. S. decision not to partici- cially in European events of this kind. Festival achieved noteworthy success ral other important areas. Friendly, urs exchanges with sponsoring com- and Federation executives as well as rs was most (and we hope, mutually) We hoped for *time* away from the awe- cial schedule to have "official hours" discussion. This is an important aim re Festival-planners. Such a "United " of industrial film people should let et better acquainted, formally, with pective interests and developments.

#### Well Represented at the Festival

e "important areas" of achievement certainly include the presence at Rouen

of journalists from throughout Europe as well as the French press. Columns about industrial films, their purposes, their values and their results, appeared in the largest dailies of these countries. Men like John Chitcock, Kenneth

John Flory, Eastman Kodak Co., alternate juror and delegate at the Rouen Festival, pictured beside busy waterfront of the Seine.

Myer and Frits Van der Molen wrote learned pieces, reacting to Festival events. They have awakened interest among non-visitors in high places among Europe's industries. For instance, the Berlin business paper "Handelsblatt" issued a four-page supplement in both German and French, discussing international developments in German industrial films.

Domestic use of business-sponsored films was stimulated among viewer groups exposed

to this extensive press coverage. Showings will be made easier-to-get through the growing influence of the international distribution organization, Inforfilm, whose chiefs from many countries were at Rouen through the festival week.

Members of Inforfilm also held their own two-day conference in Rouen. With the admission of a new representative in Finland, Filmihymä Oy, of Helsinki, this group can now provide film showings in 15 countries throughout Europe, the U. S. and Canada.

#### A Most Profitable Week for All Concerned

We emphasize the benefits gained by delegates and jurors during this Festival week. A sense of excitement in the potential of the film medium was engendered and even those whose films failed to gain awards benefited by seeing their flaws in competition on screen. The industrial executive not yet active in films could also profit greatly by this unequalled showcase from so many countries, with so many ideas and techniques for his edification.

The 1966 International Industrial Film Festival may be held in Venice, Italy next fall. Its advance planners should spend time and ask co-operation from all countries on such subjects and by all means schedule their events so there is a planned period for pre-judging counsel, instruction of the jurors, review of categories, etc. Even if it means one less ceremonial banquet. *Au revoir, Rouen!*

diners (left to right): Michael Shersby, British Industrial Film; James Carr, World Wide Pictures; Hugh Wickham, Shell Intl.

Rouen's Festival hosts excelled in hospitality. These delegates were pictured at the reception given by the regional Prefect at his home.

## **the NPR's two-lens turret gives you blimp-free silence with any lens. Any lens.**

The ingenious 12-120 zoom is an excellent lens. Sometimes, though, you may want something faster, or wider, or something else. Or you may want to use one of the present lenses. No problem. Next time they may produce a better lens than yours. It will fit the NPR. The NPR is not a camera whose noisy movement has been blimped. It is a camera whose quiet movement needs no blimp. Its rotating turret has two mounts: a standard C mount for wide adaptability and a camerette mount for the precision required by modern zoom lenses.

The NPR also gives you registration-pin movement, ten-second magazine changes, precise reflex viewing, sync-pulse generator, constant-speed motor and effortless hand-holding.

Service, sales and rental facilities are available from these expert, franchised dealers: *Chicago:* Behrends Inc.; *New York:* F&B CECO, Camera Service Center or Camera Mart; *Los Angeles:* Gordon Enterprises or Mark Armistead; *Detroit:* Victor Duncan Company; *San Francisco:* Brooks Camera. Scene of contrast from "Holland Today" brings helicopter into focus with familiar windmill.

## The Wide World of Holland's Film Makers

Carillon Pictures Uphold Tradition of Dutch Explorers in Global Outlook

RENOWNED SEAFARERS OF OLD and now among the leaders in international air transport (with their KLM airlines), the Dutch look to the world with an interest fortified by centuries of experience. Films of Holland at the recent International Industrial Festival (see other pages), included a 35-minute color film on Latin America produced by Carillon Films of Rijswijk. Sponsored by Philips of Eindhoven, *Latin American Rhapsody* throws light on some of the varied aspects of life on that continent of contrasts, presents a picture of progress and, in so doing, manages to show a good bit of its sponsor's contributions to better living among South Americans.

We met Carillon Films' principals, Gerard J. Raucamp and Ted de Wit, at Rouen. And after we had seen still another of their pictures on-screen there (*Holland Today*) we accepted with keen anticipation their kind invitation to visit the company's studio on a brief journey to Holland after the festival. It turned out to be one of the high spots of a most eventful European journey.

Films Reach Viewers Throughout World

The "true story" of all film makers is told on the screen. The work of Carillon Films is showing on cinema screens all over the world. The perspective of this Dutch-based company reaches from Indonesia to South America. Commissioned by the government of that Far Eastern land, Raucamp and De Wit are com-

pleting an entire series of films on its people, products and problems. Their forte is truly pictorial, often requiring no verbal tracks but

A leisure day is as good as any to look at the Dutch. These lakeside week-enders appear in one of many color sequences within "Holland Today."

letting exciting cinematography carry viewers into a sense of "being there" as the screen unfolds.

For example, *Holland Today* brings the image of that country up to date without "pushing all the windmills over the dikes." Sans narration, scripted by Raucamp and edited in a fascinating off-beat way (by Carillon's Olga Servaas), this KLM-Royal Dutch Airlines' production is presently distributed in 11 different versions in many hundreds of Technicolor 16mm prints. There is a one-reel

Reported from Holland by Ott C...

"theatrical" short subject companion entitled *Holland Off Guard*, now on sale throughout the world by Paramount Pictures. This short will reach an estimated audience of 40-50 million viewers.

Production Here is a "Team" Operation

Documentary films produced by the Dutch are justly world-famous. Many of these have been "one-man" efforts but the job at Carillon is a "team" operation. There is a "studio" staff of 30 talented people, working together from script to screen. Animation services are among the notable assets. Sound people and equipment at the studio work toward "foreign" versions as an every-day challenge, keeping dozens of commentators active for these long than-frequent overseas dubbing jobs.

Other Carillon productions (like its well-known *European Rhapsody*) characterized by broadness of scene and visual excitement, these film makers impart to their work, far from Madrid or Istanbul are as familiar to the lenses as the production lines in Amsterdam or Eindhoven. By the end of each picture the viewer is aware that a vast amount of subject have been covered, a mass of information disclosed without tiresome verbalisms. It is a secret of successful international public relations' use of the screen medium?

A fine "blending" of cinematic skill with real subject empathy was apparent in several Carillon productions. Let these be examples of skills abroad in the interpretations of products or people from the "wide world of Holland's truly creative film makers."

Above: Gerard J. Raucamp, talented producer and one of the principals at Carillon Films. Below: Ted de Wit of Carillon "off guards"

In this scene from film "Candid Europe" Carillon Films' camera shows Turkish coffee being charmingly served on a terrace of the Istanbul Hilton beside the Bosphorus

# International Scene in Focus

## Virginia's Ports Authority Shows "Gateway to the World"

DURING A THREE-WEEK goodwill tour of Europe, William J. Murray, Director of Commerce Department of the Virginia State Ports Authority, was host to over 100 of Britain's major shippers at a reception in September. They saw *Gateway to the World*, the Ports Authority's promotional movie produced by Per Smith Studios of Lauderdale, Fla. This is a film which convinces convincingly that the Virginia Ports can offer capacity, turnaround and direct access to the heart of the U.S.A. through railroad and waterway sys-

### Handling Grain, Tobacco Port

British shippers learned from the movie that more grain and tobacco are shipped out of the Virginia than any other in the U.S.A. More coal than from any other port in the world — and the Virginia ships have ample space for other bulk and mixed cargoes. They also saw the overseas links of the Ports Authority in their offices in Brussels and London and agency operations in other countries — all of whom advise local manufacturers about transportation facilities — and of port openings.

### Overseas Office in Brussels

Speaking to BUSINESS SCREEN at the show, Mr. Murray said the Virginia Ports Authority was the first to set up a permanent office — in Brussels in 1964. Since then they kept in touch with their regular overseas shippers through a monthly broadcast through an essential factor in new business was the Ports Authority film. *Gateway to the World* was shown by all overseas shippers and there were foreign language versions in French, German, and Japanese. He visited

Europe and Japan every other year and each time organized meetings to see the latest film.

On the current trip Mr. Murray has shown the film to a conference of 700 shippers in Denmark, 200 in Antwerp, Belgium, and similar groups in Rotterdam, Holland, as well as to audiences organized by the Authorities agents in Germany, France and Spain prior to the London meeting. He was enthusiastic about the power of the film to show shippers the things they need to know to place business — "as effectively as if they visited with us".

*Gateway to the World* was released in May 1965, and will be outdated by November due to extra port capacity becoming available, and the installation of new handling facilities.

### Sells U. S. Goods, Facilities

This was a fine practical example of the use of film to sell U.S. goods and facilities and certainly would put the Virginia State Ports Authority one up on its competitors in the eyes of European shippers.

## Bulova's "Moon Mission" Film Helps Boost Exports to Britain

Bulova boosted exports to Britain through a highly successful exhibit at the 10th International Watch and Jewelry Trade Fair in London recently.

In their small movie booth they showed *Moon Mission* — a 20 minute film trip to the moon in Project Apollo showing how two Astronauts will land on the moon and return to earth — also Astronaut White's walk in space. Bulova time-pieces similar to those seen in the space capsule were then demonstrated to a highly impressed audience of trade buyers.

Then word got out and mem-

bers of the public, anxious to see the N.A.S.A. films, got in, and the Bulova movie booth became the Exhibition's focal point.

Note for exporters: there is no better way of attracting attention than with the movie everybody wants to see — and if it shows your product in use, it becomes a sales argument which cannot be beaten!

## German Information Picture Is Awarded to Marathon Int'l.

The new spirit of Germany and its effect on the arts will be the subject of a new color film awarded to Marathon International Productions, Inc. of New York City by the German Information Center.

The new film, as yet untitled, will show how freedom of thought in Germany has brought exciting forms to architecture, art in general, industrial design and even to the people of that country, according to Dr. Joseph Thomas, director of the Information Center. It will be presented in the German Pavilion at the 1967 World Exposition to be held in Montreal.

\* \* \*

## "Laser & Living Cells" Film Honored by Military Surgeons

A French-produced film, *Laser and Living Cells*, which was made available in the United States by Merck Sharp & Dohme, has won the annual honor award of the Association of Military Surgeons for outstanding biological cinematography. It was created by Dr. Mareel Bessis, French cytologist, one of the world's foremost investigators of cell structures.

The film depicts the destructive effects of ruby laser beams on living cells while visually recording reactions of neighboring cells, such as phagocytosis, to intracellular dissection.

Photography involves the enlargement of microscopic images, relayed to a television screen, and then photographed using time-lapse motion picture techniques.

The film is recommended for persons interested in laser research and in basic scientific aspects of cellular effects of energy, the sponsor notes.

Anita displays an Indian sari.

## India's "From Fields to Forms" Shows Elegance of Silk Saris

Asia Telefilms, of Hyderabad, India, is producing a new film series titled, *From Fields to Forms*. The first of the series is a film titled *The Story of Cotton and Cottonwear Fashions*, featuring a leading star, Anita, in graceful flowerprint saris.

This Indian film producer maintains a regular staff of talented English-artists; films are distributed through cinemas in 35mm color, also via mobile vans and by special projection at large gatherings. From one to five English-version prints are kept active on such sponsored films.

## Int'l Labor & Industrial Film Triennial in Antwerp May 1966

The 5th International Labor & Industrial Film Triennial will be held May 16-21, 1966 in Antwerp, Belgium. Its announced program includes a series of showings of representative films of that type in various Belgian cities and an "international plenary session at which the best of these pictures are to be shown."

Films submitted for this event must be entered in the period from January 31 to March 15, 1966. Address inquiries to 5th Triennial, Frankrijklei 128A, in Antwerp.

Pictured at left: *The Chairman of the Film Producers Guild, Mr. K. Lockhart-Smith confers with Mr. C. Awouwer-Williams, the Managing Director of the Ghana Film Industry during the latter's visit to his London agents while premiering Ghana's first feature film. Flag-bedecked convention hall where Combined Insurance executives met at the Hilton. President W. Clement Stone is in front row, fourth from left.

## Winning Combination for a Meeting Abroad

600 Executives of Combined Insurance Company of America Find Advanced Sales Seminar at London Hilton a Real Hit

**M**ORE THAN 600 EXECUTIVES and sales representatives of the Combined Insurance Company of America and their wives attended a week-long convention at the London Hilton Hotel in September.

The delegates, flown in from the United States, Hawaii, West Indies, Canada, Australia and New Zealand were to participate in the first full scale Advanced Sales Seminar to be conducted in London by W. Clement Stone, founder and President of the Company.

### Ritt Sets Up the Meeting

In charge of the Convention arrangements was Mike Ritt, Combined's International Sales Promotion Manager, a member of I.A.V.A. Mike led an advance party to the Hilton two weeks before the event — but this trip was the culmination of months of preparation in Chicago.

It was to be an all-American convention, and all the flags, the bunting, the novelties, even the note-books had to be shipped over and cleared through Customs. Preliminary arrangements and purchases had to be made in Chicago — for this was the first time an American Company had held such a Convention overseas — and there were no local precedents.

### London A-V Facilities Used

Long before the Convention Mike asked BUSINESS SCREEN'S London office if a-v facilities could be obtained locally — the answer was "Yes — what do you want?"

The intention was to record the events through Auricon sound on film cameras — the cameras could be had for rent in London but the film, pre-stripped Ektachrome, is

not yet available in sufficient quantity for the job — so this would have to be shipped by Combined.

Next was a request for closed circuit television facilities and video recording equipment. Was this available and compatible with U.S. playback equipment? Again the answer was "Yes".

Similar enquiries came in for sound recording equipment, a 16 mm. arc motion picture projector and a number of portable 16 mm. machines to show training films to small groups. In each case local suppliers were sought out and alerted to the requirements.

### A Most Comprehensive Show

By the time that I met Mike and his team and we had carried out a preliminary reece of the convention hall and facilities, I felt that this was shaping up to be the most comprehensive a-v coverage yet seen in London.

The Hilton is a new Hotel, designed with conventions in view — accommodation for nearly 900 and the Ballroom is designed for big meetings. Its seating capacity as an auditorium is 1,000 and for dinner 750 places. The Combined required tables — and, seated in rows of 15 or so, all the delegates were comfortably accommodated.

A concealed catwalk encircling the Ballroom high under the roof which, with spotlight ports, enabled a complete lighting plot to be worked out for the stage — back-up table and podium, the band, set to the side of the stage — and travelling spots to pick up delegates as they spoke from the floor or moved up to the podium.

Nine microphone channels in the hall and on the stage were fed into a control console in the pro-

As Reported by Robinson P. Rigg, European Editor, Business Screen

jection box where there were full tape recording facilities and amplifier to loudspeakers throughout the hall. Hall lighting and air conditioning were also controlled from the box.

The assembly lobby, hospitality desk, small conference rooms and dining rooms were conveniently placed to the convention hall — and away from the Hotel's normal lobby traffic.

### Problem in Communications

In describing how he would direct operations of his 27-man convention staff and officials, Mike showed me his "walkie-talkie" equipment which had just arrived. And here we hit snag number one — the U.S. "citizens band" to which they were tuned is reserved for defense purposes in Britain and may not be used. With

Mike Ritt is at the controls of amplifier and tape deck console.

three days to go before the arrival of delegates a supplier had to be found. British a-v dealers do not carry "walkie-talkies" on their shelves (I reckon at least one will from now on!) This involved contact with the manufacturers — to be told that all available equipment was out in use on sales demonstrations at golf tournaments, police exercises, motor rallies. Eventually the sets were discovered and delivered.

Photo coverage was arranged by British Travel Association and Combined's own staff photographers, but Mike wanted each delegate to have a souvenir picture of himself and his wife — so Polaroid picture frames were obtained and printed with Combined's logo.

### Why the Company Went Abroad

As I lunched with W. Clement Stone, who incidentally is the author of "The Success System That Never Fails" and whose voice I already knew from the Business Men's Record Club discs, he ex-

plained why he brought his people over to London for their Convention. Many, he explained, had never been outside the United States and this was a great experience for them to have the opportunity to visit Europe. After the Convention they would tour in many countries as part of their annual holiday. This, he reckoned, would be a measure of reward for good service and strong motivation toward achieving his sales target.

In fact, Mr. Stone conducted his seminar with so much conviction that he put the fear of God into his staff to the extent that they just had to justify his faith in him. He himself is fully convinced of the value of the film and recorded tapes which are used not only at the Conventions, but also by 500 managers at Sales Seminars which are held in the Regions every three months. "Training with Combined is a continuous process and it relies heavily on audio-visuals" said Mr. Stone.

### Some Useful Items of Advice

I asked Mike Ritt about any special problems in organizing a Convention 4,000 miles from the Home Office. He had twelve items of advice:

(1) It is essential to clear all lines with the British Customs prior to shipping the convention stores, to ensure their duty-free importation and re-importation into the U.S.A. The first step should be to contact the British Travel Association in New York, who will give every assistance.

(2) It is most important to engage a liaison man in London to handle the supply of audio-visual equipment and stores, film processing, etc. and to look after copyright requirements, as there are many differences between U.S. and overseas conditions viz the "citizens band" for "walkie-talkies" and different frequencies and voltages for electrical equipment. Lamps, flash bulbs, even film codes may have different code numbers which can cause confusion, and requires a professional a-v man to look after the Convention on his own interests.

Other than that, Mike felt that organizing a Convention in London was no more complicated than in any typical U. S. city.

... and the money to pay for it? W. Clement Stone said that it came from Combined's overseas earnings in Canada, Australia and Britain, so there was no export of dollars!

# Here are four new things you can do with the KODAK CAROUSEL Projector, Model AV-900

Now you can use thick glass slides. Kodak is offering a new KODAK CAROUSEL Universal Slide Tray with compartments that can hold 80 slides of any thickness within the ASA tolerance of .125 inch. It fits *all* KODAK CAROUSEL Projectors, too.

Now you can have *professionally* smooth dissolves. There's a new KODAK CAROUSEL Dissolve Control that lets you dissolve smoothly from slide to slide. You can use two projectors to program up to 160 slides and get as much as 40 minutes of uninterrupted program with a fresh slide, automatically, every 15 seconds. You can also select automatic intervals of 5 seconds

or 8 seconds. Or, for complete flexibility in pacing the program, you can use manual control.

Want sound? Now there's a KODAK CAROUSEL Programmer that lets you synchronize your slides with any standard tape recorder.

Need unattended operation? The AV-900 has the long-lasting, heavy-duty components and special safety devices that let you set up for continuous, unattended operation month after month.

Kodak has a new free booklet to help you acquaint people in your organization with the benefits of audiovisual presentation. The booklet, **AUDIOVISUALS IN BUSINESS AND INDUSTRY**, introduces audiovisual methods and applications. It includes a bibliography of current literature on a variety of AV subjects. Please use the coupon.

Bob McCaslin, *Caterpillar Tractor* (third from left), speaks up during a Topical Go-Round session at IAVA's fall meeting in Boston . . .

(CONTINUED FROM PAGE 45)  
 man Edward Palmer (New England Telephone & Telegraph Co.); Dr. Raymond Wyman, Audio-Visual Director of the School of Education, University of Massachusetts, described what educators need in the way of industry-supplied overhead materials, and how this need can be met. Other speakers on this panel were Dr. Gaylen Kelly, Audio-Visual Director, Boston University School of Education, and George Gibson, Audio-Visual Director of Harvard Graduate School of Business Administration, who both discussed "how industry can help the education field."

#### New Tool to Help the Blind

Dr. Edward J. Waterhouse, Director of the Perkins School for the Blind, in Boston, described some of the psychological aspects of blindness. Blind people, he said, use sound as a guiding influence better than sighted people for no other reason than that they try harder. He demonstrated a newly developed machine which compresses the time of speech — by eliminating pauses, and by other methods — without altering pitch. Compressed speech — up to 50 percent shorter in elapsed time — greatly benefits students and other users of spoken books.

At IAVA's Banquet, held out over the water at Anthony's Pier 4 Restaurant, the guest speaker was Dr. Benjamin Weiner, Director of American Business Service of the Office of the Deputy Secretary of State, who described some of the services the Department of State is performing for American business.

#### Presenting Film as a Medium

A final day's activities consists of presentations by Carl Lenz, president of Modern Talking Picture Service, and members Larry Warnock and Al Schlaechtmeier (Link-Belt Company).

Mr. Lenz's "Stop Light" presentation is designed for showing

## IAVA Report: Anatomy of Communications

to groups of advertising and public relations people. It was brought to Boston for a tryout, he said, because IAVA represented the most sophisticated of industrial groups and he hoped that these true believers in the film medium would approve of its contents. Working in tandem with the multi-screen slide and motion picture presentation, Mr. Lenz established the point that films are now an equal partner with other major media — they offer big and fast growing audiences, and new techniques of reaching people are continually increasing the versatility of the medium.

Mr. Warnock and Mr. Schlaechtmeier described a complete marketing approach that Link-Belt

Company has recently produced for its salesmen. A motion picture, *Internal Quality*, is the keystone to the entire program, which involves advertising, trade shows, direct mail and other media.

Carl Lenz also filled in for Ott Coelln (BUSINESS SCREEN) to report on the recently-completed Sixth International Industrial Film Festival, at Rouen, France. Mr. Lenz and Mr. Coelln had been jurors at this event during the preceding week.

#### Meet in Chicago Next Spring

Next Spring's annual IAVA meeting will take place in Chicago (on May 2-5) at a location not yet chosen. Don Glasell (Montgomery Ward) is program chairman.

Panelists from education (to George Gibson, Harvard School of Business; Raymond Wyman, University of Massachusetts; and Kelly, of Boston University)

#### "Conformity" Provokes Thought About the Role of Individual

A thought-provoking television documentary, *Conformity*, asks "what's happening to the individual in America?" Originally produced as a CBS-TV "special," it is now available in 16mm sold for a free loan to schools, service clubs and other adult groups.

Conformity — one of the most hazardous threats to our democratic society today — is scrutinized in sequences on monotonous assembly lines, look-alike developments, organization "yes men" and standardized mass education. The 40-minute film, now available from Sterling in the U. S. A., makes the point that the problem can only be solved by persons who prize the right of refusing to accept things as they are.

The script by author John Keenan is narrated by CBS news commentator Harry Reasoner. The film picture is sponsored by Meely James Laboratories. Direct requests to Sterling at 375 Park Avenue, New York, N. Y. 10022.

\* \* \*

#### Capital Bakers Aid Training of Route Salesmen With Im

An intensified training program for route salesmen of Capital Bakers, Inc., a large regional bakery with distribution in Pennsylvania, Maryland and New Jersey was launched with a 20-minute film. Produced by the Motion Picture Division of the Walt O'Connor Co., Harrisburg, Pa., the training film is titled *Make Bread Business Your Business*.

The film depicts a day in the life of a route salesman and the solutions to the problems and objections he faces. "We fully expect this picture to pay its way in a relatively short time," said Capital sales manager Arthur F. LaSalle. "The savings in man-hours of instruction alone will be tremendous."

### De Luxe President Formalizes West Coast Management Tasks

Key managerial responsibilities for the West Coast Division of De Luxe Laboratories have been formalized by G. Carleton Hunt, president of the national concern which has two facilities in Hollywood, General Film Laboratories on Argyle Avenue and the De Luxe plant on Western.

Neal Keehn, the De Luxe national director of sales, is also director of sales and customer relations for the West Coast. Russ Landers, formerly executive assistant to Hunt, is production manager in charge of both plants. John Aitkens, who joined General Film as controller, is business manager with complete responsibility over accounting, credit and finance.

Stacy O'Brien continues as plant manager of General Film and Henry Goldfarb as plant manager of the De Luxe Western Avenue plant.

In addition to its West Coast Division, De Luxe operates motion picture film processing plants in New York, Chicago and Toronto.

*Wm. Richardson Co.*

1934 Sycamore Ave. Hollywood, Calif. 90038

This New York theater showed "No Time for Ugliness" (via Sterling) to 4,000 persons in four days.

### "No Time for Ugliness" Shows Urban Development Problem

Most of today's cities are an incredible collection of buildings, people, noise, history, hopes. They are built haphazardly, growing rapidly in some sections, deteriorating in others, sprawling in an undisciplined clutter. Our cities' approaches are marred by the loud sell — walls of billboards and tasteless neon signs. Who is responsible for this spreading blight on the American landscape? Rental agencies, thoughtless city officials, businessmen and each of us.

This is the message of a new film, *No Time for Ugliness*, just released by the American Institute of Architects and distributed by Sterling Movies U.S.A.

The film shows how downtown areas can be confused by commercialism, poles, wires and traffic congestion. Or, as in Fresno, California, traffic can be channeled off the main street, creating a beautiful pedestrian shopping center with sculpture, fountains, benches, trees and flowers.

We can deny residents the beauty and recreation of an urban river or lake with industrial debris, or, as the film shows in San Antonio, Texas, we can grace a river with shaded walkways, boating, trees and cafes.

Due to the present population growth and the construction boom we will rebuild America in the next 40 years. What sort of cities will we build for ourselves and our children? Time is running out — the choice is ours. As we race toward the future, we have *No Time for Ugliness*.

The film was produced by Nova Studios, New York, Larry Ravitz and Peter Yung, co-producers. •

Visualscope's "Vitamin" Film Now in National Distribution — Vitamins, from A to K, and their relationship to health are the

## Brief Reviews of Current Sponsored Films

subject of *Vitamins and Your Health*, a new film available to high schools, colleges, adult organizations and TV stations for free-loan use. The 15-minute film is presented by the National Vitamin Foundation, produced by Visualscope, Inc., and is distributed by Association Films, Inc.

*Vitamins and Your Health* seeks to make people aware of the importance of a well-balanced diet and urges them to re-examine their own eating habits. Using a light and animated style, it discusses the catalytic action of vitamins in the body and their ultimate effect on health. Starting with vitamin deficiency diseases such as beriberi and scurvy, the film concentrates on modern health problems that are affected by low vitamin intake.

### Historic Role of Scottish Rite Masons in America Is Pictured

American history as seen through the contributions of the Masons of America is portrayed in a new film, *In the Hearts of Men*, recently released by the Ancient and Accepted Scottish Rite of Freemasonry, Southern Jurisdiction, U.S.A.

Through liberal use of old prints, art, and new live photography as well, the film shows that in almost all the courses in American human events, "Freemasons were there spreading the cement of friendship, morality and brotherly love."

Depicted in the film are such illustrious Masons as George Washington, Benjamin Franklin, Alexander Hamilton, James Madison,

Traditional ritual of Free Masonry, a scene from "Hearts of Men"

Patrick Henry, as well as such modern members as J. Edgar Hoover, Charles Lindbergh and Astronaut Gordon Cooper who took a Masonic flag on his first space flight.

*In the Hearts of Men*, 29 minutes, b/w, was produced by the Institute of Visual Communications. It will be distributed through sale (\$50 per print) by the Freemason at 1733 Sixteenth Street, N.W., Washington 20009. The early five million Freemasons of the U.S. will find it an excellent means of public information about who Masons are and for what they stand.

\* \* \*

### "Trek to the Tetons" Shows Scenery and Wildlife of the West

Unusual and rarely photographed wildlife of one of the last regions in the United States where herds of buffalo, elk and moose still roam the prairie, is the subject of *Trek to the Tetons*. Presented as a public service by the Eastman Kodak Company, the 23-minute film is available for free-loan use to school, sports and nature groups, camera clubs and adult and civic organizations from Association Films, Inc. It was produced by Matco Associates in the Teton country of northwest Wyoming.

*Trek to the Tetons* captures magnificent scenery and wildlife of the region in a story about "cludes" who go west to get photographs for a magazine article with help of local residents who as guides and help them set up camera shots, they are able to get some unusual photographs: bison stampeding, whitetail prairie dogs, elk, moose and seldom-seen animals in their natural habitat. Camping out on signment, they cover the reaches of local mountain ranges and go fishing in neighborhood lakes.

The film contains some interesting close-up and telephoto shots of interest to camera buffs.

LENSCREEN REAR SCREENS

by POLACOAT

16 mm. Cine Educator by Busch

The advantages of rear screen projection in sales promotion, sales training, exhibits and displays are well established.

However, Lenscreen by Polacoat offers a valuable plus. The millions of tiny lenses on the surface of LENSSCREEN respond only to projected light. Lens response is unaffected by room illumination! So, with Lenscreen, your present projector can show sharp, clear pictures (even in full color) in fully lighted rooms.

You command greater attention. Your viewers take notes readily, assimilate faster, retain facts and sales points longer.

Eliminate the inconvenience and distractions occasioned by darkened rooms. Discover how only Lenscreens can let you enjoy the benefits of true "daylight" presentations. Reasonably, too.

Send for your free LENSSCREEN Ideo Kit, today.

# Progress Report on Telephone Technology

## Electronic Switching System Created by Western Electric

REVOLUTION taking place in electronics is being adapted by the Western Electric Company to meet increasing demands for more versatile telephone systems. One of the radical advances made by this communication manufacturer is the Electronic Switching System, known as ESS, which is virtually all electronic, the use of magnetically-stored information to control the operation necessary to put through a telephone call.

— *A Manufacturing Revolution: The New World of Telephone Technology* tells the story of this advance in a 25-minute motion picture produced for Western Electric by Pelican Motion Pictures.

### Diagrams Show Basic Features

An introductory graphic animation sequence, designed by Pelican Motion Pictures, explains the basic features of the new system — the new services made possible by this switching network. One of the conveniences provided by the system is the transfer of your calls to another phone when you're away from your own. If you're talking, ESS automatically connects another call coming in. It also sets up conference calls; dialing a few digits will connect you with the numbers frequently

used by the Pelican crew, under the direction of Jeri Sopanen (who also did the photography) traveled to Allentown, Pa. and Columbus, Ohio to film the manufacturing processes involved in producing this system. An entirely new manufacturing environment was created to meet the extreme degree of precision demanded by this complex new system. New tools and new processing techniques were also required.

### Manufacturing and Measuring

At various stages of manufacture shown: the making of the twisted wire (which furnishes access to information stored on memory) and the assembly of the printed circuit module, heart of the system. Another high production component is the sealed ceramic base element of the ferrite core which performs line switching functions in ESS.

Finally, the film takes viewers through testing and measuring techniques which are continuous through all of these steps. As solid

Scene from Western Electric film.

state manufacture becomes increasingly sub-miniaturized, problems multiply. The standard: no ESS office must be out of service for more than a few minutes in decades!

This in-depth technical film is available on loan from the Western Electric Company for groups interested in communication's technology.

### Galvanized Sheet Film Shows Fire Tests on Duct Materials

Filmed documentation of fire tests on four different heating and air conditioning duct materials is the subject of a 24-minute color film, *Modern Ducts and Fire Safety*, sponsored by the Committee of Galvanized Sheet Producers, American Iron & Steel Institute.

The film shows how commercially available ductwork materials perform under static load, impact, puncture and environmental tests as well as under various fire conditions. A highlight sequence is a full-scale fire test in which four ducts (installed side by side) are subjected to an actual fire. This test also shows how some duct materials generate smoke and noxious fumes after brief exposure to fire.

Free loan prints are available on request to: Committee of Galvanized Sheet Producers, American Iron & Steel Institute, 150 E. 42nd St., New York, N. Y.

Results of fire tests on four different heating and air conditioning duct materials are shown in film.

Pictured at right: a Navy Drone Anti-Submarine Helicopter takes off from destroyer's flight deck for an anti-submarine "search and destroy" mission. Scene is from the Gyrodyne-U.S. Navy color film produced by MRC Films.

## DASH: Navy's Answer to Submarine Attack

### Gyrodyne Film Explains Anti-Submarine Helicopter System

ONE OF THE NAVY'S newest weapons, the Drone Anti-Submarine Helicopter (DASH), is the subject of an unusual 33-minute color film recently produced for the Gyrodyne Company of America and the U. S. Navy by MRC Films, a division of McLaughlin Research Corporation.

Early sequences in the film, narrated by Alexander Scourby, trace the history of anti-submarine warfare from the first World War to the present. In World War I, it was the invention of SONAR which helped end the threat of German U-Boats. This means of underwater detection made depth charges feasible and effective.

### ASW Problem: the Nuclear Sub

But by World War II, submarine tactics had improved considerably. The development of longer range SONAR, radar and airborne means of search and attack as well as the use of new "ahead throwing" weapons such as Hedge Hog, again turned the tide against the U-Boat.

Today, with the advent of nuclear subs capable of traveling faster and farther than ever before without the need of surfacing, capable of launching nuclear missiles against cities and industrial complexes, the problem of ASW forces has greatly increased. Although "ahead throwing" weapons have improved in range and accuracy through the development of ordnance such as Weapon Alpha and Asroc, submarine capability has not lagged. Subs now carry weapons which can be launched beyond the range of counter weapons, can seek out ASW ships and destroy them.

### Today's Answer to Sub Attack

The problem: how can a destroyer stay out of the submarine's weapon range and still get close enough to kill it?

It was conceived that if a destroyer was equipped with a small helicopter carrying homing torpedos, attacks against subs could be projected to the limit of an ASW vessel's sonar range. This was the DASH Weapons System

concept. A refinement of the system was to remove the man and remotely control, or drone, the helicopter.

Navy destroyers were subsequently outfitted with flight decks, hangars, two Drone helicopters and all the control equipment required. Gyrodyne, the manufacturer of DASH helicopters, was made Weapons System Manager for DASH.

### DASH Makes Successful "Kill"

This film serves as an introduction to the system, shows how it operates and concludes with an actual mission in which DASH is used to successfully seek out and destroy a sub. The script by Gene Starbucker was directed and supervised in production by Lawrence Mollot. Cinematography is by Charles T. O'Rork.

MRC Films, in business for less than four years, has won kudos for the quality of its industrial films. 14 of these have been produced, for example, for Sylvania Electronic Systems. The parent firm, McLaughlin Research Corporation, has been a leader in the field of technical documentation for more than a quarter century, with headquarters both in New York and Washington.

\* \* \*

### "More Power for the Job" a Useful Film for Teen-Agers

Stressing the educational background necessary for college and for vocational schools and on-the-job training is a useful new 19-minute color film, *More Power for the Job*.

Available for outright print sale (\$195) or daily rental from the International Film Bureau, Inc., 332 S. Michigan Ave., Chicago, Ill. 60604, *More Power* points out expanding opportunities available to students who consult a school vocational guidance counselor — chart their career goals and plan educational and training programs for the years ahead.

The film was produced by the Montana State College Film & TV Center.

NEWS OF STAFF APPOINTMENTS AND A-V INDUSTRY DEVELOPMENTS

Hardy Glenn: to Ragsdale

## Navy's Hardy Glenn Becomes V. P. at Ragsdale Associates

Hardy Glenn, former director of the Media Relations Division, U. S. Navy Office of Information has been appointed a vice-president of Carl Ragsdale Associates, Inc. and its Sun Dial Films, Inc. division. He will headquarter at the company's Washington, D. C. facility, 1032 33rd Street N. W.

Recently retired from the Navy with the rank of Captain, Hardy Glenn has held a wide variety of assignments in its Public Information program. These include duty with the United Nations Command; Naval Forces, Far East (where he was Deputy Spokesman for the U. N. Advanced Armistice Negotiations in Korea); Naval Forces, Philippines; and the U. S. Pacific Fleet. He was also head of the Audio-Visual and News Branches of the Navy's Office of Information at the Pentagon.

\* \* \*

## Kodak Appoints John A. Pistor to Head Film Trade Relations

Motion picture trade relations at Eastman Kodak will be directed by John A. Pistor, reporting to C. Ray Troutner, sales manager of the company's Motion Picture and Education Markets Division.

Pistor is a veteran member of Kodak film departments, having joined the company in 1938 after graduation from Cornell. He began work in the motion picture sales department in 1946. After a 10-year period on leave of absence when he was associated with W. J. German, Inc. he returned to Kodak as general manager of the East Coast Division in 1963.

\* \* \*

## Pederson Now Product Manager of the Permacel Tape Division

Carl R. Pederson is now product manager for film splicing tapes and equipment at Permacel, a division of Johnson & Johnson.

## Connelly to Agfa-Gevaert as Head, Professional Cine Sales

Agfa-Gevaert, Inc. has named Paul V. Connelly as sales manager, Professional Cine Products. The appointment was announced by Rene Aerts, president of the Teterboro, N. J. company.

For the past 11 years vice-president of Pathe Industries, N. Y., Connelly's background includes financial and general officer service in the advertising, motion picture and paper industries. He was previously treasurer of America Corp.; treasurer and director of National Transitads, Inc.; and vice-president of Lathrop-Vandewater Paper Co.

He attended Fordham Univer-

sity and Boston College; served as a first lieutenant in the U. S. Air Force from 1942-45.

\* \* \*

## Burt Neuburger Is Sales V. P. at Video Pictures of Illinois

Burton Neuburger has been named vice-president in charge of sales for the Chicago-based division of Video Pictures, Inc., New York City. His appointment was confirmed last month by Fred Olsen, president of VPI of Illinois.

Neuburger, a former sales executive for the Technicolor Corporation, will remain available to that company in an advisory capacity. He returns to the production field where he has had 20 years of experience with national companies.

Ideal Pictures Names Weiland as General Manager on Jan 1  
 ☆ M. George Weiland will become general manager of Ideal Pictures Inc., national distributors and film library firm. His appointment will be effective Janu

M. George Weiland

1966, according to Jack C. Wits, recently-elected president of Ideal

Weiland assumes a post vacated by the retirement of Paul R. Ficht, president and general manager of this 48-year old company since 1952. Weiland has served as Midwest sales manager for a national film distribution company for the past 16 years.

\* \* \*

## Antonia Villi to Direct P/R and Advertising of VPI Production

☆ Mrs. Antonia Villi has joined VPI Productions, Inc., New York, as director of public relations and advertising, according to an announcement by VPI president George Tompkins.

Mrs. Villi held the same position with the Communications Group before her VPI appointment. Prior to that, she was associate PR director of Restaurant Associates, staff-writer at Gedsen-Todman, and for eight years was vice president and account executive of Garton Associates, public relations.

At VPI her responsibilities will include the creation and supervision of the advertising and public relations programs for all VPI-affiliated companies, as well as handling contract and placement with the trade and consumer press. In addition, she will be editor of the VPI promotion organ, IMAGES.

\* \* \*

## Stephen Kelly to Manage Production at Marathon Int'l

Marathon International Productions, Inc., New York City, has appointed Stephen M. Kelly as production manager. He was assistant producer for New Studios, Inc.

## We process filmstrips, too.

In fact, for 16 years, we've been doing nothing else except perhaps for some slide duplicating work now and then. Here, on Long Island Sound about 30 minutes from mid-town New York, we have managed to design and build our own printers and processors and to sign on a capable crew who, above all, care about shooting your master negatives and processing your release prints.

For price, technical or delivery information, please telephone, write or come out and visit any time you're in the neighborhood.

Jenkins . . . joins Acme

### Lab Names Lynn Jenkins Research Engineer

Lynn M. Jenkins has been named chief research engineer at Acme Film Laboratories, Inc., a subsidiary of Acme, Inc., headed by general manager Robert A. Swelson. In his new post, Mr. Jenkins will be in charge of research and development at Acme. He will be in charge of research and development at Acme, including the labs' continuing activities in "High Band" transfers and working with its new Ampex Model 100 videotape equipment. Mr. Jenkins has been working for Acme for several years to perfect color video-film transfers and is now approaching the threshold of a breakthrough. Current facilities provide for color and color tape-to-tape reproduction, b&w tape-to-film transfer and 16mm b&w and color film processing and printing. Mr. Jenkins came to Acme from the Ampex Corporation where he was a field engineer. He attended Stanford at SMCC and UCLA, then lived in Northridge, Calif. with his wife. He is an active pilot and an outdoorsman.

### to Direct Kodak Market Channel, Education Services

Thomas H. Miller's appointment as director of marketing and educational services at Eastman Kodak Company was announced in November by Gerald R. Brown, vice-president for marketing. Since 1957 he has been assistant director of industrial relations. Miller began his Kodak career in 1936 as a trainee.

### to Represent Reid Ray in Twin Cities Region

A veteran of communications, Reid J. Webb Hedin has joined Reid H. Ray Film Industries, St. Paul, Minn., as a regional account executive. Hedin will serve clients in the Twin Cities and surrounding areas. He is active in business affairs and a native of Minnesota.

### Visualscope Names A. J. Silano, Karl Fischl as Vice-Presidents

Two executive appointments have been made to the sales staff at Visualscope, Inc., New York City. Anthony J. Silano has joined the producing company as vice-president and account executive. Karl Fischl is vice-president for Educational Marketing Services and also serves as an account executive.

Silano began his career 15 years ago as an animator, was subse-

Anthony J. Silano

quently promoted to director of animation, associate producer in charge of live action production and executive producer. He came to Visualscope from Mogubgub Limited where he served as executive vice-president and contact coordinator of sales.

Fischl has been one of the industry's most active sales executives since 1946. He previously served as sales vice-president for Transfilm and was marketing director for Wilding, Inc. in New York City. His special responsibility in the new post will be to extend Visualscope's products and services in the education field. Four years of field experience in evaluating audio-visuals for this market and aid to textbook publishers are among the assets he brings to the new activity.

Karl Fischl now heads educational marketing services at Visualscope.

DA-LITE  
Screens

Here's an exciting way to bring showmanship to sales meetings and presentations!

Da-Lite's new ELECTROLET projection screen goes up and down and out of sight at the touch of a button. Add an extension cord and you can operate the Electrolet from anywhere in the room! Adds excitement and a "professional touch" to any sales meeting or presentation.

The ELECTROLET attaches easily to wall or ceiling. Plugs into any regular outlet. Operates trouble-free, year after year. The gantly styled to match office and conference room decor.

Sound expensive? The 50" x 50" ELECTROLET is only \$54.95. Prices for the 60" and 70" models are just as modest.

Write for free color folder today. Da-Lite Screen Co., Inc., Warsaw, Indiana.

### NEXT ISSUE: ANNUAL REVIEW OF AWARD-WINNING FILMS

The Annual "Film Awards of the Year" Review will provide special feature interest in these pages next month as the Editors summarize all 1965 film award programs for business and factual motion pictures and slidefilms. Film festivals at home and abroad will also be the subject of editorial analysis and rated according to their methods and values.

### New from F&B/CECO!

## 16MM ECLAIR SYNC MOTOR

COMPLETELY NOISELESS  
• WEIGHS 10 OZS.  
LESS than constant speed motor

This is the first synchronous motor specifically developed for the 16mm Eclair NPR camera. It was designed and manufactured in F&B/CECO's own shops, and weighs only 3.75 lbs.

The new motor is extremely versatile, drawing only 45 watts from a 110 volt AC power source, making it ideal for portable power supply use. Exhaustive laboratory tests have shown that even with a voltage drop as low as 70 volts, Sync will still be maintained.

AVAILABLE FOR RENTAL OR SALE

Immediate Delivery at **\$650**

Basic Motor: 110 Volt AC—60 cycles—24 frames per sec.

## THE EXECUTIVE:

### Mason Heads N.Y. Kodak Sales; Stifle Directs Midwest Region

Kenneth M. Mason has been appointed sales manager of Eastman Kodak's motion picture and education market activity, New York City Region. His post was confirmed last month by Donald E. Hyndman, Kodak assistant vice-president and general manager of the MP&EM division. Mason reports to C. Ray Troutner, sales manager of the division.

Ethan M. Stifle assumes Mason's former post in Chicago as sales manager, Midwestern Region, also reporting to Troutner. Both men are veteran members of the Kodak organization.

Mason, who graduated cum laude from Washington & Jefferson College and took graduate work at the University of Rochester, joined Kodak in 1935. Currently, he is conference vice-president of the Society of Motion Picture & Television Engineers, having previously held many executive posts in that organization.

Stifle, who graduated with high honors from the University of Illinois, joined Kodak Research Laboratories in 1931. In 1950 he was appointed manager of the East Coast Division of the company's former motion picture film department. In 1963 he was named manager of engineering service, East Coast. Stifle has also been very active in professional motion picture, trade and technical associations. He is currently serving as president of the Society of Motion Picture & Television Engineers. •

\* \* \*

### Jay Sheridan Joins Niles as Producer-Director in Chicago

Jay J. Sheridan, a 15-year veteran in film and television direction and production has joined Fred A. Niles Communications Centers, Inc. as a producer and director.

Sheridan's background includes five years at Ziv Television Productions, five years as an associate producer of the "Robert Montgomery Presents" TV series and five years with the Chicago office of Louis G. Cowan, Inc. •

\* \* \*

### Robert Wright, Jack Rumrill Join Staff of Filmack Studio

Robert E. Wright and Jack Rumrill have been added to the TV-industrial film sales staff of Filmack Studios, Chicago. Wright formerly represented Wilding, Inc.

in Washington, D. C. and Metro Rumrill is a former New York with 11 years' experience in creating and selling radio and television package shows.

\* \* \*

### Herny to Plastic Reel Corp as Deputy Director of Sales

Plastic Reel Corporation of America has appointed Henry H. Herny as deputy director of sales, responsible to Milt Blutter, vice president of sales for Weehawken, N. J. manufacturer of film handling accessories.

Herny was formerly advertising manager for Kling Photo Corp.

Henry H. Herny: now at Plastic Reel Corp. as deputy director of sales

Inc. and the Arriflex Corporation of America. In confirming the appointment, company president Walter Elterman noted "that this newly created post is one more step forward in our continuing effort to popularize economies in the use of plastic reels and cases in the audiovisual communication field."

### Buddy Gaines to Sarra, Inc Staff as a Producer-Director

Sarra-Chicago, Inc. has announced the appointment of Buddy Gaines, a former executive

Buddy Gaines: to Sarra-Chicago

producer at Cypress Gardens Productions, Florida. He is now a producer-director on the staff of the Chicago-based film production company.

## to Catch a Porpoise:"

(CONTINUED FROM PAGE 51)

There is no place in the world like the Bahamas for underwater photography. The ocean is light aqua blue and crystal clear. There is no turbulence in movement whatever that the photographic results are fantastic. Twenty or thirty feet down, the light is excel-

lently had written a sequence into the script in which Captain Wilbur Gray, Director of Collecting at the Miami Seaquarium, would catch a porpoise because of fight that marred its appearance. Obviously, this was to show that perfect specimens would be available for the Fair. Kley was in no doubt whether this was his job — to find a peculiarly beautiful porpoise in the great At-

Captain Gray, veteran of 25 years collecting marine life, told us that we could find just what we needed: a porpoise. Good to his promise, he brought a porpoise, evidently the result of a fight with a shark, caught in the net and Captain Gray rejected it for shipment to New York. The scene was shot as

Throughout the latter part of the filming scenes, the porpoises were not afraid of the cameras and crew, but the stars of the production unit became one happy family. Even when they were made from the bucket "cherry picker" directly over the big animals were expected to make an 18-foot leap out of the filming pool, they exhibited no fear. Every member of the unit, from the director to the grip, fell in with the cast of the show. When the training complete, they were transported in large custom-made boxes to the airport and so on to the World's Fair. Always docile, they offered no photographic problems. They did not rebel too much against the confinement of the boxes. On board the cargo plane to

New York the scenes presented a photographic problem because of a misunderstanding with the airline regarding power for the lights. There was nothing to do but shoot color with available light. However, this was acceptable enough to show the conditions under which the porpoises travelled to New York: First class — with a plane to themselves — courtesy Eastern Airlines.

The last scenes were shot at the World's Fair and it was very cold. The people who came to view the porpoise show at the Florida Pavilion wore overcoats, so odd shots and cutaways of the audience could not be made.

However, before our film was edited, with the sound, etc., we were able to send a staff cameraman back to get the necessary scenes. It was ironic that, with the difficult scenes we had made in the open sea, simple audience reaction scenes were so much trouble and so expensive to make.

We must come back to the original commission Burton Clark had given to Reela — five separate films to be made. Before shooting was completed it was suddenly decided, on a Friday morning in June, that an additional promotional film would be needed.

The editor, sound engineer and director-producer Sack came back to Reela that Friday night and put together a 3½-minute promotion film that so pleased Clark that he subsequently made a Spanish version for Latin America.

It was a short, steep pull, but six months after we finished all subjects we were rewarded in receiving a 1965 Cine "Golden Eagle" and an Educational Film Library Association "Blue Ribbon" for the half-hour show, *To Catch a Porpoise*. And — we are proud — all of us, including the director, cameramen, sound engineer, editor, grip and — no doubt, the porpoises would be proud if they knew about it! •

**Four U.S. Film Executives Tour Soviet Studios and Labs**

A delegation of four American motion picture film experts organized by the Society of Motion Picture and Television Engineers has taken a three-week tour of major cine facilities in the Soviet Union. This trip was made under the provisions of the U.S. — U.S.S.R. exchange agreement program of the U.S. Department of State.

The trip, originally scheduled for last June, was in reciprocation for the visit to the U.S.A. made last year by a similar group of U.S.S.R. film experts. In 1963,

the Society sponsored and effected the initial exchange sending a first delegation to the Soviet Union.

The present SMPTE-sponsored group was composed of Herbert E. Farmer, University of Southern California; Saul Jeffee, Motionlab, Inc.; Konstantin Pestrecov, BM and Sidney P. Solow, Consolidated Film Industries.

The delegation hoped to visit outstanding U.S.S.R. facilities for design and performance of new equipment for mass printing of release prints and special effects; latest technical developments in the use of motion pictures in education; and broadly, to review developments of U.S.S.R. motion picture techniques and facilities.

 any ceiling up to 14 feet high; it  
 includes a 10-foot cross bar for no-  
 seam paper and other backgrounds  
 or lights.

Where ceilings are out of reach  
 and for outdoor use, the "Pole-  
 cats" are supported by tripods  
 made from the same 2-foot  
 "Shorties." All parts are light-  
 weight, black anodized aluminum  
 packed in a compartmented can-  
 vas kit with shoulder strap. The  
 "Shorty-Kit" sells for \$89.50.  
 Write: Brewster Corp., Old Lyme,  
 Conn. for kit or data on the com-  
 plete line.

**Low-Cost Closed-Circuit TV  
 With New Ampex Videotrainer**

To expand use of closed-circuit  
 television in industry, training, etc.,  
 the Ampex Corporation has in-  
 troduced a new low-cost profes-  
 sional "VR-7000" videotape re-  
 corder and the VR-7100 Video-  
 trainer.

The VR-7100 Videotrainer  
 combines the new recorder with  
 a television camera, receiver and  
 all related equipment necessary for  
 the production and display of vi-  
 deotape programs in a self-con-  
 tained mobile console priced at  
 \$5,945.

The VR-7000 and Videotrainer  
 were designed "to fill the gap be-  
 tween broadcast-quality portable  
 videotape recorders and those  
 built for home use," according to  
 C. Gus Grant, Ampex group vice-  
 president. This recorder handles  
 63 minutes of the program mate-  
 rial on a 3,000-foot reel of video  
 tape. Programs produced with the  
 videotrainer can be played back  
 on a number of conventional tele-  
 vision receivers.

 More news about audiovisual  
 equipment is featured on the next  
 two pages of this issue.

## Need WEEKEND Lab Services?

If your Motion Picture Film deadlines make Weekend Lab Services necessary, perhaps we can help. When it comes to 16mm Color, we are unique in that we can perform all of the following in our own lab:

- ★ Develop Ektachrome Commercial, MS, ER or ERB Color Original Films . . .
- ★ Print and Process Kodachrome 7387 Reversal Color Workprint . . .
- ★ Transfer Mag Sound Track to Optical and develop complete . . .
- ★ Print and Process Silent or Sound Kodachrome 7387 Color Release Prints with color correction . . .
- ★ Print and Process EK Color Internegative and Positive Release Prints with color correction .

The Cost? So reasonable, you won't believe it! We can also provide San Francisco Airport Pickup and Delivery. Call Code 415-321-5678, or write or wire—

### CINE-CHROME LABS, Inc.

4075 Transport Street, Palo Alto, California 94304

## Why Don't You Concentrate on Profits?

Let us concentrate on helping you make your clients' films faster, easier, less costly.

Whatever your production personnel needs are, we can provide you with *qualified* free-lance people to *write—direct—edit—you name it*—the next motion picture, slidefilm or tv commercial you *have to do—but* your staff is already overworked!

We are NOT in the business of making films—you are—we have the help you need. *May we serve you?*

**Da-Lite "Executive Electrol"  
Screen Recesses Into Ceiling**

An all-new, heavy-duty Executive Electrol projection screen which recesses completely in the ceiling and provides its own automatic ceiling closure has been announced by the Da-Lite Screen Company, Inc., Warsaw, Indiana.

C. J. Cerny, sales vice-president for Da-Lite, calls the Executive Electrol "one of the most significant developments by our company in recent years. This com-

Da-Lite Executive Electrol screen.

pletely automatic screen is the ultimate for executive suites, conference rooms, small auditoriums and presentation quarters," he noted.

A hinged ceiling closure panel, only three inches wide and the length of the screen, opens at a flick of a decorator-type switch, allowing the screen surface to lower in position and stop automatically. Another touch of the switch and the screen rolls back into the ceiling case and the panel closes automatically.

The Executive Electrol is available with screen surface sizes starting at 50"x50" up to 12-foot square. Surfaces may be either Da-Lite's White Magic Chemi-Cote glass beaded or non-gloss mat white.

**Exhibit Model "Movie-Mate"  
Available for Display Shows**

A new exhibit model "Movie-Mate" 16mm continuous sound projector (Model CV-3 Special) has been introduced by the Movie-Mite Corp., Detroit. Designed for use in exhibits or displays, the CV-3 may be used for continuous or push-button ("on demand") showings; it is available for either remote or rear screen use.

Features include: Tru-Flector

New exhibit model of continuous 16mm "Movie-Mate" sound machine.

**a-v equipment trade**

NEW PRODUCTS & ACCESSORIES FOR PRODUCTION AND PRODUCTION

projection lamp; ease air filtering; film dust and static removal and full component of film protection switches to assure long film life. Magazine capacity is 500 feet of 16mm film; weight: approx. 35 lbs. Priced under \$550 f.o.b. factory, Evanston, Ill. For further details write: Movie-Mite Corp., 8811 Puritan, Detroit, Mich. 48238.

**RCA "1600" Sound Projector  
Features New "Safe Threader"**

The Radio Corporation of America has introduced the "RCA 1600", a new 16mm sound motion picture projector featuring a unique self-threading device said to eliminate a major source of film damage.

The 1600 model makes the first use of the RCA "Safe Threader"

RCA 1600, 16mm sound projector,

which is engaged only during the threading operation, thereby averting film jams and sharply reducing film wear, according to A. J. Platt, manager of distributor sales for RCA Audio-Visual Products. The projector also features a weight reduction to 30 pounds from previous models.

\* \* \*

**New Kodak Sound Synchronizer  
for the Carousel Slide Projector**

The Kodak Carousel Sound Synchronizer, a low-cost synchronizing unit which adds stereo tape sound to the well-known Carousel slide projector, has been announced by Eastman Kodak. The compact device provides for automatic slide-sound programming without distracting audible slide-changing signals.

The lightweight unit enables owners of standard stereo tape recorders who also have Carousel Models 700, 800 or AV-900 to produce tape-slide programs either with or without the company's Car-

Kodak Carousel Sound Synchronizer

ousel Dissolve Control. Models 570 and AV-580 can be used with the Carousel Dissolve Control.

The Synchronizer, which weighs only 9 ounces in its cartons, is connected by plug to the projector's remote control receptacle. The projector's remote control site is plugged into the Synchronizer. Synchronizer's phone plug is connected into a microphone on one channel of the recorder and the mike is plugged into other input channel of the recorder.

Voice and musical background are recorded on one track. When the forward button is pressed, the change-slide signal is received on the second track. Each time a signal then activates the "advance" switch in the projector, which provides the other hand. The device is available from Kodak dealers at "less than \$30."

\* \* \*

**Modular Film Storage Racks  
Hold All Standard Cans**

A new modular storage rack for film cans and cases has been developed by Worley & Company, 802 W. Whittier Blvd., Fullerton, Calif. Designed for any storage space need, the rack holds 40.

Worley modular film storage rack

and 2,000-foot film cans  
 can be rearranged or  
 meeting changing needs;  
 light (see illustration) has  
 with index card holders for  
 ation and comes in seven  
 colors to harmonize with  
 cor.

Reflex DS8-BTL Camera  
 Double Super-8 Film  
 new motion picture camera  
 100-foot rolls of double Su-  
 8 film is now available from  
 Pathe Products, Inc., Providence,  
 R.I. The Pathe Professional Reflex  
 BTL permits the cameraman  
 to load 200 feet of single Super-8  
 film on a single 100-foot roll with-  
 out use of any external maga-

Pathe Professional DS8-BTL

is thus suitable for work  
 where film economy is a guiding  
 principle and where professional ef-  
 ficiency is required.

The Pathe BTL system gives ex-  
 traordinary information before  
 starting filming with any "C"  
 prime or zoom lens, from  
 wide angle to extreme tel-  
 ephoto at any camera speed from  
 1/1000 to 1/30 fps, any variable shutter  
 setting, any ASA setting from 12  
 to 400, with any filter, any acces-  
 sories. The system offers a direct  
 readout by cds cell of the actual  
 exposure reaching the film at the film  
 plane. The light is measured only  
 after it has passed through all the  
 elements, the diaphragm, the  
 reflex system and the cam-  
 erater. Overexposed or under-  
 exposed effects if needed or de-  
 sired can be achieved by simply  
 changing the BTL exposure read-

According to Aaron Davis, presi-  
 dent of Pathe Products, Inc., ex-  
 clusive distributor of Pathe prod-  
 ucts in the United States, the  
 Pathe company determined  
 to produce a camera specifically  
 for the industrial market which  
 would not be hampered by the limi-  
 tations of the cartridge system.

For discussions with both  
 Eastman Kodak and Gevaert,  
 contact the Pathe company based on a dou-

ble-8 format was produced. Now  
 simultaneously with the announce-  
 ment of the camera, Eastman Kodak  
 has announced the availabil-  
 ity of double Super-8 film, spooled  
 in 100-foot lengths, which will  
 produce 200 feet of processed film.  
 Film prices will be \$6.33 net  
 per 100 foot roll, with processing  
 at \$4.50 net.

Price of the Pathe DS8 BTL  
 will be in the neighborhood of  
 \$850 — final price calculations  
 have not been completed.

**RCA Announces "Budget-Price"  
 PFR-10 Video-Film Recorder**

A budget-priced television film  
 recorder for transfer of TV images  
 to 16mm film is announced by the  
 RCA Broadcast and Communica-  
 tions Products Divisions. Design-  
 ed especially for industrial, school  
 and military use, the new PFR-10  
 recorder uses a special, vibration-  
 free camera to photograph TV  
 images off the display tube.

The recorder is housed in a  
 compact cabinet requiring less  
 than six square feet of floor space.  
 A variety of panchromatic film  
 types may be used for pick-up off  
 the unit's 10-inch display tube  
 which is coated with P4 phosphor.  
 The system includes 2,400-foot  
 film cassettes for one hour of re-  
 cording time and provision for au-  
 dio signal input into an optional  
 optical or magnetic sound record-  
 ing channel. Price of the RCA  
 PFR-10 recorder is \$14,500.

Write: RCA Broadcast & Com-  
 munications Products Division,  
 Burbank, Calif. for complete  
 data.

RCA television film recorder for  
 transferring TV images to 16mm  
 film is shown by S. O. Swanson.

**Multi-Purpose "Show-Talk" for  
 Filmstrips Slides With Sound**

A new multi-purpose instruc-  
 tional and sales tool combining a  
 (CONCLUDED ON THE NEXT PAGE)

Technicolor's new Model 510 motion picture projector uses Super-8 film.

**Technicolor Goes "Super-8" With Model 510**

THE SUPER-8 FORMAT, intro-  
 duced by Eastman Kodak ear-  
 lier this year, is now available in  
 cartridge-loading projection. First  
 of the projector manufacturers to  
 introduce a new model extending  
 the simplicity of cartridge-loading  
 from the camera (as introduced  
 by Kodak) into projection, is the  
 Technicolor Corporation.

The Technicolor Model 510  
 projector, just introduced in the  
 U. S. and abroad, is the world's  
 first cartridge-loading motion pic-  
 ture projector for the new Super-8  
 film. Advantages of the new, en-

Technicolor equipment of this  
 type. While basic simplicity has  
 been retained, new emphasis has  
 been given to quality and preci-  
 sion of the 510. A wholly new  
 optical and lighting system, using  
 a 150-watt Truflector lamp (said  
 to provide 500-watt brilliance) is  
 featured. The standard lens is a  
 Technor 20mm f 1.5 at the low-  
 est base price of \$87.50; Model  
 510Z features a standard zoom 20-  
 32mm f 1.4 lens at \$99.50; and  
 Model 510WA has an optional  
 wide-angle 10mm f 1.1 lens at  
 \$114.50.

Weight has been kept to the  
 minimum eight pounds; maximum  
 film length is 56 feet per cartridge  
 (the Super-8 cartridge only will  
 work on these new models), al-  
 lowing four minutes of screen  
 time with no rewinding required,  
 of course.

The new Super-8 cartridge con-  
 tains film wiping pads and car-  
 tridge lockout prevents accidental  
 use of standard 8mm film. The  
 power input is 110-120 volts off  
 standard 60 cycle AC for a con-  
 stant-speed, maintenance-free  
 blower (cooling) motor within the  
 unit.

The pictures on this page tell  
 the story of the new Model 510  
 "Instant" Super-8 projector. Speed  
 and simplicity of loading are its  
 principle advantages. The least  
 skilled individual, without training  
 or practice, can load a "Magi-  
 Cartridge" into this Technicolor  
 projector in a few seconds. Im-  
 ages on the screen uphold the  
 promise of quality and precision  
 inherent in this new design.

Model 510 in action as group of  
 salesmen view Super-8 pictures.

larged film format within 8mm  
 (approximately 50% greater than  
 previous standard 8mm) include  
 better resolution and picture  
 brightness. Larger audiences can  
 now see both image detail and  
 subtitles much more clearly on  
 this 8mm (silent) cartridge-load  
 equipment.

The Model 510 is a vastly dif-  
 ferent projector than previous

At right: the audience  
 wonders how that picture  
 got on the screen that  
 quickly. The cartridge-load  
 "510" sets up in seconds!

(CONTINUED FROM PAGE 117)  
four-speed record player/amplifier, a filmstrip slide projector and screen, all fitted into a small dispatch case. has been announced by Viewlex, Inc., of Holbrook, N.Y. Named *Showtalk*, it is designed to be used as an integrated unit or separately as an individual record player and the slide projector for large screen projection's required.

The visual portion is provided by the well known "Little Giant" blower cooled projector. A range of film carriers adapts it to either filmstrip or slide projection. here

is a choice of two projector models. the V-8 powered with a 50-watt lamp, and the V-83 with a 300-watt lamp. A remote control unit permits the *Showtalk* to be operated from a distance.

The audio portion consists of a reliable, long-life amplifier from a four-speed record player. The arm is fitted with a film cartridge, adapting it to when record is being played. The 21-inch built-in projection screen has a non-glare surface for viewing close-up.

There are four *Showtalk* models beginning from \$99.50.

**THE EDITORIAL VIEWPOINT:**

(CONTINUED FROM THE PRECEDING PAGE 36)

*New York World's Fair Had Its Problems  
But Many Exhibitors Report Real Success*

As New York's World Fair fades into history, the general public impression is left that it failed to reach its anticipated total attendance goal. Although the Fair was not a financial success, major business exhibitors are far from displeased with the results of their pavilions. Ford, General Motors and others have reported excellent attendance and have expressed genuine satisfaction.

Out of this industry, the Eastman Kodak Company is a pioneer exhibitor at such Fairs and it considers its participation in the 1964-65 New York shows "a huge success with all company objectives accomplished," according to Carroll E. Casey, general manager of the Kodak Pavilion.

"This picture-taker's paradise was the most photographed event in history. Over 12 million Fairgoers who visited the Kodak Pavilion came away with a new awareness of the achievements of the company in chemicals, fibers and plastics as well as the broad spectrum of photography."

Pointing to immediate tangible results, Kodak reported highest sales of camera equipment in its history during the two-year Fair season. Kodak distributors, dealers and photofinishers from all over the U. S. and abroad confirm the tremendous amount of picture-taking that took place.

"The very nature of a World's Fair permits a company such as Kodak to focus attention on the company's diversified operations in an interesting and dramatic manner that could hardly be accomplished in any other way," Casey noted.

"For instance many people learned for the first time of Kodak's major participation through its subsidiary, Eastman Chemical Products Inc., in chemicals, plastics and textiles through its motion picture, *Quest*, which, like Kodak's feature film attraction, *The Searching Eye*, has become one of the most honored films of the Fair."

As our own editorial postscript, we'll all long remember the Johnson Wax multi-screen motion picture, *To Be Alive!*, as one of the all-time great pictures of the Fair and of the era.

\* \* \*

*DeVry Ends 35mm Projector Line to Turn  
All Efforts to "Trainers" for the Space Age*

A Chicago company which made many notable contributions to the motion picture industry and whose founder may truly be called one of the "fathers of visual education" has written a nostalgic "finis" to a fabulous era of film equipment manufacture. The late Dr. Herman A. DeVry, inventor and motion picture pioneer in education as well as entertainment, will be long remembered for his contributions.

In early November, W. C. and E. B. DeVry, sons of the trail-blazer, brought an era to a close as their company turned out the last DeVry 35mm motion picture projector for use (CONCLUDED ON THE FOLLOWING PAGE 120)

### Almaden Vineyards Carry Wine-Making Story to Viewers of Colorful New Film

An appetizing and informative picture of the famed Almaden Vineyards is given viewers of a colorful new film titled, *The Almaden Story of Mountains and Wines*. Produced by John Wolfe & Associates of San Francisco from a script by the noted international wine expert Frank Schoonmaker, the new film can be obtained through all of the company's district managers or from the company's headquarters in San Francisco.

Much of shooting was done by Verne Carlson at Almaden's 4,000 acre Paicines Vineyards in the high, rolling foothills of the Gaviilan Mountains in the San Benito area, which is fast gaining fame as one of the foremost wine producing areas of the world.

### IBM: A MATTER OF BALANCE (CONTINUED FROM THE PRECEDING PAGE 47)

everyone. *A Matter of Balance* points up the difference between simply "winning" and the more important success of genuinely meeting customer needs. On the screen as it is in the marketplace, that difference is real and meaningful.

*A Matter of Balance* is the first of a series of different visual presentations with which IBM intends to augment its ethics program. Conference-table discussions between top management and field representatives on specific problems involving ethical decisions have been filmed by the Strauss Co. and will soon be integrated into the program.

These seminars — edited only for cinematic effect and essentially unrehearsed — communicate not only management's ideas on various problems but its very concern with those problems to begin with. Like *A Matter of Balance*, the filmed seminars serve more than one purpose.

Although produced for the exclusive use of

IBM, the wide appeal of *A Matter of Balance* was recognized by the Educational Film Library Association at the recent American Film Festival in New York. There, the film received the 1965 Blue Ribbon Award for its outstanding and thoughtful treatment of a subject which has a significance beyond its meaning for business and industry.

### A Contribution to Better Understanding

Both IBM and the Strauss organization merit respect for their contribution to a deeper understanding of the interplay of forces in the seeming conflict of values within our society. The pressures are subtle. But as *A Matter of Balance* makes clear, their impact on the individual is not.

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION (Act of October 23, 1962; Section 4369, Title 49, United States Code) 1. Date of filing: October 29, 1965. 2. Title of Publication: *Business Screen Magazine*. 3. Frequency of Issue: Published eight times annually at six-week intervals. 4. Location of known office of publication: 7064 Sheridan Road, Chicago, Cook, Illinois 60626. 5. Location of headquarters or general business offices of the publishers: same. 6. Names and addresses of publisher, editor, and managing editor: Publisher: O. H. Coelln, 7064 Sheridan Road, Chicago, Ill. 60626.

7. Owner: If owned by a corporation, its name and address must be stated and immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given. *Business Screen Magazine, Inc.*, 7064 Sheridan Road, Chicago, Illinois; Otto H. Coelln, 7064 Sheridan Road, Chicago, Illinois; Robert Seymour, Jr., New York City; Dale McCreche, Chicago, Illinois; Helen McCutcheon, San Francisco, California; and Catherine M. Baker, Evanston, Illinois.

8. Known bondholders, mortgages, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities: If there are none, so state: None.

9. Paragraphs 7 and 8 include in cases where the stock or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name and address of the person or corporation for whom such trustee is acting. Statements in the two paragraphs show the affiant's knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear on the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in paragraphs 7 and 8 when the interests of such individual are equivalent to 1 percent or more of the total amount of stock or securities of the publishing corporation.

10. This item must be completed for all publications, except those which do not carry advertising other than the publisher's own and which are named in Sections 132, 231, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500. A. Total no. copies printed (net press run): Average no. copies each issue during preceding 12 months: 8,600. Single issue nearest to filing date: 8,500. B. Paid circulation: 1. Sales through dealers and carriers, street vendors and counter sales (average 12 months): 225; single issue nearest filing date: 75. 2. Mail subscriptions (average 12 months): 7,375; (single issue nearest filing date): 7,117. C. Total paid circulation (average 12 months): 7,600; (single issue nearest filing date): 7,192. D. Free distribution (including samples by mail, carrier or other means (average 12 months): 900; (single issue nearest filing date): 1,200. E. Total distribution (Sum of C and D) (average 12 months): 8,500; (single issue nearest filing date): 8,392. F. Office use, left-overs, unaccounted, spoiled after printing (average 12 months): 25; (single issue nearest filing date): 108. G. Total (Sum of F & E) (average 12 months): 8,600; (single issue nearest filing date): 8,500.

# Film Helps Make Sales for Mogen David:

(CONTINUED FROM PAGE 51)

grandmother sitting in her rocking chair watching television. On comes an announcer who claims that Mogen David makes wines like grandma used to make. From the real "grandma" comes an indignant "harrumph." Switching off the television, she turns on the radio only to hear the same slogan. Silencing the radio, she picks up a newspaper. The first thing that greets her eye is a Mogen David ad with the same infuriating claim.

Grandma is now boiling. In the next scene, she is chugging toward the Mogen David Winery in her ancient Model-T Ford. Of course, on the way, she passes an outdoor Mogen David sign.

Storming into the Mogen David Winery, Grandma angrily corners a top executive and vehemently protests that *no one ever made wine like she used to make.*

## **Humor Sets Stage, Keys Slogan**

Done in a warm, humorous vein, this opening effectively sets the stage for the balance of the film. In addition, by using Mogen David's famous slogan as a vehicle for the story, it further builds the firm's image. Needless to say, Grandma emerges at the end of the 22-minute film a confirmed Mogen David user. She is convinced that Mogen David gives just as much individual care and attention to the making of wine as she used to do.

Produced and directed by Academy Film Productions, Inc., Chicago, the motion picture was originally shown to Mogen David's

28 district sales managers at an annual meeting. These managers handle the sale of Mogen David to distributor organizations in all 50 states.

The effect of the motion picture on these managers was great. "They knew the size and scope of the Mogen David operation," Wiernik recalled, "but the film really enabled them to visualize it."

## **Color With "Appetite Appeal"**

Use of color is particularly effective in the film. "Color shows the winery as it really is," Wiernik commented. "This is important because wines sell themselves on the appetite appeal of color. Basically, we used color for the same reason Hollywood did when it produced 'Cleopatra.' Color simply has more impact."

Mogen David distributed individual prints of the 22-minute film to each of its district managers. These managers showed the film to distributor organizations for a two-fold purpose (1) to visually sell the distributors on the size and scope of the Mogen David operation, and (2) to enable them to make more effective sales presentations to retailers.

## **Making Impact on Distributors**

Again, the impact was outstanding. Distributor after distributor was visually shown the immensity of Mogen David's wineries, one of which is the largest in the world devoted to the production of one type of wine. In one case, the motion picture was used to indoctrinate an entirely new 40-man dis-

tributor staff in Kentucky. Within a year, the new sales force was able to report that Mogen David accounted for one-quarter of all the table wines sold in the state.

Projecting of the 16mm film proved to be no problem at all. District sales managers simply rent a 16mm projector from a local camera supply shop. The managers either operate the projector themselves or hire someone recommended by the supply shop, depending upon the circumstances of the showing.

In addition, managers make the film available to their distributors to show at both retailer and civic and private group meetings. In this way, both the retailers and consumers are exposed to the Mogen David image.

## **"No Question, It's Making Sales"**

"Everywhere, the reaction is the same," according to Wiernik. "People are just stunned by the total immensity of our operation. There is no question but that it is making sales," he added.

In showing the film to groups of retailers, the Mogen David distributors go on to point out the growing market for wine. They tell package store owners that, while it is not usually possible for store managers to make a second sale of a hard liquor when customers come in to buy one label, they can often close a wine sale. Then, they point out that the already popular Mogen David can best be used to induce those extra sales.

## **More Retailers Stock the Wines**

The result: More retailers carry and sell Mogen David Wines.

The same type of reaction has been obtained through the showing of the Mogen David film at civic group, club and even company meetings. The film is interesting enough to draw the attention of audiences. Then, the distributor goes on to tell them how wine is becoming an increasingly popular beverage in the United States—pointing out how Mogen David has grown.

The result: Consumers go into their local stores and ask for Mogen David.

Does it work? Distributors have taken the time to show the film literally thousands of times.

A residual advantage of these film programs is that they frequently draw attention in the local press and even in some company house organs.

Because of the nature of this "image" film, it is likely that the original subject matter will stand

up for some years. "There are some plans to edit new footage into the film to cover new developments. But basically, our original production cost was the major investment," Wiernik explained.

Shot on Ektachrome Commercial film, Mogen David, of course, leaned on the advice of its advertising agency, Edward Weiss and Company, and account management supervisor, Byron A. Bonheim. A local producer was favored for making the film because of his flexibility and convenience in setting up schedules for shooting. The actual production cost by Academy Films was on the order of \$100,000. Ektachrome Commercial film is high-quality—and rugged—these originals.

These prints must stand a rigorous test in the rugged wear and tear of being shipped from distributor to distributor, and in being used time and again by different projector operators.

However, except for an annual quality check of all prints, Wiernik has not found it necessary to take any other action.

"We just show our sales managers how to use the film and in turn pass the word along to their distributors."

"We find that people are generally interested in learning more about us. And, when they do, it usually results in more sales for us," Wiernik concluded.

\* \* \*

## **Informative 12-Page Booklet With "Comments on Editing"**

Chicago's Colburn Laboratory has done an admirable job of publishing an informative series of booklets for film makers. The latest of these, "Colburn Comments on Editing" is a 12-page booklet aimed to help resolve the dilemma of the motion picture unit performer: how much editing should a professional "complete service" do?

Seven cardinal rules of editing are stated; tips and hints are given (i.e. allowing a maximum of 10 words for each foot of film) on the topics of editing taken up include slating of scenes, sequence making the "rough cut," A-roll, "checkerboard technique," invisible splices and lap dissolves.

Copies of "Colburn Comments on Editing" are available on request from: Geo. W. Colburn Laboratory, Inc., P.O. Box BS-7, 164 N. Wacker Drive, Chicago, Illinois 60626.

# BUICK SPORTS A FILM SUCCESS STORY

The Buick Open started in 1958 as a sports event, and has since become one of the most successful public relations promotions going. Through the medium of color motion pictures, well over 50,700,000 people have relived the exciting moments of the last five Buick Opens... and projected a modern, exciting, vigorous image of Buick. Last year Buick added a film about skiing. They produced a dramatic and instructional 28 minute film that has piled up an audience of ski buffs comparable to that of the golf films, proving that a tournament is not necessarily the secret ingredient for film success.

Buick knew that a public relations film is only as good as the size and quality of its audience, so they engaged Modern, the leader in the business of getting films seen. The score racked up by Buick's sports films speaks for itself, and enthusiasm for the program is indicated by the growing Buick "Film Shelf" at Modern.

If you'd like to know more about how your company can generate its own film success story contact the Modern office nearest you.

how  
many  
**HALF**  
salesmen  
have  
you  
?

It's easy to tell. A salesman may have a good knowledge of your product or service but, for sales success, that's only *half* of what's needed. The *other* half, equally important, is "people" knowledge. When a salesman lacks this, he's just *half* as effective as he should be.

To be *wholly* effective, salesmen must possess "people" knowledge, understand the fundamentals of selling, and develop persuasive skills that motivate prospects to want to buy.

This new University of Marketing audio-visual sales course offers this knowledge. It makes it easy to train your men in the attitudes and techniques of today's top earners. It enthuses men to want to do a better job . . . shows them how to work "smarter", rather than harder.

The six two-hour sessions are so clearly programmed, it's remarkably easy to conduct the training meetings.

Mail the coupon for details on how you can add another half to each of your men . . . and double his sales effectiveness.

Byron is the only one in the world who can make Color Correct® prints. Color Correct® means the finest quality in color motion pictures, and only Byron has the right to use the term — Color Correct® (U.S. Patent Office Trademark No. 575058)

At Byron, every step is controlled by skilled men and machines. And since no color process is any better than its control, it's no wonder that film producers all over the world turn to Byron for the finest in 16 MM Color Correct prints.

MOTION PICTURES

1226 Wisconsin Ave., N.W., Washington, D. C. 20007, Phone 202, FE 3-4000

It costs plenty to produce 1,000 feet of 16mm film. But it costs only pennies per month to protect these irreplaceable A&B roll color originals, reversal positives and tapes from damaging extremes of temperature and humidity. Store them at the famous Bonded Film Storage vaults in Fort Lee, New Jersey. Bonded now provides **temperature and humidity regulated storage areas**, when specified. Also available on request are **environmental controlled chambers** for maximum care and protection. Bonded experts record every carton you send in, individually log the location and keep everything at your fingertips for you. Bonded's radio-directed trucks will pick up and deliver for you anywhere in Metropolitan New York. Bonded has skilled packers and on-the-premises screening and shipping. (Ask De Luxe Laboratories, they've been with us for years). Better still, write us at 630 Ninth Avenue, New York City 10036.

### Announce New York Conference on "Biomedical Communications"

A conference on "Biochemical Communication: Problems and Resources" will be jointly sponsored by the New York Academy of Sciences and the U. S. Public Health Service Audiovisual Facility at the Waldorf-Astoria Hotel in New York City, April 4, 5 and 6.

Aim of the conference is to present "practical ways in which communications media, personnel and systems can help achieve important health objectives, while conserving monetary and human resources." Deans of medical schools and other institutions of the health professions, hospital administrators and representatives of national, state and local health organizations have been invited to participate.

The program will emphasize resources available for solving communication problems arising from the shortage of faculty and from the growing body of biomedical knowledge and curriculum content which has expanded at an unprecedented rate. Inquiries should be directed to Dr. James Lieberman, conference chairman and director of the Public Health Service Audiovisual Facility, Communicable Disease Center, Atlanta, Georgia 30333.

### Keehn Elected Vice-President, Sales, of DeLuxe Laboratories

The directors of De Luxe Laboratories, meeting in New York last month, have elected Neal Keehn vice-president in charge of sales for the national film processing company.

Director of sales for De Luxe since October of last year, Keehn was previously the vice-president, sales for General Film Laboratories, now a division of De Luxe. He will be responsible for overall sales planning and direction for the national laboratory organization and will continue to make his headquarters in Hollywood.

### Studio City Opening Set For North Miami on February 4-5th

Studio City, the huge motion picture production complex in North Miami, Florida, will hold opening ceremonies on Friday and Saturday, February 4-5. Leaders in government, industry and film production from that state and other U.S. cities will be on hand.

Hosting the event are Dr. D. Ray Brady, builders of Fort Lee, City, and Arthur F. Bregman, for whom who are equipping the largest of the sound stages, 80 x 125-ft. with 40 soundings. Two smaller soundings, 40 x 80-ft. with 30 soundings, have been in full production series of network television commercials. Veteran motion picture executive Sam Segal, in charge of operations.

Located in the area of Miami-based color processing laboratory of Capital Film Laboratories, with headquarters in Washington, D.C. Sam Gaughan, named sales manager for the Florida plant (see page 56).

\* \* \*

### February 1st is Entry Deadline for the TV Commercials

February 1st will be the deadline for the Seventh Annual American TV Commercials Contest. All U.S. and Canadian commercials that were telecast for the first time during 1965 and January 1966 are eligible for domestic competition, which is open to advertisers, agencies and production companies in the United States.

Walter Weir, President of Weir & Bartel Advertising, will meet as nine regional representatives to appraise an expected 150 more entries according to product classification.

In addition to "Best in Category" selections, winners will award Clio statuettes, warranted, to *Best Single Commercial*, *Best Low Budget* (Under \$5,000), *Best Retail Store*, *Best and Worst* for six Regional Markets for English and French Canadian Markets.

The annual awards will place on May 5th in New York with regional festivals planned in other cities later that month.

Entry forms and other information are available from the office at 40 East 49th Street, New York 10017.

### University Film Producers Association Annual Conference August 20-22

The 20th Annual Conference of the University Film Producers Association will be held August 20 on the Oregon State University Campus, Corvallis, Oregon. Tyo has been named president and chairman for the sessions.

# NILES AWARD-WINNING FILMS...1965

"Parable" takes gold awards in religious film category of Chicago International Film Festival (November) and in industrial film category of Fifth International Film and TV Festival of New York (October). Highly acclaimed 35mm color film was Produced for the Protestant Council of the City of New York for showing at the 1964-65 New York World's Fair.

"Atoms in Action," winner of National Visual Presentation Association award for documentary films (June). In 35mm Cinemascope, this film for the U. S. Atomic Energy Commission tells the story of the workings of the atom, emphasizing its peaceful uses.

"Million Dollar Pantry," produced by Niles in 16mm color for Reader's Digest, garners merit award in the National Visual Presentation Association employee training category (June). Film explains sales techniques preferred for employees of supermarkets.

**Hold 18th Canadian Film Awards Ceremony in Montreal May 6th**

The 18th annual Canadian Film Awards presentation will be held on Friday, May 6th at the Queen Elizabeth Hotel in Montreal. The Association of Motion Picture Producers and Laboratories of Canada has assumed responsibility for show-casing the presentation. The Management Committee of the Canadian Film Awards will continue to administer the entry and judging of films.

For the fourth year, also, the Canadian Society of Cinematographers will present its awards during these ceremonies (one for the best film in black and white and one for excellence in color photography) and, for the first time, the Directors' Guild of Canada will present two new citations: one for best direction and one for best editing.

\* \* \*

**Armour Shifts A-V Department, Expanding Its Corporate Services**

In a move described by the company as "meeting expanding needs for audio-visual service," Armour and Company, in Chicago, has transferred its Audio-Visual Department into the General Advertising Department,

headed by K. L. Skillin, corporate advertising director. The A-V Department, directed by Charles N. Shaw, will serve all Armour divisions and subsidiaries.

Coincident to the expansion, Marshall L. Wayne has been appointed to the newly-created post of audio-visual technician, reporting to Shaw. He came to Armour from the Univac division of the Sperry Rand Corporation, where he was supervisor of that firm's photographic department. •

\* \* \*

**Underwater Photography Wins Two Awards for Carl Ragsdale**

Carl V. Ragsdale, president of Sun Dial Films, Inc., of New York, has received two awards by the Underwater Photographic Society at its Sixth International Underwater Photographic Exhibit held in Los Angeles. Mr. Ragsdale's citations were for excellence in black and white photography, receiving the Gold Medal for *Anytime You're Ready C.B.*, and the Bronze Medal for *Warriors of the Deep*. Ragsdale has a natural affinity for the marine field; his company is active in U.S. Navy film production. •

**Invite 16mm Film Entries for 1966 Western Heritage Awards**

• If you've produced a factual motion picture or television film with a "Western" theme consider entering it in the 1966 "Western Heritage Awards" program sponsored by the National Cowboy Hall of Fame.

Films symbolic of the "proper image of the American West and of the people who were responsible for developing it" are eligible for prize honors to be awarded later this year. Either 16mm (or 35mm) films may be entered; the deadline for entries is *January 31, 1966*. Contact the Public Relations Department, National Cowboy Hall of Fame, 1700 Northeast 63rd St., Oklahoma City, Oklahoma for entry blanks. •

\* \* \*

**A Note of Correction on the DeLuxe-General Trademark Ad**

Our "design-conscious" printers inadvertently created a whole new art effect for the DeLuxe-General two-color advertisement which appeared in the recent Number Seven issue of *BUSINESS SCREEN*. During press operations they

"switched" the color emerald on this page and neatly dissolved a famed trade-mark symbol. The two major laboratory companies which those well-known double-reels identify.

The ad appears intact and correct on page seven of his issue, but, lest we forget that a mark symbol is the most precious asset of its owner, we present a miniature of the entire advertisement to emphasize the unity of DeLuxe-General as these two new reels round a symbol of quality and dependability in film press

Newman Bumstead: to CINE Board

Elect Bumstead, Rev. Poindexter to CINE's Board of Directors

Two key posts on the board of directors of the Council on International Nontheatrical Events, Washington, D. C., have been filled by the election of Newman Bumstead and The Rev. David O. Poindexter.

Bumstead is chief of the Geographic Art Division of the National Geographic Society in Washington and is the assistant editor of its national magazine.

Rev. Poindexter recently joined the National Council of Churches of Christ in the United States as director of utilization for the Council's Broadcasting and Film Commission in New York City. He was formerly the pastor of the Parkrose Heights Methodist Church in Portland, Oregon.

CINE has also forwarded entry application forms for 1966 international film festival candidates to the nation's producers. These entry forms were to be returned by January 14 on films released in 1965 or earlier. Any films released during the first 45 days of 1966 can be entered up to midnight, February 15th.

Application forms for these late entries may be obtained from the CINE office, 1201 Sixteenth

Reverend David O. Poindexter

Street, N. W., Washington, D. C. 20036.

## Sterling Forms New Division Creative Programming Services

Sterling Movies U.S.A. has formed a new division known as Creative Programming Services. The division will handle all age shows for free showing on commercial and educational television and radio stations and in the home. Robert E. Gurvitz, formerly head of the Radio, TV and Film Department of the New York Stock

Robert E. Gurvitz

Exchange, has been named head of the new division.

Charles F. Dolan, president of Sterling Movies U.S.A., described Creative Programming Services as a new step in advancing the capabilities of Sterling Movies to "reach audiences which are generally unavailable to sponsors."

The key consideration in developing today's audiences," Mr. Dolan said, "is the development of acceptable formats to carry the public relations message. The Creative Programming Services will attempt to do."

Robert E. Gurvitz, who headed the new division, joined Radio, TV and Film Department of the NYSE in 1955. He produced over 50 films which were listed on the stock exchange, handled radio feeds, and was instrumental in the production of innovative TV and radio spot news about the exchange. Prior to joining the stock exchange, he was with Cecil & Preston, a major advertising agency.

Headquarters of the Creative Programming Services will be in the home of Sterling Movies U.S.A., 1201 Sixteenth Avenue, New York.

Calle A. Carrello

**Calle Carrello Retires as Chief of USDA's Motion Picture Service**

One of government's veteran film-makers closed a 44-year career of service to his country on December 31st when Calle A. Carrello, chief of the Motion Picture Service, U. S. Department of Agriculture, retired. He began his long and eminently successful work in government in 1921 when he joined the USDA at the age of 16 as a messenger.

In 1923 Al Carrello became a

laboratory aide in the Motion Picture Service, even then convinced that films would become an important tool for the education and information of farmers and the public. By 1925, as an assistant cameraman, he learned to use the Akeley hand-cranked camera of the day and in his job, also processed and edited his own films. Thereafter, Al Carrello served as photographer and film director until the outbreak of World War II.

Transferring to the Field Photographic Branch of the Office of Strategic Services in 1941 this film pioneer served as a cinematographer under the famed director John Ford and later became supervisor of the OSS processing laboratory. At the end of the war he returned to the USDA after turning down a contract proffered by a major Hollywood studio.

Carrello took charge of the USDA's lab until he was named head of production in 1952. In 1961 he was appointed to his present position and, as chief of the Motion Picture Service, coordinated and led all activities in

production, lab work, scripting and distribution. Under his direction, the Service received a USDA Award for "Superior Service," the first such honor given to the unit. The award was "in recognition for exemplary service to the Department of Agriculture in conducting and distributing a series of commemorative films which improved the understanding of agriculture throughout the world."

His successor has not yet been named by the Department.

**Public Health Service Medal Awarded to Dr. James Lieberman**

The Public Health Service Meritorious Service Medal has been awarded to Dr. James Lieberman, director of the Public Health Service Audiovisual Facility in Atlanta, Georgia. The Surgeon General announced the award to Dr. Lieberman, a career officer in the Service, last month.

The honor was given for "his leadership in developing and administering a national and international program for the improvement of biomedical communication." (See report on page four).

The Facility which Dr. Lieberman directs is a national point for the development, production and distribution of learning resources for the health professions. During the past year

Dr. James Lieberman

honored for services to health with meritorious service to the

expansion of this center was recommended by the Production Commission on Heart, Lung, Cancer and Stroke. This Atlanta facility was also host to an important conference on Single-Concept Audiovisuals for health education and medical instruction during the past year.

## Television sold the kids.

## Moviematic sold the dealers.

When Pillsbury\* came out with a new powdered drink, they had to come up with a way to tell dealers about it.

And what better way, they thought, than to show dealers the actual commercials that kids would see on network television? The kids, in turn, would do a "selling job" on Mom.

So Pillsbury equipped their representatives with portable Kalart/Victor 16mm Moviematic Repeater Projectors, and dealers pre-viewed the commercials; in color, and with sound.

How about what you're selling? Moviematic will help sell it better. Applications? Sales training programs, exhibits, display use, at point-of-purchase sales . . . you name it.

If you'd like to find out more about Moviematic, and about how you can buy it or lease it, look up your nearest Kalart/Victor dealer. Or write Kalart/Victor, Dept. M-7, Plainville, Conn. 06062

### Expanding in Education Field, Raytheon Acquires D. C. Heath

In late December, the Raytheon Company, Lexington, Mass. and D. C. Heath and Company, Boston, announced agreement on plans to merge the textbook publisher and producer of classroom films and audiovisual aids with Raytheon.

The diversified electronics manufacturer has acquired three other prominent education firms in recent months as part of a planned program to build a broadly-based education business. In the past six months, Raytheon has acquired Macalester Scientific Corporation, Dage-Bell Corporation and the Edex Corporation, with its Drivex subsidiary.

### New Photographic Technology Building Is Announced by Kodak

☆ The Eastman Kodak Company has announced the construction at Kodak Park Works of a multi-million dollar building to house its photographic technology division. The building will house a laboratory complex especially designed for the study and development of photographic systems, according to Clarence Wynd, EK vice-president and general manager of Kodak Park.

\* \* \*

### F&B/Ceco Reports Higher Net; Expands Branches; Product Line

☆ At a special meeting of F&B/Ceco Industries, Inc. shareholders last month, Arthur Florman, president of the motion picture equipment firm, reported a net profit of \$234,937, or 33¢ per share for the fiscal year ended May 31, 1965; and compared to a loss of \$510,294 for the prior year.

Mr. Florman also outlined several achievements accomplished during the year, which included the establishment of F&B/Ceco branches in major cities; expansion of the Florida branch and the construction of studios there; introduction of successful new products; and improved efficiencies in operations, including a new machine shop for manufacturing the company's own line of equipment.

He further stated that several new products and additional branches will be announced during the current year, and that he is anticipating further improvements in sales and earnings.

Stockholders re-elected the Board of Directors and approved the grant of options to purchase 9,000 shares of common stock to 15 key employees.

Paul W. Fassnacht

### Fassnacht Heads Motion Picture Division of Technicolor Corp.

Paul W. Fassnacht is named general manager of Motion Picture Division of Technicolor Corporation. His appointment was confirmed by board chairman of the company and he has been elected to Board of Directors of Technicolor Incorporated.

Also a vice-president of Technicolor Corporation, Fassnacht will continue as director of its Systems Research Division and as vice-president of Technicolor International Operations. He is entering his 36th year with the company, having joined Technicolor in 1929, and has been active in various phases of operations of the Motion Picture Division.

# SYNCRØN

## FOR REALLY BIG JOBS

### PROBLEM

- Light a 1,000 foot assembly line to 250 foot candles for color.
- Provide sufficient 110 Volt power.
- Dolly entire length of area in one shot.
- Do it without disrupting plant production.
- Complete the job under "no second chance" conditions.
- Keep it within budget limitations of the producer.

### SOLUTION

- Use smaller economical lamps to give modeling effect without wasteful overflow of costly floodlighting techniques.
- Place 5 mobile generators strategically to allow for short cable runs and supply 130,000 watts of light.
- Supply a fully-equipped camera car with 20-foot boom.
- Pre-plan all cable and equipment layouts to eliminate time-consuming changes.
- Inspect and check every piece of equipment before delivery to assure trouble-free operation.
- Plan thoroughly for economical lighting (no arcs) permitting top quality at modest rates.

Sikorsky Aircraft's photo unit chose SYNCRØN to plan details and supply complete equipment for their film. Advance preparations by SYNCRØN's staff provided thorough wiring and lighting diagrams combined with overall production advice to save time and money. Sikorsky's crew was able to do the entire job, including set-up, filming, and striking, in under 8 working hours . . . !

Have you got a production problem? Big or small — SYNCRØN can help with a solution.

THE EDITORS OF  
**BUSINESS SCREEN**

*proudly announce the*

THE U. S. & WORLD MARKET PLACE FOR EVERY  
PRODUCER, SERVICE FIRM AND MANUFACTURER

This most widely-used reference "blue book" of the specializing film production companies in the United States, Canada, Europe and other lands provides more facts-in-depth about personnel, physical facilities and recent experience than all its imitators combined. That's why important bid and buying decisions are made daily from its dependable pages by industry subscribers, trade groups, advertising agencies and government bureaus. Producers seek location cooperation through listed companies at home and abroad. 1966 features include complete data on national and international film distributors; specializing film writers; national and international awards programs and data on professional and trade organizations. Federal Audiovisual Programs are reviewed in depth. The deluxe award-winning format remains an economical, efficient medium for the display advertising of all who sell the medium, its equipment and services in the U. S. and abroad. Paid readership, up 11.5 per cent in 1965, continues to make BUSINESS SCREEN and the PRODUCTION REVIEW the big, best book of this industry.

**AT CFI, WE TREAT FILMSTRIPS LIKE MAJOR SURGERY.** Any good surgeon demands the best back-up staff he can get and the vast facilities of the modern hospital complex. At CFI, we do for filmstrips what the hospital staff and equipment do for the surgeon. Our labs are staffed by trained technicians backed up by the most precise laboratory equipment. Sensitometric control insures proper color correction and exposure balance; Chemical control gives consistent color balance and density; Accurate color rendition and minimum contrast gain is assured by special lighting equipment. At CFI, our experts take the worry out of the operation. *Delivery problems?* In our business, one week is normal for a complete filmstrip, but on tighter deadlines, we'll work with you to meet your schedule. *Emergency? Like need a special piece of artwork?* Our art department will design and complete original frames with just the right touch. Or we'll photograph your flat art up to 24" x 32" (32 field). *Worried about getting the message across?* We set type on cells for superimposure or give you special handlettering. *3-dimensional packages?* We can shoot them against a colorful background right into your filmstrip. *Different size transparencies?* We shoot directly from 35mm through 8 x 10 with no intermediate reduction step to cause loss of detail or color. And at CFI, no matter how delicate the problem, our unique continuous-loop printing equipment assures you absolutely uniform filmstrip prints from scratch free negatives. Our experts are ready to solve your problems right now in our labs. *Hopeless case?* Call Lou Livingston at HO 2 0881.

*Your filmstrip benefits from the superior facilities and technology that have been developed to meet the high standards of the motion picture industry.*

## THE EDITORIAL VIEWPOINT

(CONTINUED FROM THE PRECEDING PAGE)  
and physical trends of the industry in which it operates? This "family" of specialized producers has literally no accurate knowledge of its employment, production trends, figures, etc. Only our own annual "Business Review" issues provide a true picture of the industry's active participants, their work, the depth of their physical capabilities. We have initiated one of our own "Year's resolutions" as we resume, is to conduct an accurate national survey of facts and figures about this business.

### Film Festivals: for Prestige or Profit?

5. Is there a surfeit of "festivals" and awards programs? How do you share the worth of honors from recognized, respected authorities such as the National Commission on Films for Safety from "promoted" films that exist primarily for the financial gain of those who prosper from our zeal to collect trophies? Such events cost entry fees, tie up valuable screening prints and dismay both losers and winners with the lack of *meaningful* binding.

6. Perhaps most important of all is the need for *planned* creativity. Where do we find the relevant national problem in our great media can play such a vital role? Can we match them with suggested titles? When we analyse entire industries and find the need for films as yet unconsidered? When should we begin to take cues from city, state and regional development projects and suggest the contribution of films to get them moving?

7. Research and development budgets are being cut within companies and trade groups. Can the nation's specializing film producers find a way to have a beginning in that direction? Is it not a conference of technical experts from labs and equipment makers to probe the possibilities which must be reflected first of all in the marketplace?

### European Industry Supports Film Safety

This statement is an all-too-brief outline of what should take note of the direct support of Europe's film makers receive from their national industrial associations; in the meantime, the realization achieved when their Council of European Industrial Federations sponsors one of the most important petitions worthy of top management attention and interest. What is the future of our own National Association of Motion Picture Manufacturers, whom we represented at the recent fall for the first time? Or will the United States Chamber of Commerce assume the leadership, taking the film through the local chambers whose members may not realize all potentials?

Let us hear from both producers and consumers of the factual film medium. Do you agree with the views or reject them? Will you support the progress, work for national unity or continue your own economic growth or continue to "do it alone" into an indistinct, hazy future?

No single man or publication can accomplish the miracle of unity but we can begin to do it. We can try. For there is no better way to spend the years of rewarding service, than to take the lead of publication leadership than to continue to try to lead and to help achieve the business already inherent in the medium served by BUSINESS SCREENS.

# champagne lighting on a beer budget?

Of course. Charles Ross answers every budget need. Many of the country's largest motion picture producers appear on our extensive list of customers. But whether your company's big or small...there's only one requirement for doing business with us—you must insist on the finest lighting equipment in the industry! Send for a schedule of rental rates.

## Inforfilm Offers Business an International Audience

**T**HE UNIVERSAL QUESTION, "where will these great films be shown?" was raised again at Rouen, France last fall when the Council of European Industrial Federations hosted the Sixth Industrial Film Festival. The answer for many of the important pictures was at hand. Members of INFORFILM, the International Association of Informational Film Distributors, were in that Normandy city to hold their own meetings and to sponsor one of the awards given at the festival.

The idea was born in November, 1960, when representatives of six European services met in Brussels to review the possibilities of international collaboration on distribution of factual films. They were joined a few months

later, in January, 1961, when the late Frank Arlinghaus, as president of Modern Talking Picture Service, came to Bern, Switzerland with two more European distributors interested in joining the movement.

In May, 1961, INFORFILM was officially launched in The Hague and today, five years later, the organization covers 15 countries including the U.S. and Canada (served by Modern) and Belgium, Denmark, Finland, France, Germany, Great Britain, Holland, Italy, Sweden and Switzerland in Europe. The Eastern hemisphere is served by INFORFILM members in Australia, Japan and New Zealand.

Thus a total potential audience of 600 million worldwide viewers awaits the sponsor of films with international marketing or related concepts. The group provides organized, systematic handling of prints with sound data on

language print requirements for each desired by the sponsor. It ably sustains the local and regional representative of the sponsor. Such subsidiary company lacked initiative or were badly-supplied by home offices on earlier film ventures.

But INFORFILM provides an even more important service in building audience through its centralized promotion and national members. Groups in various countries rely of a single source with continuing supply; their needs are met by professionally respected prints of consistent quality. European habit of turning to the theatrical cinema its primary (and often sole outlet) to group audiences within communities.

Within five years INFORFILM members have delivered over seven million showings to more than 600 million viewers (not including television). Perhaps the greatest contribution of all is the organization's ability to overcome European tariff barriers. A single meeting now meeting that problem collectively, providing the potential user with one point. Equally important is the establishment of a single international booking rate of \$500, exclusive, for all films coming to the market from abroad. This worldwide situation for a certified non-theatrical booking rate paid in the sponsor's own national currency.

The record of experience within this international association is notable. Its members include Modern for the United States and Canada; in Europe, the widely-respected film organization serves all of France. Great Britain is especially strong with a membership

## *Creativity in films often means seeing the familiar in a new way!*

The evolution of Super 8 Film presented a new challenge to Colburn technicians . . . namely, to process the new film on our existing high performance laboratory equipment without acquiring completely new processing machines.

The answer is our duo drive-sprocket (shown in close-up). The small sprockets accommodate the new Super 8 film perforations and the large sprockets handle standard 8mm and 16mm film perforations.

For more information about our Super 8 laboratory services write to:

**F&B/CECO MARK II PRO-JR. FRICTION HEAD**

The new Mark II Pro Jr. Head with Teflon® bearings combines fluid-head smoothness with the fast, free movement of a friction head. Features include "T" level; accessible knob for mounting camera; adjustable angle telescoping pan and tilt handle; 3 positions for attaching pan handle; tension control knobs.

Head only \$125.00 with Pro-Jr. V-Grooved legs \$195.00

**F&B/CECO PRO-JR. FLUID DRIVE HEAD**

Just as the original Pro-Jr. Friction Head was a world leader in reliability, this has created a new standard for fluid heads in the motion picture industry. Exclusive formula of silicone fluid assures maximum smoothness. Features positive grip locks; camera balancing and tightening lever; removable pan handle adjusts in any position; "T" level; accommodates any camera up to 30 lbs.

Head only \$350.00 with Pro-Jr. V-Grooved legs \$420.00

**F&B/CECO PRO-JR. SPRING HEAD**

The F&B/Ceco Professional Junior Spring Head is similar to the Pro-Jr. Friction Head. It incorporates torsion spring for counterbalance. Interchangeable telescoping pan handle. "T" level. Can be supplied with 1/4 x 20 or 3/8 x 16 camera tie down screw.

Head only \$170.00 with Pro-Jr. V-Grooved legs \$240.00

**F&B/CECO PRO-JR. GEARED HEAD**

The F&B/Ceco Professional Junior geared drive tripod head includes metal crank handles which control pan and tilt action. Crank handles snap on either side. "T" level. Can be supplied with 1/4 x 20 or 3/8 x 16 camera tie down screw.

Head only \$230.00 with Pro-Jr. V-Grooved legs \$300.00

**F&B/CECO PRO-JR. TRIPOD LEGS**

Professional Junior adjustable V-Grooved Tripod Base (legs complete). Constructed of hard maple legs, aluminum and steel hardware. For use with all Professional Junior tripod heads, except integral ball joint. The "V" groove design gives almost twice the gripping surface as before and greater rigidity at any extension is assured.

Tripod only \$85.00

# 5 Unique Powers of the Film Medium

## Why Film?

Ask yourself what other medium guarantees full attention to your entire message. No print advertisement, no TV show, no brochure, not even the most hypnotic salesman can persuade a prospective customer or an unbeliever to sit quietly for 5 to 30 minutes and concentrate on your message.

Thanks to this unique environment, film can get your message over in the right logical progression of the message-points — without the prospect being able to interrupt, or worse, to skip ahead.

Film doesn't need to waste precious time on attention-grabbing "stoppers," because the viewer is already seated and attentive.

Film "carries its stinger in its tail," i.e., in its residual impression, and hence is free to implant important, though sometimes quiet, foundational material up front, with a solid effectiveness impossible in any other medium.

Finally — and perhaps most important — film implants its impressions in the form of *picture-images*. And since people tend to remember what they see better than what they hear, the impressions burned into their minds via film have a better chance to endure — to inform, persuade, inspire . . . and compel action: to motivate.

— Cap Palmer

REACHING VIEWERS ABROAD: (CONTINUED FROM THE PRECEDING PAGE 18) ship of Sound Services Limited. The Belgian audience is served by Sofedi, out of Brussels, and in Germany, the Konferenz der Landesfilmendienste, has thorough knowledge of film using groups and their interests.

## Services Headed by Experienced Leaders

Sweden is served through the Swedish Council for Personnel Administration and the Netherlands has as its member the Technical Film Centre in The Hague. Japan is a noteworthy member because of the status of the Educational Film Exchange, which represents INFORFILM out of Tokyo.

Within these companies are some of the top experts in informational film utilization, leading the member groups in their lands. Eric Morden, who heads Sound Services Limited in Britain; Carl Lenz, president of Modern; Kerst Blaauw, in the Netherlands; and Sven Hallonsten, in Sweden are just a few of these experienced and progressive men behind the idea. They look to Jan Botermans, general secretary of the organization at its headquarters in Brussels, for coordination and group promotion, unification of systems and communication.

## Success Depends on National Cooperation

Says Jan Botermans: "while considerable progress has been made, the road ahead is not entirely rose-strewn. Europe is a complex area where political and language boundaries make a supra-European operation impractical. Local managers of subsidiary corporations may be uninterested in their own companies' investment in films. We also have to live with the growing pains of establishing our own identity and purpose."

But the general secretary is cognizant of these problems and Botermans is a crusader for the future. Today, the organization he serves has attracted more than 800 clients and it takes note of the fact that the U.S. Department of Commerce has reported a 24% increase in worldwide capital investment by U.S. corporations; the same is also true of world marketing interest by European companies and those of the Far East. INFORFILM is working hard to make the use of films by these firms, trade groups and other sponsors easier and more effective. In a way, it is a small but highly-practical version in business of the United Nations.

## Just a few minutes from now you can tell your story with slides.

That's Polaroid Land transparency film. Load the film into a Polaroid Land camera. Start clicking. And in a few minutes you can have 8 slides ready for immediate projection.

There are two kinds of Polaroid Land transparency film for making two kinds of slides. One is for line copy work. In 10 seconds it gives you a sharp, high-contrast transparency of anything set in type or drawn in ink. The other is for making transparencies of continuous tone material (people, objects, pictures, etc.), and its development time is 2 minutes. It produces slides un-

surpassed in sharpness, brilliance, and range of tones.

Both films are easy to use, so anyone can make slides with them. You just snap the shutter. Pull the tab. Wait for your finished picture. Dip it in a quick-drying hardening solution. Then slip it into a snap-together plastic frame and it's ready for the slide projector and your audience.

And what does this literally up-to-the-minute slide presentation cost? About  $\frac{1}{3}$  what you've been paying for the conventional kind. Here's the way to get your points across. Agree? Polaroid Corp., Cambridge, Mass.

# EVERY PROSPECT WANTS TO KNOW: "WHAT WILL IT DO FOR ME?"

The timeless truths for successful selling are often ignored. Salesmen fall into habits of stressing product or service facts when everyone knows it's the benefits to the buyer that create the big sales orders.

## "SELLING THE END RESULT FIRST"

Trains salesmen how to apply this most powerful of sales strategies... gives ways and means of building presentations for maximum effectiveness. Here are the tested ways for hitting harder, to develop a higher percentage of sales from calls. It's one of a series of six color sound slidefilms: —

## "SELLING IS MENTAL"

That provide you with tested material for 18 resultful sales-training meetings.

## Decade of Auto Racing History Picture in a 45-Film Library

Over 45 films recording more than a decade of racing history are now available for rental and sale from Association Instructional Materials, a division of Association Films, Inc. Many of the 16mm films are in both color and black and white and are about 30 minutes in length.

The series produced by Dynamic Films, Inc., features scenes from some of the more famous stock car races filmed at Daytona Beach, Darlington, LeMans, Sebring and Monza. In addition, the series includes all the Indianapolis 500 races from 1952 to 1963. Films on the Gold Cup Motor Races on the Potomac and hydroplane, direct track and motorcycle racing are also available.

The rental price for color prints is \$8.50 per day and for black and white prints \$6.50. All color films sell for \$175 and black and white films for \$100. To rent or preview films for purchase write to Association Instructional Materials, 347 Madison Avenue, New York 10017.

## "The Cancer Researchers" Is Available for TV Programs

A new public service television film release, *The Cancer Researchers*, merits wide audience interest. Produced by Parthenon Pictures in a new 7½-minute "experimental" length, the brief and timely subject enables station programmers to use it in varied open slots and for news shows.

The Upjohn Company made the film possible and Sterling Movies U. S. A. will distribute to television stations nationally. Additional length enables the producer to detail subject matter which will not fit the five-minute category.

257 PARK AVENUE SOUTH, NEW YORK, N. Y. 10010

Jimmy Clark (left), last year's auto racing champion, received a personal print of "The 1965 Indianapolis 500" film from producer Nat Zucker during recent premiere of the official film of the Indianapolis Motor Speedway.

**Dynamic Premieres Official Film of "Indianapolis 500" Auto Race**  
 The 1965 Indianapolis 500, the official motion picture of the annual auto classic, was premiered at a press reception at Toots Shor's in New York at year-end. Guest of honor was Jimmy Clark, international world's champion driver this year, and winner at Indy in his Lotus-Ford.

The color film, 28½ minutes in length, shows much of the distinct personality of the race — always one of the biggest sports shows in the world. This year marks the end of an era — the small rear-engined Ford-powered cars finally overtaking the Offen-

hauser roadsters which had dominated American racing for so long.

The 1965 film, which will be used officially by the Indianapolis Motor Speedway, was produced, as have many of the great racing films of the past decade, by Dynamic Films, Inc., New York. This year's Indy film will again be sponsored by several leading automotive parts manufacturers. •

**Kodak 8mm Sound Film Shows Draftsmen the Benefits of Estar**  
*Where Do You Draw the Line?* is a new sales promotional film designed for audiences of draftsmen. It is sponsored by Eastman Kodak and is intended for point of sale use on portable 8mm sound projectors.

Kodak's Estar-based drafting materials are a radical improvement over the papers commonly used. But draftsmen are a touchy lot of craftsmen. They are used to paper and it is hard to change their ways.

The film faces up to all possible negatives that might pop up in draftsmen's minds — hard to draw on? Hard to erase? Easy to smudge? Difficult to clean up?, etc. This honest approach and the straightforward answers supplied should do a lot to overcome natural prejudices.

*Where Do You Draw the Line?* was produced for Kodak by Willard Pictures, Inc., New York. •

**Goodyear's "American Challenge" Shows Daytona and Sebring Races**

America's smashing sports car victories in the 1965 Daytona Continental and 12 Hours of Sebring are colorfully portrayed in a new film announced by The Goodyear Tire & Rubber Company.

The film, *The American Challenge*, chronicles the successes scored by the Ford GT Prototype and Carroll Shelby's Cobras at Daytona Beach and Sebring and the unexpected first-place finish of Jim Hall's unconventional Chaparral at Sebring.

In the two big races, American entries routed both European drivers and equipment and made deep inroads in the Grand Prix racing class long dominated by the Europeans.

Fords and Cobras swept the first five places in the Continental and won the grand touring prototype and grand touring classes at Sebring behind the Chaparral.

The action-packed Sebring race was deluged during its final hours with a Florida rainstorm that put parts of the track and pit areas under water. That portion of the film records some of the most exciting scenes ever seen in an auto race.

Running time for the 16mm film in full color is 28 minutes. It is available on a loan basis without charge to interested clubs and organizations and may be ordered

for showing on a specific day. For writing the Audio-Visual Department, The Goodyear Tire & Rubber Company, Akron, Ohio 44316.

**"Anatomy of an Explosion" Depicts Preventive Measures**

Based on the fact that explosions are not instantaneous, a new film, *Anatomy of an Explosion*, shows how potential explosions can be detected and eliminated before they cause damage. The 18-minute color film is available for free-loan use by schools and adult organizations through the Association Films, Incorporated, 250 South Fenwal, Inc., Ashburnham, Mass.

Using high speed cameras, the film illustrates how an explosion takes place, from the spark of ignition to the final detonation. It then explores the highly sensitive detection equipment that reacts to conditions of combustion such as sudden change in pressure or heat, and automatically presses them in the incident. The film is available in 5, 10 and 20 thousand foot second.

The various types of recording systems that are tailored for industrial processes are illustrated in manufacturing sequences ranging from a starch company to a chemical plant.

**Charles Beckett Creates Film on the Art of Studio Lighting**

Charles Beckett, one of Hollywood's top directors of photography, has scripted, supervised and directed a soon-to-be-released film on the art of studio lighting. The film concentrates on the placement of key light, fill and kicker lights, the position of back or hair light, and the ratio between key and fill. Both filming and distribution will be handled by Delta Films, Inc., 1661 N. Western Blvd., Hollywood, California 90028.

**Fortune's "Salesman" Film Available for Video Showings**

The 21-minute Fortune film *The Salesman Isn't Dead Yet*, is being made available for public service showings at television stations. Made in cooperation with International Business Machines Corp. by Delta Films, Inc., the film shows today's salesman working in a competitive market, how to sell service as well as products. Prints are available from Association Telefilms local li-

# "Most-Honored" Pictures of the Year

Consensus Selection" of Sponsored Motion Pictures & Slidefilms  
 Received Awards Honors in Recognized Film Competition During the Year

WINNERS of the past year, listed  
 locally in these pages, include only  
 received first award plaques or  
 honors at a recognized film festival  
 which received high ranking at  
 competitive events in the U. S.  
 "consensus selection" is a fair and im-  
 ch to deserved recognition of  
 actual films. It supplements the  
 of overseas winners honored at  
 International Industrial Film Festi-  
 reported in our previous issue.

## "Heavy" Subject Well-Handled in Film to Update Prospects on Company Growth

THE CLEAVER-BROOKS COMPANY is the originator and probably the world's largest maker of packaged boilers. The company was launched by John Cleaver and Raymond Brooks in 1931, has continued to its present leading position through a widespread sales and service organization backed by a continuous research and development. Not the least of its manufacturing resources is their modern, automated facility at Lebanon, Pa., one of the most efficient in the industry.

That's the premise which was obvious to Cleaver-Brooks' management team. But progress has been rapid, advances in that field have been manifold and what was obvious to the Milwaukee-based headquarters organization may not have been too vividly clear to such various prospects as school boards, trade groups, consulting engineers, contractors, architects, plant managers and maintenance engineers . . . some of whom might still harbor the notion that boilers are hammered together in plants with dirt floors, let alone an automated facility.

### Aim: Hold Interest of Diversified Audience

Cleaver-Brooks faced the problem of how to tell their story to a selective, yet highly diversified audience, while making a truly heavy industry exposition interesting and worthy of real attention. W. Worth Ware, the firm's advertising and public relations director, turned to Fred A. Niles Communications Centers to bring it all together on film. Goals were set in initial sessions attended by president John C. Cleaver, vice-president of sales, Hal Holtz; Niles' Ervin Jourdan and Roy Hillgoss of the firm's agency, Klau-Van Pietersom Dunlap.

The resulting screen effort is a straight for-

ward 30-minute color exposition that at maximum attention and content value to intended viewers. Primary emphasis was on on-location sequences at the automated Lebanon complex. Here, in a 12-minute picture, viewers are given something that has never been filmed before: the production of a boiler from start to finish—from steel to shipping.

### Change Brought New Groups Into It

The sponsor's awareness of the boiler specification within recent years (to turnkey contracting, etc.) is serving to bring new groups of people with an interest in the Cleaver-Brooks' story.

Viewers see giant boilers moved efficiently, using the most advanced material handling and positioning equipment through many production stages, packing some 1700 parts, and going through final tests until it is completed in a matter of working days.

A documentary treatment was used appropriate to both the subject matter and through the company's background, its World War II production and its subsequent market expansion and design advances over two decades.

### Focus on Today's Applications and

But focus is on today's worldwide applications and design features. The cameo appearances of C/B product divisions and an affiliate, American Chem, Inc. of Waukesha, Wisconsin, a manufacturer of sea water desalting equipment. This latter phase informs audiences of the firm's commitment to present-day industrial growth. Product and marketing programs as well as export activities of the company are skillfully woven into the film's fabric.

Professional narration by NBC's Cliff Huntley adds much to the interpretation of the complex story-line. And because the sponsor's intent on delivering a wholly authentic documentary, a vast amount of research and preparation. The same diligence in production was necessary at the Lebanon complex (before filming). Music, sound effects and a voice-over narration by Huntley were completed at Niles' Chicago studios. From the decision to the finished product — *A World of Difference* — was eight months in the making.

### Employee Premieres in Three Plant

Distribution began with employee premieres at theaters in three plant cities: Miraflores, Lebanon and at Stratford, Ontario, Canada. These were well-planned events with individually mailed tickets and a descriptive brochure going to all company guests, including representatives in each area.

The second important phase of distribution is bringing the picture to the greatest sales representatives in every major city in the U. S. and Canada. Agents will conduct selective film showings as part of heating up territories for interested people in their territories.

The final step in distribution will make the film available to a national distributor for nationwide use by civic, commercial and educational groups. By that time a good many millions of viewers will have shared the present and future of Cleaver-Brooks.

The cover picture: symbolizes the theme and title of this new Cleaver-Brooks color film, "A World of Difference." This scene is also featured on the company's promotional color brochure . . .

# ing Film Needs of Color TV

Switch to Color Being Met by Machines, Men Overcome Tight Situation Without Loss of Quality

REPORTS in New York's trade press have expressed the impression that television's switch to color brought the film laborator-

ies to a true that the sudden shift of ABC and CBS in challenging NBC's has caused a temporary processing situation, with evidence that many have planned for this for several years and to take steps to meet some time ago.

**Investment in Equipment**  
begins it is estimated New York's film laboratories had several million dollars worth of color processing equipment operating around the process of installation in order for delivery this early spring.

The city's major processor is Du Art Film Laboratories, which has poured \$550,000 into new equipment in the past few months and plans to invest even more in 1966.

Irwin Young, Du Art's president, says that, none of the labs was warned of the sudden switch to color until about six months ago. But far before that, he says, he and others had under-estimated expansion moves, and had planned most overnight moves (up to 80 per cent of the equipment casting now as compared with 20 per cent a year ago) in an orderly fashion. It has not been planned. It has been ahead in every way for many months.

**Steps to Meet Demand**  
To meet the color capacity of the industry, just a case of buying new equipment — Du Art has been doing on this basis for many years. This year, the company has ordered two new Eastman color processors, a Pako Ektarsal color processor, and the Hazeltine Instantaneous Color Analyzer which was ordered a few months ago. Before the end of the year, five new Bell & Howell color printers will be in operation. Printing and processing equipment will be added early in 1967. The lab will be capable

of processing 100 million feet of film a year, up from 70 million last year. (Also being expanded is the company's Canadian affiliate, Associated Screen Industries, which expects to be well in time to handle its part in Canadian television's switch to color in 1967.)

A good part of the problem in providing color processing service

*Irwin Young, president of Du Art, is an industrial engineer, a graduate of Lehigh University. He joined the company in 1950, became executive vice-president in 1955 and president in 1960. He is also president of Associated Screen Industries, the Canadian affiliate acquired by Du Art in 1957 and is vice-president of Western Broadcasting Company, which operates WOLE, Channel 12, in Puerto Rico.*

of processing on a par with black-and-white is that each step along the way takes more care — much more time to complete. The first print takes a long time to produce with all the variables that must be controlled — even with the Hazeltine Timer.

First prints often take hours of calculation, and sometimes recalculation before perfect timing is achieved. And color considerations are subject to a great deal of subjective thinking. A print is not just too dark or light, it can also be too magenta, or cyan, or yellow, according to the whim of the viewer.

### An Intensive Training Program

To handle the vastly increased service problems that color entails, Du Art's training program has been stepped up to put many more of the company's black-and-white trained personnel into color. Hiring of trained printing and processing operators and super-

*The Hazeltine Instantaneous Color Film Analyser is a newly-developed system in which a color negative or positive film may be quickly "timed" for printing purposes. It projects a positive color image on the television screen from a scanned frame of film. The electrical characteristics of the Analyser simulate the photographic printing process. Adjustments made by the operator to obtain optimum color quality control the subsequent printing exposures. Thus, the operator may determine the brightness necessary for correct printing as well as the proper ratio of red, green and blue lights which are used in the ultimate processing of the color prints.*

visors is going on at a greatly increased rate.

To house all the new equipment and personnel, Du Art has expanded its occupancy of the building at 245 West 55th Street to nine floors — up from three in 1950. The lab first began operation at this address in 1922 — it is

the oldest continuously operating motion picture lab in New York.

Du Art's image for many years — that of an old-line conservative company — has been greatly changed in the past ten years by a period of dynamic growth under the helm of its new president, Irwin Young. Much more emphasis is now being placed on both practical and theoretical research. Du Art has pioneered in such technical advantages as the use of fiber optics for printing; it was the first lab in the city to do Eastman Color processing in 1953.

### Tight Situation to Ease Up

With the industry's crash expansion program now well in hand Du Art feels that it will not be many weeks before New York's labs are again completely out of the tight situation which the TV color changeover temporarily caused.

\* \*

### Dr. Raymond Fielding Now on Faculty at University of Iowa

Dr. Raymond Fielding, film writer, professor and a member of the board of the University Film Producers Association, has joined the University of Iowa faculty. Formerly at the University of California Los Angeles, he will teach courses in film history, production and technology at Iowa and will supervise that university's film research program.

*Arthur J. Miller, Du Art's engineering vice-president, also leads the industry's Association of Cinema Laboratories as its current president. He was associated with Eastman Kodak, CFI and Pathé Labs before joining Du Art in 1959. Along the way, he worked with Fred Waller in the development of the Waller-Gimicru-Frauer, the direct progenitor of Cinemascope. Later, at the American Optical Company, he spent 18 months helping develop the Todd-AO process for wide-screen cinema.*

**Lip sync is now as easy as voice over and usually cheaper. Does your scriptwriter know about the NPR?**

Tell him this story: Jack Davidson makes industrial and educational films in San Francisco. A giant oil company recently hired him to make a 20 minute instruction film on location. Limited budget, so the treatment called for post narration, library score and wild effects.

But Mr. Davidson took an NPR, a Nagra and a soundman on location, intending to shoot sync sound effects. Once there, they decided to shoot lip sync, too, while they were about it. The final cut ran for 10 minutes, not 20, because lip sync covered the film's points with less talk and consequently less footage. The sponsor was delighted with the way the story told itself, needing no narrator, in half the time.

These items pleased him too: less shooting time, less film, no narration, no narrator, no score, no wild effects to find and lay in, cheaper mixing session, shorter prints. Immediacy, brevity and effectiveness for less time and money than the old voice over and violins.

It's not news that sync sound is better. What is news is that in this case it cost less. It cost less because the NPR and Nagra made shooting sync as quick and easy as shooting silent, and the track was ready as soon as the rushes. Here's how. The NPR weighs only 20 pounds and is completely silent. It needs no blimp, repeat no blimp, no AC power and no clapstick. It has a built-in sync pulse generator and a battery operated constant speed motor. The magazine can be changed in well under ten seconds.

Many NPR users run sound even when they're shooting an M.O.S. sequence. It's no more trouble, and it's surprising how often the scratch track works better than narration. The choice of camera hasn't affected a film's *style* until now. Until now.

Service, sales and rental facilities are available from these expert, franchised dealers: *Chicago*: Behrends Inc.; *New York*: Camera Service Center, Camera Mart or F&B CECO; *Los Angeles*: Mark Armistead or Gordon Enterprises; *Detroit*: Behrends Inc. or Victor Duncan Company; *San Francisco*: Brooks Camera. White House premiere of "The American Vision" brought greeting from Mrs. Lyndon B. Johnson to noted art patron, Mrs. Chester Dale and Gallery director John Walker. (Washington Star photo)

## Film Brings World the Art of "The American Vision"

THE WHITE HOUSE served as a preview theatre on November 16 for an audience of art fanciers invited by Mrs. Lyndon B. Johnson to see a new National Gallery of Art film, *The American Vision*.

The 35-minute, color motion picture, produced by United States Productions, Inc., of New York, traces the development of American painting from pre-revolutionary days to the beginning of our own century. It is based on the American pictures hanging in the National Gallery of Art in Washington, D.C.

Mrs. Johnson's guests at the special showing included many public-spirited citizens whose contributions in the field of American paintings can be found in the White House and the National Gallery of Art collections.

### Respect Shape, Composition of Each Work

The film is not a conventional visit — showing the paintings in their frames hanging in the galleries with a camera host describing

John Singleton Copley's work, *The Copley Family* is one of the great paintings brought into close perspective for *The American Vision*.

*This Color Film Studies a Nation's Art Heritage; Re-Creating History Through the Work of Its Painters...*

them. Rather, the paintings are presented for themselves and the camera work and editing dramatize certain aspects of the paintings. In a departure from the standard film on art, an attempt has been made to respect the shape and total composition of the individual work of art, without losing sight of the fact that a static medium is being translated into a kind of three-part counterpoint of images, music and words.

Particularly impressive are scenes in which the camera moves about the painting picking up its significant aspects — such as in Benjamin West's great *Battle of La Hogue*, or John Singleton Copley's *The Copley Family*.

### From Colonial Painters to the Realists

Artists whose work is covered include John Singleton Copley, Benjamin West and Gilbert Stuart from the Colonial Period; Thomas Sully, John James Audubon, George Inness and Albert Pinkham Ryder among the Romantics;

John James Audubon's "Swallow-Tailed Hawk" for Plate 72 in his famed book on "Birds in America." The original aquatint, colored by hand, was presented to the Gallery by Mrs. Walter B. James.

the Expatriates James McNeill Whistler, Mary Cassatt and John Singer; and Thomas Eakins, Winslow Homer and George Bellows, Realists.

The film, which had another invitational showing later in November at the National Gallery, will now be distributed to schools and other interested groups, according to J. Carter Brown, who is assistant director of the National Gallery and who wrote and directed the film. Mr. Brown said at the premiere that final distribution plans are still under consideration. He hoped that *The American Vision* would be the first of a series of films on art sponsored by the National Gallery.

### 30 Language Versions for Showing Abroad

The U.S. Information Agency will show the film in 80 countries around the world. Thirty language versions are being made.

The film was produced under a grant to the National Gallery by Mrs. Cordelia S. May. It was narrated by Burgess Meredith; original music by Frank Ledlie Moore; photography by Rene Bras. Executive producer was Francis C. Thayer of United States Productions.

## Russia Bids for Leadership in Film Sciences: Jeffee

"WE MUST ACCURATE technical programs in the motion picture and vision sciences in our schools and abdicate our position of world leadership in these areas."

These are the words of Saul Jeffee, president of Moviab, Inc., reporting on his week tour of Russian motion picture laboratories, universities, technical design centers. Jeffee made the trip as a member of a four-man technical delegation on the auspices of the State Department and the Society of Motion Picture and Television Engineers, surveying the film industry in the USSR.

### Russia Leads the U. S. in Film Research

Jeffee pointed out that a similar trip, part of the continuing Soviet-American cultural exchange program, was made years ago. Ethan M. Stille of Eastman and a member of the U. S. delegation, on November 20, 1963, that the Russians are making a tremendous technological effort "narrowing the gap" in American aptitude in film science. The consensus of our representatives after the '63 visit, he added, was that the Russians were fairly close to us and doing more to catch up than we are to maintain our supremacy in the field of technicians and in research and development.

Jeffee contrasted these observations with those of Sid Solow, president of Cinescope Film Laboratories and a member of the delegation, who reported (November 10) that Russia leads the U.S. in film research having made great technical progress in intervening two years. Solow cited improved methods of production, film processing and projection featuring highly advanced equipment now in use in the USSR.

### Intensive Technical Training Is Needed

Acknowledging that, based on his observations, the Russians are overtaking various phases of motion picture engineering, the president of Moviab urged the industry that steps must be taken to encourage intensive technical film training. (CONTINUED ON THE FOLLOWING PAGE)

Saul Jeffee, president of Moviab, Inc., inspects a machine at Kharkov Printing Plant with Russian director Anatoly Meshkov and U. S. delegate Dr. Konstantin Pestretov.

LAST THREE YEARS the National Tuberculosis Association has gathered a number of awards for its health education programs as well as its round-the-year health education and Christmas Seal television spots. These were recently topped by a first prize at the San Francisco Film Festival for the film on cigarette smoking, *Point of View*.

For in NTA's recent prominence in health education has been the advent of Milton Robertson as director of radio TV film for the National Tuberculosis Association in 1962. Robertson came to health education with years of experience in film and television. Just before coming to NTA he served as writer-producer of the experimental PM West show for the National Broadcasting Company — and was manager of the Arlene Francis Home Show.

### NTA Re-Evaluated Its Film Making

As a well-equipped creative craftsman, the National Tuberculosis Association could initiate a concept, translate it into a thoroughly professional script, and provide knowing cooperation with a professional organization to fulfill the concept. NTA films have been produced by Vision Associates, New York.

It was in NTA, and perhaps the attitude of many health and welfare organizations, that health education spots were usually prepared with less than total knowledge of the field and its wide possibilities. NTA accepted the challenge and re-evaluated its film-making spots were suddenly no longer health lectures, but one-minute vignettes whose intent was not only to deliver a health message, but to do so with ingenuity and picture. The New York Times, in a Sunday feature by John J. F. O'Connell, hailed the work of NTA's film department, calling the Christmas Seal film "one of the most inventive, pleasing and entertaining pieces of material on the air."

### Approach to the Hazards of Smoking

Vision Associates recognized the willingness of the National Tuberculosis Association to find new ways to deal with old problems and contributed very much to the development and fulfillment of material initiated by the National Tuberculosis Association. Another film organization, Amram Associates, produced a series of NTA films that recently won a silver medal at the International Film Festival of New York.

The challenge to NTA arose when it decided to do its first film on cigarette smoking. Heretofore a score of films on the subject had struck hard on a theme of death and disaster. Most films that dealt with the threat to health assumed a burlesque quality and then proceeded to deck the smoke screens of fear and threat.

NTA reversed the process and created a new precedent by offering an unflattering portrait of cigarette smoking and its hazards in the form of a sophisticated film. The script, written by Robertson, as are all NTA films, went into the hands of the National Tuberculosis Association's medical film committee. Although the subject had been exposed to new ideas and techniques, the smoking script was a

In these scenes from the National Tuberculosis Association film, "Point of View," Second City Satirists provide some very funny moments . . .

... as they probe the "prestige motivations" that lead these "characters" to smoking. Casting adds freshness and zest to this picture's message . . .

## A Fresh "Point of View" About Smoking

The "New Look" in Films Sponsored by the National Tuberculosis Association Merits Special Attention to This Sophisticated Satire on Cigarette Smoking

This artful smoker is not on fire . . . he's just polluting the air with noxious clouds of carbon.

sharp avant garde step in their experience of film making and quite a bit of discussion developed concerning the film.

Fortunately, and after much soul searching, NTA agreed on the concept and *Point of View* arrived at Vision Associates to begin its odyssey. It could have been just another superficially clever film, but with the casting of the Second City Satirists to perform the roles, it

*Squeeze-frame sequence from "Point of View" takes viewers "round-the-clock" with a typical*

began to take shape as a most unusual film — entertaining, funny, but effectively putting across its serious message.

*Point of View* called for unusual effects, and the film demonstrates these effects in telling sequences. Perhaps of greatest importance, it was particularly intended to make an impression on youngsters. The response of youthful audiences across the nation attests to its success. It will not change the smoking habits of a nation. No film, no *hundred* films will accomplish this.

"Best Health Education Film I've Seen . . ."

But it will be noted, Emerson Foote, formerly head of a leading advertising agency, and now serving as chairman of the National Interagency Council on Smoking saw the film and stated "this is the best health education film I have ever seen, and the first that I believe can be shown as a commercial feature in film theatres."

Perhaps the most important effect of the success of *Point of View* is the knowledge that health education films can move out of the musty world of "educational films" into the arena of creative film making using advanced techniques, dynamic production methods and creative scripts that offer the viewer stimulation, entertainment and education. •

*smoker from that first cigarette in early morning until that final choking cough as he goes to bed*

Three tilted glass projection ports, plus a wide viewing window, allow use of full range of equipment. Storage area for tables, chairs is under booth.

Eight-by-eight foot center screen tilts for overhead projection, adds versatility of the room. 40 comfortable folding chairs are color-coded.

## A Model Audio-Visual Presentation Room

The Versatile Audio-Visual Presentation Room at Montgomery Ward & Company Was Designed and Equipped to Inspire and Motivate Its Merchandising Executives

WHEN MONTGOMERY WARD remodeled its corporate offices in Chicago recently, R. P. Pettit, product sales training manager, requested "an area where we can do a professional job of showing films." Realizing that the showing of a film usually complements a meeting, and that at a meeting the learning process should take place, Ward's professional A-V staff rolled up their sleeves and went to work.

The determining philosophy for an A-V room, they reasoned, should be based on the principle that the learning process is enhanced when the instructor has complete control over his environment. To arrive at this control, then, an A-V room must be designed and equipped to prepare audiences mentally and physically to be receptive, so that they can be inspired or motivated to learn.

### Flexibility Was a Key Design Factor

Application of this philosophy was the next step. Who exactly would use the room and for what specific purposes had to be deter-

mined. Ward's management, buyers and merchandisers needed an A-V room for specific purposes, but not necessarily for the same purposes. Logically the room had to be flexible enough to anticipate the needs of all.

Buyers and merchandisers in particular needed an area where they could combine visual and recorded media with actual displays of merchandise. Frequently, Wards had to make professional quality recordings, but had no place adequate to make them. Closed circuit television and the making of films also had to be anticipated. And there was not a suitable place in the building to hold news conferences.

### Designed for Professional Showmanship

So, the embryo, "an area where we can do a professional job of showing films," was developed by Ward's professional A-V staff until it grew into a mature and versatile Audio-Visual Presentation Room, a room for all types of presentations, including, but not primarily restricted to, recorded and projected visuals.

The room was designed to give the presenter

as much control of the meeting environment as possible with the least amount of distracting elements, in order to motivate the most effective communication between the presenter and his audience.

With philosophy and concept known, Glasell, audio-visual manager at J. Barth, Ward's audio-visual production manager, turned to the corporate engineering and merchandising division and told them what he had in mind. The three groups went to work. They did the architecture detailing, interior design and layout without enlisting outside professional help. The end product was well worth the effort that went into it.

### Features of Ward's Presentation Room

Here are the main features of the presentation room:

The viewing room measures 20 by 20 ft. The projection room, 7 by 20 ft. seats 40 people, theater style, and 25, class-room style.

The ceiling height is 13 ft. It is the tallest room in the building with this height. In addition, the room has an exception of the auditorium. It was designed for overhead projection with minimum obstruction, and is suitable for photography and for better room lighting.

The room is illuminated by incandescent lighting on separate circuits for section lighting. There is a general lighting dimmer

The carpeted projection room area houses the latest in projectors, recorders and record-players. It is sound-dampened to prevent extraneous noise from affecting the audio-visual presentation activities.

Projection room controls are at the disposal of the operator. Projectors, recorders, graph, phone, intercom, lights, screen and sound controls are all within easy reach. The large sound-proofed window gives the booth full view of all activities.

operator's port, looking to screen behind electrically-controlled drapes are 5 x 8 ft. screens; 5 x 8 ft. screen in center.

Three meeting room screens can be used individually, for overlapping projection or for wide-screen images; the center screen may be tilted.

Electrically-controlled drapes open on cue for dramatic effect. A second set of neutral-tinted drapes covers the side walls of room at Ward's.

adjustment to dark and light conditions were installed for podium high-contrast display accent. Fluorescents are white color to match incandescent

and store display accessories. A fiberglass noise stopboard was installed behind all walls for sound deadening.

The sound system incorporates two Electro-

lights, two of them 4 by 8 ft. and one are concealed roll down type, electrically controlled by remote switches from projection room and from a portable room. They can be used for overlapping or for wide screen. The center screen is for overhead projection.

The control panel is mounted on the lectern but may be easily removed and used anywhere in the room; a twin panel is in the projection area. Screens, projectors, recorders, players, lighting effects and drapes can all be operated by the man in booth or speaker in the meeting room.

remote control switchboards were installed in the projection area and the selectable unit located on the end of a podium for installation, on a podium or for point in the room. The switchboard has 5 switches, projector, remote extension, controlling 24 volt relay switchboard actual switching.

of independent, electrically controlled series serve primarily as a sound factor; decor is secondary. They are used to reveal wall displays on cue and provides a neutral background for

All room outlets are on individual circuits 20 amps each. One outlet is 30 amps. The total available power at room switchboard is 200 amps, and there are a total of 26 individual circuits.

Ample power is available for motion picture photography or for closed circuit TV production.

Intercoms in the viewing room, control room and outside A-V area allow independent inter-communication. Earphones can also be plugged in to cut off the intercom speaker when needed.

of independent, electrically controlled series serve primarily as a sound factor; decor is secondary. They are used to reveal wall displays on cue and provides a neutral background for

Voice Sentry II speakers mounted at ceiling line to avoid being in back of draperies. They are used in conjunction with a McIntosh Amplifier for the finest reproduction from any source. The room has been sound-dampened sufficiently to allow sound recordings to be made. It also allows the playing of tapes, records and films with a minimum of disturbance to adjacent areas with maximum quality conditions.

A separate unlisted telephone line into the room is for use by meeting participants. A pick-up extension in the control room and entrance-way is also available. There is a plug-in phone with a 20 ft. cord in the main room for use anywhere in the room.

The projection and control room features three separate ports plus an operator viewing port. Double plate glass in each, for sound control, is angled to reduce unwanted reflections. The control room lights are on a dimmer control to reduce unwanted light in the room when projecting. The floor is carpeted for sound deadening. The projection stands are individually adjustable for varying projectors. A 16mm optical and magnetic sound projector will be a permanent part of the room. (CONTINUED ON THE FOLLOWING PAGE)

structures, similar to those used in Ward's retail stores, broaden the room as actual displays of merchandise are hung on walls.

Now it's a versatile meeting room as Ward executes discuss product lines displayed along walls where they may be viewed by merchandising people.

## MODEL A-V FACILITY:

(CONTINUED FROM THE PRECEDING PAGE 37)  
record turntable is permanently installed and slidefilm and slide projectors are also always available.

Double doors allow a person to enter and leave the viewing room without disturbing the group as well as preventing light from entering if the room is dark.

### Room Can Be Cleared for A-V Production

Carpeting in the viewing room serves as sound conditioning as well as being decorative. It is not permanently installed so it can be rolled up, if necessary, to use the floor for camera dolly work or for moving displays in and out.

Fifty folding chairs are a part of the room's equipment. They are the folding type so they can be easily stored under the control room on two special dollies. Ten folding tables, eight 2 by 6 ft. and two, 2 by 5 ft. are also stored under the control room when not needed.

Two 4 by 4 ft. charcoal grey blackboards are mounted on sliding panels in the front of the room. Tackboard is in the upper 4 ft. panels as well as on two separate sliding 4 by 8 ft. panels behind the blackboards.

Adjustable shelving is available behind the tack and blackboards in the front of the room for displays and for storage. Sliding door cabinets below are also for storage.

No single feature of the room was installed as a gimmick or for its own sake, but rather to serve the whole — to create a controlled learning environment.

### Staff Helps Users Prepare for Meetings

Providing the room and its equipment is just one job of Ward's A-V staff. They help users of the room plan their meetings or presentations around the facilities so that they can be used to the fullest advantage. Staff members teach users how to operate equipment and when necessary, operate it for them.

It didn't take long for the good news to get around. When company executives saw what could be done, they decided to incorporate some of the room's features in other areas. The wall treatment, for example, and lighting controls are being planned for other conference rooms.

### Provides Single Control of All Facilities

"We are satisfied that the presentation room represents a modern business communication concept. It is much more than simply a new A-V facility," Glasell said. "A user can present and have complete remote control of the equipment and lighting without the need of an operator, all as a subtle and smoothly integrated portion of his presentation without making the audience keenly aware of the props being used." he added.

### Permanent Home for World's Fair Hit!

Construction will begin — Spring on the disc-shaped "Golden Rondel" theater adjacent to the Racine, Wis. headquarters building of Johnson's Wax where the 17-minute, three-screen film *To Be Alive!* will be shown as part of the company's tour program for its visitors.

Chairman of the board Lee Talley of The Coca-Cola Company wields scissors at ribbon-cutting ceremony that opened exhibits; vice-president Sam Gardner (left) and president J. Paul Austin (right) look on.

## Coca-Cola Keynote at Miami: Innovation

4,500 Representatives from Company's Bottling Plants in the U.S. Gather at Convention Hall to See "What's Happening" in Market Opportunity

THE IMPORTANCE OF INNOVATION in the Coca-Cola business from its earliest years was noted by Lee Talley, chairman of the board of The Coca-Cola Company in his keynote address to more than 4,500 representatives from that company's bottling plants in the United States and overseas as they gathered in Miami Beach's Convention Hall in early December.

"If ever a word fitted — characterized — and epitomized the proud history of Coca-Cola it is that word — innovation," Mr. Talley said. "... certainly by innovating we do stand to lose some of the traditions that have been of great value to us in the past. But here is one of the tests of leadership . . . those who are to lead in these changing times not only need to know the difference (between what should be retained and what should be modified) but they must have the fortitude to act on what they know."

### "This is What's Happening" in Marketing

Following Mr. Talley's address, the bottlers enjoyed and were enlightened by a two-hour

This "Little Red Schoolhouse" invited bottlers to study new lessons to be learned in training techniques at one of the most interesting exhibits featured at the Americana during meeting.

stage presentation featuring highlights of marketing opportunities which lie ahead, opened with recollections of the company's national gathering in 1961, which had the theme, "Coca-Cola Here and Now." The presentation, "This is What's Happening," featured original song numbers presented by a professional cast of 25, accompanied by a piece orchestra.

Thomas C. Law, Jr., vice-president and manager of the Bottler Sales Department, closed the first session by noting that the essential message of this entire convention is that in order to maintain and increase the value of this business, it is mandatory that every one of us do our utmost to capitalize on the current changes in our business environment.

"We have to learn the contemporary facts of life — face those facts — and make some decisions that will result in a period of profitable growth for all of us. We are just in the refreshment business where we are in effect, competing against every other product on the shelves. We are not just the marketplace purveyors of soft drinks — and therefore we are just the ken of other economic forces. We like it or not, up to our necks in the marketplace of a totally-changing business environment."

### Meeting Today's Market Opportunities

J. Paul Austin, president of The Coca-Cola Company, opened the second day's sessions by calling on the bottlers to do their efforts to meet today's market opportunities. Reminding the convention of the unparalleled marketing strength of their distribution system, he noted:

"The strength of interdependence at the same time — independence of individual business. Our business is national, but it is local. We bring to you all the advantages of a national business. You in turn are the consumers."

He closed his remarks with a summary

Plans now under development to further streamline and modernize sales.

#### of Meetings for Plant Personnel

and final day's sessions were opened by Richard Ellwein, president of The Bottlers Association and head of the Coca-Cola Bottling Company, Mitchell, et al. The main dramatic feature of the convention was a full-dress preview of motivation-entertainment for bottling plant personnel scheduled to be presented this month and through 41 cities across the nation. William Gardner, vice-president and field sales manager of the Sales Department, introduced the

entertainment features special music, lyrics which dramatizes the important aspects of the route salesman's job and the teamwork throughout the bottling operation.

#### by The Jam Handy Organization

The planning and organization of the convention was under the direction of S. N. Gardner, vice-president of The Coca-Cola Bottling Company. The Jam Handy Organization pro-

Research Exhibit at the Americana convention showing a computer which provided data for the route salesman pertinent to his home territory.

entire show under Mr. Gardner's

supervision. The script for the Jam Handy was written by David Wilson Stone. The sets and visual effects were by Ballou and the choreography was by Rodgers. Musical development and color coordination for Coca-Cola was under the direction of Morrow, manager of the company's Advertising Promotion Department.

#### Plans and Techniques for Training

The on-stage presentations during the convention were a series of exhibits set up at the Americana convention quarters during the week. A Coca-Cola Theatre provided showings of films; the "Little Red Schoolhouse" provided training techniques.

The "Market Research" exhibit, a large display which provided data pertinent to his terri-

Coca-Cola President J. Paul Austin opened the second day's sessions by calling on bottlers to re-double efforts to meet market opportunities.

tory for each visiting bottler. And in the "Advertising and Sales Promotion" exhibit (the largest at the convention), bottlers saw "main thrust" advertising media: outdoor boards, television commercials and magazine ads.

The convention program closed with an address by J. Paul Austin. After summarizing the essential areas of marketing and management covering the meetings, Mr. Austin closed with a challenge to action:

"It has been our task so far to make recommendations based on the state of this business," he said.

"To act on these recommendations to improve the state of this business—that is a task for all of us—there is an exciting journey before us if we can continue to innovate, improve and change. The courageous businessman is not unhappy at the thought of dangers beside the road ahead. He welcomes them as challenges to be faced and overcome along an adventurous course."

## "Revolution In Our Time" The Savings & Loan Idea

THE TRANSFORMATION of the United States from a nation of predominantly tenant families a quarter-century ago to its present status where two out of three families own their own homes is dramatically told in a 28-minute sound motion picture, *Revolution in Our Time*, which this month launched a nationwide campaign among the more than 6,300 savings and loan associations all over the country.

The fifth film produced by their association, the United States Savings and Loan League, brings the story of this "quiet revolution" to the screen in a factual documentary format which has wide appeal among television and film viewers. Important as a historical review of one of the great social developments of the 20th Century, the film includes sequences featuring the Hon. Hubert Humphrey, Vice-President of the United States; the Hon. Everett M. Dirksen of Illinois, minority leader of the Senate and the Hon. Wright Patman, Chairman of the Committee on Banking and Currency of the United States Congress.

#### Helping Our Neighbors Establish Systems

In the film, the Vice-President notes that savings associations "have now embarked on another great adventure, involving the expansion of thrift and home financing facilities for our Latin-American neighbors.

"Working in cooperation with the State Department and Peace Corps," he said, "American savings and loan associations are assisting in the establishment of similar systems throughout all of Latin America.

"By helping the people of South America to help themselves (that's what savings and loan associations do) an important forward step can be taken in creating a climate in which the false ideals of communism can never flourish. One of the sure preventives of communism is private ownership—home ownership."

#### Story Behind the League's Fifth Picture

Playing a key role in the planning and production of *Revolution in Our Time* was William B. O'Connell, public relations counsel of the League. He tells the story of the film:

"This is a different type of film from the four earlier pictures we produced. Two of our previous films were dramas built around families and their ventures into home ownership. A third was a cartoon presentation of the savings and loan business and the fourth was a service-type film based on the highly-successful League booklet, 'What You Should Know Before Buying a Home.'

"Our latest venture in film sponsorship is a documentary picture, of the type which has become so widely used in American television, such as the *Twentieth Century* series, *CBS Reports* and the *NBC White Paper* series. They present actual people and events.

"The basic purpose of this new film is to

(CONTINUED ON THE FOLLOWING PAGE 53)

## the Man Behind the Camera

Larry Madison has been interested in making films since his youth in Pennsylvania. As the man who is Larry Madison Productions, Inc., one of the world's most distinguished motion picture producers, he has more than 20 films to his credit, many of them prize winners. Of the 56 motion pictures selected to be shown at the Brussel's World's Fair in 1958, for example, six were produced and photographed by Larry Madison.

His films have taken him all over the United States and to many countries of the world. It's an exciting, exhilarating experience, but a tiring one, too. Whenever he can, he comes back to his woodland retreat in northwestern Connecticut.

Although their headquarters are in New York City and their permanent home in Scarsdale, New York, the Madisons bought land in an unpopulated area outside of Norfolk just over 10 years ago. For the first years, they lived in tents, still refer to their home as their "camp." Now the land sports two roomy cabins, open to the sunlight wherever possible, and a boatshed on the shore of Doolittle Lake.

"It's the greatest spot on earth, no doubt about it," says Larry Madison. "If I could manage it, I'd come up here and live full-time."

# FILMING BEYOND ALL BARRIERS

Today, millions of people, still prisoners of a primitive way of life, are stepping into the twentieth century with the aid of modern communications. A highly-effective new Bell System film, "Beyond All Barriers," tells the story, focusing on the family of man around the world. A crew of cameramen, headed by Larry Madison who also produced and directed the film, traveled for six months to capture dramatic evidence of this revolution: to remote areas in the Bolivian Andes where natives learn modern agricultural methods by transistor radio, to Thailand where a new telephone system ties people together, to Nigeria where a tape recorder brings education to fascinated villagers. For Larry Madison, making the film turned out to be a moving experience. Here he describes his impressions:

**I**F I HAD TO PUT MY FINGER on the pleasure I had while making *Beyond All Barriers*, it would be traced to the people we met. The pleasure of meeting so many — with their wonderful faces. Even the pain of seeing so many overwhelmingly uneducated was assuaged by seeing the look of recognition and joy on their faces as they learned to read and write.

People are pretty much the same all over the world. I was staggered by their intelligence, decency and sincerity. As soon as they discovered what you were about, they went out of their way to help you.

Making the film wasn't only a personal education; it was a hard job, too. Without doubt, the most difficult chores were moving ourselves and our equipment to 21 nations. In almost every case, we needed clearance from government officials. This took time and we didn't always succeed. For example, it took me three days to get our equipment through customs in New Delhi.

We wanted a sequence of the Parthenon, so before we left New York we checked with the Greek consulate to see if special clearance was needed. The answer — none was necessary. Once in Athens we found that we *did* need special permission. It took days to get approval. We selected a filming day, and as I was carrying my tripod into the Parthenon I was stopped. Special permit needed for the tripod. Three more days lost.

On the day of the shooting, we followed 3,000 visitors into the temple and stayed to film the moon rising over the Parthenon. One night a month you can film the full moon under ideal conditions. By luck we happened to hit the right time and had 15 minutes of perfect shooting. A cameraman's dream.

When we were finished shooting and had recuperated from the sheer physical exhaustion, we had 40,000 feet of film. It ran about eight hours and was edited down to 28 minutes. I think we have a truly beautiful and moving film.

At top left: Madison Productions hires professional editors for each project but Larry Madison does much of the preliminary work himself.

Below left: in Nigeria, a cameraman photographs two native women carrying bowls on their heads. Behind them, a modern communications symbol: the Western Electric tracking station at Kano.

Efforts of ancient civilizations to communicate with future generations is seen in these monuments at Karnak, Egypt. Scene is being filmed for the Bell System film "Beyond All Barriers."

The Editors are indebted to The Telephone Bulletin of The Southern New England Telephone Company for permission to reprint text and pictures appearing on this page.

Below: along a road in Ethiopia, the cameraman pauses to photograph a girl with an umbrella.

merica! And begin the journey  
visit to this vast North land!

PAN AMERICAN WORLD AIRWAYS has a dis-  
tinct and very active library contain-  
ing the world's finest expositions on  
the customs and scenic attractions of  
the world. It makes sense for Pan Am  
to be of interest to multitudes of poten-  
tial travelers but this world airline has also  
made a considerable contribution toward rich-  
ter understanding between countries.  
Motion pictures also reach the  
traveler to the United States. And as  
evidence to "Travel America" Pan Am  
has premiered *Wings to Alaska* and  
offers an intriguing and penetrating  
view of the 49th state. This latest color  
motion picture blends romance and  
offers a fascinating look at a strange  
land and the people who relate to

#### First Concerned With the People

era focused on *Wings to Alaska*  
is a close-up that is as much interested  
in the land as it is in the Eskimo,  
the newly-arrived citizen. These  
elements are as important to the picture as the awesome  
beauty of the land itself.  
This rendition, Pan Am's newest film  
continues a tradition of incisive reportage  
and beautiful beauty that was evident in

*Living (and film making) on the shores of the Arctic Ocean offers some precarious moments.*

## Flight to the 49th State...

The Latest Addition to the Library of Pan American Airways' Pictures,  
"Wings to Alaska" Is an Intriguing Study of the Land and Its Peoples

*the snowline lies the skier's dream  
reached by the swiftly-climbing helicopter."*

produced by the same producer (Henry Strauss  
of Pan Am) who gave us films in the  
series on Japan, Tahiti, New Zealand  
and a compassing view of the Soviet

#### Alaska: a Pioneer and a Prospector

the reaches of Alaska's forests, the  
majesty of her mountain ranges, the mystery  
of the clouds much of the glaciated inland  
to have their effect on the Alaskan  
as the narrator points out. "There  
is the pioneer and prospector in  
Alaska." And well there might be; for  
we see this last American frontier as a  
not a comfortable one. Alaska's cities  
near wilderness is great . . . and  
often a few miles away.

of Alaska's people the wilderness  
is wide the door. The Eskimos living  
along the shores of the Bering Sea and the Arctic  
are still wresting a living from an al-

most barren land and a sea that gives grudgingly  
and then only to the skilled and strong.

The airplane has brought them a certain  
measure of security; rifles make hunting a bit  
easier. But as the film points out, the ancient  
ceremony of the blanket toss, which once hon-  
ored men who battled whales with bone spears,  
". . . still seems fitting; for an Eskimo's whole  
life is a dance on air — an acrobat's trick of  
living on nature's tightrope."

#### Lighting the Path to Real Understanding

This technique of establishing a context for  
sequences of local color is what gives *Wings to  
Alaska* its stamp of authenticity. There's al-  
ways a reason for what we see. Whether it's a  
bush pilot flying a doctor into an isolated com-  
munity; or a group of Indian children perform-  
ing an ancient ceremonial dance; or the ghost

ridden hulk of an old sternwheeler; or even a  
trio of skiers leaving their tracks on a slope  
that may never before have had its snow dis-  
turbed by man.

Nothing is shown that doesn't "fit"; nothing  
that doesn't bring us closer to an understand-  
ing of what it's like to be an Alaskan . . . in Alas-  
ka. The results are notable here!

#### Prints Are Available from Pan Am Offices

Filed and directed by Henry Strauss,  
*Wings to Alaska* shows the result of the months  
of research and preparation that went on be-  
fore a single frame of 16mm color film was  
exposed. The thousands of feet that were even-  
tually shot have been judiciously edited into a  
26-1/2 minute motion picture that is available  
through Pan American sales offices through-  
out the country.

*"Now and then the old tales are brought to life,  
beneath ancient disguises . . . jet-age youngsters."*

*"More wealth has been taken from the seas near  
Juneau than from all of Alaska's gold mines . . ."*

Delcorama Jack Fields addressed dealer audience at the Delcorama in Boston.

## Delcorama Show Plays to 200,000 Dealers

Unique and Complex Film and Live Show Helped Introduce Delco's Automotive Power Source in 225 Principal Cities

ON DECEMBER 5, 1965 they ran the last Delcorama show for an audience of forty-five at the aging Grange Hall in the wind-worn town of Rock Springs, Wyoming. The time was 8:00 p.m. Some of the service station owners had driven more than 130 miles. It all started back in July of last year, when United Delco's Zone Managers and Assistant Zone Managers came to the General Motors Technical Center in Warren, Michigan. For four full days they saw the show and then two-man teams were carefully trained to put it on in some 225 cities across the land.

The show is complex and certainly unique. Delcorama is a combination film and live show, using two screens and featuring such TV and motion-picture luminaries as Walter Brennan, Lorne Greene, and Tom Harmon. The principal purpose of the show was to introduce Delco's Energizer, a new automotive power source that promises to make the word "battery" obsolete.

### Groups from 50 to 3,000

At this date the show has been run for over 200,000 gas station and garage owners, in groups that ranged from fewer than 50 to more than 3,000 in Boston and Minneapolis.

The whole idea is unique because units of the show traveled the country in thirty-one especially Buick Sport Wagons called "Delcorama Show Wagons" (ah there! medicine men of old). Special ingredients of the presentation were a 9 x 12 main screen and a 5 x 7 vertical screen. Two Bell & Howell projectors were

used and projection was accomplished on the vertical screen by running the projector on its side. The dialog of the show was integrated between a live meeting leader and actors talking from one screen to another. The whole show ran almost two hours and it was unquestionably the most successful product announcement and overall meeting that United Delco has ever presented. This is saying a lot because United Delco's merchandising program, headed by Mr. J. P. Kane, is accustomed to doing lively and effective meetings.

### The Men Behind the Show

The logistics of the show were staggering. The entire presentation was scripted by Eddie O'Brien — The Writer, of Wilton, Connecticut and production supervision and filming was done by GM Photographic with James W. Bostwick as the head of the Audio-Visual Department. Mr. O'Brien worked closely with the Campbell-Ewald Advertising Agency to coordinate the content with United

This illuminated Boston theater marquee greeted service station dealers who attended Delcorama program.

## showmanship in today's business

Delco's advertising schedules and concept.

Special credit must be given to individual Zone and Assistant Zone Managers for the quick manner in which they grasped the complex mechanics of the show and put it on for varied audiences in halls ranging from school auditoriums to full-size theaters. In more than 200 showings, they never had a breakdown, and split-second timing was needed to coordinate special cues on the two projectors. Mr. Kane typified reaction when he said "Eddie, how are we ever going to top this?"

Sales records for the Energizer are now topping all previous re-

ords and expectations. United Delco's wholesale distributor backed the show with rily enthusiasm and assured good attendance by providing door prizes and refreshments. Walter Brennan said "This is the first show of its kind that I have ever been involved in. If this is typical of business, I certainly have had a new and exciting medium."

Tom Harmon, who is sponsored by United Delco on CBS's "Kickoff," called Delcorama "best example of marketing important sales message I have ever seen."

## Kaiser's "Magic" for Aluminum Distributors

Live Demonstrations, Films and Closed-Circuit Television Were Combined in Effective Kaiser Marketing Presentation

MARKETING-ORIENTED INFORMATION on new techniques in metalworking and anodizing aluminum was the substance of an hour and a-half show presented by the Kaiser Aluminum & Chemical Corporation to the National Association of Aluminum Distributors (NAAD) at their recent annual conference in Phoenix. The presentation was made on the invitation of the association's program committee on the final day of the Arizona sessions.

The Kaiser show, titled *Marketing Magic*, was a really unusual combination of live demonstration, both color and black and white films and, finally, closed-circuit television projection using three sets. The "live" portion of the program brought out exotic metalworking techniques and explained these with animated film sequences in sound and color; then followed with the black and white films (sync sound) and closed-circuit television.

The monochrome film was a specially-prepared motion picture satirizing a Huntley-Brinkley newscast as it described sales advantages accruing to aluminum distributors who offer pre-anodized aluminum to their customers. The live, closed-circuit telecast (by the local CBS news director) further described the advantages of anodizing. This technique was also employed to present close-up views.

The effective total presentation — its unusual staging and logistic problems faced by the San Francisco based producer, Tom Fraser

Mr. Magic plays a featured role in the market-oriented presentation arranged by Kaiser Aluminum & Chemical Corporation for members of the National Association of Aluminum Distributors at their recent annual conference in Phoenix.

Productions — add up to a fine example of technique and execution. It played to a standing-room audience of 300 in Phoenix.

Kaiser Aluminum's hosting program was a professional affair of ceremonies, "Mr. Magic" (cut) and considerable equipment was provided by his four assistants. We're indebted to the p.r. representative Richard D. Mason for this advance report on a good piece of industry showmanship out in the field.

**S**ALISMAN AND TOP-RANKING dealers of A. O. Smith Harvestore Products, Inc. who attended that company's annual meeting in Colorado Springs last fall were entertained (and well informed) through the medium of a live musical presentation which was an integral part of the three-day program. Its objective: to reinforce the information on the corporate image, sales plans and new markets for Harvestore Systems.

The reception accorded this Wilding-produced "live" program, noted by Harvestore management, brought the idea of using a good part of it to show to farmer-prospects out across the country. The company's prospects in the field are, for the most part, highly-sophisticated commercial farmers.

#### These Audiences Want Facts

A further important element: techniques and methods of communicating product information to this group are becoming highly specialized, particularly where the price tag on the product is consid-

Robert C. Smith, director of agricultural marketing for A. O. Smith Harvestore Products, Inc. is the man directly concerned with this program.

ered by some to be too high. By way of explanation, the Harvestore System offers farmers three features:

(1) There is, first of all, a completely sealed structure to prevent air from coming in contact with livestock feed to cause oxidation losses and spoilage;

(2) The System provides top-filling and bottom unloading which permits refilling anytime feed is available, while feeding continues uninterrupted out the bottom; and

#### A Third Feature of System

(3) glass-fused-to-steel construction eliminates deterioration inside due to acids in the stored feed and maintenance on the outside. The increased profit features

"You're on Your Way" sung by Win Stracke, Bob Carroll and Dave Shelley.

## Harvestore Shows Farmers a Way to Profits

Filmed Segments Combined With Live Dealer Presentations Are Helping Sell the Company's System to Farm Prospects

are associated mostly with points one and two.

The presentation which Harvestore dealers are using in their sales meetings this winter was adapted from the Colorado Springs' show by filming at Wilding. The stars of the Colorado program — Win Stracke, Bob Carroll and Dave Shelley — bring both serious and humorous episodes to the screen. Carroll, for example, sets the mood of the show with a folk tune . . .

*"Tall Blue is taking a stand  
On all the horizons across this  
big land . . ."*

And Win Stracke sings of what is facing the world . . .

*"News of great trouble and  
sorrow in many a poverty  
land . . ."*

*"The spectre of famine is  
looming in many a poverty  
land . . ."*

#### President's Talk Was Fitted

This leads into Harvestore president Arthur D. Hyde's filmed keynote talk about the future of farming in the United States and the problems the farmer must meet in order to supply the demand for food all over the world. Competition enters the picture in the form of a character called "Chrome Dome" when Bob Carroll sings about

*"That old open silo  
That old concrete silo  
That old open silo  
Has seen its best days . . ."*

Dave Shelley as the "pitch man" warms up the audience with the reasons why the Harvestore System means more profits to the farmer in a carnival number called *Profits 12 Months of the Year*. It's

all good fun but, more than that, the show is very effective salesmanship well-suited to its intended viewers in the field.

There is good use of "live" episodes among the filmed segments. These are designed to provide an opportunity for dealer sales people to take an active role in their own programs. Solid factual data fortifies the presentation as it gives information on farming opportunities in the future plus information on increasing profits through maximum use of a farmer's land (through more intensive production and better harvesting methods).

#### David and Morton Share Credit

Martin David created and wrote the Harvestore program at Wilding, Inc. and the motion picture was produced and directed by that studio's production vice-president, talented Joseph Morton. •

Pitchman Dave Shelley gives the farm manager audience some good reasons why Harvestore means more money to them "Twelve Months of the Year" in this wind-up episode.

## Combo for a Hit: "She Purrs Like a Kitten"

Brevity and Humor Build This Five-Minute Safety-Minded  
Picture Into an Unbeatable Combination for Any Viewers

**B**REVITY AND HUMOR are two sure-fire elements all too-seldom seen in the sponsored film. Good things abound for the short-short motion picture in an era when a suitably non-commercial subject is an ideal time vehicle for the voracious television program schedule and there is always a place for an "extra" short to fill out a club or employee meeting show via 16mm programming. Add the priceless ingredient of humor and the combination used in *She Purrs Like a Kitten*, latest five-minute 16mm safety-minded film out of Parthenon Pictures in Hollywood is practically unbeatable. This color subject is even funny in its *concept*: it treats the woman driver as one to be *loved* rather than scorned (or driven hurriedly by). And why not, for isn't the woman driver all too often the victim of fate or of a heedless husband?

Underwritten by American Oil

The production was underwritten by the public relations department at American Oil Company (but without credit lines); their objective is safer driving through better car maintenance. Their aid results in a widely-useful short at a most reasonable print cost to all who can use this picture.

*She Purrs* is true "go go" and it starts going when teen-ager Eloise turns on her ignition and Mrs. Staley, a suburban matron shuttling her Cub Scout Pack, lifts the hood and Mrs. Johnston, the little old lady from Pasadena, brakes to turn in a driveway. and two club ladies chat amiably in their town car when suddenly the chauffeur's eyes bug out . . . *they're off!*

But they're *not* running! In wacky cutting of some howling Chaplinesque sequences, the cars which box in Eloise feel the impact of her idler adjustment being set too high! Mrs. Staley's broken radiator hose frees not only clouds of steam but her entire Cub Scout Pack! The little old lady from Pasadena nearly ejects herself through her car roof when she stands on her faulty brakes!

The club ladies (who forgot to fasten their safety belts) momentarily disappear when the chauffeur whams his brakes . . . and what are those Cub Scouts doing out there?

The action lives up to a motion

picture adage to *keep it moving* for the five shortest minutes in recent film history. But this is also a "whistle-while-it-works" picture and while the audience is thoroughly amused and entertained, it's also being given some very vivid images of safe driving through sensible car care.

Narrated by Frank Nelson

Frank Nelson, who will be remembered as Jack Benny's famous floorwalker, narrates *She Purrs Like a Kitten* from Cap Palmer's script, Don Livingston directed and edited (try a five-minute film sometime) and Dave Bowen brought in the music and sound. You'll want to look at this "keep-sake" subject from the source: Data Films, 2625 Temple St., Los Angeles 90026 or, if you're in a hurry, call Ted Palmer there at 213/385-3911.

## Golden Gate Report

San Francisco Chapter Active  
in Many Aspects of City Festival

Northern California chapter members were again active participants in the San Francisco International Film Festival of 1965.

Following their annual custom, the members aided in the screening of the Category III finalists (foreign and domestic films sponsored by industry, companies and other commercial institutions for showing to the general public).

They also participated in a "Film As Communication" conference held on October 21-22 in that city, at which time speakers representing minority groups, government, and the film medium explored the question of whether the documentary film is, in fact, meeting the challenge of today's social revolution.

Speakers scheduled for this conference included George Stevens, Jr., Director of Motion Picture Services of the United States Information Agency; Horace Cayton, prominent Negro writer and educator; Willard Van Dyke, famed documentary film maker; and David Brokensha, an anthropologist at the University of California.

The Northern California Chapter is also very proud of the fact that member Raymond Jaeger, Executive Vice President of IFPA Western Affairs, has been one of the important guiding lights of the San Francisco International Film Festival committee for several years. In addition, Ray is heading the Film Competition for the IFPA 1966 Convention next June.

Vin Agar, Northern California Chapter Chairman, and his program committee, presented a stimulating program for November with George Stoney screening some of the films which he recently completed for the New York police department.

Stoney, who is currently teaching at Stanford University, also discussed his methods for audience testing of these films, which were made to train police officers in the handling of various situations.

Also present at the November meeting was Mrs. Elaine Dolnick, Recording Secretary of the National Office of IFPA in Los Angeles. She flew up to San Francisco to attend the meeting and take care of some exhibitor business in connection with the 1966 National Convention. •

INDUSTRY FILM PRODUCERS ASSOCIATION, INC.

## IFPA Co-Sponsors Workshop and Seminar

Joins With Society of Motion Picture & Television Group  
and University of Southern California in Winter Program

**T**HE BIG NEWS from the National Chapter offices of IFPA in this issue is the announcement made by Dr. Harald Dyrenforth, President of IFPA, that the organization would join with the Society of Motion Picture and Television Engineers (SMPTE) and the University of Southern California in presenting the Winter Semester of their joint Workshop and Seminar.

Early in December, after many discussions on the potential, Dr. Dyrenforth and Roy L. Deets, Editorial Vice President of IFPA, met with Messrs. Herb Farmer and Don Perrin of USC and the SMPTE Education Committee, and Dr. Bernard Kantor, Head of the Department of Cinema of USC at a luncheon in the faculty dining room.

### Subjects of Member Interest

From this first discussion, an interest was expressed by Herb Farmer and Don Perrin to learn just what the IFPA members would most desire in such a series of workshop lectures and whether

it could be fitted into the format of the series which has been conducted so successfully over the past nine years by the SMPTE and USC.

A National Board meeting was held the following week and a series of lecture topics proposed. Dyrenforth then presented this proposed format to Mr. Farmer and a general acceptance was made.

### Course to Begin Next Month

Further information should be reaching IFPA members early in January — along with registration forms. The course is due to start in February. It is indeed an honor of high stature for IFPA to be invited to co-sponsor this esteemed professional workshop. All members are urged to support it to the best of their ability.

### Lapel Emblems Are Due Soon

The National office also announced that a special IFPA membership lapel pin tie tack will be available sometime in January. It can be secured by placing an order with your chapter office.

## Niver Describes Work of Film Preservation

**T**HE December meeting of the Los Angeles Chapter was held in the new facilities of Cinesound Corporation — an IFPA sustaining member of many years — operated by two hard-working friends of IFPA, Rose and Austin Green.

Their new modern facilities literally roll out the red carpet for those who enter. The building incorporates three recording rooms, three dubbing stages, a large shooting stage, beautiful and spacious office areas, and other facilities.

The first half of the program — and not nearly long enough by the consensus of everyone's opinion — was devoted to the showing of ancient films which had been discovered and restored by the

guest speaker, Kemp Niver, president of Renovare Film Company. All of the pictures shown had been filmed prior to 1900! Many were in full color!

How could this be, when color film was not available at that early date? Well, as Mr. Niver explained, they were *handpainted* — each and every frame painted by hand at one frame at a time! Many optical effects were utilized in these early films, and it is nearly unbelievable when you realize all the effects had to be created within the camera — and the camera was cranked by hand and didn't even have a footage counter.

Kemp Niver certainly put on a spectacular and amazing display. One soon realized what a great debt of gratitude the film world

(CONT'D FROM PREVIOUS PAGE)  
owes Mr. Niver and the Renovare methods of restoring these priceless and historical mementos of the earliest days of filmmaking.

The second half of the December meeting was devoted to an early viewing — while still in the rough cut stage — of a documentary film produced by Raoul Altareseo for the USIA. This was an interesting experiment on the part of Raoul to get audience reaction on a film even while it is in the editing stage. Most of those attending agreed there was still quite a bit of work to be done in polishing this "people-to-people" type documentary. A few even offered to help Raoul do this.

Earlier in the month, the Los Angeles Chapter had been invited by Dan McGovern of Edwards Air Force Base to make an all-day visit at the base on December 4th. However, "because of circumstances beyond his control", Dan had to postpone the meeting until January 15th. Tentatively scheduled for the program are an early morning tour of the base and a look at all the current aircraft under test there. Following this, there will be a lunch at the Officers Club, and then a trip to the Missile Range area for a spectacular demonstration. For those who wish to stay longer, a dinner will be served in the Officers Club at a minimal charge.

### Filming the Historic "Sea Lab" Project

#### Roy George Supervised Film Record of Aquanaut Experiments

Roy George, Treasurer of the Southern California IFPA Chapter and Chief of the Film Branch of the Naval Ordnance Test Station (NOTS), supervised the filmed recording of the recent historic Sea Lab II project.

During this project, three teams of aquanauts spent various periods of time living and carrying out experiments in a special deep-sea lab located 205 feet beneath the surface of the Pacific offshore from the Scripps Institute in La Jolla, California. Team two of the aquanauts was headed by Scott Carpenter, one of the world's first astronauts.

#### Made Three Dives in Open Bell

Roy George personally made three dives in an open diving bell to photograph the activities in the murky depths of the Scripps submarine canyon. However, accord-

ing to Roy, conditions for photography were far from ideal at such depths. Water density and color prevented adequate photo coverage of subjects larger than a man, and bottom photography by the first and second teams of aquanauts disclosed little more than an occasional fish or a tantalizing look in through one of the Sea Lab ports.

At one time, Lee Hanson — one of the NOTS cameramen — remarked: "We have been using a four-camera crew and have shot 19,000 feet of film and still not one foot will cut".

#### Light a Problem in Depths

Available light at the 200-foot depth was not sufficient to expose film rated at an ASA of 400. The only bottom coverage made required an underwater light on the camera and a great deal of per-

sistence on the part of the photographer.

One interesting side story reported by March Tamm, NOTS scriptwriter assigned to the Sea Lab II project, was a letter by the White House to please the Sea Lab via a long distance operator. When Commander Carpenter picked up the phone, his voice bore the typical effect of a pressurized helium atmosphere, of course, and sounded a deal like Donald Duck's — pitched and squeaky.

The operator, no doubt under the pressures and importance of a Presidential call, refused to complete the call, claiming no connection was not a good idea. Bond, Navy Captain of the Sea Lab staff who had been monitoring the conversation, spent several agonizing minutes attempting to explain to the operator what she was hearing was the effect of helium gas on the man voice, and it really was Commander Carpenter talking.

At this point, the operator overheard telling another operator: "Now, they're trying to tell me that Carpenter is in the chamber!"

Eventually, the operator was convinced and the call was completed, but the feeling among the Sea Lab personnel was that the President didn't understand Commander Carpenter's strange voice a bit better than the operator had — but in true Johnsonian style, he was right ahead with his congratulatory message to the aquanauts.

## Pro Football Films: Where the Action Is!

Filming of Weekly Pro Games in National Football League Takes Plenty of Skill and Split-Second Timing on Release

NO DOUBT ABOUT IT, professional football is the glamorous new in-sport of the American sports fan. Baseball may be called the national pastime, but it is football that has captured the fans' fancy. Last season, over 60 million of them paid their way through turnstiles to watch head crunching combat on the field. Even teams that figure to be season-long losers discover that they have sold all seats for every game long before the first kick-off is toed up.

Because this is so, television networks are spending large sums of money in an effort to land top football attractions for their own hookups. Networks and film producers outbid each other wildly in a scramble to air the best games in the big leagues. Even the replay value for key games has an enormous appeal.

### Films Reflect Interest of Fans

One company that is carving itself a piece of the promotional dollars being spent to saturate TV channels with flying footballs is National Football League Films Inc. (formerly Blair Films of Philadelphia). NFL Films makes an excellent thermometer with which to judge the rising fever of interest in pro football.

Four years ago the company didn't even exist. Its head man, Ed Sabol, was a retired businessman making scouting films for his son's prep school as a hobby.

Today NFL films is a booming

business, capitalizing on the American public's apparently insatiable appetite for its favorite sport. It has offices in two major cities (Philadelphia and New York), and teams of cameramen in every national football league city from coast to coast.

Its job: photographing every play in every game on every Sunday afternoon in color, in each city, then processing, editing, scripting, and producing a 30-minute color film for each game. The color films are delivered to TV stations in each national league city no later than the Wednesday night after the Sunday game, and in some instances, in time for Tuesday night showing.

### Reels Must Get There on Time

The physical logistics for photographing, processing, and returning finished films on schedule, are a lot more complicated than anything a pro quarterback ever cooked up to move a football across a goal line.

To get the job done, split second timing and close cooperation are an absolute must. The fact that it is done successfully can be attributed to an integrated effort by all hands at NFL films, the staff of Byron Motion Pictures in Washington, D.C. (the outfit responsible for printing), and the Eastman Kodak Color processing plant in Washington, D.C. where incoming footage is developed.

While NFL films may be head-

quartered in Philadelphia and New York, after the final whistles blow on Sunday afternoon, it is Washington, D.C. that becomes the focal point of activity. All the processing action is concentrated in the nation's capital. This is not a whim choice. Since all NFL films are winged in by air to one central processing location, it is essential that the area be open to air traffic. Washington, D.C. has the best record for not closing down its airport because of weather conditions of any city on the eastern seaboard. It was selected for that reason.

### Negative Moves to Lab by Air

As soon as each game is over, stand-by messengers rush canisters of film shot by NFL's teams of cameramen, plus written play descriptions to the airports in their respective cities. At Washington, other messengers are waiting at the two D.C. airports to pick up the film and paperwork the second it arrives and deliver it to the Eastman Kodak color developing laboratory.

From that point on, each film is shuttled back and forth between the color lab on Oakie Street and the Byron Motion Picture plant in Georgetown, where it is edited. First, the 2,000-some odd feet shot during the game is processed by the Kodak lab and then edited down to 900 feet at the Byron plant. This is timed, and returned to the color lab for printing. The film is then rushed back across town to Byron for final editing and then is zipped on out to the airport for shipment.

It's a wild time because all the game films have to be processed and out again within 48 hours, but it's all part of the job for NFL Films, a company that has gone

Ed Sabol (right, in hood) is directing filming of National League Football action at a championship game between Giants and Packers.

from amateur to professional time professional, in 20 years.

### Ed Sabol Launched

The driving force at NFL is Ed Sabol, the producer and founder, who nursed through the days when known as Blair Films, a man who "Had It Made" couldn't stand it. At that Sabol sold a successful manufacturing business, tired with a lucrative life a life of leisure. He found out that he and were not cut out for each other.

Restlessly seeking something to do, Sabol turned to his hobby: photography. He had a cellar full of equipment and equipment: cameras, timing machinery.

More to keep himself occupied than anything else, Sabol started a small motion picture business called Blair Films Inc. He used to travelogues and nature films. As it stepped up its activity, Blair Films turned to making pictures for Howard Hughes' Bahama Development and Piper Aircraft.

At the same time, Sabol had always had an interest in football, began to shoot color films for the prep school team he played on. This was primarily for his own amusement. He got good results that he started off from other prep schools.

### Winning Bid on Championship

The big breakthrough came, however, when Sabol made the motion picture rights to the National Football League Championship Game were up for sale. Having picked up considerable know-how on physical football games during his work with prep schools, Sabol made a bid.

As it turned out, the high bidder for the rights ended up with the contract. With the contract in hand Sabol then sold Blair and Company, a cigarette manufacturer, on the idea of producing and distributing the films for public relations purposes. He set

## 2,000 Mile Journey Through New England

Colorful Panorama Along "Heritage Trail" Captures Scenic and Historical Sights of Interest to Millions of Viewers

NEW ENGLAND'S HERITAGE TRAIL, which was conceived in 1960 by a group of New England civic associations with the approval of state development commissioners, is the subject of a new film sponsored by the New England Mutual Life Insurance Company, of Boston.

Premiered at the Johnny Victor Theatre in New York last month, *The New England Heritage Trail* was introduced by James B. McIntosh, executive vice-president of New England Life, and by James B. Roberts, vice-president.

#### Anticipate 60 Million Viewers

It is estimated that the film, which cost \$50,000 to produce, will be seen by some 60 million people.

"We decided to sponsor this picture," Mr. McIntosh said, "when we learned no film depicting America's first heritage trail existed. We believe the trail is important to New England economically and historically and that a film which tells its story will be of genuine interest to people everywhere."

#### From Skiers to Stone Cutters

From skiing to sky diving, from sailing to stone cutting, the 28-1/2 minute color film covers the traditional and unusual sights along the highway trail's 2,000-mile length.

The enigmatic Mystery Hill Caves at North Salem, N.H., which may antedate Columbus by 4,000 years, receive detailed treatment.

Paul Revere's birthplace, Daniel Webster's home and its massive Witches' Elm, the U.S.F. Constitution, and the Mystic Seaport are among other important places visited. A montage of area colleges appears, as does a series show-

Minute Man statue at Lexington seen in film of "Heritage Trail."

ing each state capitol. There is skiing at Stowe, Vt., and stone cutting in Barre and Proctor; spectacular aerial views of Rhode Island and its coastline; granite quarrying in Frankfort, Maine and memorable scenes of Casco Bay.

The lakes, seacoasts, hills, meadows, and valleys of the six-state region are pictured flowingly in the richly colored wardrobes of the four seasons.

#### A Pair of Lovely Young Eyes

The principal character in the film is Wendy Packer, an 11-year old actress from Hazardville, Conn. She plays "Barbara Anne", a child who takes an imaginary trip along the trail accompanied

Young Wendy Packer guides viewers on New England Heritage Trail.

by "Deming Jarves," early 19th century manufacturer of Cape Cod's cherished Sandwich glass.

Production of the film began 15 months ago at the studios of Bay State Film Productions, Inc., in Springfield, Mass. Ed Knowlton of Charlton City, Mass., wrote the script. Camera crews logged 6,000 ground miles and 750 miles in the air during shooting. More than 10,000 feet of color film were

James B. Roberts, vice-president of New England Mutual Life Insurance, was one of hosts in N. Y.

James B. McIntosh (l), of New England Mutual Life Insurance Co. and David Doyle, Bay State Film Productions, the producer.

shot. Of these, 1,026 feet are used in the completed film.

#### 52 Million Saw Previous Film

New England Life officials say a 60 million estimated audience for the new film is based on the company's previous successful film, *New England Portrait*, which has been seen by 52,000,000 people since its release in 1956. *New England Portrait* is still in circulation, still much in demand, and was recently selected by American Airlines for showing on Astrovision on jet airlines.

*The New England Heritage Trail* is now available throughout the country from Association Films, Inc., which was also the distributor of the earlier New England Life film.

\* \* \*

#### "Follow the Gulls" Over a New Scenic Chesapeake Bay Route

*Follow the Gulls*, a newly-released color film, features a trip across Chesapeake Bay, from eastern Virginia to the southern Virginia mainland, via the new bridge-tunnel. The 13-minute motion picture is available for free-loan use to TV stations, high schools, colleges and adult groups east of the Mississippi through the national distribution centers of Association Films, Inc. It is presented by the Chesapeake Bay Bridge and Tunnel District.

*Follow the Gulls* highlights the construction of the 18-mile complex with its twelve miles of low-level concrete trestle, two one-mile tunnels, two steel bridges and four man-made islands. It shows how this new route affords travelers a variety of sight-seeing opportunities along the way including views of Hampton Roads Harbor and the ports of the upper bay.

Scenes from Williamsburg, Jamestown and Virginia Beach, the southern terminus of the bridge-tunnel, are also featured. •

## Fighting Heavy Toll of Off-Duty Accidents

New York Telephone Company Sponsors "Safe or Sorry" to Meet Problem of Job Absence Through Off-Duty Accidents

**A**BSENCE FROM THE JOB is a universal problem for industry. For the New York Telephone Company it represents an annual cost of more than 11 million dollars. Five to six percent of the total absence is caused by off-duty accidents.

To meet the problem, the company has recently formed a centralized company-wide absence control program and is distributing internally a series of films which are designed to help curb absences. A recent motion picture in this series, *Safe or Sorry*, is aimed at the important problem of off-duty accidents.

### Job Safety Gets Attention

As the film points out, thousands of man hours are expended each year in writing about safety . . . slogans, bulletins, booklets, talking it up at group meetings . . . all in an effort to prevent accidents *on the job*.

"But it's usually not until we see our own blood on the highway and spend a few uncomfortable weeks in the hospital that most of us begin to think about *off the job* safety awareness as our own very personal problem," the film says.

### Leader in Industrial Safety

On the job safety awareness is built into practically everything an employee does in the telephone company. The Bell System has traditionally been a leader in industrial safety records. But employees sometimes lose this attitude when they step out into the

wide world of free-time carefree living.

*Safe or Sorry's* content is based on actual occurrences of accidents, and these are stressed in proportion to their actual incidence in the records. The film concentrates mostly on the causes of such common accidents as the natural hazards of home — ladder falls, back strain, burns, etc. — and the equally serious problem of auto injuries. It is basically an animated motion picture with some live action clips taken from Bell System safety films.

### Major Investment in Showings

*Safe or Sorry*, which was produced by Gotham Film Productions, Inc., New York, is being shown to all company employees at in-plant screenings. The importance of these showings to the company can be realized from the fact that over 25,000 man-hours will be invested in employee attendance at the showings. The film is being well received in the company. Interest is also being evidenced throughout the Bell System — and even in some other industries.

Since the absence control program and the film series has been in effect, there has been a marked improvement in the company's absence record. It has now dropped — in *countable daily absences* — from 3.3 percent of scheduled work days to slightly over 2.7 percent. At a company cost of \$400,000 for each tenth of one percent, it can be seen that there has been

a considerable monetary saving. But more than this — it has been instrumental in saving New York

Telephone Company people a great deal of human suffering.

## Love Makes the Long Distance Phone

Film Encourages Better Handling of Non-Business

**P**EOPLE MAKE LONG DISTANCE CALLS mainly because they want or need to speak to their loved ones.

This is the simple basic theme of a new Bell System film, *The Next Best Thing to Being There*, now being used within the system to encourage more effective handling of non-business long distance calls. It is based on the results of a survey conducted by American Telephone & Telegraph Company which can be summed up as "the telephone cord has replaced the umbilical cord."

### Covers Basic Points in Survey

The film, produced by Film Graphics, Inc., New York, and written by William Bernal, presents in dramatic, graphic amusing animation, the basic points contained in the long distance Residence Market Survey. To dramatize the points and give the film unity, the story is presented through one typical family unit and its adventures in growing up, growing apart (geographically), and keeping in touch.

The film shows that the United States is a family-oriented nation. The basic unit of the family is, and always has been, a prime ingredient of the culture. However, modern times have changed radically the structure of this family unit, and because of the change, the long distance telephone line is one very important way the family maintains its unity — "by keeping in touch."

### Much More Than a Convenience

The picture also says that long distance lines are a convenience, but a great deal more. Users have

Aunt Sophie is off on a long trip abroad—but she keeps with the family at home

stated that such calls are as good as a visit, "a better than a letter", a showing love and affection in a way of offering consolation, encouragement, friendship.

It is natural that emotional underlying cause of the make a long distance call understand this may help to company personnel handle distance calls give better and to derive more satisfaction from their own jobs.

Buzz is stationed at an air base but the phone brings home

## Job Corps' Girls Learn Dental Hygiene

**H**OW DO YOU TELL 17 to 21 year-old girls, who may never have done so before, to brush their teeth? That's one of the questions they've been asking at the all-girl Job Corps Center in Charleston, West Virginia.

The answer to this particular question is forthcoming. FilmFair Communications, Santa Barbara, California, has just finished production of a 25-minute programmed instruction course on

dental hygiene.

The program was developed by Packard Bell Electronics, a division of the center, for use on the AVR-1 Training Console, a console, which is designed for auto-instruction, uses 35mm slides which are advanced by audible beeps on an accompanying narration tape.

Telling the girls how to brush their teeth was the primary purpose of the program.

**SLIDE-TO-SLIDE  
DISSOLVING  
UNIT  
WITH BUILT-IN  
SOUND  
SYNCHRONIZATION**

Creates a new automatic 'dissolve' projection system with the flexibility and quality of 2x2 slides plus the action and effectiveness of sound motion pictures — using existing equipment

The HPI Control-A-Show is a new and highly effective tool for use in sales, advertising, training, teaching, progress reports, time lapse projection, animation, displays and similar applications in business, educational, scientific and governmental fields

The compact, easy-to-use HPI Control-A-Show is the first one package unit to offer this exclusive combination of features

- It will dissolve the image of one slide projector into the image of another projector — smoothly and automatically, without continuity-disturbing black intervals or white flashes
- It will synchronize sound from a stereo tape recorder with the dissolving image changes from two automatic projectors
- It can be used manually, or remotely without a tape recorder for "live" commentary operation
- It will program synchronizing signals on the tape with its built-in signal generator

BUSINESS SCREEN MAGAZINE

7064 Sheridan Road, Chicago, Illinois 60626

(CONT'D FROM PREVIOUS PAGE)  
capturing and holding the interest of a group of girls with divergent backgrounds and educational levels was the problem. The solution is found in the theme which is woven throughout the instructional material: bad teeth can bring personal unhappiness.

By using live-action photos to highlight affairs of the heart the production hopes to involve the girls in something which is already foremost in their minds. Even the casting was done with the idea of using talent with whom the girls could identify. And the narration, which at times presents very elementary material, was handled with extreme care lest it sound condescending.

Although it's too early to judge the success of the program it should be noted that everyone involved in the production now rinses his mouth out with water after having a between-meals snack.

### "Good Old Days" of Air Travel Are Re-Lived in "Fly American"

☆ In this jet-age of air travel, there's a rich vein of nostalgic interest and inevitable comparison which has been tapped by American Airlines with the recent release of an original 1933 travel film that is showing viewers what it was like to fly from Chicago to New York on one of the company's twin-engine Curtiss Condor biplanes in the good old days.

Community organizations and television stations alike have responded with heavy print requests for the picture through its distributor, Association Films.

The 20-minute film, *Fly American*, which might be described as "high" (or airborne) camp had been out of distribution for more than 30 years, until the original negative was recently discovered in American Airline's film vaults. A test print was made and it was decided that the film should be re-issued because it shows so dramatically the tremendous strides commercial aviation has made in only three decades.

Audiences will find the film an amusing and nostalgic "Grand Hotel" of the air, with a most diverse cast of characters: a little old lady on her first plane trip, a movie star who travels as she lives, "among the stars" and an anxious father racing the stork. A highlight of the film shows the "great winged bird" outdistancing a train far below.

At the time the film was made

American Airlines w  
American Airways. Th  
presentation title and

**ON HOME OWNERSHIP:**

(FROM THE PRECEDING PAGE 39)

Major reasons behind the progress of home ownership with some emphasis on the role of savings and loan associations made in making this progress. Probably many of our own people, who are in their day-to-day activities, do not realize that our business has become a financial catalyst in a dramatic way in American life.

The program is divided into three parts: the first covers the reforms enacted as a result of the passage of the 1930's; the second reviews the post-war real estate market; the third phase expresses the hope—that the progress of home ownership in the United States may be matched in other countries abroad by the savings and loan idea.

Why this film is unusual in several respects is certainly the first time anyone has ever set down on film the chain of events that have produced the recent great American home ownership. It is significant that three of the highest-ranking officials in our national government participate: Chairman Patman introduces the program on depression reforms; Senator Goldwater introduces the section of the film on the start of the post-war housing program; the film is climaxed by Vice President Nixon's appearance.

The film was produced for the American Home Ownership Campaign by the David L. Wolper Organization. This organization, which created the award-winning documentary, *The Making of a President*, 1960 and which presented a sequel to the campaign just a month ago.

**Associations to Promote Showings**

For showing by the League's members to service and church groups and schools, prints of the new picture are available for outright purchase or rental. It is accompanied by an excellent promotional kit, containing a synopsis, introductory remarks for local showings, a release and an order form. It was introduced last November at the 73rd Convention of the League and drew enthusiastic applause from the entire assembly. •

S. Dean Peterson, president of Canadian producers' group, signs pact with Richard Ballentine, president of Directors Guild of Canada. Standing (l to r): Arthur Chetwynd, chairman of Labor Relations group; George Gorman, Gerald Churney, DGC.

### Canadian Directors and Producers Collective Pact Is Now In Effect

The Directors Guild of Canada has announced the signing of the first Collective Agreement with producers in that country, covering the employment of freelance directors. The pact was negotiated between the DGC and the Association of Motion Picture Producers and Laboratories of Canada and went into effect January 1, 1966.

The agreement establishes minimum rates and working conditions as well as defining the creative rights of the director and will embrace all specialists in that category working on a free lance basis in the Canadian film industry. First producers to sign the agreement were Peterson Productions Limited and Chetwynd Films Limited. The Guild was formed in 1962 and at present has some 60 members.

### Priority Color Film Processing Introduced by Bebell & Bebell

30-minute dry-to-dry professional 16mm and 35mm Anscochrome cine priority processing has been introduced in New York by Bebell & Bebell Color Laboratories, Inc.

According to Norman Lars Bebell, new designs of equipment and formulation of chemicals has now brought professional cine color processing to a nominal rate of one half hour, dry-to-dry . . . down to the speed of b/w processing.

This new concept makes available a practically instantaneous sound or silent film color processing service ideal for use in TV spot news programming. (The Bebell lab is processing daily for a major network and its affiliates.)

Additionally, half-hour dry-to-

dry processing is finding application in test TV commercials, color work prints, color answer prints, color timed prints, sports color photography, engineering and data color photography, specialized medical color cinematography, high-speed color duplicates, in addition to general motion picture production.

### Kim & Gifford Conduct Film Seminars for New York Agency

At the request of the Sullivan, Stauffer, Colwell & Bayles agency, Paul Kim and Lew Gifford, New York film producers, have recently conducted a special night course for the agency's creative television department. The ten-week course explored methods for creating ideas, techniques in experimental film for client presentations.

When "Point of View" began Broadway run (see page 35), principals on hand were (l to r): Milton Robertson, director, Radio-TV-Film, NTA; Dr. James Perkins, managing director, NTA; Emerson Foote, chairman, Nat'l. Interagency Council on Smoking & Health; and Sol Lifson of NTA.

## PREMIERE "POINT OF VIEW"

National Audio-Visual Association presented "Talk Is Not Enough" Second Annual Audiovisual Institute for American Society for Development held at Indiana University last fall. Three-screen production was continuing coast-to-coast showings in early months.

### Eddie Paul, Film Musician, Is Accepting Free Lance Subjects

Edward (Eddie) Paul, who has composed, conducted, scored and laid tracks for hundreds of motion pictures in the factual film field, is now available for free lance work. Long known for his work on Jerry Fairbanks Productions and (for the past 15 years) for the music in AT&T films, he is now at liberty to accept assignments.

A graduate of the Julliard School of Music in New York City, Paul was music director for the Roxy, New York and Paramount Theaters in that center. A member of the Motion Picture

Academy, Television Academy and ASCAP, his wide "sensitivity and good taste" with vast technical knowledge according to one long-time Vince Hunter of the Pacific Railroad.

Paul is located at 4440 Lomond Place, Hollywood.

### Hollywood Valley Film Lab Equipped for Super-8

A new Research Photographic printer, providing Super-8mm capability in the area, has been installed at Hollywood Valley Film Laboratory, bank, Calif. The new printer handles 16 and 35mm on the projector side; 8 and Super-8 on the camera side.

According to lab manager Frith, the printer is operated by punched tape to make masks and other effects. Other features include exposure control (made with neutral density probes, on the original Super-8) and expanding the Super-8 contact printer is being handled by Peterson Motion Picture Co.

NEWS OF STAFF APPOINTMENTS AND A-V INDUSTRY DEVELOPMENTS

Sam C. Gale, Jr.

## Sam Gale to Direct Sales of Capital's New Miami-Based Lab

Sam C. Gale, Jr., has been named sales manager of the Miami-based laboratory of Capital Film Laboratories, Inc., which is headquartered in Washington, D. C. He will continue in his present capacity as a sales executive in the nation's capitol, responsible for new business, advertising and sales promotion.

Capital president Alfred E. Bruch noted that Gale was "mainly instrumental in developing the Miami subsidiary concept." The company's third-of-a-million dollar facility in that area will be the only laboratory in the Southeast offering 35mm color overnight "daily" film processing service to producers in Florida, the Caribbean and Latin America.

Prior to joining Capital in 1963, Gale was a writer and director of motion pictures for General Electric's Missile and Armament Department, Burlington, Vermont. He holds a degree in advertising from the University of Minnesota. The company's new branch is at 1998 N. E. 150th Street, North Miami.

## Leonard Hirschfield at MPO

Cameraman-Director Leonard Hirschfield has joined the staff at MPO Videotronics Inc., New York. He is noted for his work as director of photography for the feature, *David and Lisa*, as well as on many award-winning TV Commercials.

Mr. Hirschfield will be available to direct and photograph commercials and industrial films at MPO. Prior to joining MPO he was a vice-president at VPI. His early film experience includes a B.A. in Cinema at the University of Southern California and free-lance directing, cinematography, editing and writing.

## W. R. Lane to Direct Advertising of Technicolor's Com'l Division

William R. Lane has been named advertising and sales promotion manager of the Commercial and Educational Division, Technicolor Corporation. His appointment was confirmed last month by Robert Krieman, general manager of the Division.

Lane joins the Costa Mesa-based organization after wide experience in the film production field. He has handled production work for such Technicolor producer-dealers as Fred A. Niles Communication Centers, Inc. and Parthenon Pictures, in Hollywood. He was an assistant production manager at Subscription TV, Inc. and also headed Lane Films, where he specialized in a-v presentations for government contractors.

"Mr. Lane's background and experience in the audiovisual and film production field fit perfectly with our expansion plans for the Commercial and Educational Division," noted Krieman. A graduate of the University of Southern California, Lane is married and makes his home in Torrance.

## Ernst Lutz Now Eastern Sales Rep for Association Films, Inc.

☆ Ernst Lutz, formerly an account executive with Trans-World Airlines, has joined Association Films as their eastern sales representative. He will work in New York state and New England.

Prior to TWA, Mr. Lutz was an account supervisor with Advertising Radio and TV Services,

Ernst Lutz: at Association Films

Inc. and account executive and branch manager with a motion picture distribution company. Mr. Lutz has also been employed by

Kenyon & Eckhardt and McCann Erickson advertising agencies.

In addition to sales, he will service sponsored film accounts and contact television stations for placement of sponsored films on sustaining time periods.

## Wilding Names George Zenner Vice-President for Finance

The appointment of George Zenner as vice-president, finance, at Wilding, Inc., has been announced by president Robert C. Ausbeck. He was previously fi-

George Zenner: to Wilding, Inc.

financial vice-president and a member of the board of directors at the E. F. MacDonald Company, Dayton, Ohio.

Zenner received his degree from the School of Commerce, Loyola University, Chicago and was affiliated with the Chicago accounting firm of Alexander Grant & Co. before joining the MacDonald organization.

## Sheldon Berman to Manage Sales for Score Productions, New York

Score Productions, Inc., New York, packager of music for films and television, has appointed Sheldon Berman its sales manager for East Coast operations. Mr. Berman was formerly with the William Morris Agency.

Score is currently producing original music for 33 network shows a week, in addition to producing the music for the United Artists' release, *The Group*.

## Rosenthal Names Segal a V.P.

Stephen J. Segal has been elected vice-president of Rosenthal Productions Inc., New York. He will have control of the commercial and industrial production in the company.

## Joseph Liebich Head of Sales for Association Films

Association Films Inc. announced the appointment of Joseph Liebich as midwest sales manager with offices in the Building, Chicago. He was formerly manager of the company's East Central Area in Oakmont, Pa., joined Association Films in 1963.

Robert Imlach, operating manager of the Central Area, change in LaGrange, named manager of the office, succeeding Mr. Imlach has been with the company over five years.

## Stephen Rose Joins Film Group at Goldsholl Design

Film designer and producer Stephen T. Rose, WNDT-TV (Channel 3) in New York City has joined the group at Morton Goldsholl Design Associates, Northbrook, Illinois.

Rose organized the design department at Channel 3, designed show opening titles, other features for the station. He was also associated with WNDT-TV, commercial photography in Manhattan, and is a member of the Rhode Island School of Design.

## H. R. Henke, Formerly a Vice-President at Paulmar, Inc., Now at Illinois

☆ Paulmar, Inc., Northbrook, Illinois has acquired the services of Harry R. Henke, manager of International Sales Group of IT&T industrial division. He will serve as vice-president of the autonomous film inspection and development machine firm.

## Dwan to Mehring Productions

☆ Robert E. Dwan, producer-director, has joined Mehring Productions in Los Angeles. Dwan recently returned from England where he produced a television series for the BBC. He is a former producer-director for Groucho Marx in the "You Bet Your Life" series and has also directed television commercials for numerous national accounts.

## J. J. Bernstein, Dick Bernstein Join Staff of the Film-Makers, Inc.

35mm Filmstrip Previewer Sr.

**Previewer Sr. Projects 35mm Filmstrips on Built-In Screen**

The 7 x 9-inch rear view screen of this improved 35mm filmstrip projector pops into position when the case cover is lifted. The Previewer Sr., recently introduced by Viewlex, Inc., is self-threading, accepting 35mm strips into a lip on top of the unit. From then on it is advanced by a click-stop knob set on the left of the body.

This manually-operated desk top projector will handle images in ordinary room light. Other features include a screen tilting device to allow head-on viewing; an isolated storage compartment to house cord set and filmstrips. All internal parts are of rust-proof, heavy-gauge steel but weight of unit is only five and one-half pounds. Priced at \$62.00 list; write the New Products Desk @ BUSINESS SCREEN to receive manufacturer's literature.

\* \* \*

**Paulmar, Inc. Announces a New 16mm Film Cleaning Machine**

Paulmar, Inc., makers of automatic 16mm film inspection equipment, have announced a new 16mm film cleaning machine which washes, dries and conditions film "with complete safety."

This "Clean-a-Matic 500" machine is self-powered, accommodates 16mm reels up to 2,000-foot capacity. In the washing chamber, filter film cleaner and conditioner material from two nozzles flood each side of the film; soft rotating optical brushes "scrub" the film. A replaceable filter insures that

Paulmar's "Clean-a-Matic 500"

NEW PRODUCTS & ACCESSORIES FOR PRODUCTION AND PROJECTION

only clean, filtered liquid is recirculated to film washing chamber by the pump.

The operation continues in a forced-air drying chamber. A flexible duct and fitting for exhausting air and fumes from the drying chamber to outside is part of the installation.

Write our New Products Desk, BUSINESS SCREEN, 7064 Sheridan Rd., Chicago, Ill. 60626 for detailed literature and price.

**HPI's "Pro-Splicer" Helps to Keep Films Working in Field**

Today's greatly-increased use of both 8mm and 16mm films in the field often requires immediate availability of a desk-top film splicer to keep the show on the road. Hudson Photographic Industries meet that need with a line of "Quick Splice" splicers. The mod-

HPI's Handy "Pro-Splicer"

el pictured here is the company's 8 and 16mm Pro Splicer, made with special cutting blades for use with Cronar base films.

This butt splicer enables anyone to make a professional splice on any film, Cronar or acetate, with-

out scraping, liquids or heat. In operation, film ends are automatically aligned by registration pins, then cut exactly between frames with a simple motion of the splicer's cutting blades. Film ends are held in contact, not overlapping, so that Quik Splice tape can be applied. Tape is made of optically clear Mylar backed with a pressure sensitive adhesive designed to bond to all film bases. This material is supplied in a professional dispenser pack as a key accessory to the splicer.

Splicer is \$19.50 list; tape packs are \$5.00. Contact your dealer or write A. V. Industrial Products Division, Hudson Photographic Industries, Inc., Irvington-on-Hudson, New York for nearest source.

\* \* \*

**ColorTran Announces Line of Variable, Fixed-Focus Broads**

A full line of variable and fixed-focus broads capable of meeting any motion picture or TV studio lighting problem requiring this type of lighting is now available from Color Tran Industries. Exclusive focusing capabilities are noted as a key feature. The maker says this line permits wider coverage and more lumens-per-watt.

ColorTran focusing broads are available in two model types: the Variable Broad and the Multi-Broad. Both are variable-beam single broads, using 3200-degree K quartz-iodine lamps operating from 120 or 230 volts AC or DC. They maintain constant intensity and are particularly adaptable for color work requiring constant temperatures.

Write the New Products Desk for literature.

Genarco 3,000-Watt Projector

**Electric Changer on New 3,000-Watt Slide Projector**

A new 3000 watt slide projector with an automatic changing system is now marketed by Genarco, Inc., Jamaica, N.Y.

The projector has been designed especially for use by large groups. The 3000 watt power allows the projection of a 6000 lumen image on a 48" size screen by front projection. The reversible slide changer is designed to allow the training director to come back to a projected slide to emphasize a point, or to advance to the next slide from the audience.

The price of the SM-6000 is approximately \$1900. Contact the projection lens at Genarco, Inc.

**RUSSIA NARROWS FILM GAP:**  
 (CONTINUED FROM THE PRECEDING PAGE 57)  
 set design, art direction, musical scoring, editing and photography is covered by a wide range of courses.

The U. S. film industry lacks comparable training facilities and curricula in the motion picture and television sciences and this should be the basis of a crash program, Jeffee believes.

"If we ignore the film equipment 'sputniks' that our delegation saw and do not rise above the lethargy that surrounds our own research and training plans, American initiative will be overshadowed by dramatic developments abroad."

**\$25,000 Grant to SMPTE Scholarships**

Jeffee is not only talking about the need for training programs; he is doing something about it. On his return from the USSR, Movielab made the first contribution of \$25,000 to launch the scholarship program of the Society of Motion Picture and Television Engineers (SMPTE) for undergraduate degree programs in the photographic and television sciences. Additional contributions are expected in the near future to broaden this SMPTE educational program. First college selected is Rochester Institute of Technology. Other universities are now being considered.

The Movielab executive also referred to a program now under way in New York City in which he is taking a leading role to formulate vocational school programs for the primary training of film handlers and for upgrading low level technicians during the course of their employment. Discussions have already been held with the New York City Board of Education and the state's Office of Manpower Development operating in conjunction with the federal government.

**Charts Courses for Expanding U.S. Effort**

"There is nothing wrong with our educational system and its capacity to produce results in competition with totalitarian methods once the wheels are set in motion and a direction is charted particularly with the federal, state and local governments evidencing a readiness to participate in such programs," Jeffee stated.

Additional ways of intensifying U. S. development and research programs were enumerated by Jeffee. He suggested that a portion of the federal funds earmarked for the establishment of an American Film Institute be allocated to technical research projects in film and television sciences. The SMPTE would be a logical organization through which to funnel this project, he added.

Urging all branches of the industry to further the effort, Jeffee stated that the unions were in a unique position to get behind the concept by actively participating in the technical training programs and by helping actively in the preparation of technical curricula. He also referred to the positive benefits derived from the all-industry Motion Picture Research Council prematurely shelved because of discontinued financial support. The Movielab president concluded with a recommendation for reactivation of an all-industry research project on a national basis through the SMPTE as a step in the right direction toward national progress.

## PRO FOOTBALL FILM

(CONTINUED FROM PAGE 62)ments on the field, and other was roaming the stands capturing fan reactions. Various production crew kept in contact with each other by walky-talky radios.

With success like that, Blair Films had no trouble winning the contract to film the following year's championship. It was equally successful the time Sabol and his company making a reputation for around the league. When it time for the League to hire a company to handle its films, by *Play Report*, the Sabol Films was in the driver's seat.

Blair did so well at it in 1964, that this year, the League bought out the company, switched its name to National Football League, and gave its full support to president Sabol.

### Banks Sponsor a New Film

Success during the 1964 league season has put National Football League in a position to turn out the promotional football film. Now the company has produced a picture called *How to Watch Pro Football*, which is being shown in 48 states. The film is a composite of 65 plays featuring the team in the league. 67 camera feet utilizing arrows, close-ups, lines appear in the program. The film is also appearing on television, just one more step in the career of the home movie who built a company whose picture as big as pro football's.

Two "Chemistry at Work" Are Offered by Association  
The *Electrolysis of Vine* and *Commercial Production of Vine*, the first two films in the series. *Chemistry at Work* is available for free-loan to colleges, adult and industrial organizations. They are presented in public service by Pittsburgh Glass Company, and are distributed by Association Films.

The *Electrolysis of Bromine* (minutes color) shows a classroom demonstration of a massive commercial application of the same basic process. *Commercial Production of Chlorine* (minutes, color) features the commercial manufacture of bromine from the extraction of bromine from the earth through the electrolysis process. Other films will

**Screen Directors Guild Issues a New "Directory of Directors"**

The 1965-66 "Directory of Directors," published by the Screen Directors International Guild, 250 W. 57th St., New York, N. Y. 10019, lists more than 600 members of that organization. Directors listed in detail (with credits) serve every type of screen presentation, including feature motion pictures and television shows to documentary, business films and television commercials.

The Directory also lists associates on the set: assistant directors and production assistants, script supervisors and production secretaries. It includes a summary of the current SDIG Basic Agreement (effective until March 7, 1966) and an expanded list of Guild Area Representatives.

Write, on your company or studio letterhead to the Guild office above for a free copy.

**52-Page Modern Catalog Lists Over 300 Free Loan Pictures**

More than 300 16mm sound motion pictures, many of them in color, are described in the current 52-page catalog of Modern Talking Picture Service, Inc. A section on "How to Plan Your Film Program" gives valuable aid to groups served by this nationwide distributor of sponsored films. All are available on a free-loan basis.

Copies of the catalog, "A Wonderful World of Informative Entertainment" are available on letterhead request from Ralph Del Coro, Modern Talking Picture Service, Inc., 1212 Avenue of the Americas, New York, N. Y. 10036.

\* \* \*

**Genarco Catalog #406 Covers Slide Projectors and Changers**

A new audiovisual equipment catalog (#406) describes the line of 3,000-watt slide projectors and electric slide changers for 3 1/4" x 4" slides available from Genarco, Inc., Jamaica, N. Y. 11435.

Among the new items described is a reversible electric slide changer which accepts glass-mounted slides and Polaroid transparencies in plastic mounts. It is the only slide changer for this size image which operates forward or in reverse by push-button remote control.

Write the manufacturer for a free copy on your company letterhead, mentioning BUSINESS SCREEN as the source.

\* \* \*

**Brochure Describes Arriflex 35 2C Professional Cameras**

A new 12-page illustrated color brochure on the Arriflex-35 2C line of professional motion picture cameras and related accessories is available from the Arriflex Corporation of America.

Detailed data on the various Arri-35 2C models and full specifications is provided, including the 35mm blimp program and accessories. Available on letterhead request from: the Arriflex Corp. of America, 25-20 Brooklyn-Queens Expressway West, Woodside, New York 11377. Mention BUSINESS SCREEN as the source.

\* \* \*

**Fairehild Users' Bulletin on "8mm Sound Film Production"**

A new audiovisual users' bulletin on the "Production of 8mm Sound Films" is available from Fairehild Industrial Products, a

division of Fairehild Instrument Corporation

It includes specific recommended printing and laboratory facilities for professional results. Address request (on firm letterhead) to director of communications and services, Fairehild Industrial Products, 221 Fairview Ave., Plainview, N. Y. 11803.

\* \* \*

**"Free Film News" Available from Sterling Movies**

If you haven't already received one, copies of the fall "Free Film News" listing of current sponsored motion pictures available from Sterling Movies, U.S.A. are available from the company.

The pictorial catalog lists loan 16mm sound films in categories such as sports and nature, investing, health, science, travel. Bookings, handled by an automated system, are accepted far into the future as they are desired. Letterhead requests should be sent to Sterling's New York headquarters at 43 West 57th Street, New York, N. Y. 10019.

\* \* \*

**United World Films' Bulletin on Custom Film Distribution**

A deluxe-size, informative brochure titled "How Custom Film Distribution Can Improve Your Public Information Film Program" offered by United World Films, Inc. to eligible film sponsors, address letterhead requests to vice-president John D. Esposito, 221 Park Avenue South, New York, N. Y. 10003 for a free copy.

\* \* \*

**Ozalid's Sensitized Materials Described in a 28-Page Catalog**

A new 28-page catalog describing Ozalid sensitized reproduction materials has just been released by General Aniline & Film Corporation, manufacturer of various repro products.

The catalog gives complete information on the company's line of Ozalid dry diazo materials as opaque papers, cards, intermediate papers, cloth, and special purpose products. It also lists afaz moist diazo materials, thermal diazo papers, and various papers, lithographic products, and the GAF-Microline microfilm micro-image products.

A free copy of the catalog can be obtained from the United World Service Department, General Aniline & Film Corporation, 100 Hamilton, New York.

# 5th Annual Production Review

The Complete 1966 Buyer's Guide  
and Film/Tape Reference Bluebook  
to Qualified Producers  
of Business and Television Films

Number 1 • Volume 27 • Two Dollars

# We had a head-start, of course

We've been active in the motion picture business since it was a flicker in Thomas Edison's eye. Since 1889. That was the year Edison invented the motion picture camera and that was the year Eastman introduced transparent roll film on a flexible base.

We got started before anybody else. We intended—right from the start—to stay ahead. Our research chemists perfected the first positive motion picture film and the first non-flammable film. Since 1928 their experiments in color photography have led to the continuous introduction of new color films and processes.

Eastman offers you complete color film systems, complete black-and-white film systems. The widest range of

films for the widest variety of shooting conditions. Films of the highest acutance, lowest granularity, truest fidelity to their subjects. Films of the most consistent uniformity from roll to roll. And Eastman backs up every roll with unmatched engineering service.

Everything considered, doesn't it make good sense to stick with Eastman—right from the start?

## EASTMAN KODAK COMPANY

ATLANTA: 5115 Peachtree Industrial Blvd., Chamblee, Ga. 30005, J4-GL 7-5211 CHICAGO: 130 E. Randolph Dr., 60601, 312-236-7234 DA-AS-6100 Cedar Springs Rd., 75215, 214-FL 1-3221 HOLLYWOOD: 6677 Santa Monica Blvd., 90038, 213-464-6111 NEW YORK: 200 Park Avenue, 017-212 MU 7-7080

FROM TECHNICOLOR CORPORATION,  
WORLD'S FIRST CARTRIDGE-LOADING  
MOVIE PROJECTOR FOR SUPER 8 FILM

# NEW SUPER 8

*Super 510 Projector — only \$87.50*

Now, movies that present your story **BIGGER, BRIGHTER, SHARPER**, in full color, live motion, instantly with exclusive cartridge-loading action!

## COMPARE IT TO 16<sup>mm</sup> IN QUALITY & 8<sup>mm</sup> IN COST

Now you can enjoy the advantages of big film projected on full-sized screen for large groups at economical 8mm cost — with Technicolor's all new Super 510 Projector. Weighs only 8 lbs. Technicolor Super 510 models priced from \$87.50. *Great for desk-top selling, too!*

### ELIMINATES THREADING AND REWINDING

Technicolor Magi-Cartridge™ film magazine provides snap-in loading. Operates in seconds with no previous instruction. No reels. No sprockets. No threading. No rewinding. Just slip in the Magi-cartridge and the film begins instantly. New heavy-duty cartridge protects film from dust, smudges and costly scratches.

New Super 8 film picture is 50% larger. Bigger picture allows more light for brighter, sharper and better image on a big screen.

### NOW TWO 8MM MOVIE SIZES

Technicolor's full line of Standard 8mm projectors for a personalized way to direct your sales message to the individual where it counts. Or Super 8mm projectors to show your sales message to many prospects at once in conference-room-size situations.

# accuracy

How many prints did you order? At Byron, each will be uniformly accurate. A Byron timer punches exposure data on a controlling tape, then plays it back to check accuracy. His tape and your original go to the printing room. Quality never varies from first to final print, because a single tape controls the amount of red, blue and green for each scene. No wonder film producers the world over turn to Byron for the finest in 16mm "Color-Correct"™ prints. Only Byron can give you "Color-Correct"™ accuracy, because only Byron makes "Color-Correct"™ prints.

## 830 Films Compete for Honors at American Film Festival, N. Y.

☆ Roger L. Stevens, chairman of the National Foundation on the Arts and Humanities, will be the honored guest speaker at an American Film Festival luncheon on Thursday, May 12. The event is jointly-sponsored by the host organization, the Educational Film Library Association and the New York Film Council.

830 motion pictures and filmstrips have been submitted for blue ribbon honors at this year's Festival, which will be held at the Hotel Biltmore in New York City from May 11-14. The awards banquet, climaxing three days of competitive screenings in 44 subject area categories, will be held in the Grand Ballroom of the Biltmore.

### Offer Program of Special Tours

Festival guests will be able to take part in a diverse program of special tours, demonstrating how films are produced, distributed and used. They may also join any one of five free-for-all panel discussions of current controversies in the audiovisual field. Included in the tours are visits to Reeves Sound Studios and to the headquarters building of MPO Videoelectronics, a major producer of tele-

## Important Events on the Industry Calendar

vision commercials and sponsored films for industry.

On May 13, a series of panel discussions led by recognized authorities will be on the Festival's afternoon agenda. Topics include "The Impact of Federal Spending on the Audiovisual Field", "The New Role of Films in Multi-Media Programs", "The Inter-action of Television and Films," and "The Creative Filmmaker and the Functional Film."

The Committee on Physical and Mental Health Films will also present a program of films and discussion on "Stress: Its Causes and Effects" on May 13.

### Show Award-Winners on Saturday

1966 Blue Ribbon award winners will be shown on Saturday, May 14, following the awards banquet on the previous evening, at the Biltmore. Festival information, advance programs and reservation forms may be obtained from EFLA, 250 West 57th St., New York, N.Y. 10019.

\* \* \*

### Catholic Audio-Visual Educators Present Film Awards on April 14

☆ The Catholic Audio-Visual Educators Association will hold its

first Communication Arts Award dinner at the Conrad Hilton Hotel in Chicago on Thursday evening, April 14th. Awards are to be presented in 10 categories of motion pictures and to a like number of outstanding 35mm filmstrips which have contributed to Catholic education.

CAVE president, the Rev. Louis Rongione, O. S. A. will introduce the presiding officer of the awards' program, the Most Reverend Joseph Hodges, Bishop of Wheeling, West Virginia and Episcopal Moderator for the Catholic audiovisual organization.

\* \* \*

### 27th National A-V Convention in Washington, D.C., July 16-19

☆ The 27th National Audio-Visual Convention and Exhibit, hosted by the National Audio-Visual Association, has taken as its theme "Audio-Visuals = Dynamic Communication." The annual gathering of audiovisual dealers, equipment makers and service companies will be held July 16-19 at the Washington Hilton, in Washington, D.C. Max Rarig, of Seattle, Washington, is general chairman of the convention. Here is

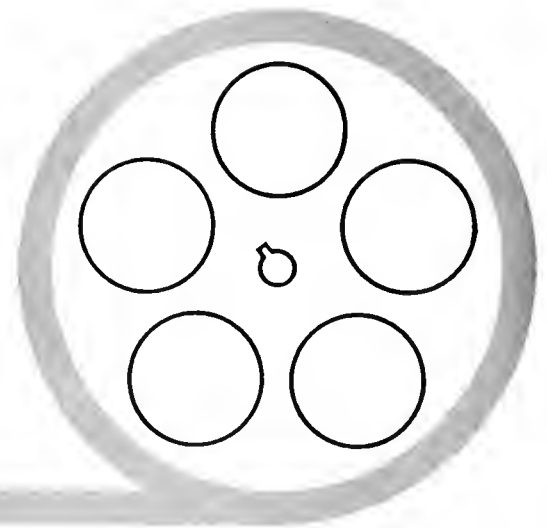

what this NAVA pioneer says: "Our theme this year expresses a conviction that is fundamental to our reason for having an annual gathering of the people and products of the industry," chairman Rarig said. "The NAVA convention and trade show are living demonstrations of the fact that audiovisuals do, indeed, equal dynamic communication, regardless of whether this communication happens to take place in the classroom, the church, or in the marketplace of business and industry."

Underscoring the association's move to Washington for its first annual gathering in history outside of Chicago, the convention theme may also be abbreviated to each "A-V = D.C." Federal spending for education has made an important contribution toward the utilization of audiovisuals throughout the nation's schools.

# NILES AND THE SALES MEETING 1965-66

For Quaker Oats—Niles produced three-day meeting introducing 1966 advertising and sales promotion programs for all Quaker products. Combination stage and screen presentation provided visualizations of 40 separate ad programs. Wide-screen color filmstrip, multiple rear-screen projectors, and multiple speakers were among variety of special effects used.

For Serta Mattress—Niles conducts three-city meeting to present "Perfect Sleeper" mattress and its promotional program to Serta plant management and sales personnel. Productions were staged by Niles crews in Chicago, San Francisco and Washington, D. C. Stage show, with a full orchestra on hand, had original musical score and choreography developed especially for occasion. Motion picture presentation provided first showing of Niles-produced sales promotion "Get Ready for Henry".

## Freedoms Foundation Honors Films and TV

**George Washington Honor Medal to Procter & Gamble Film**  
 THE 17TH ANNUAL AWARDS program of Freedoms Foundation at Valley Forge has bestowed a George Washington Honor Medal on the Procter & Gamble Company, of Cincinnati, Ohio, for its motion picture, *The Pursuit of Profit*, produced by The Jam Handy Organization. The film, which shows that product distribution today is free enterprise at work, emphasizes that profit plus free enterprise makes progress as shown by America where each individual profits by profit.

*The Pursuit of Profit* award was part of the Freedoms Foundation's Alexander Hamilton Awards program for "Economic Education on Dynamic Capitalism." The film has been widely shown to retail clerks throughout the United States and was featured in these pages last year.

### Encased Medal to Thomas' Film

The principal motion picture award, an encased George Washington Honor Medal, went to Thomas Productions of Hollywood, California, for the film, *Let the Word Go Forth*. The film is an account of the tyrannies and injustices which fomented the American Revolution, culminating in the victory which enabled every American to say, "13 years ago I had a king. Today I have a president, a Nation, a Constitution and a Bill of Rights."

Principal awards ceremonies took place at Valley Forge, Pa. on Washington's Birthday, February 22nd and will be followed by a number of regional awards presentations being made throughout the country. Dr. Kenneth D. Wells is president of Freedoms Founda-

tion. The Very Reverend W. Dullea, president of the University of San Francisco, served as chairman of the distinguished Awards Jury.

### These Pictures Were Honored

Other honor medal awards motion pictures were shown. The American Iron and Steel Institute, New York City, for its film *Steel and America*, produced by Walt Disney and by the Ford Motor Company, for the motion picture, *A Mouthful of Dirt*, showing the activities of the F.B.I., showing that, despite the background of individual involved, all human lives are protected by law.

Parthenon Pictures, of Hollywood, received the George Washington Honor Medal for its film *Washington — City of the Future*. This pictorial report on the city's history and growth, was honored as a "television exhortation to citizenship and patriotic appreciation of our national shrines to American freedom."

This film is being distributed in U. S. schools by Film Association of California.

### Award Medal to Masonic Film

William J. Ganz' production *In The Hearts of Men* won honor medal for its sponsorship. Scottish Rite of Freemasonry, Washington, D. C. This documentary film report shows the major role in providing leadership in the development of America from the time of Washington, Franklin Madison, to the continued development of freedom by MacArthur, Eisenhower and Astronaut Corps.

Dimension Films, Los Angeles received the medal award for *Washington*. (CONTINUED ON NEXT PAGE)

## Freedoms Awards:

(CONT'D FROM PREVIOUS PAGE)

*Liberty and Justice Means*, a film for young viewers, and Coronet Instructional Films, of Chicago, was again honored as its film, *Federal Taxation*, received an honor medal from the Foundation.

### Television Award to Lutherans

The principal television award went to the Lutheran Church, Missouri Synod, of St. Louis, Mo. for its filmed program, *The Greatest Freedom*. Part of the Synod's *This Is the Life* series, the program features a German refugee's description of the terrors of life under totalitarianism and communism in East Berlin which causes a student to disavow subversive activities on his college campus and return to Christian Church leadership and the true foundation of faith on which human freedom is firmly based.

In the special category of "Americana" awards, the George Washington Honor Medal was bestowed on Burt Munk & Company and The Society for Visual Education, Inc., both of Chicago, for two sets of educational filmstrips, *The United States Flag* and *Our American Heritage of Patriotic Songs*. The strips were honored as "inspiring reverence and respect for the Flag and those ideals for which it stands, and admiration for the patriotic spirit of our Nation's people."

### 18th NAVA Selling Institute Opens at Indiana U on July 10

☆ To accomplish its purpose of "helping prepare commercial people to meet total responsibilities

Dr. Kenneth Wells (left), president of Freedoms Foundation, presents encased George Washington Honor Medal to Dr. Leonard C. Wuciel, on behalf of the Lutheran Church-Missouri Synod's top television pm.

to business and industrial firms using audiovisual techniques," the National Audio Visual Association will hold its 18th Annual NAVA Institute on July 10-15, 1966. The conference will be held at the Audio Visual Center of Indiana University, Bloomington, Ind.

The purchase and utilization of audiovisual equipment in business and industry for all types of training and sales presentations will be one area covered at the NAVA Institute. Concentration will be on practical instruction and courses will include creative selling, servicing, application of equipment to industrial programs and preparation of audiovisual materials.

Newly-appointed Chairman of the 1966 program is Marty Muro, of Chicago. He will be assisted by a staff drawn from executives representing AV manufacturers, AV dealers, and Indiana University faculty members.

## CREATIVE FILMWORK OPPORTUNITY

WE ARE LOOKING FOR 2 FILM MAKERS to work in an outstanding film studio in the Chicago area. We own complete facilities and equipment. Our group is compact and will remain so since we will accept and make only unique industrial and cultural films. We are experimental film makers with a well-established reputation, international awards and successful results.

1. We want an animation cameraman with experience, willingness and art ability or aesthetic understanding.
2. We also need an experienced animator/artist willing to work as well as experiment, able to accomplish, wanting to grow.

Ideal working conditions with full benefits. We are an equal opportunity employer. Send full details on experience, salary requirements along with credits, sample films and an outline of your film philosophy.

## ARRIFLEX® 16M

**ONE CAMERA — CHOICE OF *THREE* MAGAZINES**

You're ready for any assignment with an Arriflex 16M. Just select the film load that's right for the job—big, little or in-between. **One camera—choice of three magazines.** Makes sense. Saves time. Saves money. Typically Arriflex.

**HERE'S HOW.** For short runs—hand-held grab shots and greatest mobility—there's the compact 200 ft. magazine. For runs of hundreds-of-feet, and most professional jobs, use the capable 400 ft. magazine. These magazines use 200 ft. and 400 ft. core-wound film and 100 ft. and 200 ft. daylight loading spools respectively. And for the really long run jobs, there's the big-capacity, 1200 ft. magazine. Co-axial design gives it excellent balance and handling ease. Locks onto the camera as easily and quickly as the other two. Uses 1200 ft. core wound film—33 minutes film running time.

**BEST OF ALL:** All three 16M magazines are gear driven, have a built-in sprocket and preformed film loop system. These advantages provide the sturdiest, most reliable quick-change system available today. The best system, because it locates the entire film gate (aperture, side pressure rail and rear pressure plate) all safely in the camera head for maximum precision and maximum reliability. In addition, this professional feature keeps the cost of the magazines low—important savings for you when your filming needs call for more than one magazine.

The Arriflex 16M wide choice-of-magazines concept and Quick-Change system are but two more proven professional features of this distinguished camera—in good company with its mirror-shutter reflex system, registration-pin movement and the many other famous Arri features. On your next assignment, shoot with an Arriflex 16M. You can't miss.

## New York Film Producers Elect New Board

Mucciolo is President-Elect; Members Hear Talk by Jeremy Gury

**N**EW OFFICERS of the Film Producers Association of New York were introduced at an annual membership meeting of the Association held at the Columbia University Club on February 24.

Installed as president for the 1966 term was Louis Mucciolo (Gerald Productions, Inc.) Other new officials are Irving Hecht (Cineffects, Inc.), vice-president; Robert Colodzin (Colodzin Productions, Inc.), secretary; and Morris Behrend (WCD, Inc.), treasurer.

Harold Klein, executive secretary, reported that FPA's membership has now grown to over sixty. He said that negotiation with the various crafts and guilds are progressing, but that many hours of hard bargaining will still be required before present areas of impasse can be overcome.

### Shakespeare and Mass Appeal

A feature speaker of the evening, Jeremy Gury, Senior Vice President in charge of Creative Operations, Ted Bates & Co., told the group of 75 FPA members and guests that "if it's got mass appeal it stinks" is an "idiotic" and "unrealistic" attitude. In fact, William Shakespeare's purpose, he stated, was exactly the same as an advertising agency's "... to appeal to the largest possible audience in order to make money."

Good writing, Mr. Gury said, is the result of the talent and taste of the author, not the size of the audience he is aiming at.

Bad writing and bad commercials are produced every day, Mr. Gury admitted. But the poor quality is the result of laziness, indif-

ference or the wish to please the client rather than sell his product. Universality is obviously the result of understanding mass appeal. Mr. Gury went on, whether the result is a three-hour play or 30-second commercial.

"You and I are not in the business of creating immortal art—but neither was Shakespeare. Immortality is a by-product of ability, work and taste," he concluded.

Below: Harold Klein, executive secretary of FPA, reports favorable progress on color negotiations.

FPA president-elect Louis Mucciolo (at right) of Gerald Productions receives congratulations from his predecessor, Robert Bergmann, Filmex, Inc., at recent membership meeting. Executive secretary Harold Klein in center.

# A TALL BUILDING NEEDS DEEP FOUNDATIONS

The foundation of a documentary film is a penetrating survey which will shape the plan of the film, and, bearing in mind the audience for which it is to be made, decide its scope.

The steel framework is the script, which will give the film its final form. As the steel is clad with the stone, so the script is given substance by intelligent direction — good photography — polished editing — faultless sound.

But ultimately the functional suitability of the building depends upon the skill of the architect. Behind every Reid Ray film is the experience of a pioneer in film production. Like a building, a Reid Ray film is an investment.

## Engineers to Meet in Washington May 16

99th Technical Conference to Open With Talk by Senator

SENATOR GEORGE MURPHY of California will be the guest speaker at the Get-Together luncheon when the Society of Motion Picture and Television Engineers opens its 99th Technical Conference and Exhibit on May 1st at the Sheraton Park Hotel, Washington, D.C.

The five-day conference, at which attendance is expected to run into the thousands, will mark the 50th Anniversary of the founding of the Society, which was incorporated in Washington in 1916. Senator Murphy's background in the motion picture industry makes him a most appropriate figure for the celebration of this significant event.

The amazing changes in technology the SMPTE has seen in the course of its 50 years will be amply demonstrated during the 99th Conference. At one end of the scale, the very latest technical advances in space photography will hopefully be highlighted by the presentation of special awards to astronauts McDivitt and White, the first cinematographers to operate literally in space. At the other — the Library of Congress, Smithsonian Institute and the National Archives will display treasures from their collections of historical motion pictures from the earliest days of the industry.

Other highlights of the conference will be a technical review of the Seventh International Congress on High-Speed Photography, held in Zurich, Switzerland, last September; plus an important presentation on underwater photography; and some significant recent contributions in television broadcast engineering.

### First SMPTE Scholarship to Photographic Science Student

☆ Jan L. Meades, a third-year student in the photographic science course at Rochester Institute of Technology has been selected by R.I.T. and the Society of Motion Picture and Television Engineers as the first SMPTE Scholarship Award recipient. Miss Meades, of Norfolk, Va., is the only girl in her class and possesses a most impressive academic record. Upon graduation in 1967 she hopes to continue at R.I.T. as a teaching assistant while earning her master's degree.

SMPTE last fall inaugurated this scholarship program to further

## Paths to Health Goals Discussed at Biomedical Conference in N.Y.

☆ The New York Academy of Sciences and the U.S. Public Health Service Audiovisual Facility were co-sponsors of a first conference on "Biomedical Communication: Problems and Resources" which was held at the Waldorf-Astoria Hotel in New York City on April 4-6.

The objective of the conference, as presented by its chairman, Dr. James Lieberman, director of the Public Health Audiovisual Facility at Atlanta, Georgia, was "to present practical ways in which communications media, personnel and systems can help achieve important health objectives, while at the same time conserving monetary and human resources."

Keynote speaker at the conference was introduced by Dr. F. Ellis Kelsey, special assistant to the U.S. Surgeon General (for Scientific Information) in the Public Health Service, Washington, D.C. Robert Abernethy, Washington correspondent for NBC, was the moderator for a presentation of "The Tomorrow Show" a featured program event. Pauline Frederick, United Nations correspondent for NBC, was moderator and chairwoman for the program "Focus on Today." Adrian Ter-Louw, educational consultant for the Eastman Kodak Company, participated in this program, speaking on "Why Is Industry Interested?"

## Midwest Chapter, NVPA, Hosts 13th "Day of Visuals" June 1-2

☆ The 13th Annual "Day of Visuals" and annual awards program of the National Visual Presentation Association, held in New York City for 12 previous years, will move to the Sherman House in Chicago on June 1 and 2. The association's Midwest Chapter will serve as the host organization.

Howard Turner, of the DuKane Corporation, is program chairman for Chicago's first "Day of Visuals" event. General co-chairmen for the gathering are Marvin E. Goessl, Becker-Goessl, Inc. and A. M. Baltzer, National Safety Council. Howard Rice, of the Motorola Communications Division, is awards chairman.

The program will feature talks by leaders in business audiovisual activities and competitive screenings of motion pictures and slide-films entered in the NVPA awards'

contest. Seven categories have been set up for judging audiovisuals in this annual competition. Judging chairman is Robert Konikow, editor of Advertising and Sales Promotion magazines.

Exhibits of the latest visual equipment and services will be another featured event. A two-day Chicago program, headed by Robinson, of Harper & Robinson in Chicago, is exhibits chairman. Arrangements for participation in exhibits and attendance at "Day of Visuals" may be made at the newly-opened midwest office, 333 North Michigan Avenue. The Chicago telephone number is Financial 6-1665.

Norman C. Lindquist, president of Fred A. Nile Communications Centers, Inc., is president of the Midwest Chapter, NVPA and host at this year's program. Theme of the seminar program to be held during the two-day meeting is "New Dimensions in Audio-Visual Communication." The Sales-Marketing Executive of Chicago are cooperating in program arrangements.

## Norton Company Notes 25% Growth With 2,000 Film Shows in 1964

☆ Two thousand showings marking an increase of 25% over the previous year for its library of films, are reported by the Norton Company, Worcester, Massachusetts, manufacturers of abrasive equipment.

The films: *The Cutting Edge*, *How to Select the Right Grinding Wheel*, *Grinding Wheel Selection*, *The Diamond Wheel, Its Characteristics and Use*, *The Grinding Wheel*, *Adventures in Abrasives* are shown in all 50 states. Reflecting the upsurge in vocational education, colleges and trade schools are counted for 50% of the showings. The remaining bookings are for color, optical sound films widely shared by public institutions, technical societies and industrial companies.

# The money camera plays for keeps.

## Don't you?

That's what we call the Bolex 16: "the money camera." Because when there's something on the line, when you can't afford mistakes, you can always depend on it. Why?

Because Bolex has more going for you. Take the camera pictured above, it's called "The Coach," and with it you can take anything from a wide sweep to a close-up of a quarterback hand-off. Capture athlete's form in all sports, easily. Or slow the action down to extra slow motion. And never waste a second in reloading, because of automatic threading and spool ejection. And you have more going for you in sports accessories, too. Take the "all-sport" tripod, shown above. It lets you zoom with your left hand, while you pan to follow the action and hold the pan handle with built-in cable release in your right. You just don't miss a play. And take the special "unimotor" (shown above) that lets you run off 100 feet of film at a clip. Either plugged-in or on batteries. And take any one of the more than 50 other accessories. That's "the money camera" for you.

Now you might ask whether the Bolex is great only outdoors. Not by a long shot. It has the lens speed and focal length to capture the action of basketball, (shown right) swimming, wrestling, fencing. Any indoor sport. And just to show its real versatility, replace the zoom with an extreme wide angle or extreme telephoto lens (as shown below) and it's perfect for nature study (shown right), drama class, bio lab, or any other scholastic purpose.

That's why we call Bolex "the money camera." Because it's rugged, dependable, versatile. Because it always comes through. In any situation. That's why you'll find the Bolex "Coach" in schools throughout the country. And that's why your school should put its money on it, too. Bolex: "the money camera!" You can depend on it.

For further information or free catalog on shooting sports with the Bolex 16, write: Paillard Incorporated, 1900 Lower Road, Linden, N. J. 07036. **BOLEX**

Atlas Chemical Premieres "The Man from D.A.R.C.O."  
 ☆ Atlas Chemical Industries, Inc., of Wilmington, Delaware, premiered its new film on the correct use of activated carbon in drycleaning operations on Thursday, March 24 in the Lenox Room of the Sheraton-Lake Shore Hotel in Chicago.  
 Titled *The Man from D.A.R.C.O.*, the color picture was patterned after spy stories currently popular on television. It shows how the hero, an agent of Drycleaners Association for Right Carbon Operations, battles S.M.O.C.K. (The Society for Making Our Customers Komplain) for control of a drycleaning plant.

### Modern Offers TV Stations Choice of 150 Color Films

☆ Some 52 half-hour film programs in color and 39 quarter-hour color films are included in the *Modern Rainbow Theater* list of Modern Talking Picture Service, now offered on free loan to independent color television station program directors throughout the U. S.

The national distributor also has 26 half-hour and 20 quarter-hour shows in its *See the U.S.A.* library; the *Wheels to Adventure* series offers another 13 half-hour travel films (presented by Humble Oil & Refining Co.).

### "Something to Work For" Aids Employee Motivation

☆ Latest of the syndicated training films produced by Roundtable Films, Inc., of Beverly Hills, Calif., is a 6-minute motion picture, *Something to Work For*, which encourages managers and supervisors to re-examine their own attitudes towards motivating employees.

The film is based on a composite case history and illustrates how supervisors can most effectively motivate employees by being sensitive to their subordinates' values. R. Hollis Hamstra, a well-known industrial psychologist, was the consultant.

*Something to Work For* is available for rental or outright purchase in black and white or color from Roundtable Films, Inc., 321 So. Beverly Hills, Calif. 902

## **at airports**

**Modern's Free Movie Lounges reach  
decision-making executives.**

Operated as a service to waiting air travelers, our free Skyport Movie Lounges are placed in major air terminals throughout the country. The popularity of these movie lounges is evidenced by the hundreds of enthusiastic compliments we have received. Sponsors like Skyport Cinema, too...because, according to viewer surveys 96% of the viewers are employed, as follows:

<b>Management</b>	<b>11%</b>	<b>Sales &amp; Marketing</b>	<b>31%</b>
<b>Technical &amp; Engineering</b>	<b>16%</b>	<b>All others</b>	<b>38%</b>

Truly a tremendous new market reached by sponsored films!

Short, to-the-point digests are especially appreciated by these executives, who are accustomed to brief, concise reports in their business communications. Up to 2500 airport showings per year can give tremendous exposure to **your** Digest message.

## **at resorts**

**Modern supplies movies, projectors and delivery  
service — all free of charge to reach vacationing  
family groups.**

Resort Cinema now includes over 1300 participating resorts, motels and camps — from Squaw Valley to Cape Cod—where our movie programs are shown 3 to 6 nights a week during vacation seasons. The many letters of appreciation and continued participation by resorts make it evident that Modern's ever-growing Resort Cinema will continue to afford sponsors an ideal opportunity to reach prime family groups with higher-than-average disposable income.

Certain sponsors will find that a unique opportunity exists to make Digests with particular appeal and application to vacationers. Swimming and boating safety, forest conservation, anti-litter and, of course, sports and travel are just a few of the subjects that merit consideration. With 100 prints of your Digest, Modern can deliver 2,000 resort showings during the summer months.

Right purchase in black  
white or color from Round  
table Films, Inc., 321 South  
Beverly Hills, Calif. 90211.

# FILMS

Depending on the subject matter, your digest can extend your communications through exposures in:

### **Regular Community Groups**

where films are used to provide information, training and entertainment.

### **Television**

where Digests are used by the stations to fill "holes" in their daily programming.

### **Theatres**

where "short subjects" are used regularly. Of course, 35mm prints are required.

You have the facts about the fantastic exposure opportunities... here's how

In an era of 1-minute television commercials, an increasing number of film sponsors are finding that they can tell their story and achieve great impact with the short to-the-point film. Whether you sell steel or stocks, travel or tackle, automobiles or airplanes, the Digest may be an effective vehicle to carry your message to our prime viewers. These people appreciate well-produced subjects that are informative and interesting.

### **Savings in Distribution**

Modern's charge for Digest showings at airports, resorts and community groups is only \$2.50 per booking — about 30% less than the average distribution charges for longer films.

### **Savings in Production**

The production cost for a Digest will vary, depending on the type of film, but you can obviously plan on considerable savings when making a Digest, as compared to a 30-minute film of a similar type and quality. The economy of production will allow you to plan a series of Digests aimed at specific audience markets, or covering different facets and divisions of your company.

### **Savings in Prints**

The difference in print costs between a Digest and a 30-minute film represents substantial savings that could be applied to your production or distribution budget.

Until Modern developed the new markets for sponsored films, Digests were primarily made for television because of the limited exposure opportunities in other areas. But now, with audiences in airports, resorts and community groups, Modern can generate up to 6500 showings per year on your Digest with only 150 prints. This fact, coupled with the additional distribution to television and theatres, makes the Digest a **powerful and versatile communications tool.**

If budget problems have previously prevented you from using the 16mm-sound film as a vehicle to reach the public, the economy of the Digest opens **new horizons for your corporate communications program.** The economy of the Digest also means you can afford to **produce films for specific audience groups** that may be of particular interest to your company.

The Digest can also affect your plans for the production of longer films. More and more sponsors are now making 15 to 30 minute films for general distribution with Digest "lift-outs" for specific audiences. This approach allows them to **maximize exposure opportunities for very little extra production cost.**

#### **A WORD OF CAUTION . . .**

Don't regard Digests as a way to expose viewers to a 5-minute commercial. These are not captive audiences; they can and will walk out if the subject is not interesting and informative.

If your message requires more than Digest treatment, make a longer film. The basic foundation of our Airport, Resort and Community Programs is, and will continue to be, 15 to 30-minute films.

#### **FOR ADDITIONAL INFORMATION**

about the Digest and Modern's new markets and opportunities, contact your producer or Modern.

# AWARDS COMPETITION FOR BUSINESS FILMS

## THE AMERICAN FILM FESTIVAL

Sponsored by the Educational  
Film Library Association  
New York City May 11-14, 1966

The 1966 American Film Festival, sponsored by the Educational Film Library Association, representing school, university and public libraries, and film libraries throughout the U.S. will be held May 11-14 at the Biltmore Hotel, New York City.

**CATEGORIES:** 32 major areas of education and training, art and culture, religion and philosophy, business and industry, and health and medicine will be offered for final judging by judging groups during the Festival. Elections have been made by pre-screening juries for final entries.

**AWARDS:** Blue Ribbon (certificate) Awards will be presented at banquet, Friday, May 13. The festival closed on January 27, 1966.

**FESTIVAL:** May 10-13. Closing date: January 27, 1967. •

## THE FIFTH ANNUAL FILM FESTIVAL AMERICAN PERSONNEL & GUIDANCE ASSOCIATION

Held in conjunction with the Annual  
Convention at Washington, D. C., April 4-7

**CATEGORIES:** Films and filmstrips in the following categories will be presented: International Relations; Educational and Career Planning; Rehabilitation; Counseling; The Profession, Principles and Techniques; and Foreign Films from other countries.

**NOTICE:** All films and filmstrips presented at the Film Festival are previewed before the invitation to the producer. Generally 75 films are previewed, and 25 to 30 are selected. Selection is aimed to provide as wide a program as possible.

**INFORMATION:** Copies of the programs and information about APGA Film Festival are available from Laura Mae Kress, Film Festival Coordinator, 1609 New Hampshire Avenue, N.W., Washington, D.C. 20009. •

## THE 14TH ANNUAL COLUMBUS FILM FESTIVAL AND AWARDS

Sponsored by the  
Film Council of Greater Columbus  
in association with the  
Columbus Area Chamber of Commerce

**Screenings (for General Public):**  
**Producers and Sponsors:** "Producers Meet" September 8-9 at Battelle Memorial Institute Building, Friday afternoon, Oct. 7 at the Hayes Hotel. Chris Awards Banquet: Friday evening, Oct. 7 at the Fort Hayes Hotel.

**AWARDS:** Film producers and sponsors are invited to enter motion pictures and filmstrips produced in 1964, 1965 and 1966 provided they have not been previously submitted to the Columbus Film Festival. Entries (in the

## National Programs for the Selection of Outstanding Pictures

categories enumerated below) must be accompanied by 3x5 cards (for preview committees) noting type of audience intended.

Films are judged by professionals in the various fields. Entry fee for all motion pictures, regardless of length, (no filmstrips accepted this year) is \$15. Entries will be accepted beginning February 1 and closing date is August 1, 1965 at 5 p.m. E.S.T. Each print should be made available for judging for at least one month or longer. If less time is available, the category chairman should be so informed. This year no film will be accepted after the closing date for entries, August 1.

**CATEGORIES & CHAIRMEN:** (Motion pictures should be shipped directly to the following:)  
**Business & Industry** (job training; sales promotion; industrial relations; public relations; *Galvy Gordon, Columbus Public Library, 96 S. Grant Ave., Columbus, Ohio 43215*);  
**Information and Education** (classroom instructional films; specialized instructional; general information). *Frederic B. Saunier, P.O. Box 3001, University Station, Columbus, Ohio 43210*;  
**Health & Mental Health** (health & hygiene; mental health; general medicine; professional medicine; dental). *Florence L. Fogle, Assoc. Professor of Health Education, Ohio State University, 321 W. 17th St., Columbus, Ohio 43210*;  
**Travel U.S. & Foreign**, *Daniel F. Prugh, Film Council of Greater Columbus, 280 East Broad St., Columbus 15, Ohio*;  
**Religious Films**, *Miss Delores Sherwood, Augsburg Publishing House, Audio Visual Dept., 57 E. Main St., Columbus 15, Ohio*;  
**Special Fields**: *S. N. Hallock, Center of Science & Industry, 280 E. Broad St., Columbus 15, Ohio*.

**AWARDS:** This is the eighth year of the Chris Statuette Awards, presented to the outstanding films in each category. Films receiving the Chris Statuette must be voted "best in photography, story value, and technical aspects of production." Chris Certificate Awards are given to motion pictures considered "finalists" but not receiving the statuette award.

**FOR ENTRY BLANKS:** Write to Miss Mary Rupe, Film Library, Columbus Public Library, 96 South Grant Avenue, Columbus, Ohio 43215. •

## FARM FILM FOUNDATION PROFESSIONAL IMPROVEMENT AWARDS

**AWARDS:** For the 12th consecutive year, an inscribed certificate and \$500.00 will be given to an active member of the American Association of Agricultural College Editors, who is selected by a committee of three Judges as

having made, through work in motion picture production, the most outstanding contribution to the advancement of agriculture, home economics, rural-urban relations, and the public interest during the past two years. Honorable Mention Awards of \$50.00 each may also be given at the discretion of the judges.

**PRESENTATION:** The Awards will be presented at a dinner co-sponsored by the Farm Foundation and the Foundation for American Agriculture at the annual meeting of the American Association of Agricultural College Editors scheduled for July 13, 1966 at The University of Georgia, Athens, Georgia.

**ELIGIBILITY:** Any active member of AAACE engaged in some phase of motion picture production is eligible to apply for the Award. •

## THE ROBERT FLAHERTY AWARDS

Sponsored by The Institute of Film Techniques  
City College of New York

For the 14th time, the Robert Flaherty Award will be given for the best documentary film completed in the preceding year. The dominant factor is to stimulate, encourage and reward film people, students and professional alike, engaged in producing the film which documents life in the established tradition generally ascribed to the monumental figure of the documentary scene, Robert Flaherty.

**ENTRY DATE & INFORMATION:** Entries will be accepted until February 29, 1967. There is a small entry fee, except for students. Address inquiries in writing to: Jack Knapp, Chairman, Flaherty Award Committee, Institute of Film Techniques, City College of New York, 133rd Street & Convent Avenue, New York, N.Y. 10031. •

## FREEDOMS FOUNDATION AWARDS

Sponsored by the Freedoms Foundation  
Valley Forge, Pennsylvania

Closing Date for Entries: November 1, 1966

**CATEGORIES:** Consideration is given to all films produced or released during 1966, which are aimed at building a better understanding of the American Way of Life.

**AWARDS:** A distinguished jury of State Supreme Court jurists and other eminent citizens selects one film for the top award and approximately 10 others for the George Washington Honor Medal recognition. Awards will be announced at Valley Forge on February 22, 1967.

**FOR NOMINATION:** Nomination forms are available from Freedoms Foundation, at Valley Forge, Pennsylvania. •

# AWARDS FOR BUSINESS FILM

#### INDUSTRY FILM PRODUCERS AWARD:

improvement in the quality of documentary, public relations and educational films, and their effective utilization by industry, business, education and government.

**CATEGORIES:** Information-Education, Business-Sales Presentation-Public Relations, and Films Produced Specifically for Internal Use.

**ENTRY INFORMATION:** Any film produced by or commissioned by an IFPA Active Member during the calendar year 1965, or any such film completed for release during the calendar year 1965 is eligible. Films completed earlier, under government security classification, but declassified during 1965, are also eligible for submission. More than one film may be submitted by the same member or organization. Entry deadline is March 12, 1966. Entry fee for each film is \$15. For additional information write to: Raymond Jaeger, Executive Vice President and Chairman of Film Competitions Committee, P.O. Box 1395, Thousand Oaks, California.

#### THIRD ANNUAL INTERNATIONAL MANAGEMENT FILM FESTIVAL AND AWARDS

Sponsored by

The Society for Advancement of Management  
Finalist Judging—New York City  
October 20-21, 1966

**CATEGORIES:** "Community service" in nature, stressing a management interest; films dealing in management techniques, such as management development and management theory; management in practice; technical films dealing with technical areas of management, or for the education of managers.

**ENTRIES:** Limited to two from each producer. Only films not previously entered will be accepted. Films judged by professional executives in top management, and specialists in education and science. Entries accepted until October 1, 1966. Entry fee dependent on category entered. For full information write to: Peter Livingston, Film Director, Society for Advancement of Management, 16 West 40th St., New York, N.Y.

**AWARDS:** Bronze Plaques presented to grand prize winner and winner of each category. Awards presented at banquet on October 21, 1966, in New York City.

#### THE 24TH ANNUAL NATIONAL SAFETY FILM CONTEST

Sponsored by the National Committee  
on Films for Safety

**ELIGIBLE FILMS:** All motion pictures and sound slidefilms produced or released during 1966 whose primary objectives are safety or which have important accident prevention sequences. Contest entry deadline will be February 20, 1967.

**CATEGORIES:** Motion pictures, non-theatrical (16mm) in each of four fields: 1. Occupational. 2. Home. 3. Traffic and transportation. 4. General. Sound slidefilms are judged separate-

ly, as are television and theatrical subjects, shorts and spots.

**AWARDS:** Bronze Plaques will be awarded top winners in each of the various categories. Award of Merit Certificates will be given to other films for special reasons of merit, treatment, production excellence and unusual contribution to safety. At the discretion of the judges, awards may be given separately for "instruction-teaching" and for "inspirational" purpose films.

**PRESENTATIONS:** Films winning the Grand Prize will be shown in October during the National Safety Congress and Exposition in Chicago, Ill. Plaques will be presented at that time to representatives of sponsors of the films by the Committee's chairman. Certificate of Merit winners will receive their awards after the final judging which is in April. Winners will be notified immediately after judging.

**INFORMATION ON AWARDS PROGRAMS** Write to William Englander, Secretary, National Committee on Films for Safety, 425 North Michigan Avenue, Chicago, Illinois 60611.

#### 13TH ANNUAL "DAY OF VISUAL"

Sponsored by the

National Visual Presentation Association  
Chicago, Illinois — June 1-2, 1966

• The 13th Annual "Day of Visual" Competition will be held June 1-2, 1966, at the Sherman House, Chicago, Ill. The event is open to both members and non-members, producers and non-producers.

The program includes two days of seminars, a luncheon program and the annual Awards Banquet. Winners will receive their awards at the Banquet June 1.

Program chairman is Howard Turner (United Kane Corp.). Co-chairmen are Martin Goessl (Becker-Goessl) and A. M. Altman (National Safety Council). Awards Chairman is Howard Rice (Motorola, Inc.).

**FOR INFORMATION:** Write "Day of Visual" Chairman @ 333 North Michigan Avenue, Chicago, Illinois.

#### THE SIXTH ANNUAL WESTERN HERITAGE AWARDS

Oklahoma City — April 29, 1966

Sponsored by The National Cowboy Hall and Western Heritage Center

**CATEGORIES:** Dedicated to honoring outstanding pictures, television programs, books, articles and musical compositions for their accurate portrayal of the West, the Awards hope to bring about a desire to create a greater appreciation and a better understanding of our nation's Western heritage.

**ENTRY INFORMATION:** Application blank can be obtained from the Public Relations Department at the National Cowboy Hall of Fame, 1700 N. E. 63rd Street, Oklahoma City, Oklahoma. Phone: (405) GR 8-1811.

#### THE SEVENTH INTERNATIONAL INDUSTRIAL FILM FESTIVAL

Venice, Italy — September, 1966

Sponsored by The Council of European Industrial Federations

Italy is the host country for the Seventh International Industrial Film Festival, sponsored annually by members of the Council of European Industrial Federations (CEIF). European film entries are selected through national industrial film festivals held in each of the respective countries. Films of the United States have been invited to participate through the National Association of Manufacturers in this country and a special committee is judging U. S. entries, in cooperation with the Council on International Nontheatrical Events.

**CATEGORIES:** the following types of films are in competition at this International Festival:

A. Films about industrial questions (economic, social, technical or scientific) or general interest and intended for showing primarily to the general public.

B. Films about specific industrial products, materials or projects, intended for showing primarily to the general public.

C. Films aiming less at information than do the films in categories A and B, but which have the purpose of contributing to the prestige of the industry concerned or of a firm, intended primarily for the general public.

D. Films about specific industrial products, materials or projects or about industrial techniques (management methods, measure for increasing productivity, efficiency and output, rationalisation, automation, application of modern techniques, etc.) intended primarily for specialist audiences.

E. Films on industrial application of scientific principles and research intended primarily for special audiences, including educational establishments, rather than for general showing like categories A, B and C.

F. Films on management and manpower training (for example, vocational guidance and training, training within the firm) and on power promotion and human relations within the firm, intended rather for an industrial audience than for the general public.

G. Films on accident prevention, occupational diseases, health, re-education and measures of social security, intended rather for an industrial audience than the general public.

Films will be shown in their original language. The two official languages of the Festival will be English and French.

**EXHIBITION:** There will be an International Exhibition of Photographic Art & Science in Venice during the Festival.

**CLOSING DATES:** Films must be received by the host organization, the Italian Confederation of Industry, in Rome not later than July 30, 1966. Films are not accepted by direct entry, however, but must be submitted through national host organizations of industry within their respective countries.

## LET'S TALK BUSINESS ABOUT FILMS

Maybe a film really isn't the answer to your particular sales or public relations problem. If it isn't, we wouldn't hesitate to tell you so. We've turned down assignments in the past . . . but we've turned up many more result-producing films for such clients as Xerox, Westinghouse, Corning Glass, R. T. French, Graflex, Dunlop, Hooker Chemical, Bausch & Lomb, Marine Midland, and The United Appeal of Greater Cleveland, to mention a few.

If there is a film in your future, protect your investment now by working with a business-oriented motion picture production firm specializing in business films. Holland-Wegman Productions, Inc. has the experience, know-how, staff and facilities to put more telling force into your selling force. To put effective communications to work for your firm, simply contact Ed Wegman. He's as close to you and your business problems as your telephone.

# INTERNATIONAL AWARD COMPETITION

## THE SIXTH INTERNATIONAL LABOUR AND INDUSTRIAL FILM TRIENNIAL

Sponsored by the Belgian Ministry of Employment and Labour

• The Kingdom of Belgium is again sponsoring the International Labour and Industrial Film Triennial to be held during May 1967.

**ENTRY DATES & CATEGORIES:** Cinematographic films, film cartridges, filmstrips, series of slides, kinescopes and videotapes. Deadline for entering: January 31, 1967.

**INFORMATION:** For further information, write to: Secretariat, International Labour and Industrial Film Triennial, Frankrijklei 128a Antwerp, Belgium.

The following awards programs are privately-sponsored enterprises of the individuals or corporations in charge

## CHICAGO INTERNATIONAL FILM FESTIVAL

Communication In Film, Art In Film  
November 5-11, 1966

**COMMUNICATION IN FILM:** Categories: (A) TV Commercials. 1965 and 1966 productions are eligible. Awards will be made in three specific areas: Impact, Entertainment Value and Technical Excellence. Winner in each area receives the Silver Hugo Statue. Grand prize winner will receive the Gold Hugo Statue. The judges and the public will view the finalists

on live television, via Chicago's non-commercial educational station. (B) Industrials. Motion pictures will be judged in two areas: Public Relations and Sales & Promotion. Awards include The Gold Hugo Statue, Silver Hugo Statue. Gold & Silver Certificates and special jury awards. Finalists all receive a certificate of acceptance and participation. (C) Educational. Two areas: Classroom and Safety. Awards same as above.

**ART IN FILM:** It is the function of this category to bring together the best of recently produced motion pictures which focus their attention on experimental areas of film-making. Imagination, freshness and creativity are important aspects to be considered in this category usually entered by the independent producers of all nations. Awards: The Gold Hugo Statue and \$1000; The Silver Hugo Statue and \$500; Special Jury Awards; finalists receive acceptance certificates.

**ENTRANCE FEE:** \$25.00 per TV Commercial — 16mm prints only; \$25.00 per Industrial Film — 16mm prints preferred; \$25.00 per Educational Film — 16mm prints only; \$25.00 per Art Film — 16mm & 35mm accepted.

**ENTRY INFORMATION:** Applications are available from May, 1966 from: Applications Committee, Chicago International Film Festival, 235 West Eugenie Street (T-2), Chicago, Ill. 60614. Deadline for entry forms is August 15, 1966.

## 6TH INTERNATIONAL FILM & TV FESTIVAL OF NEW YORK

(Held in Conjunction With the Industrial Film & A-V Exhibition)

New York City—October 6-7, 1966

☆ The Sixth International Film & TV Festival of New York is scheduled for October 6-7, 1966, at the Americana Hotel, 53rd Street & 7th Avenue, New York City. Industrial and other sponsored films as well as TV commercials are eligible for entry.

**CATEGORIES:** Business films may be entered in (1) Sales Presentation; (2) Training; (3) Public Relations; (4) Scientific; (5) Educational; (6) Public Service; and (7) Documentary categories. Television commercials are grouped into (1) Live Action; (2) Animation and Puppet; and (3) Live and Animation, and are divided into (a) up to 30 seconds; and (b) over 30 seconds. Public Service Television Programs in following categories: (a) single program produced by a local station; (b) series produced by a local station; (c) single program produced by a station group; (d) series produced by a station group; and (e) programs produced by an independent producer. Industrial filmstrips in following categories: (1) Sales Presentation; (2) Training; (3) Public Relations; (4) Public Service.

**AWARDS:** Grand Prix is awarded in each of the primary groups, Business Films, TV Commercials, Public Service TV Programs and Industrial Filmstrips. Each category in these groups is eligible for First Prize and Special Awards.

Manhattan Effects, Inc., Dept. A-B, 210 West 65th St., New York, N.Y. 10023, (212) TR 3-491

## It's the picture that counts.

To shoot what looks like a desert oasis, MPO created a beach on a Florida beach for Kennecott Copper Corporation's new film, "Copper!" Then to Bingham, Utah, to photograph the great Kennecott open pit mine; at a hydroelectric plant in South Dakota; to Devils Slide, Wyoming; Novelty, Ohio; Villa Blanca, Texas; Long Island City, New York—in 10 states and 19 cities MPO production crews filmed copper resources and uses.

Getting the picture is only one aspect of MPO's film

making service. MPO's unique ability to interpret the client's message and creatively translate it into the film medium has brought more awards to MPO than any other film producer.

Through the years, more and more accounts have found it pays to trust their film projects to a creative, quality producer: MPO. To learn more about MPO's creative staff and studio facilities, or to arrange a screening of recent work, call or write Judd Pollock in New York.

MPO PRODUCTIONS, INC., a subsidiary of MPO VIDEOTRONICS/222 East 44, New York, N.Y. 10017/212 TN 7-S200/also in Detroit, Chicago, Hollywood

**PRIVATELY-SPONSORED AWARDS:**  
(CONTINUED FROM THE PRECEDING PAGE 28)  
Special achievement awards are given for contributions in Best Direction, Best Musical Sound Track, Best Special Effects, Best Photography, Best Art Work, etc.

**ENTRIES:** For entry forms and fees apply to Industrial Exhibitions, Inc., sponsors of the Festival, 17 East 45th St., New York, New York 10017. Phone: OXford 7-4978.

**MIFED, INTERNATIONAL FILM, TV FILM AND DOCUMENTARY MARKET**

13th Cine Meeting, April 18-25, 1966  
14th Cine Meeting, October 15-24, 1966

**CATEGORIES:** Feature (entertainment) motion pictures, telefilms, publicity films and documentary motion pictures may be screened at this market-place for possible resale.

**MARKETS:** Two sessions are held each year. The Spring session is concurrent with the 44th Milan International Trade Fair. The Fall session is in October.

**AWARDS:** The "Five Continents Trophy" goes to the best entertainment feature; the "TV Pearl" is presented in two Grand Prix Awards for the best full-length or serialized film, and for the best short film produced for TV transmission.

**ENTRIES:** Address requests or entry forms, etc. to: Dr. M. G. Franci, Commissioner of MIFED, MIFED Secretariat, I. Largo Domodossola, Milan, Italy.

**AWARD PROGRAMS  
Television Commercials  
& Theater Screen Ads**

**THE SEVENTH ANNUAL AMERICAN  
TV COMMERCIALS FESTIVAL**

New York City—May 5, 1966  
Chicago, Toronto, Dallas, Los Angeles  
Atlanta and Boston—May & June, 1966

**ELIGIBILITY:** Open to commercials telecast in the U.S. and Canada for the first time during 1965. No limit on entries from sponsors, agencies, stations or production companies.

**CATEGORIES:** Forty product classifications plus one category for Classics, which must have been first telecast more than five years ago. New International category this year is open to entries from all other countries.

**JUDGING:** By nine Regional Councils of prominent advertising executives, headed in 1966 by Walter Weir, President, West, Weir & Bartel Advertising Agency.

**CRITERIA:** Outstanding commercials . . . based on strength of the sales message, visual and aural appeal and all-over technical skill.

**AWARDS:** A golden "CLIO" statuette to each Best of Product Category and Special Citation winner. Certificates to Runners-Up and 150 Finalists.

**INFORMATION:** 16mm reel of winners is avail-

able from Wallace A. Ross, Director, American TV Commercials Festival, 6 West 57th Street, New York, New York 10019. Phone: (212) LT 1-7060.

**THE 13TH INTERNATIONAL  
ADVERTISING FILM FESTIVAL**

Venice, Italy — June 13 to 18, 1966  
Sponsored by the Screen Advertising World Association Ltd.

**MANAGEMENT COMMITTEE:** The Executive Festival Committee, consisting of the president, Mr. Jean Mineur; Mr. Ernest Pearl & Dean Ltd., Honorary Life President; Mr. Jo Linten, Movierecord S. A.; and Mr. Massimo Momigliano, Opus Proclam, fully responsible for all policy matters in relation to the Festival Organization. Categories and awards are planned by these representatives of the sponsoring Association. Festival Director: Mr. Peter E. Taylor, Head Office International Advertising Film Festival, 3 Piccadilly, London, W.1., England. Phone: REgent 7621/2.

**ENTRY DATE & CATEGORIES:** Entry forms issued from London Office During March. Closing dates: for completed entry forms—April 23rd; for delivery of films to Venice—May 14th. Information in United States: Earl Pinkerton Associates, 527 Madison Ave., New York, N.Y. 10022.

**CATEGORIES:** There will be 10 categories each of the two groups— Cinema and television.

(CONCLUDED ON THE FOLLOWING PAGE 50)

No, we're not tired of solving individual problems. In fact, we're rather proud that our fifteen consecutive years performing specialized laboratory services for filmstrips and slidefilms qualifies us as experts.

But we thought a FILMSTRIP-SLIDEFILM PRODUCTION KIT would be an invaluable aid in planning and producing these audio-visuals. So we assembled one.

Whether your A-V program is being handled by a professional film producer or your own in-plant department, this kit will serve as a handy reference, clearing up many of the technical problems that have become second nature to us.

Here's some of the areas covered:

- Filmstrip/Slidefilm Layout Field Guide
- Filmstrip Shooting Sequence Sheet
- Glossary of Filmstrip and Slidefilm Laboratory Terminology
- List of Filmstrip and Slidefilm Apertures
- Table of Filmstrip Aperture Specifications
- Table of Filmstrip and Slidefilm Projectors
- Tips for Shooting ECN and 6008
- Tips for Preparing Original Art

There's nothing else like it available. For your copy send \$1 to Bernie Barnett, Executive Vice President.

# IS F&B/CECO TOO BIG TO CARE?

STURGIS-GRANT  
PRODUCTIONS, INC.

328 EAST 44th STREET, NEW YORK 17, N. Y. - MU 9-4994

January 5, 1966

Mr. John Babb  
F&B/CECO, Inc.  
315 West 43rd Street  
New York, N.Y. 10036

Dear John,

We have just completed our latest production, RADIOISOTOPES FOR MEDICINE and your rental equipment functioned perfectly, as usual.

I would also like to tell you that in spite of the growth of F&B by leaps and bounds, the one fear I had has not materialized. Oh, I knew that management, variety of gear and quality of equipment would not suffer by any growth (after all, you and your other key men know what you're about). But I did wonder if the personal rapport between the customer and the department experts and servicemen was something that would go out the window in favor of big-time, impersonal channels. One who had so often forged his way through the piles of equipment at 45th Street, because he liked the way you fellows always came through, should be forgiven for dire predictions.

On the contrary to my fears, you have somehow, somehow been able to maintain an atmosphere in which the most modest customer knows that whoever he contacts at JU-6-1420 will give him top service... with willingness, promptness, understanding and (when necessary) compassion.

This must have taken a lot of doing on the part of a lot of people and I hope you realize that the World's Film Makers - Fine or otherwise - do appreciate what F&B/CECO has to offer.

With that off my chest, may I wish all my friends under your roof the best wishes for the New Year.

Sincerely,

William H. Terry  
Executive Vice President

there's just one thing  
that goes into being  
**NUMBER ONE**  
in PROFESSIONAL  
MOTION PICTURE  
RENTALS...  
**PEOPLE!**

(and we've got 'em!)

Of course we're Number One after trying harder for over 30 years. We have MORE equipment than anybody else. Of even greater importance, we also have the HIGHEST SKILLED TECHNICIANS to maintain it...an accumulation of 434 years of experience.\* These engineers and the folks who back them up are highly experienced not only in repairs and maintenance...they're trained to serve your every need, to help and guide you all the way.

**YOU CAN AFFORD  
TO DEAL WITH NUMBER ONE!**

Want proof? See our new Rental Price Catalog. It shows how we combine LOWEST rental rates with highest technical skills. If you're not taking advantage of this unbeatable combination...you're losing money!

\*Among veteran employees with over 5 years of industry experience. (More than one hundred others are not pictured.)

These same fine technicians also do your repairs. Send your equipment in for free estimate.

Call or write for catalog.

**SOME OF OUR FILMSTRIP CUSTOMERS** bring in grocery cartons full of everything from cornflakes to handlettered signs. At CFI we make great filmstrips from the darndest material. Backed by special equipment, our experts specialize in converting all kinds of copy into filmstrips. *Different sizes of art?* We shoot flat copy up to 24" x 32" (32 field). *Products to shoot?* We'll photograph them into your filmstrip against a colorful background. *Need additional art? A skyline? Hand lettering? Type set on a cell overlay?* We can do. Or if you have an assortment of transparencies, we copy from 35 mm through 8 x 10 direct with no intermediate reduction step to cause loss of color or detail. *Quality?* We give you faithful color rendition with minimum contrast gain and frame to frame color correction to insure over-all balance. And our unique continuous-loop printing equipment assures you absolutely uniform filmstrip prints from scratch-free negatives. *How long?* Our normal delivery is one week. On super-rush jobs we'll work with you to meet a tighter deadline. *Need advice?* We'll answer your questions on the phone. Call Lou Livingston at HO 2-0881.

*Your filmstrip benefits from the superior facilities and technology that have been developed to meet the high standards of the motion picture industry.*

SPRING, 1966

## GIVE US TINT PRINTS'— SAY COLOR TV STATIONS

### TravelCinemas Open in Memphis, New Orleans, Seattle-Tacoma

TravelCinema airport theaters are now opening in Memphis, New Orleans and Seattle-Tacoma, with additional terminal show-places under construction in Seattle and Memphis. The Tucson cinema, which is completing its first year of operation, has been exceptionally well received by the thousands of air travelers who have attended.

The key to the success of the sponsored-airport theaters is their location. The size of the airport itself has little bearing on the number of persons who attend. Studies of theaters in various cities show. TravelCinemas are located near or in main waiting areas and convenient to ticket counters, restaurants, cocktail lounges and other passenger attractions.

(Continued on Page 4)

### Films Do Sell Travel',

### Travel News Affirms

Travel News, official publication of the American Society of Travel Agents, says the industry-sponsored travel film: "The selling power has been proved often." In a feature article, "Travel Films DO Sell Travel," quotes at considerable length from Association Films' recent survey of agents and gives examples of travel films we distribute. ASTA also mentions the travel film kit which we have prepared to help agents promote travel-film showings. (Incidentally, more than 800 of these kits have been ordered by agents all over the country).

JUDY COLLINS

### Sound of Sponsored Film Music

Soundtrack albums of the musical scores from sponsored films are becoming increasingly popular as limited-edition giveaways and other promotions. An interesting dual-impact feature is to have the music and narration on one side of a 33 1/3 LP and music alone on the reverse side.

Alcoa's album, "Words and Music from the Motion Picture, Change for the Better," produced by their agency, Fuller & Smith & Ross, Inc., has ten musical themes. The narration is by Douglas Fairbanks, Jr. The original score was written by Otis Clements who has written special material for Johnny Mathis, Mabel Mercer and others.

The Institute of Life Insurance has produced a 10-inch plastic record of Judy

(Continued on Page 4)

The color TV revolution is having its effects on public relations and free films.

Nine out of ten television stations with color equipment show free, sponsored films in color, according to a survey just completed by Association Films.

The survey also revealed:

- Eighty-nine per cent of the program directors would consider re-running free films originally televised in black and white.
- Color prints are preferred even for black and white telecasts.
- Travel and sports films are heavy color program favorites.
- Sixty-four per cent of the programmers would be interested in televising a good color series for color's sake alone.

Forty-seven per cent of the stations responding to the questionnaire stated that they are now equipped to originate local color programs both live and on film. Sixty-three per cent of this programming is film.

During the week, Monday through Friday, 26 per cent of the free-film color programs are shown before 9:00 a.m. Fourteen per cent are televised between the hours of 3:00 p.m. and 10:00 p.m. On weekends, 50 per cent of the films are shown between noon and 5:00 p.m. Noon to 3:00 p.m. is the heaviest period of color film telecasts: 51 per cent.

Only 21 per cent of the stations that televise free films in black and white prefer black and white prints, the survey also revealed. Thirty-one per cent prefer color prints, 40 per cent will accept either for televising.

The average number of free films televised in color each week is three, the 124

## Accent on Color

Color, like sound, has always intrigued moviemakers. From the earliest days attempts were made to bring color to motion picture screens. In the 1900's a few patient souls actually hand-painted prints frame-by-frame.

In the twenties "toned" prints came into vogue—blue for night scenes, amber for interiors, lavender for love (purple passion?). In 1926 Technicolor created a chromatic stir with the seagoing swashbuckler "The Black Pirate," starring Douglas Fairbanks. Two colors, printed on each side of the film, added greatly to the derring-do on screen.

For more than a decade the vast majority of sponsored films have been in color. It has been customary, too, for TV release prints to be black and white for reasons of economy primarily. Now, however, things have changed dramatically.

Our television survey published in this issue shows that nine out of ten stations equipped to originate color programs televise free films *in color*. Eighty-nine per cent will consider *re-running* color films originally televised in black and white.

For these reasons we are urging sponsors to make *all* release prints of color productions in color. Further, we are recommending that sponsors start replacing black and white prints with color where practicable.

Lest we be accused of seeing the future through Eastman-colored glasses, we would like to re-assert our belief in the importance of black and white as a cinema form. The black and white film will exist as long as there are motion pictures and TV screens. Only black and white can so heighten reality, convey truth with such devastating honesty and provide filmmakers with such flexibility and mobility.

## 'Message' Films

There's a Hollywood adage, attributed to various tycoons, which goes: "If you want a message, go to Western Union." The idea was that so-called "message" pictures were always poison at the box office.

Fortunately, most sponsored films are message films, not beholden to box office returns. They have something to say, a point of view to express, sometimes even an ideology to present. For example, "It's Your Decision—Clean Water," from the Soap and Detergent Association and the League of Women Voters, comes to grips with the water pollution problem and poses an answer. (Installation of secondary sewage systems.) Meo's "Change for the Better" challenges our earth-bound thinking with one of the most provocative and erudite scripts in years.

"The Road Ahead," from the National Urban League, deals with the problem of being a Negro drop-out and why a high school diploma is so essential to success in an affluent, computerized society.

We hope these films are contributing to "community dialogues" throughout the country. They've got meat and merit.

NEW HEADQUARTERS OF ASSOCIATION FILMS, 600 Madison Avenue, New York City. The more than 6,000 square feet on the 11th floor house the company's executive offices, promotion and public relations department, national sales offices and billing and accounting departments. A combination conference room and preview theater facilities for standard 16mm and CinemaScope projection, hi-fidelity sound, slide and film-strip projection, automatic curtain control, a dimmer system, sliding blackboard and presentation panels.

## PRU PROFILES:

### 'MAN OF THE MONTH'

Pope Paul VI, Dean Rusk, Ho Chi Minh and Dr. Michael De Bakey, famous heart surgeon, are the first of six international figures to be profiled in "Man of the Month" a new series within the series, "The Twentieth Century." The half-hour CBS-TV documentaries are in distribution to schools, colleges and community organizations as an educational service of The Prudential Insurance Company of America.

Since 1958, when "The Twentieth Century" first went on the air and into distribution through

Association Films, biographies have been among the most popular subjects with teachers and program chairmen. Among other personalities profiled are Winston Churchill, FDR, Woodrow Wilson, Franklin D. Roosevelt, William Lloyd Garrison, and Trotsky, Dag Hammarskjöld and General Marshall.

More than 39 million teachers and adults have watched "The Twentieth Century" films in classrooms and clubrooms. The films have been shown 71,000 times. The average audience booking is 140 persons, 4 per cent higher than the normal for sponsored films.

# NOW SHOWING: ALL OVER AMERICA!

**GUS FAIRBANKS, JR.** narrates thoughtful study of this century's challenges, "Change for the Better." The 28-minute EastmanColor film that man progresses as he "reaches the stars" even though they exceed his...

**MUSICAL GOBLETS**—This young lady learns about Sandwich glass and many other things in an imaginary journey in "The New England Heritage Trail", a new film from New England Life. The 28-minute color film was produced by Bay State Films.

**SIGHTS SEEING**—"Trek to the Tetons", the new Eastman Kodak outdoor spectacular might be subtitled "Two Dudes Go West". It tells of the adventures and misadventures of a pair of magazine writers attempting to do a picture story on wild game conservation. The shots of wild animal life have seldom been equalled.

**PRESIDENT JOHNSON** welcomes more than 70 young essay winners and honor recipients in a new film from the National Electric Cooperative Association, "Honoring Youth." The quarter-hour color feature follows the youngsters as they explore the Capital's wonders.

**ON THE "ROAD"**—227 miles in 22 minutes, sums up the new sightseeing scenic from the German Federal Railroad, "The Romantic Road." The bus tour, from the Main River to the Alps, has become one of the most popular attractions for American visitors.

**PUPPY LOVE**—Man's best friends are the stars of nine films from the Gaines Dog Research Center. Newest entry is "Bringing up Your Puppy", with hints on making him a happy, healthy member of the family.

**MISS AMERICA** — Ralph Edwards presents the lovely college queen in "The 11th Annual National College Queen Pageant", a color film from Best Foods Division of the General Foods Company. Fifty outstanding young women, one from each state, were selected, chosen for their scholastic achievements, personality and home economics skills, among other talents.

**"BOND" WAGON?** Agent 007 would undoubtedly find this slick, sleek experimental sports car very much to his liking. It's featured in the new Technicolor spectacular "Copper!", sponsored by Kennecott Copper Corp., and produced, written, photographed and directed by Lloyd Ritter of MPO.

**POLLUTION SOLUTION?** "It's Your Decision — Clean Water," a new animated quarter-hour, gives the whys and wherefors of water pollution (people — prosperity — products) and the practical solution: secondary sewage treatment. Co-sponsored by the Soap and Detergent Association and the League of Women Voters of the U.S.

## 'Baths And Babies', For Mothers, With Love

"Baths and Babies," Johnson & Johnson's worthy successor to "Bathing Time for Baby," is a delightful approach to baby care, refreshing for its candor and believability.

The increasingly-popular "candid" or "cinema verité" camera technique is used in a real-life situation: a demonstration to expectant mothers of the proper way to bathe a baby. The soundtrack contains the actual words of a professional nurse, the questions by the mothers and their off-camera comments. Post-natal sequences are perhaps the most charming as the camera shows the mothers with their own babies. Each is a delicate vignette of motherhood.

"Baths and Babies" was produced for J & J by On Film. Its predecessor from the Walt Disney studio was seen by millions of teenagers and women during the 15 years it was in distribution.

### New York Life Offers Business Letter Series

*Insurance companies probably receive, and reply to, more letters than any other businesses in the country. New York Life, aware of the fact that letters are the language of business, has produced a sound filmstrip series consisting of: "Dear Mrs. Calvin" (an 8½ minute strip that emphasizes friendliness in letterwriting), "The Language of Letters" (a 15 minute filmstrip created by cartoonist Jules Feiffer on the dangers of unclear communication) and "The Clay Ball" (a 16 minute slide-film on the importance of clarity, simplicity and directness in letterwriting).*

*The films are available for purchase, with 33½ rpm record, at \$15 for all three or \$6.00 each.*

## Airport Theatres

(Continued from Page 1)

Because movies, by their very nature, attract people, TravelCinemas are in open areas where the rear-screen units are visible to passengers going to and from boarding gates. Design of the theaters conforms to the architecture of the airport. For example, the Tucson TravelCinema is styled after the wild-west motif of the terminal.

Seats are arranged so that passengers can wander in easily, keep an eye on the clock (which is located next to the screen) and make their flights with time to spare.

Audiences are about 70 per cent male, executive or professional and business travel. Over 65 per cent are college or graduate school educated, making them a most attractive audience for sponsored motion pictures.

## TV STATIONS ARE 'DISCOVERING AMERICA'

Association Films' color travel series, "Discovering America", shows every indication of being the most successful television concept we have yet developed. More than 100 stations are running the series. At least 35 per cent of the telecasts are in color.

The success of "Discovering America" is attributable to several factors: 1) the special introduction by Vice President Humphrey, 2) the heightened interest in travel in an affluent society, 3) the international Discover America program supported by the travel industry in cooperation with the government, and 4) the traditional popularity of travel films with TV programmers. (See survey in this issue).

Among the new films being syndicated as part of the series are: "The New England Heritage Trail" (New England Life), "Accent on Youth" (National Rural Electric Cooperative Association), "Follow the Gulls" (Chesapeake Bay Bridge and Tunnel Commission), "The Short Way Around" (Firestone Tire & Rubber Company), "The Magic of the Bicycle" (Arnold, Schwinn), and "The 11th Annual National College Queen Pageant" (Best Foods Division of Corn Products Company).

"Discovering America" is being promoted throughout the travel industry by the National Association of Travel Organizations (NATO) and the American Society of Travel Agents (ASTA).

## Soundtrack Albums

(Continued from Page 1)

Collins' ballads from the new film "Time and a Place to Grow." The record will be distributed to educators by the Institute and mailed by Association Telefilms to TV program directors. Miss Collins is one of the most popular young folksingers in the business.

J. C. Penney has in limited edition the music scores from "Mexican Watercolor" and "One Peseta, Two Peseta", the company's newest travel-fashion films. The former features mariachi music of Mexico recorded on location. "One Peseta" is played by a "Tuna" band which includes violins, mandolins, guitars and medieval stringed instruments.

One of the first and most ambitious albums was the recorded score from "Rhapsody of Steel" composed by Dimitri Tiomkin and played by the Pittsburgh Symphony Orchestra.

"The Magic of the Bicycle", introduced "Discovering America".

## 'Chemistry at Work' New PPG College Series

Pittsburgh Plate Glass Company is sponsoring a college-level chemistry motion picture series, "Chemistry at Work". Seven color films have been completed so far. Titles include "Commercial Production of Chlorine", "Electrolysis of Brine," and "Commercial Production of Caustic Soda."

The purpose of the films is to provide simple classroom demonstrations and massive commercial applications of basic processes. Special consultant of the series is Dr. Jack C. Calvert of Case Western Reserve University. They are being produced by Dynamic Films.

The films are available for free loan to colleges and universities or may be purchased at \$55 each.

## Color Survey

(Continued from Page 1)

color-equipped stations answering the survey stated. The combined total of black and white and color transmissions was 1,500 films.

The films stations prefer, by subject matter, are:

1) sports, 2) travel, 3) education (industrial, informational, etc.), 4) science and related subjects, 5) art and lifestyle, 6) home service (foods, decor, etc.), 7) religious, agriculture and other miscellaneous subjects.

Ninety-five per cent of the color stations are now programming free, sponsored motion pictures in color. Half-hour length is preferred to quarter-hour and other lengths.

Replies were received from 266 commercial and ETV stations. There are approximately 565 commercial stations and 100 educational stations on the air at this time.

Copies of this questionnaire will be available shortly from Association of

*Sponsors Academy Award Telecast on April 18; Will Show Films' Useful Roles*

A television audience expected to exceed 100 million persons will have the opportunity to determine the role played by films and other audiovisuals used to improve classroom teaching effectiveness and business communications. According to an announcement by the Eastman Kodak Company.

The Kodak presentation is being offered to viewers of the 1966 Academy Awards telecast, on April 18, when a two-hour program will be presented under the sponsorship of the company. (10-12 PM, EST). Sequences designed to deliver the Kodak message will involve youngsters confronted with difficult classroom problems and find solutions through filmed explanations. Films in business, industry and science will be the subject of another sequence.

\* \* \*

*Survey Expanding Use of Audiovisuals in Vocational Classes in Poverty Program*

Don't underestimate the impact of the Administration's Poverty Program on expanded use of audiovisuals within U. S. industry, as well as in schools. Many firms are expanding programs for both academic and vocational education of socially-neglected young people. Identify this a potentially important source of manpower development. Labor shortages are acute enough in some areas to help spur the adoption of business firms.

Within such companies who are operating vocational programs on contract for the Federal Government (such as Federal Electric Corporation at the Kilmer Job Corps Center in Edison, N. J.), activities include the work of vocational specialists in Instructional Resources offices. While this work is in part supplemental, the need has been indicated for audiovisual materials.

\* \* \*

*Color Television Boom to Gain Momentum; Industry Begins Color Telecasts in October*

While color television heads for new records in sales, manufacture and acquisition in U. S. households in 1966 (and for 1967 the prediction is for six million color receivers to be sold) a similar color boom may be predicted for our neighbor to the North—Canada. When that country reverses the 1963 ruling of its Communications Board of Broadcast Governors (next year), it will benefit by experience in production, programming and set quality learned in the U. S.

Canadian standards in Canada are fully compatible with the U. S. and its present 55 television stations now reach 92% of the five million Canadian households. The official start of color TV in Canada is October 1st and at that time nearly all major stations (approximately 100) will start transmission of network and local color programs.

The U. S. presently has 670 television stations, a tremendous advance on the 107 stations operating in 1949. By next year, better than 75 per cent of major network programming will be in color.

# 5 Unique Powers of the Film Medium

**WHY FILM?**

Ask yourself what other medium guarantees full attention to your entire message. No print advertisement, no TV show, no brochure, not even the most hypnotic salesman can persuade a prospective customer or an unbeliever to sit quietly for 5 to 30 minutes and concentrate on your message.

Thanks to this unique environment, film can get your message over in the right logical progression of the message-points — without the prospect being able to interrupt, or worse, to skip ahead.

Film doesn't need to waste precious time on attention-grabbing "stoppers," because the viewer is already seated and attentive.

Film "carries its stinger in its tail," i.e., in its residual impression, and hence is free to implant important, though sometimes quiet, foundational material up front, with a solid effectiveness impossible in any other medium.

Finally — and perhaps most important — film implants its impressions in the form of *picture-images*. And since people tend to remember what they see better than what they hear, the impressions burned into their minds via film have a better chance to endure — to inform, persuade, inspire . . . and compel action: to motivate. — Cap Palmer

## CATHOLIC AUDIO-VISUAL EDUCATORS:

**OFFICERS:** Rev. Louis Rongione, O. S. A. (Villanova University), *President*; Rev. Raymond F. Valle, D. Ed., (Cand.), *Vice-President*; Sister Jean Philip, O. P. (St. Ailbe's Convent, Chicago, Ill.), *Secretary*; Rev. Bernard Butcher (St. Mary's Church, Meriden, Conn.), *Treasurer*.

**PURPOSE:** To further the use of Audio-Visual equipment and materials in Catholic education and to encourage production of suitable films for Catholic school use.

**ANNUAL CONVENTION:** CAVE is coordinating its Fifteenth Annual Convention with the National Catholic Educational Association national convention, April 11-14, 1966 at the Conrad Hilton Hotel, Chicago, Ill. Audio-visual equipment and materials may be exhibited at this joint convention. No registration fees are required.

## DEPARTMENT OF AUDIOVISUAL INSTRUCTION OF THE NATIONAL EDUCATION ASSOCIATION

**OFFICE:** 1201 Sixteenth Street, N.W., Washington, D.C. 20036. Anna L. Hyer, *Executive Secretary*.

**OFFICERS:** Kenneth Norberg (Prof. of Educ., Sacramento State College), *President*; Wesley C. Meierhenry (Asst. Dean, Teachers College, Univ. of Nebraska), *President-Elect*; John Vergis (Prof. of Educ., Arizona State Univ.), *Vice President*; Donald P. Ely (Dir., Center for Instructional Communications, Syracuse Univ.), *Past President*.

**DUES:** Individual, \$10 and \$15; Business, \$25 and \$50. Membership is approximately 6,000. A joint membership plan at a reduced rate of \$20 has been set up with the National Assn. of Educational Broadcasters.

**PURPOSE:** The improvement of instruction through the better, wider use of audio-visual equipment, materials and techniques. Membership consists primarily of directors and specialists in colleges and universities, state depts. of education, and county and city school systems. School supervisors and administrators, classroom teachers, librarians and audio-visual specialists in the armed forces, in industry and among religious groups are included in membership of this NEA a-v department.

**CONFERENCES:** National Convention: 1966, San Diego, Calif., April 24-29; 1967: Atlantic City, N. J., April 2-7; 1968: Houston, Tex., March 24-29. Summer meeting in connection with NEA Convention, Miami Beach, June 27. Lake Okoboji Educational Media Leadership Conference, August 21-25.

**ACTIVITIES, 1965-66:** DAVI has committees and commissions dealing with such areas as quantitative standards, teacher education, professional education of the AV specialist, school

plant design, technical standards for equipment, legislation, international relations, consultative service, research, and historical archives. DAVI participates in activities of international organizations such as World Federation of Organizations of the Teaching Profession, International Council for Educational Films. DAVI participates in state and regional audiovisual conferences and provides consultants for conventions of many national organizations: works on joint projects including the Educational Media Council, American Assn. of School Librarians, American Educational Research Assn.-American Psychological Assn., National Assn. of Educational Broadcasters, National Assn. for Industrial Educational Cooperation; and operates National Tape Repository of approximately 70 titles offering recording service for educational institutions.

**PUBLICATIONS:** Official organ is *Audiotape Instruction* (monthly except July and August); *AV Communication Review* (quarterly). Recent publications include: *Criteria for Instructional Media Programs in Elementary and Secondary Schools* (with Evaluative Checklist); *Criteria for Educational Media Programs in Higher Education* (with Evaluative Checklist); *Quantitative Standards for Audio-Visual Personnel, Equipment, and Materials in Elementary, Secondary, and Higher Education*; *Teaching Machines and Programmed Learning II: Data and Directions; Recommendations for Reporting the Effectiveness of Programmed Instruction Materials; Selection and Use of Programmed Materials* (12-inch recording accompanying filmstrip); *DAVI Membership Directory & Data Book; Handbook for Editors of State Newsletters*. (Complete publications catalog available upon request.)

**AWARDS and SCHOLARSHIPS:** Pioneer Awards for long-time service in the AV field given at each national convention; three scholarships for AV personnel — H. Wilson, Memorial and Programmed Instruction scholarships.

## THE EDUCATIONAL FILM LIBRARY ASSOCIATION

**OFFICE:** 250 West 57th Street, New York, New York 10019.

**OFFICERS:** Galon R. Miller, *President*; James L. Limbacher, *Vice President*; William J. Speed, *Secretary*; Emily S. Jones, *Administrative Director* (at headquarters).

**COMMITTEES:** Frederic Krahn, *Festival Chairman*; William J. Speed, *Nominations Chairman*; James L. Limbacher, *Membership Chairman*; Theo Betjemann, *Evaluations Chairman*.

**MEMBERSHIP:** (Constituent) — 570 non-profit educational institutions; (Service) — 75 commercial organizations and interested individuals; 4 international members (government agencies, film groups of other countries).

## WHAT PRICE SNOW?

(Being a coldly analytical look at motion picture production costs, and their relationship to real or imaginary communications barriers.)

There is a widespread impression that all motion picture producers learned their alphabets by reciting, "A roll, B roll, C roll". Not so. A few—mind you, a few—can talk to you in terms of your technology, your product and your market. And can talk with equal knowledgeability to research people, engineers, and top management. Their vocabularies include such terms as atomic absorption spectroscopy, microminiaturization, magnetic domains, computer control.

In the last year we've produced industrial films on each of these subjects. For some of the largest industrial corporations. Including the largest. Why? We talk their language. Technically. Economically.

Want to cut through the snow? Write today for our Film Fact Sheets—resumes of actual production costs on some of our more recent efforts. You won't have to take a course at Berlitz to get the meaning. Mutschmann Films, Plank Avenue, Paoli, Pa. (For sudden attention, call 215-647-1650.)

## MUTSCHMANN FILMS

**Now! An exciting new opportunity  
to tell your PR story to  
theatre audiences across the country:**

# CAVALCADE

**Sterling Movies USA presents a new low cost  
PR film series for companies  
and organizations that have a story to tell**

CAVALCADE is a news-and-feature film series in the great tradition of the theatre newsreel. Stories in CAVALCADE serve the hearty American appetite for information on meaningful events taking place around them every day. In striking wide-screen color, CAVALCADE achieves high impact in reporting on modern science, travel, fashions, industry research and development, trends in education . . . in fact, any activity of interest to discriminating theatre audiences.

If you've got a story to tell — and who hasn't? — get in touch with us about theatre CAVALCADE. In less than a year, you can reach approximately 2,500,000 people under ideal viewing conditions. And at a cost which will surprise you.

Call or write at any of the Sterling Movies addresses below — or use our coupon so we can add up the response to this announcement.

**FILM PRODUCERS:** CAVALCADE offers you a unique opportunity to extend the reach of your clients' film programs. Discuss with us how your current projects can include a CAVALCADE segment at small additional cost.

# IT'S OUR 30TH ANNIVERSARY

But what can  
we say about it?

Not too much, really.

We like making good films  
... films that persuade  
and excite ...

films that move products  
and people ...

films that make good sense.

At 30, a film company  
is old.

But we're not.

Just ask anyone who  
knows us or who has seen  
our films.

Even better, drop in  
some day.

We make pretty good  
conversation, too.

You'll find us  
in new offices at

28 West 11th Street  
New York, N.Y. 10036

Martin (Pope, Ballard & Loos), *Counsel*; Dickson Loos (Pope, Ballard & Loos), *Assistant Treasurer*.

**BOARD OF TRUSTEES:** Elmaar Bakken (Boy Scouts of America); Mrs. Edith T. Bennett, *Exec. V. P.*; Henry O. Bercher (International Harvester Co.); William T. Brady (Corn Products Co.); Mrs. Anna Breckenridge (Potomac Grange); Rober Corbett (New Mexico State University); P. O. Davis (Assn. of Land Grant Colleges); Beatty H. Dimit (National Grange); Roger Fleming (American Farm Bureau Federation); Ken Geyer (Connecticut Milk Producers' Assn.); James E. Gibson (Peace Corps.); N. John Hansen (National Assn. of County Agricultural Agents); H. G. Hawes (Maine State Dept. of Agriculture); Karl D. Loos (Pope, Ballard & Loos); Herschel D. Newsom (National Grange); E. M. Norton (National Milk Producers Federation); Mrs. Haven Smith (Women's Committee, Am. Farm Bureau Federation); J. K. Stern (American Institute of Cooperation); Carroll Streeter (Farm Journal); R. Douglas Stuart (Quaker Oats Company); Webster Tenney (Future Farmers of America); J. Jerome Thompson (Chas. Pfizer & Co.); Francis Wilcox (National Council of Farmer Cooperatives); P. O. Wilson (National Live Stock Prod. Assn.).

**HONORARY LIFE MEMBERS:** Earl W. Benjamin, Frank W. Jenks, James A. McConnell, Wheeler McMillen, Mrs. Raymond Sayre, William T. Spanton.

**BOARD OF CONSULTANTS:** Roy Battles (Clear

Channel Broadcasting Service); E. G. Gerbonnier (Foundation for American Agriculture); Ott Coelln (Business Screen Magazine); Don Donnelly (American Farm Bureau Education); Kit H. Haynes (National Council of Farmers Cooperatives); Wib Just (National Grange); J. Don Parel (Association of America Railroads); Val Sherman (National Milk Producers Federation); C. Maurice Verling (Ohio Farm Bureau Federation); Lou H. Wilson (National Plant Food Institute); J. Wyatt (Missouri Farmers' Association).

**MEETINGS:** The Trustees meet each year in June. The Board of Consultants meet to screen films on call of the Executive Vice President.

**PURPOSE:** The creation of better understanding between rural and urban America through audio-visual education.

**ACTIVITIES:** (1) Distributes through its main office and cooperating depositories 16mm motion pictures found suitable by Board of Consultants for Foundation endorsement. Distribution is principally to rural America. There is no cost to film users except for return postage. There is, however, a small library of special purpose rental films maintained at the main office. (2) The Foundation, through its contacts with all phases of rural America, makes available a unique consultation service to film sponsors and producers.

MEETINGS: Held semi-annually at the same time and place as the Society of Motion Picture and Television Engineers' conventions. •

Where in the world is Bay State ... ?

Well, last year alone, our clients sent us to Canada, Mexico, France, England, Scotland, Trinidad, Puerto Rico, and Surinam. Of course, most of our production work is done right here in the good old U. S. A. . . .

for a roster of Blue Chip clients of whom we are justly proud.

During the year, our films picked up three more Top Awards, too.

If you need a first rate, creative film presentation, then act like our clients! Just pick up the phone and tell us where to go. We will

## TRADE ORGANIZATIONS:

### CANADIAN PRODUCERS & LABORATORIES:

tion picture production or laboratory work are eligible for Active Membership. Persons, firms or organizations acceptable to the membership and interested in the furtherance of the motion picture industry in Canada are eligible for Associate Membership. Present membership: 58 Active Members; 14 Associate Members; Total 72.

**PURPOSE:** To promote the common interest of those engaged in the motion picture production and laboratory industries in Canada by maintaining the highest possible standards in the production of motion pictures for commercial, theatrical, or television release; to represent the industry in its relations with government, other associations and the public at large; to encourage government agencies to have required films let by tender to private producers.

**1966 ACTIVITIES:** 1. To continue to promote the position of the Canadian private film production industry. 2. To encourage all governments and government agencies to let more and more film production to private producers via tender and to do less internally. 3. To acquaint advertisers with the value of film by making specific presentations to the members of the Association of Canadian Advertisers. 4. To work helpfully with the Federal Government in bringing into effect a bill expected to be presented in the House of Commons this year, outlining a program of financial assistance for feature film production. 5. To assist in staging a new and striking Canadian Film Awards presentations night in Montreal on May 6th.

### FEDERATION OF SPECIALIZED FILM ASSOCIATIONS

**OFFICE** (of the Secretary): 2, Bouchier Street London, W. 1, England. Telephone: REGent 3781. J. Neill Brown, M.A., *Secretary*.

**PURPOSE:** The Federation represents and promotes the interests of all branches of the specialized film industry through its constituent member Associations: (1) Association of Specialized Film Producers representing the pro-

ducers of cinema shorts, documentaries, sponsored industrial and Government films (2) Advertising Film Producers Association representing producers of advertising films for television and cinema. (3) British Animation Group representing producers of cartoon, animated diagram, special and model animation films. Each Association is represented on the Federation Council by its Chairman and Vice-Chairman and elected representative.

### SCREEN ADVERTISING WORLD ASSOCIATION LTD.

**OFFICE:** 35 Piccadilly, London W.1, England. Cables: FESTFILM LONDON W.1.

**OFFICERS:** Jean Mineur, *President*; Ines Pearl, *Honorary Life President*; Pax Mren and Per Onner, *Vice Presidents*; Peter Tlor, *Director General*.

**PURPOSE:** To promote and develop cinema screen advertising on an international basis to assist in the promotion and trade among members of the Association by provision of distribution facilities and a central information service; and by arranging for the exchange between members of information for their mutual assistance.

**1966 ACTIVITIES:** The Association is responsible for the organization of the International Advertising Film Festival. The 13th International Advertising Film Festival will be held during the period June 13-18, 1966, at Venice, Italy, under its auspices.

**INTERNATIONAL ADVERTISING FILM FESTIVAL** (CONTINUED FROM THE PRECEDING PAGE) vision. In the Cinema Group the new category introduced in 1965 for films of all techniques except Cinemascope up to 10 metres in length will be continued. The remaining categories will provide for films ranging from 10 metres to 110 metres in Live Action, cartoon, Animated Objects, etc. In the Television Group there will be a category for all techniques other than Live Action up to 20 seconds and one category for Live Action clips up to 20 seconds in length.

**JURIES:** Two international juries, one for the Cinema and the other for the Television group will be selected to judge all the entries.

## "The Journey"

An Owen Murphy Production

Produced for the  
U.S. Information Agency

## Dear HFE:

Everybody talks about fast service. Please tell us what YOU mean by it.

## Dear Lab Customer:

To us, speed means *same-day processing of your color originals* and giving you daily color prints.

At HFE, speed means daily processing of B&W negative and reversal . . . Ektachrome Type 7255 . . . Ektachrome E. R. Type 7257-7258 . . . Ektachrome M. S. Type 7256.

It means using our own *in-plant equipment* for processing Ektachrome Commercial . . . and using five additive printers so incoming work immediately becomes outgoing work—not piling-up work. (*The printers, incidentally, are built for super-quality. Filter changes provide for color correction of inter-negs or masters or color prints.*)

Sometime you might also ask what we mean by *quality, safety, and service*. They're all part of the same package.

Meanwhile, since "The proof of the pudding is in the eating," you can find out exactly what these terms mean, at HFE, with a personal visit and inspection of facilities—and/or a trial order. Do it soon, won't you?

*For complete PERSONALIZED 16mm Laboratory Service—*

## Civic and National Film Council Groups:

### THE CHICAGO FILM COUNCIL:

*dent:* Jerry Curto, Jr. (Santa Fe Railroad), *Vice President:* Phil Tobin (Contemporary Films, Inc.), *Treasurer:* Frank Bronwell (Chicago Cinema Club), *Program Director:* Gloria Janis (Argonne National Laboratory), *Secretary:*

*DIRECTORS:* Dr. Philip Lewis (Chicago Board of Education); Darryl Miller (Am. Dental Assn.); Richard Edmundson (Illinois Public Aid Commission); William Kruse (Audio-Visual Media, Inc.); John Colburn (John Colburn Assoc.); Bernard Mack (Filmack Studios); Donald Buck (Coronet Films); Esther Altschul (Journal Films, Inc.); Robert Konikow (Advertising & Sales Promotion); Frank Greenleaf (U.S. Steel Corp.); George Tressel (Argonne National Lab.); Jack Lusk (Modern Talking Pictures).

**PURPOSE:** The purpose of the Council is to promote, improve, and extend the use of films and other audio visual materials for commercial, informational, cultural, and socially constructive purposes, and to seek progressive methods of film production, distribution and effective use of films.

**MEETINGS:** Third Thursdays of month, noon luncheon at Stouffer's Restaurant, Fiesta Room, 26 Madison Street.

### THE FILM COUNCIL OF GREATER COLUMBUS

**OFFICES:** Center of Science and Industry, 280 E. Broad Street, Columbus 15, Ohio, and Film Dept., Columbus Public Library, 96 So. Garnt Avenue, Columbus, Ohio.

**OFFICERS:** Dr. D. F. Prugh (Director, Franklin County Historical Society), *President:* Galvy Gordon (Public Relations Dir., Columbus Public Library), *Executive Vice-President:* Kenneth B. Hobbs (Battelle Memorial Institute), *Vice President:* Mary A. Rupe (Film Librarian, Columbus Public Library), *Secretary-Treasurer:* Samuel E. Blackwell, *Program Chairman:* E. H. Gillis, *Director of Public Relations.*

**TRUSTEES:** G. Roger Cahaney (Executive Vice President, Sterling Movies U.S.A.); Dr. Edgar Dale (Research Associate of the Bureau of Education, Ohio State University); Carl M. Lenz, (President, Modern Talking Picture Service); Dr. Alfred Garrett (Vice President for Research, Ohio State University); Dr. Robert M. Wagner (Director of Motion Picture Division, Ohio State University); Charles W. Vaughn (Director of Communications Arts Department, Xavier University); Robert Finchout (Vice President, Association Films).

**PURPOSE:** To promote a greater interest in the production and use of films by schools and universities, public service organizations, civic groups, and business firms and industries. The

use of films by these organizations in the Columbus area and the state is also stressed.

**1966 ACTIVITIES:** The 14th Annual Columbus Film Festival will take place October 7, 1966. This year's Chris Award banquet will be held at the Fort Hayes Hotel on Friday evening, October 7. Something new has been added to the Festival celebration. For the benefit of all producers, sponsors or their representatives, award-winning films will be shown in the entirety. These screenings, known as "Producers Showcase," will be held at the Fort Hayes Hotel on Friday afternoon. Public screening of Chris Award films will take place on Saturday and Sunday, October 8 and 9 at Battelle Memorial Institute. A speaker will replace film clips at the Chris Award Banquet, October 7.

### THE CANADIAN FILM INSTITUTE

**NATIONAL OFFICE:** 1762 Carling Avenue, Ottawa 13, Ontario, Canada.

**OFFICERS:** His Excellency Major-General Georges P. Vanier, DSO, MC, CD, Governor-General of Canada, *Honorary President;* Jen Clavel, *President;* A. L. Hepworth, *Vice-President;* G. Delisle, *Vice President;* Dr. L. Hanson, *Honorary Treasurer;* Roy Little, *Executive Director;* G. F. Noble, *Acting Director.*

**DIVISIONS:** Canadian Film Archives, Canadian Federation of Film Societies, Scientific Film Division, Business Film Service.

**PURPOSE:** To bring together Canada's educational, scientific, cultural and community interest in the field of documentary films and to encourage and promote the study, appreciation and use of motion pictures and television as educational and cultural factors.

**ACTIVITIES:** Distribution—National Film Library (8,000 titles in 32 special collections); National Science Film Library established June, 1962, Peter Morris, *Director;* Importation of films from other countries; Information Service; Preservation of films of historic interest; Distribution of sponsored films; Canadian Film Awards; Special services in the field of business films, scientific films, films on a film for UNESCO's East-West project, medical films, etc.

**PUBLICATIONS:** Bulletin, Catalogues, Special Subject Listings of Film Societies, Information Sheets on selected entertainment films, C.F.F.S. Bulletin.

**COMMITTEES:** Canadian Film Awards, Canadian Film Archives, Canadian Labour Film Committee, Canadian Centre of Films for Children are represented by committees.

Bureau of Mines Releases New Color Film On Helium  
The unique properties of helium, which have made it indispensable to science, industry and national defense, is the subject of a new 28-minute color film now available on free loan from the film library of the Department of the Interior's Bureau of Mines, 4800 Forbes Ave., Pittsburgh, Pa. 15213.

Sponsored by four industrial firms playing key roles in the nation's helium conservation program (Cities Service Helix, Inc.; North Helix Co.; Phillips Petroleum Co.; and National Helium Corp.), the film was produced by F. K. Beckel Productions, with animation explaining the atomic structure of the gas as well as many scenes showing modern applications, including pressurization of rocket and missile fuel tanks, shielding of reactive metals from contamination during arc welding, dilution of anesthetics in operating rooms to help prevent explosions, leak testing of refrigerators and air conditioners, and heat-transfer in atomic reactors generating electric power.

Nat'l Boat & Engine Mfg. Show Press "Marina" In...  
The National Association of Engine and Boat Manufacturers, Inc. has previewed its new motion picture "Marina" at a press show here on Wednesday, March 10. The Johnny Victor Telecast of the RCA Exhibition in New York City. The picture is expected to gain national distribution later in the Spring months.

Tire Production Pictured in New Firestone Film  
The Firestone Tire & Rubber Company has just released an informative film on tire production, "For Every Wheel That Turns". The 16mm color picture explains the many complex phases of tire production, depicting some of the hundreds of uses of rubber in modern transportation. The film is being distributed by Association Film and will be available to television stations, schools, churches, civic groups.

and *General Mgr.*; James Bach, *Sales Mgr.*

BACKGROUND: Founded in 1911 (as "The YMCA

Movie Picture Bureau," a division of the Inter-

national Committee of the YMCA's), Association

Films was the first sponsored film distributor in

America. In 1949, the company was incorporated

as an independent national distribution service.

SERVICES: Promotion and Publicity: Promotes

sponsored films through catalogs, special supple-

ments (directed to teachers and program chair-

men), advertising in educational and adult jour-

nals, individual film brochures, exhibits at con-

ventions, publicity services. Print Inspection and

Maintenance: prints are electronically cleaned

and inspected after each use; repairs are made

expedited and replacement prints ordered on

director's authority; scratched prints are given

ultra-New treatment, as authorized; during the

past 36 months of print life Association Films

has in replacement costs due to damages.

Monthly Reports: sponsors receive detailed per-

formance reports (IBM) which give audience

gender and composition; film-user evaluations and

comments; course of study where film was used;

bookings and showings (current, year-to-date,

and cumulative); summary of coverage by

cities; and other data about performance and

audiences. Programming Services: confirmation

and advance booking notices are sent to users

and sponsors on a daily basis; bookers assist

organizations in arranging programs and special

distribution concepts (Movie-A-Week, Films for

Travel, etc.). Library Service Plan: a profes-

sional "physical handling" service for sponsored

libraries that provides all regular services

except promotion, as desired) and includes

Director Imprinted forms.

ASSOCIATION TELEFILMS: This division is respon-

sible for the distribution of sponsored films to

commercial and educational TV stations. It main-

tains daily contact with TV programmers, creates

sponsored-film series and special concepts, pre-

pare TV promotion kits, publicizes sponsored films in "TV Guide" and local newspapers and distributes newsclips and scripts to TV news departments. Current AF-TV series include: *Kyle Rote's World*, *Discovering America*, *Films for Freedom*, *Your Neighbor - The World*, *Theatre 30*, *Achievement*, *World in Focus* and *This Acro-space Age*, all comprised of sponsored films.

THEATRICAL DISTRIBUTION: Through the booking services and facilities of Theatrical Film Distributors, Association Films places sponsored films in motion picture theatres. Monthly reports, comment cards and advance booking notices are provided; promotion is sent to theatres and 31 exchange-city bookers; publicity stories are sent to theatrical trade magazines.

ASSOCIATION INSTRUCTIONAL MATERIALS: This division of Association Films handles the sales, long-term leasing and rental of educational, training and special purpose films and filmstrips. •

**BACKGROUND:** The outgrowth of a pioneering program in the field of talking motion pictures by Electrical Research Products, Inc., a subsidiary of the Western Electric Co., formed in 1927 at the birth of the commercial sound motion picture medium, Modern Talking Picture Service first emerged as the non-theatrical department of that company. An early pioneer in the licensing and operation of portable projection service for industry, etc., Modern's present trade name was adopted by its licensees in 1935 and Frank Arlinghaus, then of ERPI, was placed in charge of this growing activity. Modern became an independent corporation on July 1, 1937, under the ownership and management of its distribution employees.

**SERVICES:** In 1965 in its 28th year, Modern represents over 100 organizations from industry, commerce and the professions, distributing their public relations films to schools, colleges, industrial plants, offices, and to the public and private clubs, and social groups throughout the United States and Canada. Other primary channels of distribution in which Modern is a leading specialist include: the direct showing of sponsored short subjects, television stations. Modern operates a network of 32 regional libraries. For sponsors utilizing its service, the company promotes, ships, cleans, repairs, maintains and stores their films. Additionally, it counts audience attendance, records their comments and furnishes the sponsor a monthly tabulation. Extensive IBM facilities and equipment for promotion accounting are maintained at New York headquarters. All regional libraries are equipped for complete film inspection and handling. In 1960, Modern established the Modern Learning Aids division to distribute educational films for purchase, subscription (lease-to-own) and lease-to-buy. Modern distributes

film series developed by the Physical Science Study Committee, CHEMstudy, Colonial Williamsburg, SMCG, and others.

**REGIONAL EXCHANGES** are located in Anchorage, Alaska (811-8th Ave.); Atlanta, Ga. (714 Spring St., N.W.); Boston, Mass. (1168 Commonwealth Ave.); Buffalo, N.Y. (1122 W. Chippewa St.); Cedar Rapids, Ia. (129-3rd Ave., S.W.); Charlotte, N. C. (501 N. College St.); Chicago, Ill. (160 E. Grand Ave.); Cincinnati, Ohio (9 Garfield Pl.); Cleveland, Ohio (2238 Euclid Ave.); Dallas, Tex. (1400 Slocum St.); Denver, Colo. (922 Bannock St.); Detroit, Mich. (14533 Second Ave.); Harrisburg, Pa. (928 N. 3rd St.); Honolulu, Hawaii (712 Ala Moana Blvd.); Houston, Tex. (4081 Westheimer Rd.); Indianapolis, Ind. (102 E. Vermont St.); Kansas City, Mo. (3718 Broadway); Los Angeles, Calif. (2400 W. 7th St.); Memphis, Tenn. (214 S. Cleveland St.); Milwaukee, Wis. (1696 N. Astor St.); Minneapolis, Minn. (1114 Nicollet Ave.); New Orleans, La. (715 Girod St.); New York, N. Y. (1212 Ave. of the Americas); Omaha, Neb. (1410 Howard St.); Philadelphia, Pa. (1234 Spruce St.); Pittsburgh, Pa. (910 Penn Ave.); St. Louis, Mo. (621 N. Skinker Blvd.); San Francisco, Calif. (16 Spear St.); Seattle, Wash. (2100 N. 45th St.); Summit, N. J. (315 Springfield Ave.); Washington, D. C. (927-19th St., N.W.); Don Mills, Ontario, Canada (1875 Leslie St.).

**SPECIAL ACTIVITIES:** A physical handling services is maintained for technical professional and special films. Recent references for sponsor reading (available on letterhead request or by telephone from listed sales offices) include: *The Modern Fact Book of Sponsored Film Distribution; Business Films at the Movies; How to Reach the Television Audience with Business Sponsored Films; The Teen Age Market; and How To Hit The Bull's Eye With Your Business Motion Picture.*

**SKYPORT CINEMA:** Free movie lounges in airport terminals now operating in Atlanta, Cincinnati, Cleveland, Denver, Kansas City and Minneapolis. Films provide entertainment and information for waiting passengers and are shown continuously for about ten hours each day.

**MODERN MARKETING PROGRAMS:** Handles the sale and rental of business programs to industry; also coordinates marketing programs in the sponsored film field.

Douglas D. Rothacker, Jr., *President*

W. Stanheld Cooper, *Vice-President*

Edward F. Psotta, *Vice-President*

Mayme R. Dawson, *Secretary-Treasurer*

**BACKGROUND:** Established in 1910 as the Rothacker Film Manufacturing Co., pioneer producer and distributor of sponsored films, the organization was subsequently reorganized as Rothacker, Inc., and is currently engaged in specialized business film distribution throughout the world.

**SERVICES AND OPERATIONS:** Distribution of sponsored business films through theatrical, non-

theatrical and television outlets is handled through the New York office and the various distributors throughout the United States and Europe. Emphasis is put upon reaching exactly the audience the sponsor wishes to reach; and this individual approach is accomplished through selective promotional campaigns, audience selection, publicity and physical handling done on a separate basis for each film. A general catalog is not published since each title receives an extensive handling, thus assuring the sponsor complete identification and a closer tie-in with his film. Prints are all hand-inspected, read, cleaned and repaired and a complete maintenance on condition of each print. An individual print breakdown with classification ways available and print lifetime guarantee a part of the service. Monthly exhibition reports sent with full information of each showing. Special questionnaires and personal attention at screenings provide additional information that can be keyed to supplement companies' other public relations efforts.

**FOREIGN DISTRIBUTION:** In addition to full coverage throughout the United States and Canada, Rothacker, Inc., offers international distribution service for Europe and the Orient. The main basis of operation is from Germany with distributors located in England, France, Scandinavia, the Benelux countries, Italy and Switzerland. The foreign distribution is handled in exactly the same manner as the domestic with emphasis on audience selectivity and a high standard of the circulation of each film title. This type of activity continues to grow throughout Europe, the number of specific outlets in specialized categories continues to increase.

WE HAVE TALKED A LOT ABOUT HOW FUSSY WE ARE WITH PRINT CARE AND INSPECTION. BECAUSE OF THIS EMPHASIS, WE NOW CAN OFFER A TWO YEAR PRINT GUARANTEE THAT WILL MAKE US RESPONSIBLE FOR NEW PRINTS AND REPLACEMENT FOOTAGE, NO MATTER HOW ACTIVE YOUR DISTRIBUTION PROGRAM. NO POINT IN REPEATING HOW IMPORTANT EXCELLENT PRINT CONDITIONS ARE TO YOUR COMPANY — WE ARE SURE THAT YOU REALIZE THIS. AND NOW THE UNKNOWN FACTOR OF DISTRIBUTION BUDGETS CAN BE ELIMINATED BY YOUR KNOWING EXACTLY HOW MUCH YOUR CIRCULATION PROGRAM WILL COST YOU. THERE WILL BE NO ITEM FOR REPLACEMENT PRINTS OR FOOTAGE FOR AT LEAST TWO YEARS — THIS WILL BE OUR RESPONSIBILITY. WITH OUR SERVICE YOU STILL WILL HAVE THE ASSURANCE THAT EVERY SHOWING MADE WILL REFLECT THE BEST OF YOUR ORGANIZATION.

# Our Competitors Are Very Good!

We are one of the many fine motion picture laboratories contributing to Chicago's reputation as a professional film center. In fact, our competitors are so good that it is not easy to stand out in the crowd.

But we have the answer.  
It is a new concept of service.

- . . . Immediate service.
- . . . Quality service.
- . . . Personalized service.

We specialize in immediate controlled processing of 16mm Ektachrome Reversal and black and white negative and reversal film. We also provide a complete range of laboratory services geared to your immediate production needs.

For information, phone or write Joseph Palese, our laboratory supervisor. He will give your inquiry his immediate attention.

**BACKGROUND:** United World Films was organized in 1946. It is part of the Music Corporation of America, which includes Universal Pictures, Decca Records, Inc., and MCA-TV, Inc. In 1946 United World Films purchased the Bell Howell Film-O-Sound library which is the largest film library operating in the United States. In 1946 United also purchased outrightly the largest producer and distributor of 8mm and 16mm sound and silent motion pictures. **SERVICES:** Since its organization, United World Films has distributed sponsored films found in industry. Distribution is conducted for non-theatrical television and theatrical audiences through distribution offices located throughout the United States. United also produces and distributes classroom teaching films to the nation's schools and makes available on 16mm film all of its own company (Universal) feature theatrical titles along with selected features from Paramount and Arthur Rank. Demand for its films comes from clubs, business organizations, colleges, universities, high schools, women's organizations, fraternal groups, etc. These audiences are constantly increasing and United uses this source for new audience contacts for distributing their clients' sponsored films. In the distribution of their clients' 35mm sponsored films, United utilizes the theatrical knowledge, experience and contacts of Universal Pictures, its parent company. By reason of its affinity with MCA, United has the added opportunity to be in constant contact with the program departments of television stations throughout the country. These contacts are used by United in arranging showings for clients' films.

**PROMOTION AND PUBLICITY:** United not only produces individual advertising and brochures for each of their clients' pictures, but also handles the extra advertising exposure via listing in other film catalogs produced by the company and distributed to 16mm audiences. United maintains booths and exhibits at the important conventions and audio-visual demonstration centers throughout the world.

**PRINT SERVICES AND MAINTENANCE:** Because it is part of a professional motion picture distribution organization, United maintains the highest standard of inspection. Prints are inspected and cleaned utilizing the latest electronic equipment. Scratched prints are repaired under a special film coating process. United also shares the cost of replacing any prints damaged during the early years of distribution.

**FILM USERS EVALUATION REPORTS:** Certified attendance report forms are supplied to the exhibitor on every showing.

**MONTHLY REPORTS:** The sponsor receives a detailed performance reports which supply accurate information by type and size. A detailed report (CONCLUDED ON THE FOLLOWING PAGE)

The star (★) over listings in these pages indicates display advertising in this issue.

**DEPARTMENT OF DEFENSE**  
**Office of Public Affairs: Directorate for**  
**Information Services—Audio-Visual Division**  
 The Pentagon, Washington, D. C. 20301

This division is the central Armed Forces connector for news media and producers in the important fields of radio, television, still pictures and motion pictures. Direct contacts on national and international release matters in these fields are:

**Robert W. Harvey, Deputy Director**  
*Information Services (Audio-Visual)*  
 Phone: OXford 7-1162

**Norman T. Hatch, Chief, Radio-TV**  
*News Branch*  
 Phone: OXford 7-5111

**Major F. N. Satterlee, USAF, Chief, News**  
*Photo Branch*  
 Phone: OXford 7-1252

**Donald E. Baruch, Chief, Motion Picture**  
*Production Cooperation Branch*  
 Phone: OXford 7-4596

**ACTIVITIES:** The Motion Picture Production Cooperation Branch approves release of Armed Forces stock footage which cannot be procured commercially for newsfilm television programs, theatrical productions, etc. The Branch cooperates with producers of some 35 major theatrical productions and 10-12 TV series featuring or relating to the Armed Forces. Information on Armed Forces films available for public non-profit showing cleared for public service TV programs can be obtained from the Motion Picture Production Cooperation Branch.

The Radio-TV News Branch releases approximately 275 (2-3) minute subjects to the TV, newsfilm and theatrical newsfilm media annually. It maintains two small Pentagon studios for servicing the news media and radio programs, which feature interviews with top Defense officials. In addition, the Radio-TV News Branch releases taped and filmed messages by Secretaries and Service Chiefs provides advice and guidance to documentary film and TV producers on military subjects.

The News Photo Branch releases to the press and television approximately 2,000 photographs per year.

**PRODUCTIONS:** The only film directly produced by the Office of Public Affairs for the Secretary of Defense is an annual film report on the progress and achievements of the Armed Forces. It is expected to be available in April, 1966.

**Armed Forces Institute of Pathology**  
**Medical Illustration Service**

**Morris M. Goldberg, Chief, Medical**  
*Illustration Service*  
 Phone: 576-2866

**John A. Ey, Jr., Asst. Chief, Medical**  
*Illustration Service*  
 Phone: 576-2867

**James N. Young, Chief, Training Aids Division**  
 Phone: 576-2865

**Miss Daisy B. Howze, Chief, Audio-Visual**  
*Support Center*  
 Phone: 576-2864

**ACTIVITIES:** This Institute makes or supervises films for the Armed Forces on medical subjects.

**FACILITIES:** In-house capability, and contracts through the Army Signal Corps.

**DESCRIPTION:** AFIP operates a U.S. Army Signal Corps film exchange for medical films. The Institute procures and loans films for the Medical Services of the Armed Forces wherever and whenever they are needed. Unclassified films are available to members of the medical profession, without borrowers paying return postage. For information about available films, write the Government Printing Office, Washington 25, D.C., and refer to *The Film Reference Guide - Medical and Allied Subjects*.

**Directorate for Armed Forces**  
**Information and Education**

**Paul J. Murdock, Chief, Motion Picture**  
*Division*

Phone: OXford 7-2967

**Dallas Halverstadt, Assistant Chief**  
 Phone: OXford 7-2967

• This office produces and distributes information films for the use of the Armed Forces. Films are distributed through the film exchanges of each service, through on-base theaters, and to Armed Forces TV networks in 31 overseas locations.

**DEPARTMENT OF THE AIR FORCE**

The Pentagon, Washington, D.C.

• The U.S. Air Force produces approximately 400-500 reels of film each year by contract with commercial producers or in-service. These films are used by all levels of management for education, training and informational briefings.

**ACTIVITIES:** Headquarters, USAF at the Pentagon, Washington, D.C. The management focal point within the Air Staff for all photographic policy is the Audio-Visual Systems Division, Directorate of Operations. Complete address is:

Hq U.S. Air Force  
 AFXOPNB  
 Washington, D.C. 20330

The key personnel in charge of the program are:

Lt. Col. Lewis S. Clement, Jr.  
 Thomas E. Farmer

This office is responsible for determining or validating requirements for all Air Force motion pictures and insuring that the capability exists within the Air Force to either procure them by contract or produce them with in-house facilities. In this respect, they monitor the Aerospace Audio Visual Service. This organization is a technical service under the Military Air Transport Command and is directly responsible for producing or procuring films, adequate photographic documentation of the total Air Force mission and distribution of release prints.

**FACILITIES:** The Aerospace Audio Visual Service, Orlando, AFB, Florida, is the headquarters for the Air Force world-wide photographic program. Complete motion picture production facilities located at the 1365th Photographic Squadron, Orlando, AFB, Florida, and at the 1352nd Photographic Group, Los Angeles, California, support Air Force-wide production requirements.

1350th Motion Picture Squadron, APCS, Wright-Patterson AFB, Ohio, is responsible for contract procurement and commercial production of Air Force films, and provides in-service engineering and film report type productions to Technical Commands. The 1350th Motion Picture Squadron also maintains the USAF Film Depository, a film archive with historical and current film footage holdings in excess of 99,000,000 feet.

APCS also maintains photographic units at Vandenberg AFB, Lompoc, Calif.; Ent AFB, Colorado Springs, Colo.; and Andrews AFB, Camp Springs, Md. to provide documentary and instrumentation coverage of Air Force missile and other activities. APCS also maintains combat documentary teams capable of rapid deployment anywhere in the world. These teams are permanently located at March AFB, Riverside, Calif.; Offutt AFB, Omaha, Nebr.; and Westover AFB, Chicopee Falls, Mass. Photographic Detachments are also located overseas, in the Far East, Europe and certain other areas of the world, to provide historical and combat documentation film coverage of important events of national and Air Force interest.

Additional information regarding the Air Force Film Program may be obtained by contacting:

Col. William S. Barksdale, Jr.  
 Commander, Aerospace Audio Visual Service,  
 Orlando AFB, Florida 32813  
 Phone: (305) 841-5611, ext. 501

# A-V PROGRAMS OF THE FEDERAL GOVERNMENT

## DEPARTMENT OF THE AIR FORCE:

Col. James P. Warndorf, *Deputy Chief of Staff, Photography, Air Photographic & Charting Service, Orlando, AFB, Fla. 32813*  
Phone: (305) 811-5611, ext. 2226

- Specific information regarding the Commercial Production of Air Force films may be obtained by contacting:

Lt. Col. Peter Boyko, *Commander*  
1350th Motion Picture Squadron, APCS  
Wright-Patterson AFB, Ohio 45433  
Phone: Clearwater 3-7111, ext. 53058

**DISTRIBUTION:** Approved Air Force films, filmstrips and related visual aids are distributed by the Air Photographic and Charting Service through the centralized facilities of the Air Force Film Library Center, St. Louis, Mo. This facility routinely distributes 360,000 films per year to Air Force units and other agencies all over the world. The present active inventory consists of nearly one-half million prints of more than 4,000 separate film subjects. The Film Library Center also maintains overseas central Film Libraries located in France, Japan and Alaska, with a Branch Film Library in the United Kingdom. These libraries are strategically placed and stocked to service approximately 140 Base Film Libraries located throughout the world. Information regarding distribution of these films can be obtained by contacting:

Major Theodore R. Hammer, *Commander*,  
1356th Film Library Squadron, 8900 South  
Broadway, St. Louis, Missouri 63125  
Phone: MErose 1-4800, ext. 671

## DEPARTMENT OF THE ARMY

Pentagon, Washington, D.C. 20315

- The Chief, Communications-Electronics of the Army is responsible for policy matters on the procurement, production, distribution and utilization of all official motion pictures of the Army. As the DA Staff contact point, all film programs are coordinated by the Pictorial & Audio-Visual Directorate of the Office of the Chief, Communications-Electronics. Information pertaining to pictorial and audio-visual activities may be obtained from the following:

Col. Donald S. Bowman, *Director, Pictorial and Audio-Visual Directorate*  
Phone: OXford 7-3520

Lt. Col. Charles E. Campbell, *Chief, Photographic Division*  
Phone: OXford 5-3806

Lt. Col. Dominick V. Puccio, *Chief, Television-Information Display Division*  
Phone: OXford 5-1395

James A. Moses, *Chief, Concept & Application Branch*  
Phone: OXford 7-2039

The Army Pictorial Center is responsible for the actual production and initial distribution of official motion pictures and related audio-visual materials. Information concerning contracts for writing, production and procurement may be obtained from:

Commanding Officer, Army Pictorial Center,  
35-11 35th Avenue, Long Island City, New  
York 11106 Phone: ASToria 1-3100.

**AUDIO-VISUAL SUPPORT CENTERS.** All official motion pictures, filmstrips, transparencies, language training materials and related audio-visual material are distributed throughout the U.S. Army by the Army Audio-Visual Support Distribution and Utilization System. This system is composed of three segments: (1) the Pictorial & Audio-Visual Directorate, OCC-E; (2) the Distribution Branch of the Army Pictorial Center, and (3) the network of Audio-Visual Support Centers located at headquarters major commands, major service schools and throughout the Zone of the Interior and overseas commands.

## DEPARTMENT OF THE NAVY

Washington, D.C. 20390

- The U.S. Department of the Navy produces motion pictures for such purposes as training, maintaining fleet readiness, explaining new weapons and devices, and for medical, historical, indoctrination, safety and recruiting uses, to a few key subject areas.

• **Information and General Policy Procedures** on all aspects of the Navy film program, including application information for commercial producers interested in bidding on Navy contract film, are handled by the Chief, Bureau of Naval Weapons, Navy Department, Washington, D.C. 20360.

Captain J. J. Crowder, USN — *Code FF Director, Photographic Management Office*  
Phone: OXford 8-3416

E. L. Randel, Code FFMP, *Head, Training Film & Motion Picture Branch, Photographic Management Office*  
Phones: OXford 8-3470, OXford 8-3422

- **Procurement policies and procedures**, which involve information on technical questions regarding bids, are handled by the Office in Charge, Navy Purchasing Office, Washington, D.C. 20360.

Captain O. W. Stafford, USN, *Officer in Charge*  
Phone: OXford 8-2901

Cdr. E. C. Goodwin, USN, *Director, Purchase Division*  
Phone: OXford 8-2845

**FACILITIES:** The U. S. Naval Photographic Center, a field activity of the Bureau of Naval Weapons, is the central photographic laboratory for the Navy Department and the Navy's largest photographic activity. The Center, composed of about 530 military and civilian personnel, provides photographic assistance and specialized services to the entire Naval Establishment. It supervises the production of Navy training films, maintains the Navy's motion picture and photographic film libraries.

The motion picture production facilities at the Center are modern and complete. There is a sound stage, film and tape recording and editing equipment, an art and animation group and an editorial branch. Here experienced script writers and artists collaborate with Navy photographers and technicians, maintaining high standard quality for Navy productions. The production division has the capability to develop and process negative film and release prints in 35mm, 16mm black-and-white and negative-positive color. About 75 percent of all Navy films, however, are contracted with established commercial producers.

In addition, there is a growing requirement for films to report on the Navy's research and development activity. To meet this need, a closed circuit kinescope facility has been installed. Two video tape recorders and kinescopes together with viscomat processing make for rapid completion of urgent films.

Extensive libraries of both still and motion picture photography are maintained at the Center. Library services are provided to the Naval Establishment, other government agencies to commercial concerns on a cash sale basis. Still Picture Department produces all types of still photography such as press, serials, medals and official portraits. Modern continuous paper printing and processing units meet the Navy's large volume print demands. There are also complete negative, positive and transparent color processing facilities.

A research and development group conducts tests, experimentations, development and evaluation of photographic equipment. Here, technical photographic specifications, instructions and publications are also prepared. Information and NPC may be obtained from: Commanding

"This lucid and thorough manual on **EDUCATIONAL FILM-MAKING** will be an invaluable aid for anyone engaged in conceiving, writing, directing, editing or producing this type of film . . .

It is well-organized, smoothly written and provides the theory and practical knowledge needed to make an expert, professionally organized educational film."

— *EM and Fine Arts*

"A highly professional contribution . . . the total concept of film-making for educational purposes is thoroughly and clearly set down."— *Film World and A-V News*

"Definitely for anyone writing, directing or in any way involved in educational films . . . amazingly comprehensive . . . in addition to covering all aspects of the business, it offers a satisfactory text for the making of movies in general."— *Film Makers' Guide*

"Fills a vital need for film-making students as well as professionals in the educational film field."— *The Journal of the Screen Producer's Guild*

## A-V PROGRAMS OF THE FEDERAL GOVERNMENT:

### DEPARTMENT OF THE NAVY:

ficer, Naval Photographic Center, U. S. Naval Station, Washington 25, D.C.

Captain R. G. Jancecak, USN,  
*Commanding Officer*

Phone: OXford 8-2101

Cdr. T. E. DeVeas, USN, *Head*.

*Motion Picture Department*  
Phone: OXford 8-2142

**DISTRIBUTION:** Prints of all Navy films available to the public can be purchased from DuArt Labs, Inc., 245 W. 55th St., New York, New York, under an annual contract administered by the U.S. Office of Education. Civilians may borrow films from Naval District Public Information Officers. Training Aids Libraries, Aviation Films Libraries, Recruiting Stations and Public Information Offices located throughout the United States will serve governmental requests for film showings. Requests for the use of Navy stock footage in commercial productions should be submitted to the Chief of Information, Navy Department, Washington, D. C. 20390.

### United States Marine Corps

• For information on U. S. Marine Corps films, which are produced by the Department of the Navy, write to the office of:

Commandant of the Marine Corps (Code A03P)

Headquarters, U. S. Marine Corps  
Henderson Hall  
Arlington, Virginia 22214

☆ These U. S. Government audiovisual listings are an exclusive feature of the Production Review issues for reference use of our readers.

### DEPARTMENT OF AGRICULTURE

#### Office of Information

#### Motion Picture Service

Washington, D.C. 20250

• The Motion Picture Service of the USDA produces motion pictures in color and black-and-white on agricultural and related subjects for various agencies within the Department and, on occasion, for other Government agencies. Production and laboratory services are also available on a cooperative basis with land grant colleges and universities.

Martin Lobdell, *Chief, Motion Picture Service*

Phone: DUDley 8-6072

Homer Boor, *Producer*

Phone: DUDley 8-3628

Judd Scott, *Producer*

Phone: DUDley 8-6518

Gilbert Courtney, *Producer*

Phone: DUDley 8-3319

Joseph Sanders, *Chief, Business Management*

Phone: DUDley 8-7263

James E. Alford, *Chief of Distribution*

Phone: DUDley 8-5246

Mrs. Anne Ware, *Stock Footage Librarian*

Phone: DUDley 8-3629

**ACTIVITIES:** The USDA currently has more than 300 films in distribution with an estimated audience of 380 million persons. These films cover such subjects as conservation, forestry, agricultural research, insect eradication, control of animal diseases, consumer information, rural area development, nutrition and marketing. In addition, the Department is prepared to cooperate with qualified non-government organizations in the production and distribution of agricultural

educational motion pictures and TV films are related to agricultural programs, if the government cooperator is a non-profit organization or association concerned with the dissemination of agricultural information or the production or handling of one or more agricultural products. Maintains an extensive 16mm stock footage library of agricultural scenes which are for sale at nominal cost.

**FACILITIES:** The USDA Motion Picture Service has complete in-service production and laboratory facilities which have been in continuous operation since 1912.

**DISTRIBUTION:** Films for school and group showings are distributed through 69 cooperative libraries located in each state. Films for TV showings are distributed directly from Washington and prints of all films may be purchased from DuArt Film Laboratories, Inc., 245 W. 55th St., New York, N.Y., 10019. Catalogues are available of motion pictures, films suitable for TV showing, state produced films and of stock footage scenes.

**PUBLICATIONS:** Two catalogs contain complete listings of USDA motion pictures; one of these provides data on films for general 16mm distribution; the other lists films available for public service showings by television stations.

### DEPARTMENT OF COMMERCE

Washington, D.C. 20230

• The U. S. Department of Commerce produces and circulates motion pictures dealing with domestic and foreign subjects relating to the offices under the jurisdiction of this Department.

## A-V PROGRAMS OF THE FEDERAL GOVERNMENT

U. S. DEPARTMENT OF COMMERCE:

Earl Young, *Motion Picture Analyst, Motion Picture & Photographic Products Branch*  
Phone: WOrth 7-2911

• The Motion Picture and Photographic Products Branch was established to serve the motion picture apparatus, equipment and supplies industries. It performs many functions, some of the more important being to foster, promote, and develop the foreign and domestic trade of these industries. It provides market development counsel to producers and exporters as to where and how to cultivate and expand their overseas sales, acquire distributors, facilitate the acquisition of frozen remittances, and render assistance in other problem areas. It also participates in tariff and trade negotiations, and maintains constant surveillance of foreign trade trends, and periodically issues concise basic information releases for industry guidance. Furthermore, the Branch acts as the focal point for industry with reference to advice and guidance to other agencies and use of other agency facilities.

### Environmental Science

#### Services Administration (ESSA)

Stanley B. Eames, *Director of Public Information*

Phone: 496-8193

### Coast & Geodetic Survey

G. P. Meredith, *Chief, Administrative and Technical Services Division*  
Phone: (301) 496-8031

• Over the past decade, the Bureau has produced five documentary films covering both its general activities and such specific programs as tide and current measurement, wire-drag techniques, surveying and the oceanographic cruise of the Ocean Survey ship "Explorer." The Bureau is now working to replace its older documentaries. The activities film has been completely revised and was released in July, 1964.

A documentary film titled *Tsunami*, dealing

with the phenomena and potential dangers of seismic sea waves, was produced during 1964. Production of a film depicting the historical aspects of geographic and geodetic position determination, and climaxing in the modern technique of satellite triangulation is planned in '66.

Collaborative film work at the Coast and Geodetic Survey included assistance on the National Academy of Science *Planet Earth series* in the preparation of *Science for Survival*, a recent production of the Interagency Committee on Oceanography.

Film information is available through the Administrative and Technical Services Division, Coast and Geodetic Survey, Washington Service Center, 6001 Executive Blvd., Rockville, Maryland 20852.

### U. S. Weather Bureau

• The Weather Bureau occasionally contracts for films and film shorts to be used in warning programs associated with hurricanes and tornadoes. In addition, it provides technical assistance for films on weather related subjects. The Bureau has a library of other weather films produced elsewhere; loan information is available from the Public Information Office.

### Bureau of Public Roads

William F. Hall, *Chief, Photographic Services*  
Phone: WOrth 7-3013

**ACTIVITIES:** This Bureau produces films on subjects pertinent to highway development, maintenance and related subjects, sometimes in cooperation with other government agencies, state and local highway departments, and other interested organizations.

**FACILITIES:** In-house capacity.

**DISTRIBUTION:** These films are available on loan basis, with borrower paying return transportation, from Chief, Photographic Services, Bureau of Public Roads, Washington, D.C. 20235. Films may be purchased by responsible organizations, by inquiry to same address.

### National Bureau of Standards

William R. Tilley, *Office of Technical Information and Publications, Washington, D.C. 20234*  
Phone: (301) 921-2493

• This Bureau produces scientific and technical films about its own research programs. Films are available from above address for loan without charge except payment of return postage and insurance. Produced in 1965 (in collaboration with Naval Research Laboratory): *Production of White Cast-Iron Standards*, 16mm color; 15½ min., running time. Other calibration pictures planned. Film catalog on request.

### Office of Publications and Information for Domestic and International Business

Americo A. W. Favale, *Director, Graphics Division*  
Phone: WOrth 7-5481

**ACTIVITIES:** This office produces films describing Government-industry cooperation in staging special U. S. Exhibitions at international trade fairs overseas.

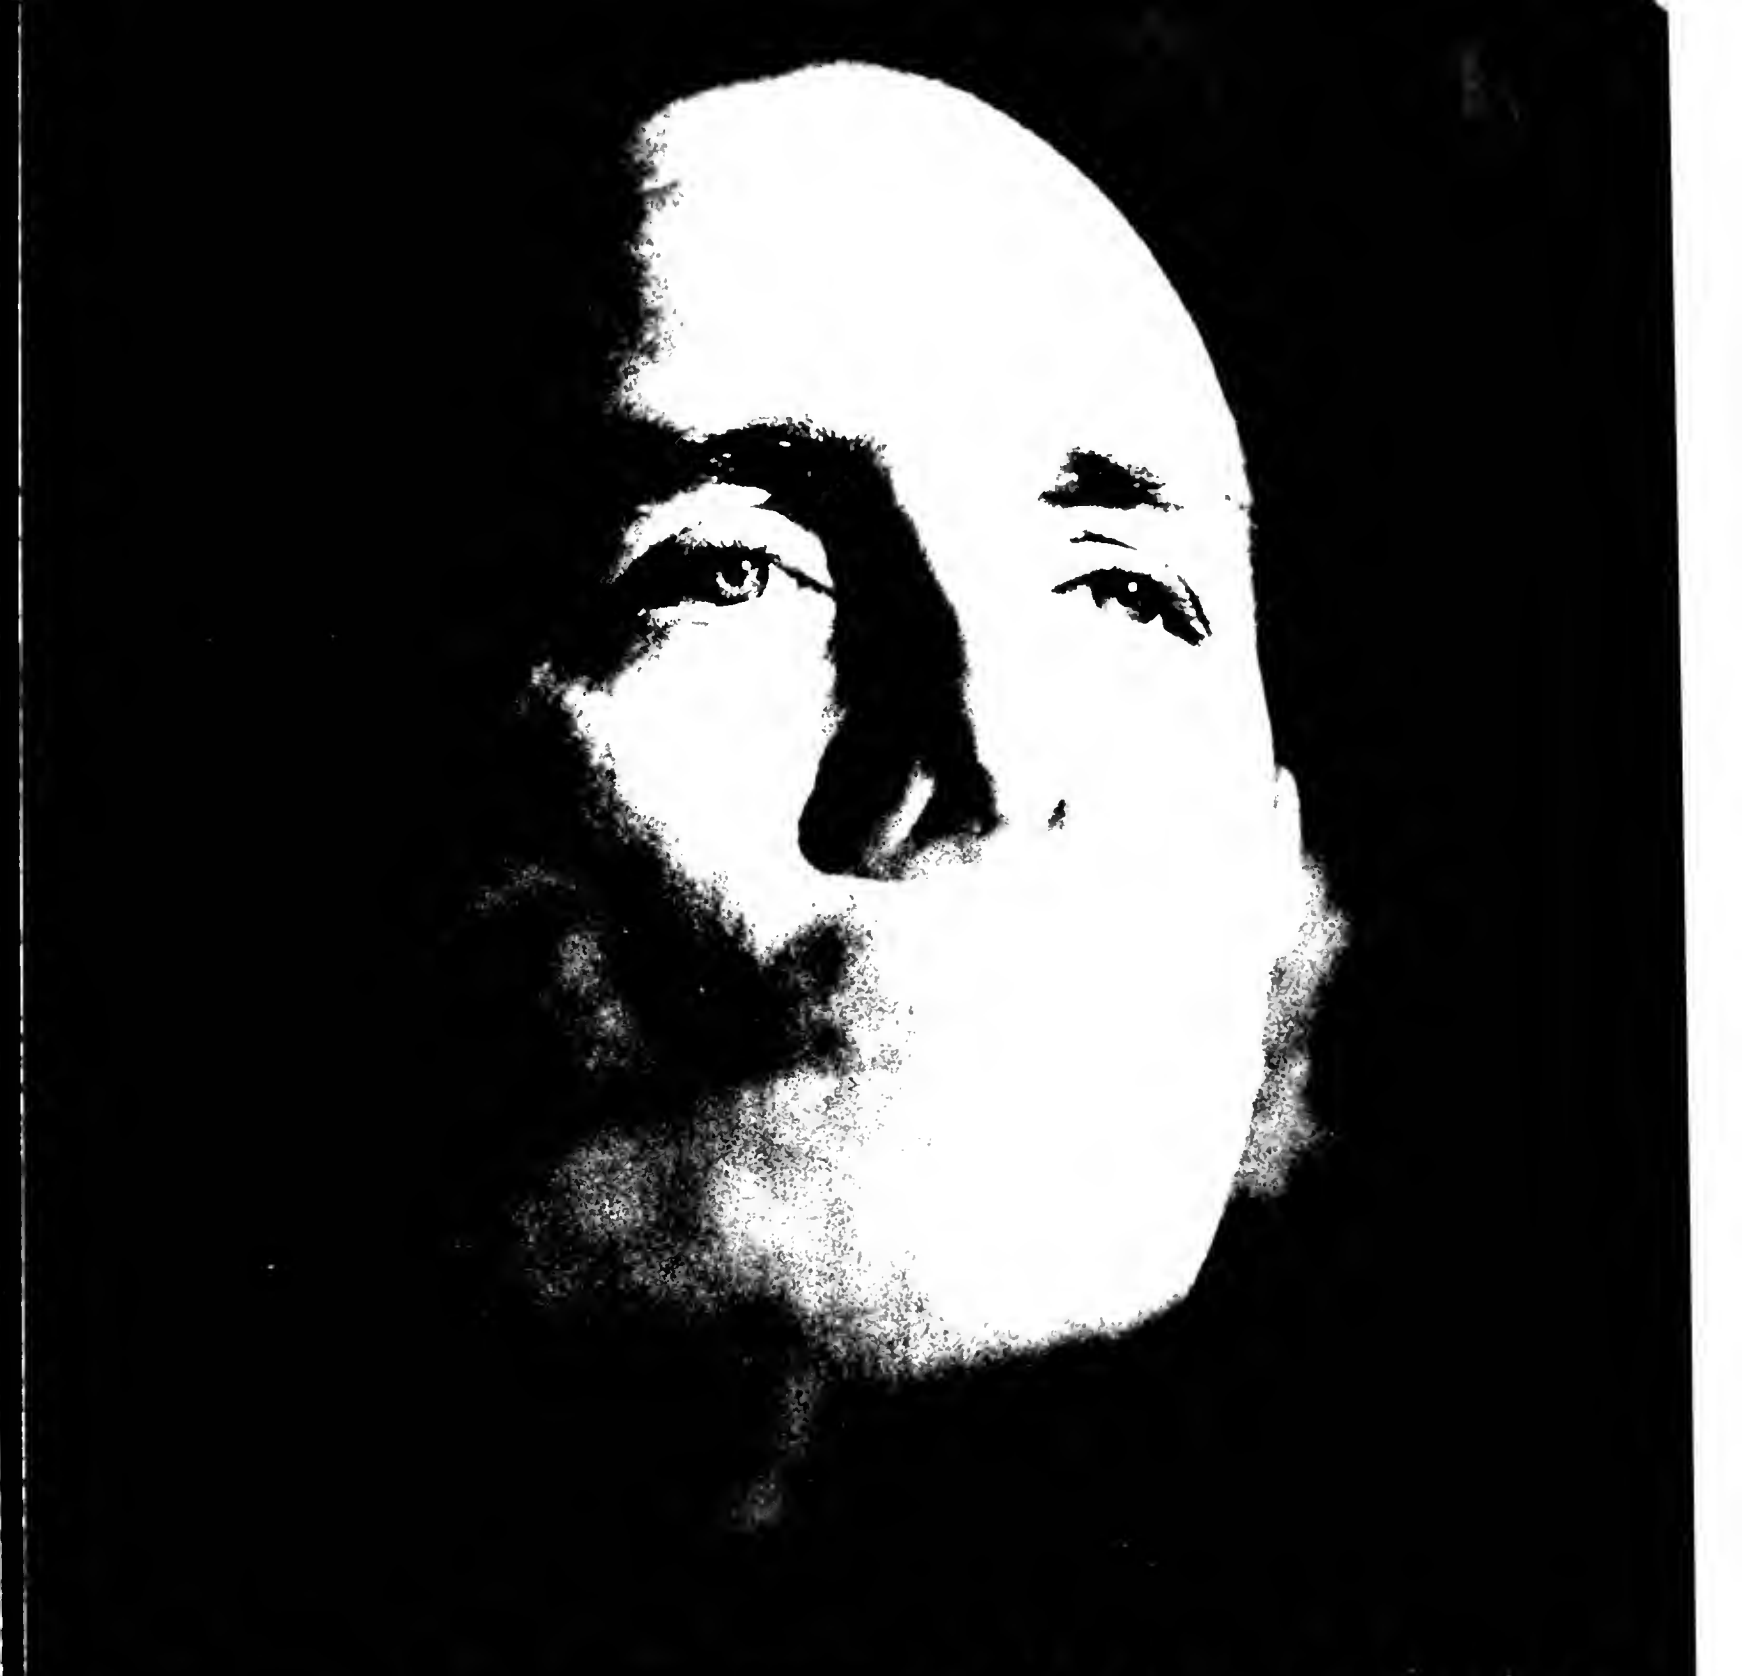

**FACILITIES:** Footage is shot by staff photographers of the Graphics Division and films are produced on contract by industrial film companies.

**DISTRIBUTION:** Color films average 15 minutes length and are available on a free loan basis by application to the Director, Graphics Division. These films are also available through Department of Commerce Field Offices. Black and White prints are available for TV use.

**FILM NOW AVAILABLE:** *The Trade Fair*

Dondell C. Cotter, *Program Management Officer*

Katherine C. Skogstad, *Information and Publications Officer*

Lucian Glen Lambert, *Chief, Graphic and Photographic Arts Section*

Charles N. Farner, Jr., *Chief, Utilization and Distribution Section*

ACTIVITIES: The Public Health Service Audiovisual Facility, a Branch of the Communicable Disease Center, is a national center for development of a nationwide audiovisual program in medicine and the allied sciences. It produces films, strips, television tapes, exhibits, publications and other audiovisual forms for the medical and scientific communities.

New phases of the Facility's program include Educational Advisory Services involving support for schools of the health professions, the development of specialized conferences, seminars and workshops; and a Communications Systems Planning activity through which consultation is provided to biomedical and other health oriented institutions in the U.S. and abroad.

In 1965 the Facility sponsored the first national conference on the Single Concept Teaching Film. In 1966 the Facility and the National Academy of Sciences co-sponsored the conference, Biomedical Communication: Problems and Resources. Also in 1966 the Facility experimented with a number of institutions the possibility of contribution to a national cadre of bionics communications specialists through presently established academic graduate curricula.

FACILITIES: The Facility has complete instructional motion picture, filmstrip and television, production and laboratory equipment located in a two-story building designed especially for audiovisual activities. In addition, the Facility acquires and distributes medical and health-related films, makes multiple prints and distributes them throughout the world, operates the National Archives of Medical Motion Pictures and maintains an international central reference file of medical audio-visuals.

DISTRIBUTION: Public Health Service films are available from the U.S. Public Health Service Audiovisual Facility, Atlanta, Georgia 30333. Loan to schools of the health professions, health educational institutions and medical health organizations throughout the U. S. and abroad. Films are listed in a Public Health Service Catalog published by the Facility. Information on teaching films is also available from a central reference file.

REFERENCE SOURCES: Three other film catalogs are published by the Facility: *Film Reference Guide for Medicine and Allied Sciences*; *Clinical Film Guide*; and *Neurological and Speech Disease Film Guide*. Other specialized reference works are in production. A master international index is maintained to support special requests for film information not otherwise available.

PRODUCTIONS: Among the recent 16mm motion pictures produced by the Facility are: *Cholera Today*, *Front Line of Battle* (Aedes aegypti mosquito spraying technique); a series of single concept films teaching laboratory techniques and diagnosis including *Collection and Processing of Specimens for Respiratory Virus Isolation*; *Fiberscope Endoscopy*; *Hemiplegic Patient*, Parts I and V and *Diagnostic Tests for Bronchitis and Emphysema*. Two outstanding videotaped programs were completed: *Palpation and Inspection of the Anterior Chest* and *Mammography Techniques*, Part I. Projected film videotape productions for F Y 1966 will approximate 110. 15 of these productions will be in Spanish or French sound tracks.

# DuKANE A-V Matic

## SOUND FILMSTRIP PROJECTOR

If you have a story to tell, the new DuKane A-V Matic provides the best way to tell it. Schools, churches, businesses and professional offices all use the A-V Matic to clearly deliver their message. Let the dramatic impact of DuKane *Sight and Sound* help you train, teach or sell more effectively.

The A-V Matic provides you with an ideal way to get and hold the interest and attention of your audience . . . whether it's an individual or small group.

And it's so easy to use. Just turn it on, put the film in and play the record . . . the rest is automatic. A new Program Hold Control lets you stop the record and film at any time and simply release it to start again.

The new DuKane A-V Matic is tastefully styled in a rich wood tone finish.

### OUTSTANDING FEATURES:

- *New Program Hold Control* . . . provides complete control of the program at all times. Sound and picture can be stopped or started instantly to answer questions, for telephone calls or other interruptions. Also ideal for programmed instruction.
- *Automatic Operation* . . . place the tone arm on the record and from then on your program operates completely automatically.
- *Remote Control* . . . push-button remote control is provided for manual operation or lecturing.
- *Brilliant Pictures* . . . with no room darkening required and pictures are always in perfect focus.
- *Stylishly Designed* . . . TV type appearance and rich wood tone metal case blends into any decor.
- *Redi-Wind* . . . automatically rewinds the film ready for re-use. Provides greater film life by keeping the film clean.
- *Simple to Operate* . . . always ready for use, programs can be changed in seconds. Even a child can operate this unit.

### SPECIFICATIONS:

<b>OPERATION</b>	Pictures change automatically in perfect synchronization with the recorded message by means of the inaudible DuKane 30/50 system. A 10 ft. push-button cord is provided for manual operation.
<b>FILM</b>	Projects standard 35mm single frame filmstrip.
<b>RECORDS</b>	Turntable plays 33 1/3 rpm records up to 12" in diameter standard or microgroove. Speaker positioned below the screen. Receptacle for earphones provided.
<b>SCREEN</b>	9" x 7" TV type, high brilliance screen.
<b>POWER</b>	Operates on 115 volt AC.
<b>CASE</b>	Durable scuff-proof walnut vinyl bonded to steel. Will not scratch, chip or peel.
<b>ACCESSORIES</b>	Earphones \$17.00.
<b>WEIGHT</b>	17 lbs.
<b>SIZE</b>	15 x 13 x 18 inches.
<b>WARRANTY</b>	Covered by One-Year Warranty available through a nation-wide network of authorized DuKane service stations.
<b>PRICE</b>	\$210.00 (including protective slip cover).

For a demonstration contact your nearby DuKane A-V Dealer . . . Or write—  
phone (312-584-2300) for more information.

## Social Security Administration Baltimore, Maryland 21235

Roy L. Swift, *Information Officer*  
Phone: 944-5000, ext. 2187

Wallace Kendall, *Chief, Production Branch,  
Office of Information*  
Phone: 944-5000, ext. 2985

**ACTIVITIES:** The Social Security Administration produces and distributes films on Old Age, Survivors and Disability Insurance. These are public information films designed to explain the Social Security Law. All films are designed for TV audiences, and both spots and film shorts are produced.

**FACILITIES:** The Administration, located in Baltimore Headquarters, has a small studio and limited production facilities. Most film work is contracted to commercial producers.

**DISTRIBUTION:** Through 622 District Offices throughout the country, prints may be obtained on a free loan basis. Prints may also be bought.

## DEPARTMENT OF INTERIOR Washington 25, D.C.

• The Department of Interior produces films which are concerned with the management, conservation and development of natural resources in every section of the Nation. Films are available from the bureau in which they have been produced.

### Office of the Secretary

Harlan Wood, *Office of Information*  
Phone: 343-3171

Inquiries concerning the use of Department of

of Interior films for television should be addressed to this office. A Departmental film catalog is available on request.

## The Bureau of Mines

A. Nicholas Vardac, *Motion Picture Repr.,  
Bureau of Mines, Washington, D. C. 20240,*  
Phone: REpublic 7-1820, ext. 3359

Meyer Reiness, *Chief, Bureau of Mines Distri-  
bution, 4800 Forbes Ave., Pittsburgh, Pa.  
15213*

**ACTIVITIES:** The Bureau of Mines has a broad film program dating from about 1920. Motion picture subjects deal with natural resources of states and areas and with mineral commodities including metals, non-metals and petroleum. Recently released films include: *Helium* and *Aluminum—Metal of Many Faces*.

**FACILITIES:** All films are made in cooperation with private industrial firms which pay production costs and select commercial film producers. The Bureau maintains no production facilities for the films.

**DISTRIBUTION:** About 5,000 prints of films are distributed to the public on a free loan basis from the central film distribution center of the Bureau of Mines, 4800 Forbes Ave., Pittsburgh 13, Pa., and from depositories in 40 states. Annual number of showings is 200,000. Most films are cleared for free TV use. Single or block bookings arranged. Catalogues available.

**PRODUCTIONS:** Films in current production include: A presently untitled film on steel and revisions of *Arizona and its Natural Resources* and *Nevada and its Natural Resources*. Educational TV Program Series: The following televi-

sion series are available: *Down to Earth; Steps of the Union; Out of the Earth.*

## The Bureau of Reclamation

Ottis Peterson, *Assistant to the Commissioner,  
Information*

Phone: 343-4662

**ACTIVITIES:** The Bureau of Reclamation produces one or two pictures a year on water resource development in the seventeen western states. These films are usually "low budget," sold color films which run 14 or 28 minutes for TV use. Film catalogs are available from the Washington, D.C., office of the Bureau; the Regional offices and the Film Distribution Center in Denver.

**FACILITIES:** Most of the film work for the Bureau of Reclamation is contracted by the appropriate Regional office with commercial producers. There are seven Regional offices, all in the western states, supervised by the Washington office.

**DISTRIBUTION:** Distribution of Bureau of Reclamation films is now accomplished through the Film Distribution Center, Bureau of Reclamation, Bldg. 53, Denver Federal Center, Denver, Colorado. On occasion, prints are loaned to educational institutions for short periods of time.

**PRODUCTIONS:** Recent productions include: *Fanning Gorge*, the story of the construction of a high dam on the Green River in the Rocky Mountains in northern Utah which was selected as the winner in public relations, sales and advertising in the recent industrial photography competition; *Power for a Nation* in which the Bureau of Reclamation collaborated with other Department agencies to portray the role of the Department in hydropower production. The Bureau of Reclamation is also distributing prints of *New a-*

## As Washington Changes . . . . . . so does its motion picture film business.

*Obsolescence is a disease of progress and the technique of documentary film production is no exception. Stuart Finley Productions presents a new and imaginative capability for the complete production of high quality motion picture films*

- Potomac Concept"-A half-hour color film produced for the Secretary of Interior, Stewart Udall. Other films on the subject of our Potomac River Resources have been produced for the U.S. Public Health Service, Corps of Engineers, U.S. Army, and the Interstate Commission on the Potomac River Basin. Fifty television documentary films on the subject of "A Clean Potomac" were produced for WRC-TV.
- "The Investment" - A twenty-minute color film for the United Givers Fund campaign. For the past seven years, Stuart Finley Productions has produced these films in addition to over a hundred TV film spots for the UGF.
- "Oops!" - The latest of eight films for the Ohio River Valley Water Sanitation Commission.
- "Time is for Taking" - On the subject of Mental Retardation. This is our newest "distribution" film. "The Green City" and "Physical Education in Elementary Schools" are other productions designed especially for schools, colleges, libraries, and civic organizations.

- Where In The World and The New River produced for the Kimberly-Clark Corporation.
- TV spots in color for Downtown Progress and the Washington Gas Light Company.
- Still photographs for the United Givers Fund, Public Health Service, and the National Institute of Health.
- Film strips with original color artwork for the Army Times Publishing Company.

## A-V PROGRAMS OF THE FEDERAL GOVERNMENT:

### U. S. BUREAU OF RECLAMATION

for a *Thirsty World* which was produced recently by the Office of Saline Water of the Department of the Interior.

#### The Bureau of Land Management

Dan Sauls, *Information Officer*  
Phone: 313-3609

• Three films are available from the Bureau's Washington, D.C. office and from 11 State offices in western states.

Available for loan and for TV showings are: *Alaska, Land to Grow On*, 28-minute color film on public lands and resources in Alaska, *Watershed Conservation*, demonstrating water conservation on the public lands, and *Rogue River Country*, 28-minute color film about the recreational opportunities and wealth of natural resources found in the Rogue River Valley of southwestern Oregon. State BLM offices having film libraries are: Portland, Sacramento, Phoenix, Reno, Salt Lake City, Santa Fe, Denver, Cheyenne, Boise, Billings, and Anchorage.

#### The U. S. Geological Survey

Frank H. Forrester, *Information Officer*  
Phones: 313-1616/1617

• This office maintains and distributes a limited collection of motion picture films dealing with the earth sciences. Of major interest are the award winning films, *The Eruption of Kilauea*, 1959-60 and the earlier film release, *The 1955 Eruption of Kilauea*. These show, at close range, the spectacular eruption of the Kilauea volcano on the island of Hawaii.

Recent film releases include the *Alaskan Earthquake*, 1964 and *The Sea River*. The first

of these films documents the destructive effects of the March 27, 1964, Alaskan earthquake both graphically and pictorially in on-the-spot scenes. The *Sea River* film records hydrological investigations carried on in The Amazon River Basin as a joint operation between the Geological Survey and the Brazilian Navy.

Requests for additional information about these and other films should be addressed to the Information Office, U.S. Geological Survey, Washington, D.C. 20212.

#### U. S. Fish & Wildlife Service

Elliot A. Macklow, *Chief, Audio Visual Services*, Branch of Marketing, Bureau of Commercial Fisheries, Fish & Wildlife Service.  
Phone: 313-6897 A/C 202

**ACTIVITIES:** Using commercial contractual motion picture facilities, this organizational unit plans, produces and distributes fishery marketing and educational motion pictures sponsored by both Government and industry. Other audio-visual materials such as fishery television spot announcements, radio spot announcement discs, slides, specialized publications, etc. are also produced and distributed.

**FACILITIES:** Commercial contractual motion picture facilities.

**DISTRIBUTION:** Utilizing about 200 Government and private film libraries, 22 fishery motion pictures are distributed free of charge upon request. Provision has been made so that most of the films are cleared for television, although special permission is required before telecasting. Stock footage is not available. A catalog listing the commercial fisheries films distributed and the instructions for obtaining them may be obtained free of charge upon request. A central

Audio-Visual Services film library is maintained. Films and information may be obtained by writing Audio Visual Services, Bureau of Commercial Fisheries, 1815 N. Ft. Myer Drive, Arlington, Va., 22209. Requests for films to be sent outside the U. S. should be made to the nearest U. S. Embassy or Consulate.

**PRODUCTIONS:** Recent productions include a new film for the Maine Sardine Council entitled *Flavor of Maine*. Four fully animated television spot announcements and a radio disc have been released. In production are films for the National Fish Meal Assn. of the National Fisheries Institute, *Menhaden Magic*, the U. S. Trout Farmers Assn. *Rainbows to Order* and the State of Florida *Mullet For Millions*. All titles are tentative.

are prepared by the Internal Revenue Service. Motion pictures for public viewing are produced by the Public Information Division, those for employee training or orientation by the Training Division. The Information Division also supervises production of television spot announcements for each tax filing period. It has also recently begun the production of films and TV spots in Spanish, partly to extend its taxpayer information in the U. S. and partly as an advisory aid to Latin American countries concerned with Federal government cooperative programs.

**FACILITIES:** The public information films of Internal Revenue Service are produced professionally, usually utilizing the agency's own office facilities and personnel for background scenes but hiring professional talent for action bits, narration, etc. Laboratory production facilities are contracted to complete the film after the first rough cut. Training films are sometimes produced with Internal Revenue Service personnel and sometimes with professional talent.

**DISTRIBUTION:** The 58 district offices, and several of the larger local offices, distribute Internal Revenue Service film productions. All clearances and releases have been obtained for general showing of all Internal Revenue Service films.

**PRODUCTIONS:** The Public Information Division plans a new half-hour documentary, 16mm color production on the related activities of its Collection Audit and Intelligence divisions; and a quarter-hour film, 16mm color, on American history in its relation to taxes, with brief treatments of typical district and regional office activities — and those of the ADP, automatic data processing program, as they affect the average taxpayer. The latter film will be produced in both English and Spanish and will also serve as a training vehicle. Newest IRS production is *It Happens Every Year*, third in a series of annual half-hour presentations on preparing a Federal income tax return. Other current productions are *Then and Now* — 22 min.; *Time and Taxes* — 18 min.; *The Notable Day* — 22 min.; *Push Buttons and Taxes* — 10 min.; *Moonshine and Taxes* — 15 min. *Since the Beginning of Time, Then and Now*, and *Moonshine and Taxes* are available as 8mm films for theater use.

**United States Coast Guard**

E. Whitwer, Chief, Motion Picture & TV Branch, Public Information Division  
Phone: (202) WOrth 4-5303

**FACILITIES:** The U. S. Coast Guard produces information and training, as well as recruiting films. The majority are in 16mm color-sound with running time of 3 to 28 minutes. Coast Guard films have consistently been selected by the United States government for entry in foreign film festivals, and have won a number of awards.

**FACILITIES:** In-house capability. The Coast Guard has limited in-house writing, directing, shooting and editorial capability. Additional production services as well as all processing and printing are contracted for as required.

**DISTRIBUTION:** A catalog of U. S. Coast Guard films is distributed by film libraries in Washington, D. C. and at District offices in Boston, New York, Portsmouth, Miami, St. Louis, Long Beach, San Francisco, Seattle, Juneau and Honolulu.

**PRODUCTIONS:** Latest productions include a series of TV recruiting spots and a new 14-minute sound film on *AMVER: Automated Merchant Vessel Reports*. Planned productions include a 28-minute Coast Guard Reserve subject and several training and indoctrination films.

**U. S. Savings Bonds Division**

Read how Fairchild's amazing new MoviePak cartridge multiplies the value of your entire sound film program

At last you can show any film, anywhere, anytime — without threading, film handling or rewinding.

Simply select the Fairchild MoviePak sound film cartridge you want, snap it into the Mark IV rear-screen projector, and play. In broad daylight. In a prospect's office. In showrooms. At trade shows. On sales counters. In training classes. In the boardroom. To switch instantly to another film, just snap out one cartridge, snap in another.

Every film you have can be easily converted to 8mm and threaded into the MoviePak cartridge. Duplicate prints are less expensive than 16mm, too. Now you can unleash the full power of your entire sound film program.

The Fairchild Mark IV projector is portable, weighs only 20 pounds and is always ready for action. No warm-up time required.

For display use, it will run without supervision, repeating automatically. It takes up to 22 minutes of film with a single MoviePak.

To see for yourself, just send in the coupon.

### U. S. TREASURY DEPARTMENT:

ational, some humorous, some informational. All were made available to the Treasury by volunteers and showings take place under volunteer auspices. *The Land We Love*, 16mm, sound-color, 20-min., is a film tour produced by Warner Brothers in association with other major motion picture studios. *Wilbur Gets the Message . . . About Payroll Savings*, 16mm, sound-b&w, 20 min., has been cleared for television. *Danny Kaye for School Savings*, 16mm, sound-b&w, 16 min. is not cleared for television. *The Junior Astronaut*, 16mm, sound-b&w, 15 min., is cleared for television.

### UNITED STATES ATOMIC ENERGY COMMISSION

#### Division of Public Information

#### Audio-Visual Branch

Washington, D.C. 20545

• The Audio-Visual Branch of the Atomic Energy Commission has as its primary function responding to requests from the public media in all the audio-visual fields for assistance in the preparation of films, stills, and other audio-visual materials on atomic energy.

Edwin L. Wilber, *Branch Chief*  
Phone: (301) 973-5365

Elton P. Lord, *Deputy Chief*  
Phone: (301) 973-5476

Sid L. Schwartz, *Asst. to the Chief*  
Phone: (301) 973-1239

Patti Searight, *Radio/TV Specialist*  
Phone: (301) 973-5367

ACTIVITIES: This branch plans and carries out film, TV, radio and still picture projects to advance specific Commission Programs, and acts

as advisor to Commission and contractor personnel in Washington and nationwide on audio-visual problems and projects. In 1965, 27 films were produced by the Commission and its contractors; about 25 films are planned for 1966. In addition, more TV clips and radio tapes are produced by the Commission and contractors every year. This branch also places Commission- and contractor-produced motion pictures into loan and commercial sale channels, determines the content of the 10 domestic and 4 overseas film libraries, and issues popular-level and professional-level film lists.

FACILITIES: AEC has no motion picture production facility or motion picture laboratory, but uses Government and/or commercial services.

DISTRIBUTION: AEC operates an 8,000 still photo library, and distributes films through 10 domestic film libraries which cover particular geographical areas. All films are for free-loan. Each library has about 300 titles (popular, semi-technical, and technical levels). The Commission also has four overseas libraries at its offices at the U. S. Embassies at London, Brussels, Tokyo and Buenos Aires, stocked with semi-technical and technical films, and also supplies films to the film library of the International Atomic Energy Agency in Vienna, The American Film Library, The Hague, Holland, The National Science Film Library of Canada, and to USIS-Stockholm for use throughout Scandinavia. The Brussels and Buenos Aires libraries have about 50 films each in French and Spanish respectively. Information on libraries available from Washington office.

STOCK FOOTAGE: The Commission has more than 120,000 feet of 35mm black-and-white unedited film footage on peacetime uses of atomic energy available for purchase. Information may be obtained from Washington office. Color stock footage is also available from any of the completed

documentary films produced by or sponsored by the government. Films may be borrowed from libraries in geographical areas for footage cuts prior to purchase of duplicating materials from the various laboratories holding the originals. Unedited stock film footage in black-and-white and color on nuclear or thermonuclear donations sold at Lookout Mountain Air Force Station, USAF, 8935 Wonderland Avenue, Hollywood, California 90016.

B. Set the projector on it . . . It's a stand!

ultural program of the U.S. Government. The audience numbers over 260 million tele- views in 92 countries plus some 750 million private showings. Output ranges the full of both media - from brief newsclips to length motion pictures and hour-long tele- dramas. These products are released in as is 58 foreign languages.

PRODUCTIONS: Recent examples of the Agency's picture and television output include: *From Little Rock*, depicting U. S. Civil progress, this 20-minute production won 65 Academy Award for the best short docu- mentary of the year and has since won several other major awards; *Nuestro Barrio*, a series of continuing dramatic episodes of the Alliance progress now playing on television in 25 Latin American cities. *Night of the Dragon*, 26-minute documentary on Viet Nam now being shown theatrically and non-theatrically in 23 languages. *John F. Kennedy: Years of Lightning, Days of Drums*, an 85-minute color feature on President Kennedy's term in office. The film has already played in over 1000 commercial theaters and bookings indicate its overwhelming popularity will continue. To date the 29 language versions have been in 117 countries.

### THE PEACE CORPS

Washington, D.C. 20525

J. Gibson, Director, *Public Affairs Support*  
Phone: (202) 382-1722

ACTIVITIES: Limited film activity.

DISTRIBUTION: Two films, *A Mission of Discovery* (1964) and *A Choice I Made* (1965) are distributed by United World Free Films through outlets in continental U.S., Alaska and Hawaii. A third film, *Assignment: Langkawi* (1965), a story of Peace Corps nurses in Malaysia, is available on free loan to nursing schools and nursing organizations from Peace Corps, Washington.

## A-V PROGRAMS OF THE FEDERAL GOVERNMENT:

PRODUCTIONS: Three films in production are scheduled for completion in early 1966. One will feature Peace Corps teachers in India; the second will deal with the Peace Corps program in Nigeria; the third is being edited from footage shot in the Altiplano region of Peru showing Peace Corps Volunteers at work in Arts and Crafts projects. All are designed for general information and recruiting use.

Miss Frances L. Menges, *Head, Special Services Section, Card Division*

Phone: STerling 3-0400, ext. 8039

• The Library of Congress has an unrivalled collection of American films dating from the infancy of the motion-picture industry, which it has acquired through the operation of the copyright law and through gifts, and it also has a large body of foreign films turned over to it as a result of wartime seizure. The Library's activities in the motion-picture field include the registration of claims to copyright, the acquisition of films, the cataloging of films and related bibliographies from Peace Corps, Washington.

The Library's Copyright Office has registered claims to copyright for motion pictures since 1894, when the first examples of this medium were deposited in the Library in the form of photographic paper prints; since 1912 the copyright law has provided for the registration and deposit of motion pictures as such. Generally, under the provisions of the motion-picture copyright agreement between the Library of Congress and the motion-picture proprietors, the films are returned to the copyright proprietor by the Library after registration, but the Library has the right to claim the deposits for its collections later.

The Copyright Cataloging Division of the Copyright Office prepares a semi-annual *Catalog of Copyright Entries: Motion Pictures and Filmstrips*, which lists all such materials registered for copyright in the United States and which is published by the Library and sold by the Government Printing Office. It has also prepared four cumulative catalogs entitled *Motion Pictures*, which together cover registrations of films for the years 1894-1959 and which are for sale by the Government Printing Office.

In addition, the Library's Descriptive and Subject Cataloging Divisions catalog educational films, using data submitted largely by producers and distributors, and the Library publishes this cataloging information in two useful forms for purchase by other libraries or individuals. One form is the printed catalog card, which any filmmaker may purchase to establish his own card-catalog for the control of his collection and for the dissemination of film information. The other is a book-catalog reproduced photographically from the printed cards and containing a detailed subject-index, adequately cross-indexed; entitled *Library of Congress Catalog - Motion Pictures and Filmstrips*, this publication is issued quarterly and in annual cumulation, and it also ap-

the Reference Department. It is primarily an archive in nature, and reference service is limited to assisting research activities. The Library does not lend motion pictures, but some films may be copied under certain conditions; copying requires the signing of a standard agreement concerning the clearance of copyright and the copying of equivalent footage for the Library.

#### The National Archives

James W. Moore, *Acting Chief, Audio-Visual Branch*, 8th St. and Pennsylvania Ave., N.W., Washington, D.C. 20108.

Phones: (202) WO 3-6493; 3-6725

• The National Archives is the repository for 17 million feet of motion picture film created by 75 Federal agencies and several important private producers. Films are accessioned periodically thereby ensuring an ever-growing collection. The entire National Archives collection of motion pictures covers the period of 1896 to the present. It depicts a wide range of subjects. Its documentation of the activities of American, Allied and enemy forces during World Wars I and II is of particular value.

Some of the more significant film was made by the U. S. Army Signal Corps, the U. S. Air Force, the U. S. Navy, the National Park Service, the Department of State and the Office of War Information. Complementing these holdings are those films received as gifts. Among these are *Paramount News* from 1940 to 1957; *Movietone News* from 1957 to 1963 and the *March of Time* series from 1939 to 1951. The largest and in many respects the most significant gift collection is the recently acquired Ford Motor Company Historical Film Collection depicting American life from 1914 to 1945.

The film holdings are almost completely catalogued in a library-type card catalogue. Equipment is available on which film can be viewed by any adult having a serious purpose. No loan is maintained.

The National Archives has a photographic laboratory which is fully equipped to make black and white reproductions, 35mm or 16mm, sound or silent. No films are reproduced without the consent of the depositing agency.

#### NATIONAL DISTRIBUTORS: UNITED WORLD

(CONTINUED FROM THE PRECEDING PAGE 64)

capitulation of the cumulative total audience is supplied each month together with information on number of showings, bookings and the like.

**TELEVISION DEPARTMENT:** This department specializes in the distribution of client sponsored films to commercial and educational TV stations utilizing TV station contacts of MCA.

**THEATRICAL FILM DEPARTMENT:** Through this department, arrangements are made for quality theatrical distribution dates utilizing the experience and theater contacts of the parent firm, Universal Pictures. The latter company has had over 50 years experience in theatrical distribution and was the first organized motion picture company in the industry. United also makes arrangements for its sponsored clients through its film editing staff to produce 35mm prints from existing 16mm prints via a special process. These 35mm prints are thereafter exhibited in the nation's theaters. Professional advertising is employed by United in the exploitation of its clients' films in the theatrical distribution.

**NON-THEATRICAL DIVISION:** Clubs, organizations, colleges, universities, men's and women's groups, high schools, agricultural groups, etc. are but some of the audiences supplied to their clients by this division of United. Film showings are arranged, advance booking notices supplied, monthly reports and recapitulations utilizing automatic business machines.

**SPONSOR-GENERATED DISTRIBUTION:** Where a client wishes to solicit and obtain bookings himself, United provides the physical handling, inspection, storage and distribution of such films

utilizing its professional experience and facilities. Additional services include "custom" promotion and national research can also be obtained under this type distribution.

**"CUSTOM" SERVICES:** United produces a "custom" service which includes promotional kits supplied (under a special contract service with its client) by United to each film audience. This gives the sponsored client the added public relation effect surrounding each local community film distribution. It is accomplished by United's publicity division and advertising staff which prepares special news releases, film guides, advertising mats and special posters for use by local film exhibiting audience.

**NATIONAL RESEARCH FACILITIES:** United has engaged a national research organization on a permanent basis for the purpose of conducting a detailed research on questions of importance and interest to its clients. Such things as preferred length of films, content and the like is obtained from audiences throughout the country.

## Trends in the BUSINESS of Audiovisuals

### Eastman Kodak Earnings Up 18%; Company's "Best Year to Date"

☆ A sales and earnings report for 1966 that put it among America's top growth companies has been issued by the Eastman Kodak Company. Albert K. Chapman, chairman and William S. Vaughn, president, reported consolidated sales of the company U.S. units for 1965 at \$1,463,485,000 — 18 per cent above the 1964 figure and the highest percentage increase in 14 years.

Eastman Kodak's 1965 net earnings were reported at \$247,625,000 based on the 80,602,708 shares outstanding at the year end. There were 18,500 more shareholders in '65 than in the previous year.

Summing up the glowing report, Chapman and Vaughn stated "against a background of general economic expansion, the company's sales and earnings rose to new high levels in 1965. It was Kodak's best year to date. Amateur photographic products set the pace. There was good progress also in commercial and professional markets."

According to the latest Kodak report, the film's commercial, professional and industrial photographic sales have grown at an average rate of 9 per cent. The 1965 sales rise in this area was set at 11 per cent.

### United Shareowners to Honor Moviellab's "Excellent Relations"

☆ Moviellab, Inc. will receive the 1965-66 Management-Shareowner Award of the United Shareowners of America, Inc. for "excellent relations" with shareowners, it was announced by Daniel Eisenberg, Vice President-Finance of the film laboratory.

United Shareowners of America, Inc., the nationwide association which fosters and develops better understanding between management and shareowners, will present the award at Moviellab's annual meeting scheduled to be held at the Moviellab Building in New York City on May 10th.

In a letter received from Benjamin Javits, USA Inc. president, and Charles E. Wilson, chairman of USA's National Advisory Committee, announcing the award, Moviellab's president Saul Jeffers was told "this award serves as our acknowledgement of your contribution to the basic and proper growth of the national economy.

A cross section of American shareowners also recognizes this fact . . . We are justly proud of our efforts in this direction."

### MPO Videotronics, Inc. Reports Higher Sales, Earnings for 1965

☆ The annual report of MPO Videotronics, Inc. for the fiscal year ended October 31, 1965 shows sales for the year at a record high of \$14,641,611, compared with sales of \$12,272,000 for the previous year, a 19 per cent increase.

Earnings after taxes in 1965 were \$476,098, which was equal to \$1.02 per share (combined Class A and Class B shares) in the preceding fiscal year net income after taxes was \$252,977, or \$.54 per share, which included 19¢ per share resulting from the sale of a capital asset.

MPO Videotronics, one of the nation's largest producers of television commercials and sponsored films for training, sales promotion, and education, is now producing a first full-length feature for theatrical and TV release in cooperation with ABC Films. MPO also manufactures and markets an 8mm sound repeating motion picture projector for leisure and training use. Shares are traded on the American Stock Exchange.

### Motion Picture, Consumer Photo Gains Noted by Technicolor, Inc.

☆ Technicolor, Inc. reveals that net sales for 1965 were \$96,470,000 and net income was \$3,700,000 — a drop from the previous year.

The Motion Picture Division and the Consumer Photographic Division led all other divisions with significant gains. Sales of Technicolor's cartridge-loading projector for commercial and educational use were considerably higher than in 1964.

Eversharp, Inc. has developed a new Super-8mm half-hour cartridge loading sound projector. Technicolor, Inc. Plans call for introduction in 1966.

### Modern Learning Aids to Hall Avalon Daggett's Teaching Film

☆ Avalon Daggett Productions, Baton Rouge, La. producer of educational and industrial motion pictures has announced Modern Learning Aids, a division of Modern Talking Pictures Service, as the distributor of its educational releases to the nation's schools.

## Facing Up to Our Crisis in Leadership

THEIR CONCERN THAT American institutions, both public and private, are facing a leadership crisis . . . that the nation's organizations are in danger of coming under the leadership of men who lack the confidence to lead. If this is indeed the case — and there's a growing consensus that it is — then "Charlie" has appeared on the scene none too soon.

And just who is Charlie? Charlie's the "hero" of *Follow the Leader*, a 16mm color motion picture about supervision and leadership recently released by Henry Strauss & Co. of New York. Charlie's also a puppet, as are all the characters in *Follow the Leader*, artfully fashioned to portray a host of emotions, attitudes, and personality characteristics that are seen to have a significant effect on the relationship of the supervisor to the people he works with.

### Presenting Basic Ideas on Leadership

Afforded the freedom of a cast that can do anything, and making full use of miniaturized, abstract sets that actually visualize ideas rather than serve as mere backgrounds for the action, *Follow the Leader* is at once an engaging example of the art of film and a unique and forceful presentation of some basic ideas on leadership. Unique and forceful enough, anyway, to be awarded a First Prize for excellence by the Society for the Advancement of Management at its recent Second Annual Management Film Festival. Charlie's pride can only be imagined.

But the real importance of both Charlie's

theatrical achievement and *Follow the Leader's* cinematic excellence lies in their direct response to the leadership crisis. For Charlie, as seen in *Follow the Leader*, goes through it all — from his first moment of panic as he realizes the burden of responsibility; through longer moments of doubt and indecision as he adjusts to his new role; to his final moment of triumph as he recognizes just what leadership is all about and how he, Charlie, can measure up to its demands.

### The Importance of Goals and Objectives

What Charlie learns during the 11-minute running time of *Follow the Leader* are the basic principles and practices of positive supervision and leadership. He learns the importance of sound objectives and realistic goals. He discovers how certain supervisory methods can waste not only his time and effort but the precious human energy under his control. He realizes that ". . . new conditions . . . demand new kinds of knowledge, new flexibility, new skill in dealing with human beings." He learns, finally, that leadership is not a kind of mystique of personality but simply the considered application of proven methods and techniques. Charlie meets the challenge of his own personal leadership crisis and emerges a winner.

At first, however, Charlie saw his problem as one of deciding just what kind of leader to be. He tries on several different types of leadership personalities: "Good-time Charlie" to get

people to like him; "Charlie-the-Wise" to win their respect; "Charlie-the-Great", tough, decisive, to get people to obey with no questions asked.

### Charlie Takes on Varied Personality Roles

His adopting of these various personalities is complete, down to appropriate costume and satisfying, if imaginary, remarks from his subordinates: "That Charlie — what a sense of humor . . ."; "Ask Charlie — he knows a thing or two . . ."; "Charlie's strict as they come, but he's fair . . ."

Charlie, though, soon realizes that where he's going to be is not as important as where he intends to go. Without a good, strong sense of direction ". . . he can't lead anybody anywhere — except into confusion." The visualization of Charlie's sense of establishment, of the purposes and objectives he establishes, and of the relation of them to the over-all goals of his company provides some of the most interesting cinematographic effects of *Follow the Leader*. . . effects which result in some of the most essential insights into the basic function of supervision. Charlie seems well on his way to success.

### Full Energy of the Group Is Essential

His education isn't complete, however, until he discovers that the attaining of his and his organization's goals is beyond the capacity of any one person, that what is needed is the full energy of the group, and that making available the human energy at his disposal available to do the job is the special and primary responsibility of the supervisor-leader.

Charlie learns of the pitfalls and barriers that lie between the leader and his goals through a gallery of old-fashioned leadership types who demonstrate ably, if sadly, how the skill, brains and talent at their disposal are dissipated by ineffectual supervisory methods. All of these "leaders" end up on the discard pile, fitting enough, but not before they provide Charlie with ample reason to avoid their pathetic mistakes.

Charlie's development in *Follow the Leader* is swift but thorough. Objectives in sight and understanding how best to utilize the strength of others in achieving a common goal, Charlie is the personification of a new kind of leadership. Representing as he does the tens of thousands of others who, properly motivated and trained, could assume with confidence the responsibilities of leadership, Charlie is nothing less than a significant part of the answer to the leadership crisis.

### How to Obtain This Picture for Group Use

*Follow the Leader* was originally produced by the Strauss Company for Pan American World Airways where it is currently used in their supervisory training programs. *Follow the Leader* is now available for general distribution. The purchase price of the film, together with a discussion guide, is \$175.00. Previous purchase can be arranged at a cost of \$10.00 which is applicable towards purchase. Henry Strauss & Co., 31 West 53rd Street, New York City are the sole distributors.

\* \* \*

☆ Reviews of other current and useful films are offered on pages 96, 108, 110, 116, and throughout the back pages of this issue.

Meet Charlie: an artfully-fashioned puppet in "Follow the Leader" who recognizes the importance of sound objectives (he's the hero) . . .

"Or maybe you ought to be tough . . . decisive . . . Charlie the Great . . . get them to obey you with no questions asked (and no quarter given!) . . .

How does energy get lost? Sometimes it gets locked up inside . . . frozen energy . . . chilled by criticism and immobilized by inner doubts . . .

Positive leadership makes energy available for work and available to do the job at hand. It's a key factor in the film "Follow the Leader."

**Names That Made NEWS in Communications**

**Drotning to Head American Oil's Bell, Subsidiary of Raytheon Co.**

☆ Communications Services, new public relations division, has been set up to "expand and strengthen American Oil Company's internal and external communications programs" according to that company's public relations director, James M. Patterson.

Phillip T. Drotning has been named manager of the new division. Prior to joining American Oil's parent company, Standard Oil Company (Indiana), a year ago, Drotning was special assistant in the Administrator's office of the National Aeronautics and Space Administration, Washington, D.C. He previously served as vice-president, public relations, for Northwest Orient Airlines, Inc. and as executive secretary to Governors Rennebohm and Kohler of Wisconsin.

In other moves at American Oil, H. H. Hardy, manager of field services, will assume responsibility for press relations as well as continuing his supervision of the area operations and other field services of the department. John Canning has been appointed manager of press relations. Arthur R. Kuhl will continue as manager of creative services in the communications services division.

\* \* \*

**Ralph Mueth Directs Audiovisuals at Southwestern Bell Telephone**

☆ H. Ralph Mueth has become audio-visual supervisor for the Southwestern Bell Telephone Company in its general public relations department at St. Louis. Southwestern Bell operates in Missouri, Kansas, Oklahoma, Arkansas, Texas and a portion of Illinois.

Prior to his appointment, Mueth was a public relations supervisor, assigned to the company's Missouri-Illinois headquarters in St. Louis. He joined the company in 1954 as an advertising copywriter, was formerly in the St. Louis bureaus of the United Press, International News Service and with the St. Louis Cardinals professional baseball club.

While a member of Southwestern Bell's public relations staff, his exhibit-display program was awarded four gold first-place medals in the International Exhibit-Display Award competitions held in 1963, 1964 and 1965. Two of the awards were given for work done in the past year.

**Elect Kreiman as Vice-President, GM of Technicolor Pace Division**  
 ☆ Robert T. Kreiman has been named vice-president and general manager of the new Pace Division of Technicolor, Inc. according to an announcement by Paul W. Aschnacht, president.

Technicolor's Commercial and Educational branch has now been raised to divisional level and renamed the PACE Division to more closely identify it with the manufacture of Projectors and Audio-visual Equipment and accessories.

Kreiman, who has served Technicolor, Inc. for four years as general manager of the Commercial and Educational branch, will take his office in the Pace Division headquarters. Location of the modern production facilities in Costa Mesa, California.

\* \* \*

**Webb Presides at F. K. Rockett, James Ebling Now Vice-President**

☆ A promotion and a staff addition have been announced by the board of directors of F. K. Rockett Productions, Inc., Hollywood-based film production company.

Stanton Webb, who served as administrative vice-president and associate producer since 1959, has been elevated to the position of president and executive producer. Webb has had many years production experience in the motion picture industry along with an executive background in several major corporations.

Lt. Col. James Ebling (USF Ret.) has been appointed to fill the post of vice president and production coordinator at Rockett. While serving with the Inspector-General of the U.S. Air Force, Col. Ebling had over 200 motion pictures to his credit. In his new position he will be primarily responsible for budget and production control of all film production in the sponsored field.

\* \* \*

**Elect Butler President of Dage-Bell, Subsidiary of Raytheon Co.**

☆ Joseph W. Butler has been elected president of Dage-Bell Corp., Michigan City, Ind. subsidiary of Raytheon Company. Dage-Bell manufactures closed circuit TV systems and language learning laboratories for schools.

Butler, who succeeds Patricia Clancy at Dage-Bell Corp., joined Raytheon in 1959 and served in various management and manufacturing posts in the Missiles Systems Division.

## How do you measure quality in film transfers?

You know it when you see it! Your eye is our judge. That's why we demand perfection in clarity, definition and true grey scale. We get perfection by complete control. All of our work is done under one roof... a unique way of operating in our industry. And we feel the results are worth it. So do our clients — companies like AMERICAN MOTORS, MGM-TELESTUDIOS, MCA-TV, HEATH DE ROCHEMONT, even AMPEX. Their names

tell you a lot about our standards. But there's a better way to find out. Try us. We offer "in by 9—out by 5" processing—with your transfer jetting back the same night. And optimum quality is guaranteed (backed by two decades of expert Hollywood technology). If you believe your eyes call Acme Film Laboratories, Inc., Hollywood, 1161 No. Highland Avenue, Hollywood 1-7 171; New York, 100 Madison Avenue, HA 1-3 100.

### F&B/Ceco President Reports

#### An Upturn in N. Y. Production

☆ Arthur Florman, president of F&B/Ceco, professional motion picture equipment suppliers, has reported that film production in New York has taken a definite upturn in 1966.

Camera and lighting equipment rentals for January and February are up over 30 per cent from the corresponding period last year and are continuing to climb.

Also advance bookings for the near future through next summer are well ahead of last year.

Mr. Florman said, "It looks like New York is making a film production comeback after the slowest 16 month period in ten years. The trend of shooting TV commercials in California had to reverse itself eventually, because there was no real reason for it to have gone there in the first place. New York facilities and talent for commercials are second to none in the world. TV shows and series are another matter, and except for those needing a New York locale, have always been filmed in Hollywood. When New York-style shows are needed, they'll be done here again.

"Florida is also coming up rapidly as a film producing center," Mr. Florman added, "but it is drawing most of its business away from California, Chicago and Detroit. The latter two cities are losing what television production they had because of climate and scarcity of talent, equipment and trained technical personnel.

"It looks like 1966 will be one of the big years for New York film production," he concluded. •

"Color Television Test Film" is Available from SMPTE, N. Y.

The Society of Motion Picture and Television Engineers has released a new *Color Television Test Film* for use by laboratories, telecasters, manufacturers, producers and agencies as a "reference print" for subjectively evaluating color release prints and color television transmission systems and in performing quality control.

With the industry striving for uniformity, wide use of this film between film laboratories and telecasters will result in a major step toward effecting a consistent match of color release prints to be reproduced on television. Satisfactory reproduction of this film or of the companion set of eight 2 x 2-

inch slides containing similar scenes, should indicate good reproduction of other materials with similar color balance and contrast range.

The film as produced in 16mm, 35mm and 2 x 2 inch slide formats is intended to serve the laboratory and telecaster as a "representative material" to objectively evaluate product for density and color balance and as a final subjective evaluation of the performance of color television transmission systems, after the chain has been properly set up.

The *Color Television Test Film* incorporates a narrative soundtrack in addition to the instructional literature supplied. Inquiries may be directed to SMPTE, 9 East 41st St., New York.

### Post Office Ruling Now Permits Instructions to Accompany Film

• An important new ruling regarding postage payment on instructions accompanying private film shipments has been announced by the General Counsel's office of the Post Office Department.

Whereas in the past instructions accompanying films were not exempted and private carriers were required to pay postage to the department for these items, the new ruling places film instructions in the same class with bills of lading, freight bills and invoices that accompany shipments. The new interpretation is applicable only if the instructions accompany and directly relate to films shipped for processing.

The Department points out that films and instructions shipped through regular mail channels will be subject to usual mail charges.

Exemption privileges covering privately-shipped films do not apply if the instructions contain information other than the size, color, number of prints and other processing data.

## Brief Reviews of Current Sponsored Films

### Norton Company's Color Picture Shows "Adventures in Abrasives"

A new 25-minute color film describing the manufacture of grinding wheels from raw material to finished product has been released by the Norton Company, Worcester, Mass. Entitled *Adventures in Abrasives*, the film is narrated by Lowell Thomas.

Scenes were shot in the jungle areas of Surinam where expansive deposits of bauxite (used in the manufacture of aluminum oxide abrasive) are mined; in Chippewa, Canada, home of Norton Company's electric furnace plants which transform crude bauxite ore into abrasive; and at Worcester, Mass., the site of Norton's principal manufacturing operations.

*Adventures in Abrasives* points up the special technology and careful controls required to manufacture modern grinding wheels.

The film's executive producer was Milton W. Sebring, manager of audio-visual services. Technical consultant was Enfried T. Larson, former editor of technical publications. Bay State Film Productions of Boston and Springfield, was the producer.

\* \* \*

### Ships' Role in World Trade is

#### Told in New Volkswagen Picture

☆ *The Way of a Ship*, a new color film sponsored by Volkswagen, tells the story of ships around the world and the role they play in international trade. Stars of the film are the ships themselves, with the leading role taken by the *Johann Schulte*, one of the newest and largest in the 68-unit Volkswagen fleet that delivers about 5,000 cars daily all over the world.

The script was written by Nicholas Monsarrat, author of *The Cruel Sea* and other books about ships and seamen. Narration of the film is by Hans Conried.

The picture is the sixth in a series of internationally distributed films produced by Marathon International Productions for Volkswagen. Distribution is being handled by Modern Talking Picture Service.

*The Way of a Ship* was photographed in the open seas, in winter and summer, and in harbors of Holland, Italy, Germany, Japan and the U.S. It shows the never-ending work of the world's ships — cargo vessels, passenger ships, the family-run craft of Europe's inland waterways, and tugs.

### Facts on \$11 Billion Market in "Wonderful World of Boys' Life"

☆ *The Wonderful World of Boys' Life* is a new 12-minute promotional motion picture designed to present facts and figures of the \$11 billion male youth market — in an entertaining and persuasive way — for advertisers and their agencies.

"This energetic market is insatiable," the film states, "It is downright fierce, passionate in its loyalties, laughing at barriers, rooting loud and heartily for what it believes in, rejecting and selecting with equal enthusiasm — and it is reached exclusively by one and only one magazine: Boys' Life."

The film goes on to cite a rapidly rising circulation — now two and a half million, exceptional editorial quality, advertiser successes and the teen-ager's potent influence on major family purchasing decisions.

Accompanying these words, spoken by narrator John K.M. McCaffery and written by Saturday Review columnist John Fuller, are lively, handsome visual sequences depicting youth at work and at play.

Filmed on location in Connecticut and Florida, the picture was directed by Bill Buckley, photographed by Jules Sindie and Vachel Blair, and produced by Anne Koller, of Rossmore Productions, New York. It was supervised by Boys' Life promotional director, Robert L. Goldsmith.

*The Wonderful World of Boys' Life* will be shown to gatherings of advertising men in most major

Narrator John K. M. McCaffery (seated) checks script for Boys' Life film as (left to right) director Bill Buckley; producer Anne Koller; Robert L. Goldsmith (the magazine's promotion director); and asst. producer Ellen Shaff watch attentively during recording at Manhattan Sound Studios.

market areas of the country during the next few months. Intensive desk-top presentations will also be made by Boys' Life representatives, using Fairchild Mark IV 8mm sound projectors.

### Role of Welcome Wagon Service Explained in Two Color Film

☆ *The Welcome Wagon and Opportunities* are two new film explaining the functions of the Welcome Wagon organization and exploring the many rewards such work offers Welcome Wagon hostesses. The films are presented as a public service by Welcome Wagon International, Inc., and are distributed nationally through Association Films, Inc. They were produced by Wilding, Inc.

*The Welcome Wagon* (28 min., color) is the story of 5,000 women who serve their communities as Welcome Wagon hostesses. The film explains what Welcome Wagon is and follows several hostesses in their daily visits to newcomers in the community. In addition, the film points out other hostess activities such as visits to families celebrating a special occasion, conferences with religious leaders and important meetings with business men — all showing how these women form a dynamic and vital part of community life.

*Opportunities* (31 min., color) is a featured panel discussion with five Welcome Wagon supervisors who talk about the challenges and opportunities for personal growth and service with the Welcome Wagon organization. These women from all parts of the country give their reasons for going into Welcome Wagon work and discuss their field experiences.

## McGraw-Hill Offers First 8mm Sound Films

Release 8mm Optical Sound Prints of 26 Science Films

McGraw-Hill Text-Films has announced the release of its first two series of science films in 8mm optical sound. The series — *Planet Earth* and *General Science* — each contains thirteen films. In 8mm optical sound, they will cost significantly less than their corresponding 16mm color versions.

Albert J. Rosenberg, vice-president and general manager of McGraw-Hill's Text-Films Division, announced that "as the program develops, and it is developing rapidly, we will be offering a wide selection of subjects in 8mm." He went on to point out that "the development of 8mm optical sound films is the most significant advance in years in the audiovisual industry."

The low cost, high quality, and convenience of 8mm optical sound films may make possible greatly expanded use of audio-visual teaching in the classroom — adding a whole new dimension to education. Prints are not only relatively inexpensive, but also lightweight, easy to handle and convenient to store. It is now economically feasible for individual teachers to have 8mm equipment for their own classes, rather than have to wait for availability of basic 16mm audio-visual library materials.

The development of McGraw-Hill's new 8mm optical sound film has overcome a major deterrent to the use of 8mm in the past. This new format is "8mm" in name only — because the picture frame itself has been greatly increased in size, assuring picture brilliance and clarity comparable to 16mm, with a full-size optical sound track making the sound as permanent as the picture.

8mm equipment is particularly

suitable for small group use and is therefore especially valuable in the individual classroom. The small, compact 8mm projector, made by Viewlex, Inc., can be carried easily from room to room, enabling teachers to supplement the 16mm material in their school film libraries with 8mm material for specific classes.

\* \* \*

### Laser Television System, Camera Developed by Perkin-Elmer Corp.

A development that less than five years ago would be attributed to the pages of science fiction literature was announced by Perkin-Elmer Corporation of Norwalk, Connecticut. Consisting of a so-called laser television system, it features the recording and projecting of TV images in a studio requiring no studio lights or external sources of illumination.

The term "laser" is an acronym for light amplification by the stimulated emission of radiation. First demonstrated as recently as 1951, the light from laser is highly coherent, pure, bright and monochromatic.

The laser TV camera, developed as an extension of Perkin-Elmer's work in optical scanning and laser illumination, scans subjects with narrow beams of red laser light with the result that eye are illuminated on the TV monitor as if in daylight brightness. The intensity of the laser beam is well below the level said to endanger the vision of human subjects.

According to Marvin J. Fenn, manager of Laser Illumination Systems of Perkin-Elmer, other uses for laser beams are as all-weather landing aids for aircraft, covert surveillance for law enforcement agencies and for study of nocturnal animal behavior.

## How to Reach 26 Million Customers Abroad

WIDESPREAD ACCEPTANCE of film as a powerful marketing weapon is one reason why a sponsored film distributor's office resembles a Command Post these days — planning strategy and carrying out operations for sponsors on many an international front.

The product salesman knows who his customers are, where they are and how they can best be contacted. It may be a Thai village gathering, V.I.P.s brought together round a dinner table in Washington, Paris or London, or an audience of thousands at a great Convention Centre. In each case the sales approach is different — and if a film is used to support the sales presentation, expert handling is needed to ensure that projection details, seating arrangements, methods of invitation, introduction and follow-up will have the maximum desired effect.

### Film Presentation Specialists

In Europe is one of the most experienced road show operators, Sound Services, which for thirty years has specialized in organizing many thousands of sales film presentations in Britain and the European countries, and is responsible for the preparation and supply of all foreign language versions of the films used by such international sponsors as Caltex and British Petroleum.

With this experience, a unique service for sales presentations has grown up. — In London, for example, there is a bewildering choice of preview theatres, hotels, restaurants and meeting halls where films can be shown — but variations in facilities, standards and service make it essential to maintain a constant review.

### Pitfalls for Meeting Chairmen

A change of banqueting manager or film projectionist may be the difference between a highly successful presentation — and the sort of fiasco that everybody wants to forget — except the competitors! In the hands of the specialist, there are no risks.

In other parts of England, Wales, Northern Ireland and Scotland a similar service is maintained by a network of associates working closely with the London office of Sound Services.

### Can You Use Film Successfully?

But on the continent of Europe, how can a U.S. marketing man be

... "Colgate-Palmolive, which has been selling in Thailand for thirty years . . . dominates the toothpaste market, but in soaps and detergents it has to battle with its ubiquitous competitor, Unilever.

To stay abreast of the competition, Colgate employs sixty salesmen and some unusual sales methods. In Bangkok the salesmen make conventional door-to-door sales, but in rural areas they are preceded by a road show. Often this consists of a movie projected from the back of a jeep onto a folding wide screen. During the show, salesmen move among the crowd, distributing samples and pamphlets. Colgate also uses five boats to reach people settled along the canals." (from Fortune magazine, January, 1966)

sure that it will be possible for him to include films in a sales campaign taking in, for example, Paris, Brussels, Antwerp, Liege, Rotterdam, Noordwijk, six industrial centers in Germany, Jyväskylä in Finland, Milan, Rome, and a V.I.P. customer who can only be contacted on holiday at St. Moritz? That is — without the necessity of sending a man on ahead to make the arrangements, or placing a heavy burden on the company's importing agents who may be inexperienced in arranging film shows?

From a file at Sound Services' London office containing details of over 400 hotels and conference centers in Europe, North Africa and the Middle East, the most suitable venues can be selected — by reference to the listed projection and catering facilities — including other a-v services such as simultaneous translation, amplifiers, tape recorders, slide and film

strip projection, closed circuit television and videotape facilities

### How Sound Services Functions

Working in collaboration with overseas associates, Sound Services ensures that the films are available and ready to be shown in the appropriate languages as required. Meetings are publicized, audience groups contacted, publicity material distributed — in fact, a whole export sales tour can be planned, booked and carried out with the same confidence as for a home-based audiovisual program.

In the same way audiovisual display material can be included in exhibitions — last summer Sound Services' specialists were in Cannes, France, providing the CCTV viewing facilities at the International Advertising Film Festival; setting up projection facilities on the White Horse Whisky distillers' stand at the International Trade Fair in Helsinki, and

Inforfilm's British member, Sound Services, dispatches more than 100 film titles each day from this depot in London. The overhead conveyor is used to move bags of film cases to shipping van waiting outside

# look hear

able to sell in Europe your message has to be understood *and* accepted. That's where we can help you. We have the experience of thirty years' successful communication through film in Europe. We can dub your existing films in any language and distribute them to your audiences.

Sound Services, Europe's largest sponsored film library, is just one of our nineteen companies in Britain, Germany and Switzerland which offer total capability in planning production and distribution of all business and industrial motion picture, T.V. and cinema commercials.

Our 'man in Europe' could be our Bert Jessop—why not communicate with him and ask him to tell you more?

## How to Reach 26 Million Customers Abroad:

plays at the Hanover Fair in Germany, the International Shipping Exhibition in Oslo, the International Samples Fair in Barcelona, and at the Paris International Aeronautical Exhibition.

Operations on this scale would be impossible without close co-operation between specialists in many countries provided through a fifteen nation international association of professional film distributors called Inforfilm.

### Reaching 500,000 Audiences . . .

Well over 500,000 audience groups regularly borrow sponsored films from the Inforfilm members who operate in Australia, Belgium, Canada, Denmark, Finland, France, Germany, Great Britain, Holland, Italy, Japan, New Zealand, Sweden, Switzerland and the U.S.

These influential audiences mould opinion in their countries — they are the industry groups, business and professional clubs, universities, schools, political associations which, according to Inforfilm's General Secretary, Jan Botermans, have shown sponsored films to over 605 million people during the last five years.

### If You Export to the U. S.

These are impressive figures — and they can be invaluable to the businessman faced with the problem of setting up and developing overseas marketing operations. Take a European exporter for example, anxious to establish his company's name in the United States; or vice versa. Each way, there is the advantage of direct contact between nine European

45 years ago, Milton Hartmann of Schmalfilm Central, in Switzerland, trekked his mobile projection equipment by sledge to remote Alpine villages to whom he provided their only means of entertainment on portable screens.

Inforfilm members and the U.S. member, Modern Talking Picture Service. In the U.S.A. Modern's 32 regional offices disseminate details of the exporter's free loan films to 200,000 active audience groups which have a total undu-

International Harvester booth at this London exhibition included a film show utilizing Sound Services' rear-projection equipment; showings provided a restful, informative interlude for trade buyers viewing picture.

licated audience of 15 million community-minded Americans.

The European members would provide a similar service for the U.S. sponsor's films which would be made available in the appropriate languages. And the cost? By agreement, the Inforfilm global international rate is the same for operations in all member countries. It includes research into audiences and their reactions — inclusion of film titles in the catalogs sent to active mailing lists.

processing of all bookings, shipping and retrieval of films, including packaging and postage, inspection and maintenance.

The distribution charge also buys years of valuable experience in library operations, for example — Inforfilm's Swiss member, Schmalfilm-Zentrale (Central du

Technical Film Centre present industry's films in Europe's most densely populated areas. On the other side of the world, Steer Millimeter Australia covers that continent.

Wherever films are shown these days — challenges become opportunities for sponsor's increased goodwill, sales and profits.

### Britain to Select the Year's Best Industrial Films on May 23-24

Britain's annual National Industrial Film Awards Competition will take place at the Shell Theatre, South Bank, London S. E. 1 on May 23-24. The 96th competition to select that country's outstanding industrial sponsored motion pictures is being organized by the British Industrial Film Association on behalf of the Confederation of British Industry.

20 national awards will be presented this year from selections made by representatives of industry, commerce and the specialized film industry. The Federation of Specialized Film Association has nominated three representatives to serve on each of the preliminary evaluation juries which view films in each of the seven categories of entry. In addition to the national first awards, diplomas and certificates of merit will be awarded a second and third prizes. Prizes winners will be presented at a ceremony to be held on the evening of May 24.

The Council of the British Industrial Film Association will select from the winning entries the 15 films which will comprise the official British entry to the 7th International Industrial Film Festival to be held in Venice in September.

Film a format réduit) was founded in 1921 by American-born Milton Ray Hartmann, whose horse-drawn mobile projection units were the first to visit the most remote Alpine villages. Today they still rely on Schmalfilm for their regular film shows.

### Each Area is Vastly Different

Each territory offers a different challenge to the sponsor who seeks international audiences for his films through Inforfilm's services — Belgium's Sofedi and Holland's

Today, Schmalfilm is one of Europe's most effective sponsored film distribution agencies. The sleigh has been replaced by the Volkswagen but the pioneer spirit, reaching out for new viewing groups, remains unchanged.

## Venice to Host Industrial Film Festival

Seventh International Event to be Held in Mid-September at Lido

**S**PECIALISTS IN BUSINESS and industrial film production and use throughout the world are expected to attend the 7th International Industrial Film Festival to be held in Venice, Italy in mid-September. Dates were not finalized at presstime but the indicated opening date is the 10th or 12th of September. The International Show of Cinematographic Art will be held concurrently.

This year's festival is being organized by Italy's Confederazione Generale dell' Industria Italiana, under the auspices of the sponsoring group, the Council of European Industrial Federations. It will be held at the Palazzo del Cinema, Lido, Venice.

### Guiglia Head of Arrangements

Arrangements for Festival events are being made by Giacomo Guiglia, chief of the Press Office of the Italian Industrial Confederation. Industrial motion pictures from 21 countries, including Africa, Australia, Canada, Israel, Japan and the United States competed at last year's event, held in Rouen, France. A maximum of 15 entries is permitted from each country and all films must be officially submitted through associations of industry within the entering country.

U.S. entries are being submitted under the auspices of the National Association of Manufacturers and will be selected by a special committee headed by William Connelly, advertising manager of Union Carbide Plastics, in co-operation with the Council on International Nontheatrical Events, headed by Willis Pratt, Jr., American Telephone & Telegraph Co.

### Competition Abroad Vigorous

In other competing countries, such as Britain, France and Germany, International Festival en-

tries are selected through national industrial film competitive events held on behalf of their respective industrial federations.

### 1966 Photokina Combined With Int'l Congress for Photography

☆ The 1966 Photokina—World's Fair of Photography and Cinematography—and the First International Congress for Photography and Film in Industry and Technology will be jointly held in Cologne, Germany Oct. 1-9, 1966. Some 600 firms from the important photographic producing countries of the world are expected to participate, exhibiting the latest in equipment.

The theme of the first International Congress for Photography and Technology will be "Photography Helps Technology." Dr. Rolf Rodenstock, Professor of Optics at the University of Munich, has been named president of the Congress.

Latest developments in photography will be discussed by leading experts from all over the world at the Congress in a series of highly technical discussion areas.

An added feature at this year's Photokina will be the special screening of outstanding industrial motion picture films at a theater set up on the fairgrounds.

## Kodak Opens Major Exhibit of Photography

April 18 Premiere at Chicago Museum of Science & Industry

A MAJOR EXHIBIT of the all-encompassing world of photography, which will emphasize the capabilities of photography in the fields of science and industry, will be sponsored by the Eastman Kodak Company at the Chicago Museum of Science and Industry.

The only exhibit on this subject at the world-famed museum, it will be opened to the public on Wednesday, April 20th. A press preview will be held at 10:30 a.m. on that day, followed by an informal dinner for special guests at 6:30 p.m. William S. Vaughn, president of Eastman Kodak, will be joined by other officers of the company at both events. Their host is Major Lenox Lohr, president of the Chicago museum.

### Three Million Annual Visitors

Some three million people visit the Museum of Science and Industry each year; 32 per cent of these visitors are under 21 years of age; 71 per cent come from outside the city. Evolving as 18 distinct elements, the Kodak exhibit will demonstrate how photography contributes to the ever-changing world picture.

Key criteria in developing the exhibit were viewer participation and personal involvement. The viewer will be able to operate many of the displays manually. One of these is in the "time machine" section in which a viewer-

operated console selects historical events preserved on film to emphasize photography's historical and record-keeping propensities.

### Photography as Working Tool

The broad capabilities of photography will also include a "time modifier" which dramatically shows how photography can slow down high-speed action and accelerate slow action. Viewer-activated Kodak Carousel projectors will offer slide sequences on the uses of photography as a working tool in industry, education, science, journalism, business and exploration. Such sequences will depict the uses of photography in helping people to know one another better throughout the world.

## NEW FILMSTRIP TELLS HOW FILMSTRIPS HELP SALESMEN SELL

"The World's Biggest Sample Case," produced by Pilot Productions, Inc., tells how a good filmstrip saves your salesman's time, allows them to make more calls—and at the same time trains and stimulates them.

It points out that a filmstrip can never replace salesmen, but tells how it can take on the job of telling the basic selling facts in the same, fresh, interesting manner each time—allowing the

salesmen to use their ability and experience to supplement the filmstrip and achieve a close.

Arrange for a showing. Your only cost is the postage to return the film and record. Or, if you don't mind having someone from Pilot peering over your shoulder, we'll arrange for one of our men to handle your showing. Write or phone.

**this is a bird ...  
it cheeps**

**this is a cheap  
color processor  
...it's for the birds!**

We make a line of continuous laboratory processors. They're good.

Sometimes we wonder whether we make them too good. (Apparently some people are willing to settle for less.)

For example, take our color processors for industrial motion picture film.

We could forget that top color performance is essential in sales, training, and educational programs . . . and knock off hundreds of dollars by using low capacity dryers, second-rate heat exchangers, and two-bit controls.

If we did all that (— and more), we could probably sell our processors for 20% less. But would it make sense?

Is it old-fashioned to give every processor the extra dependability that skilled, dedicated craftsmen can build in?

Is it wasteful to test every unit we build to make sure you get all the performance our reputation promises?

Has the practice of providing an honest product at a reasonable price gone out of style?

We don't think so. And apparently a lot of people agree. They figure they get what they pay for. They believe that Treise quality is a bargain. And they've helped us grow to the point where we have designed, built, and installed more Ektachrome Processors than any other manufacturer in the world!

## Clean Water: a Film On a National Issue

Co-Sponsored by League of Women Voters and Soap Makers

THE MENACING SHORTAGE of clean water, regarded by many conservation authorities as the most serious threat in the years ahead, is the subject of a public service film previewed on March 7th in Washington, D.C. Titled *It's Your Decision — Clean Water*, the 14½ minute, 16mm film was initially shown to representatives of government agencies, national trade associations, and conservation and women's clubs.

*It's Your Decision — Clean Water* was produced by Wilding, Inc. and is being distributed nationally by Association Films, Inc. Co-sponsors are the League of Women Voters and the Soap and Detergent Association. The League is currently studying water resources as part of its community improvement program, while the Soap and Detergent Association represents an industry that has just completed a \$150 million changeover from "hard" to "soft" materials that readily "break down" after disposal under adequate sewage treatment.

Technical assistance and guidance in making the film was provided by the Public Health Service and the Federal Water Pollution Control Administration of the U.S. Department of Health, Education and Welfare.

The public service film attributes the present lack of clean water to three primary sources: people, prosperity and products. There are three times as many Americans living as in 1900. Not only do these people draw more water for personal use, but a wide variety of equipment used in today's "better living" utilizes tremendous quantities of water. Finally, in the last 20 years we have created six times more pollution per individual than in pre-World War II days.

The use of renovated water (water that has been used and treated for re-use) is pointed up as an important potential added source in *It's Your Decision — Clean Water*. The film states that only 33 per cent of our population is today served by secondary sewage treatment plants which are "compact, efficient, modern adaptations of nature's own methods of purifying sewage and restoring water to better quality."

Various kinds of waste treatment in use today are illustrated and evaluated in the film. The

Eight per cent of the nation's people still discharge untreated raw sewage from sewer systems into our streams.

film stresses, however, that in the final analysis the decision to have good sewage treatment and control of pollution rests with responsible citizens who make their interests known by voting for modern sewage treatment.

\* \* \*

### Mass Inoculation Urged to Halt Smallpox in World Health Picture

☆ In today's world of rapid intercontinental travel, no one is safe from the scourge of smallpox unless he is vaccinated, states the new film, *Smallpox: Merciless Traveler*. Using animation, the 17-minute, color motion picture underscores the worldwide need to eradicate the dreaded disease by mass inoculation. It was produced by Czechoslovak Film for the World Health Organization and is available for purchase from the Center for Mass Communication of Columbia University Press.

The film traces the history of smallpox from its appearance in ancient Egypt, as verified by the poek-marked face of Ramses V, to the most recent scare in the United States in 1961. Vivid, stylized animation depicts its march across the centuries — first with nomads, then with invaders, explorers and crusaders and today with jet travelers.

*Smallpox: Merciless Traveler* portrays Jenner's successful use of cowpox pus to vaccinate against smallpox and the slow adoption of his methods in countries throughout the world.

The recent case of Eugene L. who brought smallpox into this country in 1958 dramatically illustrates the need for mass inoculation. The film points out that the threat of an epidemic in any nation is real as long as there are countries in the world where the disease remains unchecked.

### Open 75-Seat TravelCinema at Memphis' Metropolitan Airport

☆ As a free passenger service, a 75-seat TravelCinema theater has been opened at the Memphis Metropolitan Airport. Centrally-located for maximum passenger convenience, the wood-paneled rear-screen showcase has been drawing large crowds during its first weeks of operation, according to Association Films, national film distributor.

The cinema is in an open area adjacent to the airport ticket offices in the main passenger section of the terminal. Association Films and the operators of the chain of theaters, TravelCinema, of Westwood, N.J., show 16mm films on a continuous basis 12 hours a day.

#### Theater Location a Key Factor

"The location of the theaters and not necessarily the size of the air terminals is the key to the success of TravelCinema," according to Robert Finehout, vice-president of Association Films. "Locations must be carefully chosen for maximum passenger traffic to and from the various carriers. We try, too, to have the cinemas in areas near or adjacent to cocktail lounges, restaurants and other inter-terminal attractions."

The films, primarily sports, travel, public relations and entertainment, are selected from Association Films' sponsored-film library of more than 700 subjects. The first TravelCinema, located in Tucson International Airport, has been operating for almost a year. Audience surveys of the several thousand passengers who have seen the programs there show that the free screenings have been very well received.

#### Other Cinemas Being Built

Additional cinemas are under construction in a number of airports in other cities, TravelCinema has announced.

Distributor listings begin on Page 59 of this 16th Review issue.

Dr. Eugene Baumgartner examines a patient who is constant smoker.

### "Critical Decades" Shows Vital Role of Middle-Years in Old Age

☆ *The Critical Decades*, a new film produced for the United States Department of Health, Education, and Welfare by Columbia University Press Center for Mass Communication, underscores the need for healthful living patterns early in life to prevent later illness.

The 31-minute film (28½ min. in a TV version) was written and directed by George C. Stoney and features Dr. Eugene I. Baumgartner, former president of the American Academy of General Practice. Dr. Baumgartner explains, "Unless we get the patterns of our lives straightened out in our forties and fifties, we aren't likely to do so well in the home stretch." Using actual patients, he shows how lack of medical attention in the middle years results in serious illness later on.

*The Critical Decades* has a clear message for patient and doctor alike. The film suggests ways the family doctor can foster preventive attitudes in his patients. It shows how to educate and motivate patients toward the goal of a positive health program.

The Center for Mass Communication at Columbia University is a non-profit producer and distributor of educational films. It has specialized in the production of films for government agencies, foundations and educational organizations.

**Your message  
printed here.  
In 10 seconds.  
55¢.**

You can put your message on a Polaroid Land transparency in 10 seconds for a mere 55¢. That's about 23 hours, 59 minutes, and 50 seconds faster, and 1 dollar less expensive than an ordinary slide.

All you do is load the film into the camera. Snap the shutter. 10 seconds later you have your transparency.

After a quick hardening just slip the slides into the snap-together plastic frames. And you're ready to go.

There are 2 different kinds of transparency film.

Polaroid PolaLine transparency film is designed especially for line copy work. The blacks are really black, the clear areas are extremely clear. That makes it ideal for charts, graphs, diagrams...anything set in type or drawn in pencil or ink. It develops

in only 10 seconds.

The other film is for continuous tone work. You make slides of pictures and objects with it in 2 minutes. You can even take a picture of someone in the audience. And a few minutes later show it on the screen. That's guaranteed to liven up the presentation.

Both kinds of slides fit any standard lantern slide projector. Both kinds of slides can be made with the many Polaroid Land cameras that accept Series 40 film, except for the J-66.

And both kinds of slides have terrific impact when they're projected. Just imagine how much more this ad would have impressed you if it had appeared 3 feet tall on your office wall.

### San Francisco Will Hold 10th Int'l Film Festival Oct. 20-30

San Francisco will hold its 10th Annual International Film Festival in the city's Masonic Auditorium on October 20-30. These dates were confirmed at presstime by the sponsor of the event, the Greater San Francisco Chamber of Commerce, whose directors recently adopted a resolution to permanently host the Festival.

Primarily a non-competitive showcase for the 21 entertainment pictures chosen for the Festival, it also includes a Competitive Division in which television programs, communications films and art or experimental productions compete in their separate classifications. Judging of these entries is a non-public, closed event. Carson McGill has been named chairman of this division.

Cyril Magnin, president of the San Francisco Chamber, also announced that David M. Sacks, vice-president of the American Broadcasting Corporation and general manager of the network's local station, has been named general chairman for the 10th Festival. William C. Boyd, administrative manager for the Chamber, will again serve as executive director.

Ed. Note: details of this Festival were received long after our deadline for its listing within the Film Awards section (pp. 21-30) and further data will appear in these pages as details of the Communications Film competition are provided.

### Bank of America Using Cinema-D at World Trade Fair May 12-25

When the 8th U. S. World Trade Fair opens May 12 at San Francisco's Civic Auditorium and Brooks Hall for an 11-day run, the Bank of America will present a program of world-wide travel and informational films in a specially-designed 42-seat theater using a Cinema-D system.

The system is a patented process for which Jim Holt Enterprises holds exclusive rights and is a projection method which adds clarity, brightness and depth without the use of special film, lenses or projection equipment. To give a "window-like" perspective to the projected images, the Cinema-D System utilizes a large mirror reflecting a hidden screen, properly masked and oriented, so that the sense of reality is enhanced.

In a four-month test conducted among both trade and public audiences in a Los Angeles suburb,

## the news perspective

96.5 per cent of the viewers in the 40-seat screening room indicated on preview cards that the motion

pictures they had seen presented (both feature films and short subjects) seemed much "more real."

### 757 Attend 20th Annual Calvin Workshop in Kansas City Studio

The 20th annual Motion Picture Workshop, hosted by Calvin Productions in Kansas City on February 7, 8 and 9 brought a record attendance of 757 guests. The attendance in 1965 was 630.

Calvin president Leonard W. Keck introduced the keynote speaker, O. H. Coelln, publisher of *BUSINESS SCREENS*, who discussed "Barriers and Bridges to Better Film Utilization" on the opening morning of the '66 Workshop. Gene Carr, of the Calvin staff, was in charge of arrangements.

Coelln's presentation was followed by a comprehensive, illustrated talk on scriptwriting by Calvin director William J. Sollner. Other highlights of the Workshop program included a talk on 8mm problems and possibilities by Calvin vice-president William Hedden and the "1965 Survey of Factual

Motion Picture Progress," delivered by Tom Hope, of the Motion Picture and Education Markets staff, Eastman Kodak Company.

Edward Ancona, color television expert of the National Broadcasting Company, discussed color film problems in that area. As is the custom at these annual Workshops, there were frequent screenings of special films created for the program and all guests were supplied with detailed notebooks.

An exhibit of production and projection equipment was held in an adjoining area, next to the large stage where the program took place. A reception for all guests was held at the President Hotel in Kansas City.

Showings of outstanding films highlighted evening get-togethers, featuring such pictures as the award-winning *Forth Road Bridge* and two McDonnell Aircraft Corp. films, *The F4* and a color film on *Major White's Walk in Space*. •

President Leonard Keck welcomes 757 guests to the Calvin Workshop.

Dean Blomeyer, advertising manager of Caterpillar Tractor at make.

V. P. Bill Hedden discussed future of 8mm, cited need for standards

Tom Hope, of Eastman Kodak brought new facts on this industry.

Skyport Cinema at Kansas City Municipal Airport seats 50; showings are on a continuous 10-hour schedule.

*These showings to waiting travelers at large terminals are reaching active, influential viewers.*

# Skyport Cinema: free films for air travelers

**N**EW WAYS of reaching prospective viewers of business-sponsored motion pictures are the constant concern of the nation's leading distributors of this medium. Notable success has been achieved by two of these firms in providing facilities for showing at air terminals throughout the U. S.

The "Skyport Cinema" program, inaugurated by Modern Talking Picture Service Inc. when that company opened its first installation at the Greater Cincinnati Airport in September, 1964, merits special attention in this report. Modern will soon open another theater at the busy Cleveland terminal; already in operation are Cinema showcases in Atlanta, Kansas City and Minneapolis-St. Paul. A Denver facility will begin showings when the new air terminal is completed there in May.

These theaters were all *designed and engineered* for their specific purpose: to provide the air traveler-in-waiting with a relaxing interval in which free films from industry and other groups bring informative and entertaining pro-

grams to brightly-lighted screens. Each Skyport Cinema installation has benefited from the pioneering effort at Cincinnati where valuable lessons were learned on trouble-free equipment operation, audience interest and other data.

What kind of audiences are these? Louis Harris and Associates, in a recent survey of the air travel market they made for American Airlines, calls air travelers "*undoubtedly the most articulate, successful, active and alert group of people that populate America today . . . Of all major industries, the airlines probably have the most exclusive leadership community as their customers.*"

Modern has concentrated its cinema development program in major terminals; the company considers the country's "top 25" airports as its primary goal and appears to be well on the way to success. Annual Atlanta departures, within the last reported year, totaled nearly 3 million and the figure is said to have increased by 18 to 25 per cent in the past year. Denver rates high with a re-

Cinema installation uses rear-screen projection to show bright picture in ordinary light on the 48-inch screen.

Dual projectors provide a continuous performance over a 10-hour span with no program breaks.

Illuminated signs throughout terminal (this is Cincinnati) direct the waiting passengers to free showings.

Viewer reactions to film showings are solicited at these installations. We get many enthusiastic comments.

Atlanta's busy Municipal Terminal (at left) had 2,741,789 departures in a year, with traffic constantly growing at this Southeast travel crossroads. Below: Modern's Skyport Cinema in Atlanta has comfortable seating for 35.

Fig: Skyport Cinema for waiting passengers at Minneapolis-St. Paul International Airport where movies are popular during afternoon, evening hours.

Modern's first Skyport Cinema was opened in September, 1963 at the Greater Cincinnati Airport and provided valuable experience used in later theaters.

ped 1,394,543 annual departures; Cleveland, Kansas City and Minneapolis-St. Paul had well over a million departures in these older CB figures. Cincinnati was moving up to the million mark.

What kind of films are shown? Travel, sports and business short subjects are high on the list of audience preferences. And with only 86 per cent of air flights out of Kansas City, for instance, being made by business and professional men, this was high praise for such fare. The distributor knows what the viewers like, solicits free opinion comments in an open "day book" which has recorded real praise from appreciative viewers.

averaging 35 capacity at Atlanta to 50 chairs in front of the Kansas City screen. But the sponsor fortunate enough to get on a Skyport Cinema showing schedule can achieve impressive audience totals through regular daily "repeats" — day-in-and-day-out. He can also be sure of professional film projection: rear-screen showings on the 48-inch area offer the equivalent of 60-inch TV reception. Dual projection facilities facilitate constant operation with no "down time" for repairs, maintenance or program "breaks."

But it isn't only the air traveler who attends the theater. Friends of the arriving or the departing passenger are in the audiences — exposed to the sponsored film me-

dium and made aware that such films are also available for their club, community or business use.

Airport managers and air-line agents find that these free movie lounges are welcomed by travelers — that they help ease weather wait-outs and delays.

The idea, like air travel, suits the pattern of growth, of progressive audience development which has moved the film medium into new groups of audiences. Opening such new channels of film distribution at this high level of buying power and community influence was neither easy or inexpensive. But it reflects the spirit of challenge which pervades the field of distribution and it affords a real opportunity for sponsors.

Below: Skyport Cinemas are constantly attended during all operating hours. Each audience is counted.

Signs like this Atlanta Skyport Cinema poster inform potential viewers of films offered, hours of operation.

They're also carefully counted for benefit of sponsoring clients. attendant on duty throughout full 10-hour day-and-evening showing hours takes a personal tally after each program has finished its run.

Seating capacity is modest;

These waiting travelers (and potential film viewers) at a big city terminal tuffly today's boom in air travel.

Wisconsin Governor Warren P. Knowles (center) was at premiere showing of "We Like It Here." Shown in group (from left to right): Rudy Swanson and his son, Bob, the producers, Gov. Knowles; Ken Haagensen, representing the Governor's Council for Economic Development; and Ken Boyer, the public relations official of Wisconsin Telephone Co., an advisor on film.

## Picture of Wisconsin: "We Like It Here"

Statewide Cooperation Has Achieved Major Promotional Result

A COOPERATIVE EFFORT involving Wisconsin state agencies, industry, agriculture and labor, and an independent motion picture producer has resulted in the production of *We Like It Here*, a promotional film serving as a centerpiece for Wisconsin's current ambitious economic development program.

The idea for producing the hour-long 16mm color film originated with a special Communications Task Force working with Governor Warren P. Knowles' Board of Economic Development. Governor Knowles, representing the state's minority party, called the production a "truly bi-partisan effort."

### Matching Funds Made It Possible

Once the thinking behind the film crystallized, various state departments contributed \$25,000 and business, industry, labor and agriculture matched the figure with a similar contribution.

The film makers intended to extoll Wisconsin's virtues as a place to work, play and vacation. The camera's roving eye caught a wide range of scenic wonders, people, festivals, lakes, rivers and farms. The services of various state agencies were solicited and the head of each was asked "What's new and unusual

### Covering the State With Film

Filming and editing *We Like It Here* took five months, and the original 80,000 feet shot throughout the state was edited down to

2000 feet. An unprecedented viewing audience was assured when, on December 28, 1965, all 17 stations in Wisconsin simultaneously ran the film during prime evening time.

Plans call for the later release of the film throughout the country. Industrial executives will be particularly urged to view the presentation. As Raymond Huber, speaker of the Wisconsin state assembly summed it up: "It's very good . . . Now it is up to us to sell it."

And sell it they will — the picture is getting a great deal of favorable press comment.

\* \* \*

### The Story Behind the Picture

*We Like It Here*, the one hour 16mm color film, "selling" the Badger State was a cooperative

Below: Dave Kennedy (left) who composed original score for Wisconsin picture, shared plaudits with producer Robert Swanson, president of Swanson Productions, writer and producer of "We Like It Here."

production involving a lot of Wisconsinites, but Bob Swanson, head of Rudy Swanson Productions in Milwaukee, Kenneth R. Boyer, assistant vice president in charge of public relations for the Wisconsin Telephone Company, and Dave Kennedy, a musician and Milwaukee recording studio executive, did most of the leg work.

### Shot Over 700 Color Scenes

Literally covering every corner of the state, Bob Swanson shot more than 700 scenes in color — 80,000 feet in all. Swanson trudged 10,000 miles on the ground, and hovered above the state in a helicopter logging 3000 additional miles.

Boyer was the coordinator, advance man, persuader and pusher

and shover. But he says he did a very simple job of persuading people to do. "When people saw a top-of-the-line and motion picture camera, they simply said we were making a film for the state and they said, 'Go right ahead.'"

### Symphony Plays Original Score

Dave Kennedy wrote an original musical score and a theme song, "We Like It Here" that was recorded by 37 members of the Milwaukee Symphony Orchestra and 20 members of the Milwaukee A Capella Choir.

The film was narrated by Jay Scott, the "voice" of the world championship Green Bay Packers, a pro football team that is also a Wisconsin product.

## ABC Shows Sponsors "Look of Tomorrow"

Network Samples 33 New Color Shows in A-V Presentation

CASTING ONE HOPEFUL EYE at the time buying sponsors, and the other at 1966 Nielsens, the American Broadcasting Company recently took its *Look of Tomorrow*, a hard-hitting audiovisual sales show, to audiences in New York, Chicago, Detroit and San Francisco. Produced for ABC by Visualscope, Inc., the presentation features previews of television shows slated for ABC video presentation in the Fall of 1966. Advertisers, agencies, and sales executives made up most of the audience at the series of breakfast meetings.

The Chicago meeting was intrepidly presented early on a Monday morning in February. Following a continental breakfast of fruit juice, sweet rolls and coffee the still somnolent audience of 300 was jolted to attention by the show's fanfare: a visual and audio "Pow!" "Bam!" and "Zap" that flashed across three large screens on stage, and reverberated off the walls of the Grand Ballroom in Chicago's Conrad Hilton Hotel. From then, until the final fadeout, momentum was sustained.

### Sampling of 33 Color Shows

Tightly-edited and projected from a battery of eleven separate projectors operating under the direction of Marvin Green of Visualscope, Inc., ABC's hour-long *Look of Tomorrow* sampled 33 upcoming TV shows, all in color. Such ABC stalwarts as Batman, Red Buttons, Robert Goulet and promising new horse and dog stars were paraded across the screen via film clips and slide films. There were also dramatic situations portraying the FBI in peace and the

Marines in World War II action.

A contingent of ABC executives from New York headquarters and WBKB-TV, the network's Chicago affiliate, provided live narration during the showing of *Look of Tomorrow*, and besides the effort to tempt the audience to buy, they took a filmic poke at the competition. This was the imaginary trip through the place called the "Cannal Islands." Stopovers were made at Stanton Island and Sarnoff Island where business looked particularly bright. But there was a decided trade bias when viewers were shepherded through a beautiful region known as "Treasure Islands" which turned out to be ABC's happy hunting ground for advertising agencies. Among the colorful places in this region were Interpublic State Park, the twin cities of Batesville and Batesville, and Young & Rubicam.

### Behind the Stage and Screen

The projectors for the wall-to-wall show consisted of three 16mm and 35mm Xenon-equipped projection picture units, a 3/4 x 4 inch fan set illuminator, a pair of Perhouse units, and four DuKane projectors. Audio coverage was from magnetic tapes transmitted through a series of stereo speakers placed around the meeting room. Three screens were alternately and simultaneously employed, and they formed retractable parts of a futuristic, portable skyscraper placed on an 18 foot rotating stage. The interesting set and stage construction was by Wilcox-Lange Chicago, from a design created by Robert Taylor, president of Visualscope Inc.

Their senses reeling from t

oncentrated audiovisual impact of  
od of Tomorrow the viewers  
lin out of the Chicago meeting  
er presented with attractive sou-  
ent boxes through the courtesy  
of BC-TV. These contained at-  
ractive, gold-filled paperweights  
that housed a folding magnifying

glass with the ABC escutcheon and  
the words: "Look of Tomorrow"  
embellished on top. The implica-  
tion was that as far as the hosts  
were concerned, tomorrow's look  
was proportionately as big, Big,  
BIG as looking through the sou-  
venir magnifying glass indicated. •

## Pope Paul VI in "The Journey for Peace"

NEVER BEING SEEN IN THEATERS all over the world is a beautiful  
new U.S. Information Agency motion picture, *The Journey*, which  
vividly documents the brief hours spent by Pope Paul VI in the  
United States on his recent mission to the United Nations.

Although made under extremely difficult conditions — the pro-  
ducer was faced with camera space competition from 77 TV cameras,  
hundreds of motion picture cameras and literally thousands of still pho-  
tographers throughout the day — *The Journey* emerges as a finely  
crafted record of the "great city succumbing to the gentle visitor  
from Rome."

The film was commissioned to Owen Murphy Productions, New  
York, by U.S.I.A. just a week before the historic journey took place.  
Instructions were simply to make the best film possible, and *not* to  
make just a newsreel. The results are a revelation of what four thor-  
oughly-experienced industrial film and studio type cinematographers  
with 35mm Eastman color film, shooting under every sort of situation  
— indoors, outdoors, night time, often hand-held — can achieve.  
These are not grab-and-run newsreel shots but carefully contrived,  
thoughtfully framed and skillfully edited sequences which make up  
a thoroughly moving motion picture.

The film covers the Pope's arrival at Kennedy Airport, the motor-  
cade which took His Holiness through New York to St. Patrick's  
Cathedral, the visit to the United Nations and the culmination of the  
journey, a celebration of Mass at Yankee Stadium in which a vast  
mob of people participated.

The U.S.I.A. message is contained in narration accompanying scenes  
of His Holiness and President Johnson meeting at the Waldorf Astoria  
Hotel: *that these are two men united in a prayer for peace in the world  
and a trust in the United Nations as a means for achieving this goal.*

*The Journey*, which was directed by Paul Cohen, was delivered to  
U.S.I.A. exactly a month after the shooting date. Dozens of language  
versions have been made for world-wide showings. •

of Paul VI officiates at ritual during "The Journey" to United Nations.

## Keys to Film Results

### A Buyer Preface to the Producer Listing Pages

THE 70 PAGES OF SPECIALIZED PRODUCER LISTINGS which  
follow this preface provide unequalled, exclusive facts-in-  
depth about 415 companies in the United States and Canada,  
plus an additional listing of 76 producers on all continents  
throughout the world. These are, beyond any question, the  
vast majority of the most active, specializing producers of  
motion pictures, slidefilms and the other relevant forms of audio-  
visual communication in the United States and abroad.

But mere numbers have never been the primary goal of  
this most complete and dependable source of buyer reference.  
With no payment accepted and reserving the right to reject  
any listing which does not meet our long-established mini-  
mum standards of reference and reliability, the Editors of  
BUSINESS SCREEN put *quality of information* above sheer  
*names-in-quantity*. *The buyer of films and other audiovisual  
media in business and industry, government, trade groups, and  
the institutional fields is the real judge of the Review's value.*

*Let the buyer look to this data with confidence, check the  
accompanying credits freely provided by all listed firms. Let  
him then view films submitted as further evidence of work  
performed. And then let the producer stand on solid evidence  
of financial stability; permanence of staff; physical facilities.*

And let the record show that this 16th Annual Production  
Review issue in our 27th year of publication contained data  
on more than 2,450 titles of motion pictures produced by  
listed companies in the U.S. and abroad — *plus* additional  
reference data on over 500 slidefilms, meeting presentations  
and live shows also created and produced by these firms.  
Behind these statistics is the more important evidence that  
*these were also the most widely-used films of 1965; fortified  
by more hundreds of prints and shown to more people than  
all others in use.* That these films received the vast majority  
of national and international film awards in the past year is  
impressive evidence of *quality*. But it is secondary to *results  
achieved* in helping their sponsors to *more effectively inform  
and persuade* — helping industry and government with *better  
training and education*; and helping to *deliver ideas and  
information to the hearts and minds of their intended viewers.*  
In short: these pages of film credits reflect *real results*.

Behind these resultful films and their makers within these  
pages, stand the *key individuals* responsible to the buyers, from  
top management throughout the many departments of listed  
companies. This 16th Production Review provides the names  
of 2,418 *people who contributed leadership, creative and  
technical skills toward the success of the factual film medium.*

As a final postscript-in-preface to an editorial effort of  
considerable size, involving months of preparation, checking  
and production by the Editors of this Review, we call attention  
to acceptance of listings from new companies (organized  
within the past year) without benefit of client and title reference.  
We note the specialization of producers of television commer-  
cials; the acceptance of the fact that in a few limited instances  
we have listed companies performing only a few tasks during  
the year. We are fortified by nearly three decades of experience  
with the facts-of-production-life; let the record stand as printed.

But we would also note in closing that these countless  
thousands of listing lines will contain the inevitable gremlins  
of typographical error and omission. To the reader (and to  
those affected) we offer the pages of the Production Review  
Supplement, scheduled for an early mid-year issue. — OHC

The detail in depth of these listings of business and television film companies provides the sponsor, advertising agency and government film buyer with a complete picture of his prospective producer.

In addition to names of principal officers and data on services and physical studio facilities, the facts on "Recent Productions and Sponsors" show the nature of recent studio experience; of films produced in the past year. Preview current pictures as a prerequisite to purchases, bidders should also provide factual data on experience, staff, facilities and financial stability.

There was no charge or obligation whatsoever to these listed companies, every known source was contacted with three separate first-class mailings. Only those who furnished evidence of recent production were accepted for unqualified listing.

### Sound Advice for the Film Buyer

A careful study of the prospective producer's listing text is a prerequisite to film buying. See the pictures listed by the company, note the nature of client references. And if the prospective producer isn't listed in these pages visit his facilities; meet permanent staff personnel and view current pictures identified as his own productions.

## sync sound without a blimp: how to spend the day shooting not setting up.

Why is the camera crew so often called an hour before the cast? Lighting is one reason. Another is the time and effort it takes to set up a blimped camera. The NPR weighs 20 pounds – and it needs no blimp.

That's the day's first setup. What about the others? A crab dolly saves you from having to haul the rig yourself, but the angles you can get with it are limited, of course. Taking one on location is a pain in the neck. The NPR gives you sync sound without a blimp – and it needs no AC power. If you want a *really* high angle, you can climb a tree with it in one hand, like a briefcase.

Changing lenses, setting the stop and focussing are all slowed down by a blimp. Changing magazines is even worse. We all know what a disruption that can be. People leave the set, the lights are killed. When the camera – and blimp – are ready, the director has to establish the mood and continuity all over again, poor chap. The NPR's pre-threaded magazine can be changed in five seconds. If you happen to run out in mid scene, it just means another take. Immediately.

With the NPR you get more shot in a day. You also get precise reflex viewing, rotating lens turret, registration-pin movement, constant speed motor, sync-pulse generator, five second magazine changes and, of course, blimp-free silence.

Service, sales and rental facilities are available from these expert, franchised dealers: *New York*: Camera Service Center, Camera Mart or F&B CECO; *Detroit*: Behrends Inc. or Victor Duncan Company; *Chicago*: Behrends Inc.; *Los Angeles*: Mark Armistead or Gordon Enterprises; *San Francisco*: Brooks Camera. Or write to us. We'd like to send you our brochure. Eclair Corporation of America, 7262 Melrose Avenue, Los Angeles, California.

Motion Picture Cameras since 1909
